Rules and Regulations

Federal Register
Vol. 54, No. 211
Thursday, November 2, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 932

[Docket No. FV-89-070FR]

Olives Grown in California; Change in Procedures for Nominating Producer Members To Serve on the California Olive Committee

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule changes mail balloting procedures used to nominate producer members and alternate producer members to serve on the California Olive Committee (Committee). The change allows producers who are interested in serving on the Committee, but are unable to attend meetings at which candidates are selected for nomination, to submit their names to the Committee to be included on the mail ballot. Thus, more producers will be able to participate in the nomination process.

EFFECTIVE DATE: December 4, 1989.

FOR FURTHER INFORMATION CONTACT: Patrick Packnett, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2530-S, Washington, DC 20090-6456, telephone (202) 475-3862.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 932 (7 CFR 932) regulating the handling of olives grown in California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RAF), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately seven handlers of California olives regulated under this marketing order each season, and approximately 1,390 olive producers in California. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. Most, but not all, of the olive producers and none of the olive handlers may be classified as small entities.

The Committee works with the Department in administering the marketing order. The Committee consists of 16 members and alternates. Eight members represent producers and eight members represent handlers.

The producer member positions are apportioned among four districts within the State of California. Four handler members represent handlers who are cooperative handler organizations, and four represent handlers who are not cooperative handler organizations.

Section 932.129 of the rules and regulations implementing the order (7 CFR 932.106-932.161) specifies that producer members and alternates may be nominated by mail ballot or at nomination meetings as the Committee may determine. When mail ballot voting is used in lieu of nominating meetings, the Committee is required to schedule a meeting in each producing district for the purpose of selecting candidates for member and alternate member nominations. The mail ballot voting procedures set forth in paragraph (a)(1) of § 932.129 do not permit a producer who is not present at a candidate selection meeting and who is not recommended as a candidate by a producer in attendance at such a meeting to be included on a nomination ballot.

Experience has shown that there are instances where producers are unable to attend these meetings but would like to offer themselves as candidates for nomination. It is the Committee's view that all producers interested in serving on the Committee should be provided an opportunity to be considered by their fellow producers for nomination, and that circumstances preventing a producer from attending a meeting should not be cause for denying that producer a chance to be nominated to serve on the Committee.

At its June 6, 1989, meeting, the Committee unanimously recommended that provision be added to paragraph (a)(1) to allow producers who are unable to attend the candidate selection meeting in their respective districts to submit their name to the Committee office, no later than seven days after such meeting, to be placed on the ballot as a candidate for a member or an alternate member position. The change is made in § 932.129(a)(1) by redesignating paragraph (iv) as paragraph (v) and adding a new paragraph (iv) specifying that in the event a producer cannot attend a meeting but wishes to be included on the ballot, that producer may notify the Committee office in writing no later than 7 days after the date of the nomination meeting for the producer's district.

Notice of this action was published in the **Federal Register** on September 6, 1989 (54 FR 36985). The comment period ended October 6, 1989. No comments were received.

The change will not impose any additional costs on producers or handlers. Furthermore, the change is for the benefit of producers and will provide an opportunity for greater producer participation in the Committee nomination process. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant information presented, the Committee's recommendation and other available

VOL 54 ISS 211 NO 2 1989 UMI

information, it is found that this final rule will tend to effectuate the declared policy of the Act.

Lists of Subjects in 7 CFR Part 932

California, marketing agreements and orders, olives.

For the reasons set forth in the preamble, 7 CFR part 932 is amended as follows:

Note: These sections will be published in the Code of Federal Regulations.

PART 932—OLIVES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR part 932 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Paragraph (a)(1)(iv) of § 932.129 is redesignated as paragraph (a)(1)(v) and a new paragraph (a)(1)(iv) is added to read as follows:

§ 932.129 Nomination procedures for producer members.

(a) * * *

(1) * * *

(iv) In the event a producer cannot attend a meeting but wishes to be included on the ballot, that producer may notify the Committee office in writing no later than 7 days after the date of the nomination meeting for the producer's district and request that the producer's name be included on the ballot.

* * * * *

Dated: October 30, 1989.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–M

7 CFR Part 1230

[No. LS–104]

Pork Promotion and Research

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule; correction.

SUMMARY: AMS is correcting three numbers in the table listing assessments for Pork and Pork products which appeared in the September 21, 1989, Federal Register (54 FR 38813). The ninth number in the first column of the second table is revised to read 0203.29.20008; the 16th number in the first column of the second table is revised to read 0210.12.00404; and the 17th number in the first column of the second table is revised to read 0210.19.00005.

FOR FURTHER INFORMATION CONTACT: Ralph L. Tapp, Chief, Marketing Programs Branch—202/447–2650.

SUPPLEMENTARY INFORMATION: The following corrections are made in FR Doc. 89–22281, the Pork Promotion and Research final rule to decrease the amount of assessments per pound due on imported pork and pork products subject to assessment under the Pork Promotion, Research, and Consumer Information Act of 1985 (7 U.S.C. 4801–4819) published in the September 21, 1989, Federal Register (54 38813):

§ 1230.110 [Amended]

1. In § 1230.110, the following three numbers in the first column of the second table on page 38814 change as listed below:

The ninth number "0203.90.20008" changes to "0203.29.20008."

The 16th number "0201.12.00404" changes to "0210.12.00404."

The 17th number "0201.19.00005" changes to "0210.19.00005."

Done at Washington, DC, on October 27, 1989.

Kenneth C. Clayton,

Acting Administrator.

[FR Doc. 89–25776 Filed 11–1–89; 8:45 am]

BILLING CODE 3410–02–M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Organization and Operation of Federal Credit Unions

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final amendments.

SUMMARY: The National Credit Union Administration ("NCUA") Board, as part of its periodic review of its regulations, is publishing the final amendments to § 701.31—Nondiscrimination Requirements. Section 701.31 summarizes the prohibitions on discrimination in real estate lending. Section 701.31 was not in need of major revision. The Board's final amendments simplify and clarify the regulation by making several technical changes as proposed. Changes to the Federal Fair Housing Act and the Department of Housing and Urban Development's regulations required minor amendments to § 701.31 and to NCUA's Equal Housing Lender poster.

EFFECTIVE DATE: December 4, 1989.

FOR FURTHER INFORMATION CONTACT: Roy DeLoach, NCUA, Office of General Counsel, 1776 G Street, NW., Washington, DC 20456, telephone: (202) 682–9630.

SUPPLEMENTARY INFORMATION:

On May 22, 1989, the NCUA Board published proposed amendments to § 701.31 of the NCUA's Rules and Regulations—Nondiscrimination Requirements. (*See* 54 FR 21963.) Only minor changes to the regulation were proposed. The NCUA last amended § 701.31 on August 31, 1979 (*See* 44 FR 51191). Section 701.31 is designed to summarize in one place the prohibitions on discrimination in real estate lending activities contained in: (1) The Federal Fair Housing Act (42 U.S.C. 3601 et seq.) and Department of Housing and Urban Development regulations issued thereunder; and (2) the Equal Credit Opportunity Act (15 U.S.C. 1691) and the Federal Reserve Board's Regulation B (12 CFR Part 202) issued thereunder. NCUA is not required by either the Fair Housing Act or the Equal Credit Opportunity Act to promulgate regulations. However, the Board believes it helpful to Federal credit unions to have the nondiscrimination regulation in place. Comments were due on August 21, 1989. Five comment letters were received. Two national credit union trade associations, one state credit union league, one Federal credit union, and one savings and loan interest group commented. All five commenters agreed with the proposed changes.

In the interest of keeping this section simple to use and understand, the NCUA Board is making only minor technical changes and changes required by the Fair Housing Amendments Act of 1988 ("the Amendments Act") as proposed. The substantive changes required by the Amendments Act expand prohibited housing practices to include handicap and familial status (having children under the age of 18). These two classes have been added to paragraphs (b)(1), (b)(2), (c)(1), (c)(2) and (e)(1). The NCUA's Equal Housing Lender poster has also been revised to include these changes. (*See* paragraph (d)(3).) Lastly, current paragraph (e)(1) references two Supreme Court cases concerning discrimination. The Board believes the cited cases do not clarify nondiscrimination requirements for Federal credit unions and, as proposed, has deleted the references. The rest of the regulation remains unchanged.

Regulatory Procedures

This final rule makes no substantive changes to the current rule. Neither a Regulatory Flexibility Analysis nor Paperwork Reduction Act analysis are required.

Executive Order 12612

This regulation explains the law and sets forth previously established guidelines for Federal credit unions; it adds no new obligations. Although Federal statutes prohibiting discrimination (Fair Housing Act and Equal Opportunity Act) apply to state-chartered credit unions as well, this regulation does not apply to them.

List of Subjects in 12 CFR Part 701

Credit unions, Discrimination in real estate lending.

By the National Credit Union Administration Board on October 17, 1989.

Becky Baker,

Secretary of the Board.

Accordingly, NCUA amends its regulation as follows:

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

1. The authority citation for part 701 continues to read as follows:

Authority: 12 U.S.C. 1755, 1756, 1757, 1759, 1761a, 1761b, 1766, 1767, 1782, 1784, 1787, and 1789. Section 701.31 is also authorized by 15 U.S.C. 3801–3610.

2. Section 701.31 is revised to read as follows:

§ 701.31 Nondiscrimination requirements.

(a) *Definitions.* As used in this part, the term:

(1) *Application* carries the meaning of that term as defined in 12 CFR 202.2(f) (Regulation B), which is as follows: "An oral or written request for an extension of credit that is made in accordance with procedures established by a creditor for the type of credit requested";

(2) *Dwelling* carries the meaning of that term as defined in 42 U.S.C. 3602(b) (Fair Housing Act), which is as follows: "Any building, structure, or portion thereof which is occupied as, or designed or intended for occupancy as, a residence by one or more families, and any vacant land which is offered for sale or lease for the construction or location thereon of any building, structure, or portion thereof"; and

(3) *Real estate-related loan* means any loan for which application is made to finance or refinance the purchase, construction, improvement, repair, or maintenance of a dwelling.

(b) *Nondiscrimination in Lending.* (1) A Federal credit union may not deny a real estate-related loan, nor may it discriminate in setting or exercising its rights pursuant to the terms or conditions of such a loan, nor may it discourage an application for such a loan, on the basis of the race, color, national origin, religion, sex, handicap, or familial status (having children under the age of 18) of:

(i) Any applicant or joint applicant;

(ii) Any person associated, in connection with a real estate-related loan application, with an applicant or joint applicant;

(iii) The present or prospective owners, lessees, tenants, or occupants of the dwelling for which a real estate-related loan is requested;

(iv) The present or prospective owners, lessees, tenants, or occupants of other dwellings in the vicinity of the dwelling for which a real estate-related loan is requested.

(2) With regard to a real estate-related loan, a Federal credit union may not consider a lending criterion or exercise a lending policy which has the effect of discriminating on the basis of race, color, national origin, religion, sex, handicap, or familial status (having children under the age of 18). Guidelines concerning possible exceptions to this provision appear in paragraph (e)(1) of this section.

(3) Consideration of any of the following factors in connection with a real estate-related loan is not necessary to a Federal credit union's business, generally has a discriminatory effect, and is therefore prohibited:

(i) The age or location of the dwelling;

(ii) Zip code of the applicant's current residence;

(iii) Previous home ownership;

(iv) The age or location of dwellings in the neighborhood of the dwelling;

(v) The income level of residents in the neighborhood of the dwelling. Guidelines concerning possible exceptions to this provision appear in paragraph (e)(2) of this section.

(c) *Nondiscrimination in appraisals.* (1) A Federal credit union may not rely upon an appraisal of a dwelling if it knows or should know that the appraisal is based upon consideration of the race, color, national origin, religion, sex, handicap, or familial status (having children under the age of 18) of:

(i) Any applicant or joint applicant;

(ii) Any person associated, in connection with a real estate-related loan application, with an applicant or joint applicant;

(iii) The present or prospective owners, lessees, tenants, or occupants of the dwelling for which a real estate-related loan is requested;

(iv) The present or prospective owners, lessees, tenants, or occupants of other dwellings in the vicinity of the dwelling for which a real estate-related loan is requested.

(2) With respect to a real estate related loan, a Federal credit union may not rely upon an appraisal of a dwelling if it knows or should know that the appraisal is based upon consideration of a criterion which has the effect of discriminating on the basis of race, color, national origin, religion, sex, handicap, or familial status (having children under the age of 18). Guidelines concerning possible exceptions to this provision appear in paragraph (e)(1) of this section.

(3) A Federal credit union may not rely upon an appraisal that it knows or should know is based upon consideration of any of the following criteria, for such criteria generally have a discriminatory effect, and are not necessary to a Federal credit union's business:

(i) The age or location of the dwelling;

(ii) The age or location of dwellings in the neighborhood of the dwelling;

(iii) The income level of the residents in the neighborhood of the dwelling.

(4) Notwithstanding paragraph (c)(3) of this section, it is recognized that there may be factors concerning location of the dwelling which can be properly considered in an appraisal. If any such factor(s) is relied upon, it must be specifically documented in the appraisal, accompanied by a brief statement demonstrating the necessity of using such factor(s). Guidelines concerning the consideration of location factors appear in paragraph (e)(3) of this section.

(5) Each Federal credit union shall make available, to any requesting member/applicant, a copy of the appraisal used in connection with that member's real estate-related loan application. The appraisal shall be available for a period of 25 months after the applicant has received notice from the Federal credit union of the action taken by the Federal credit union on the real estate-related loan application.

(d) *Nondiscrimination in advertising*—(1) *Advertising notice of nondiscrimination compliance.*

(i) No Federal credit union may directly or indirectly engage in any form of advertising of real estate-related loans which implies or suggests that the Federal credit union discriminates in violation of the provisions of the Fair Housing Act or of this section. Advertisements of such loans shall include a facsimile of the following:

EQUAL HOUSING
LENDER

We Do Business in Accordance With the Federal Fair Housing Law and the Equal Credit Opportunity Act

(ii) Advertisements of real estate-related loans which are broadcast on the radio shall contain the following statement: "The (insert name) Federal Credit Union is an equal housing lender."

(2) *Lobby notice of nondiscrimination compliance.* Every Federal credit union which engages in real estate-related lending shall conspicuously display in the public lobby of such credit union and in the public area of each office where such loans are made, in a manner so as to be clearly visible to the general public entering such lobby or area, a notice that incorporates a facsimile of the logotype and notice appearing in paragraph (d)(3) of this section. Posters containing this notice and logotype may be obtained from the Regional Offices of the National Credit Union Administration.

(3) *Logotype and notice of nondiscrimination compliance.* The logotype and text of the notice required in paragraph (d)(2) of this section shall be as follows:

BILLING CODE 7535-01-M

EQUAL HOUSING
LENDER

We Do Business in Accordance With
Federal Fair Lending Laws

UNDER THE FEDERAL FAIR HOUSING ACT, IT IS ILLEGAL, ON THE BASIS OF RACE, COLOR, NATIONAL ORIGIN, RELIGION, SEX, HANDICAP, OR FAMILIAL STATUS (HAVING CHILDREN UNDER THE AGE OF 18), TO:

- Deny a loan for the purpose of purchasing, constructing, improving, repairing or maintaining a dwelling, or deny any loan secured by a dwelling; or
- Discriminate in fixing the amount, interest rate, duration, application procedures or other terms or conditions of such a loan, or in appraising property.

IF YOU BELIEVE YOU HAVE BEEN DISCRIMINATED AGAINST, YOU SHOULD SEND A COMPLAINT TO:

Assistant Secretary for Fair Housing and Equal Opportunity
Department of Housing & Urban Development
Washington, D.C. 20410
For processing under the Federal Fair Housing Act
and to:
National Credit Union Administration
Office of Examination and Insurance
Washington, D.C. 20456
For processing under NCUA Regulations

****

UNDER THE EQUAL CREDIT OPPORTUNITY ACT, IT IS ILLEGAL TO DISCRIMINATE IN ANY CREDIT TRANSACTION:

- On the basis of race, color, national origin, religion, sex, marital status, or age,
- Because income is from public assistance, or
- Because a right was exercised under the Consumer Credit Protection Act.

IF YOU BELIEVE YOU HAVE BEEN DISCRIMINATED AGAINST, YOU SHOULD SEND A COMPLAINT TO:

National Credit Union Administration
Office of Examination and Insurance
Washington, D.C. 20456

NCUA 1552 (Rev. 3/89)

BILLING CODE 7535-01-C

VOL 54 ISS 211 NO 2 1989 UMI

VOL 54 ISS 211 NO 2 1989 UMI

(e) *Guidelines.* (1) Compliance with the Fair Housing Act is achieved when each loan applicant's creditworthiness is evaluated on an individual basis, without presuming that the applicant has certain characteristics of a group. If certain lending policies or procedures do presume group characteristics, they may violate the Fair Housing Act, even though the characteristics are not based upon race, color, sex, national origin, religion, handicap, or familial status. Such a violation occurs when otherwise facially nondiscriminatory lending procedures (either general lending policies or specific criteria used in reviewing loan applications) have the effect of making real estate-related loans unavailable or less available on the basis of race, color, sex, national origin, religion, handicap, or familial status. Note, however, that a policy or criterion which has a discriminatory effect is not a violation of the Fair Housing Act if its use achieves a legitimate business necessity which cannot be achieved by using less discriminatory standards. It is also important to note that the Equal Credit Opportunity Act and Regulation B prohibit discrimination, either per se or in effect, on the basis of the applicant's age, marital status, receipt of public assistance, or the exercise of any rights under the Consumer Credit Protection Act.

(2) Paragraph (b)(3) of this section prohibits consideration of certain factors because of their likely discriminatory effect and because they are not necessary to make sound real estate-related loans. For purposes of clarification, the prohibited use of location factors in this section is intended to prevent abandonment of areas in which a Federal credit union's members live or want to live. It is not intended to require loans in those areas that are geographically remote from the FCU's main or branch offices or that contravene the parameters of a Federal credit union's charter. Further, this prohibition does not preclude requiring a borrower to obtain flood insurance protection pursuant to the National Flood Insurance Act and Part 760 of NCUA's Rules and Regulations, nor does it preclude involvement with Federal or state housing insurance programs which provide for lower interest rates for the purchase of homes in certain urban or rural areas. Also, the legitimate use of location factors in an appraisal does not constitute a violation of the provision of paragraph (b)(3) of this section, which prohibits consideration of location of the dwelling. Finally, the prohibited use of prior home ownership does not preclude a Federal credit union from considering an applicant's payment history on a loan which was made to obtain a home. Such action entails consideration of the payment record on a previous loan in determining creditworthiness; it does not entail consideration of prior home ownership.

(3)(i) Paragraph (c)(3) of this section prohibits consideration of the age or location of a dwelling in a real estate-related loan appraisal. These restrictions are intended to prohibit the use of unfounded or unsubstantiated assumptions regarding the effect upon loan risk of the age of a dwelling or the physical or economic characteristics of an area. Appraisals should be based on the present market value of the property offered as security (including consideration of specific improvements to be made by the borrower) and the likelihood that the property will retain an adequate value over the term of the loan.

(ii) The term "age of the dwelling" does not encompass structural soundness. In addition, the age of the dwelling may be used by an appraiser as a basis for conducting further inspections of certain structural aspects of the dwelling. Paragraph (c)(3) of this section does, however, prohibit an unsubstantiated determination that a house over X years in age is not structurally sound.

(iii) With respect to location factors, paragraph (c)(4) of this section recognizes that there may be location factors which may be considered in an appraisal, and requires that the use of any such factors be specifically documented in the appraisal. These factors will most often be those location factors which may negatively affect the short range future value (up to 3–5 years) of a property. Factors which in some cases may cause the market value of a property to decline are recent zoning changes or a significant number of abandoned homes in the immediate vicinity of the property. However, not all zoning changes will cause a decline in property values, and proximity to abandoned buildings may not affect the market value of a property because the cause of abandonment is unrelated to high risk. Proper considerations include the condition and utility of the improvement and various physical factors such as street conditions, amenities such as parks and recreation areas, availability of public utilities and municipal services, and exposure to flooding and land faults.

BILLING CODE 7535–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 89–AWA–5]

Establishment of the Memphis Terminal Control Area and Revocation of the Memphis International Airport, Airport Radar Service Area; TN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: This action corrects an error in the airspace description of Area B of the Memphis, TN, Terminal Control Area (TCA). The boundaries of Area B should begin at the Memphis VORTAC 037° radial 13-mile fix, in lieu of, "a point 13 miles northeast of the Memphis International Airport on the Memphis VORTAC 037° radial." This action corrects that error, which appeared in the final rule, published on September 22, 1989.

EFFECTIVE DATE: 0901 UTC, November 2, 1989.

FOR FURTHER INFORMATION CONTACT: Alton D. Scott, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–9252.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 89–22410 was published on September 22, 1989, establishing the Memphis International Airport TCA and revoking the Memphis International Airport, Airport Radar Service Area (54 FR 39112). Due to an administrative error, the airspace description of the Area B boundaries of the Memphis TCA incorrectly began at a point 13 miles northeast of the Memphis International Airport on the Memphis VORTAC 037° radial. The boundary of Area B should begin at the Memphis VORTAC 037° radial 13-mile fix. Current charts depicting the Memphis International Airport TCA were described correctly using the Memphis VORTAC for Area B. No correction to

current TCA charts are necessary. Additionally, no additional airspace is added by this correction. This action corrects the aforementioned error.

Correction to Final Rule

§ 71.501 [Corrected]

Accordingly, pursuant to the authority delegated to me, **Federal Register** Document 89–22410, as published on page 39116 of the **Federal Register** on September 22, 1989, (54 FR 39112) is corrected as follows:

Memphis, TN [Corrected]

In Area B by removing the words "beginning at a point 13 miles northeast of the Memphis International Airport on the Memphis VORTAC 037° radial," and substituting the words "beginning at the Memphis VORTAC 037° radial 13-mile fix.".

Issued in Washington, DC, on October 26, 1989.

Harold W. Becker,

Manager, Airspace-Rules and Aeronautical Information Division.

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 51

[DoD Directive 1350.2]

Department of Defense Military Equal Opportunity Program

AGENCY: Military Equal Opportunity Policy Directorate.

ACTION: Final rule.

SUMMARY: 32 CFR part 51 (DoD Directive 1350.2), "The Department of Defense Military Equal Opportunity Program," establishes policy, procedures, and guidance for Equal Opportunity (EO) Programs within the Department of Defense. These policies and procedures as outlined in DoD Directive 1350.2, are applicable to all Military Departments.

The operations and support of the Defense Equal Opportunity Management Institute (DEOMI), to include facilities and staffing, are provided for by this part.

The Defense Equal Opportunity Council (DEOC) is a review board chaired by the Assistant Secretary of Defense for Force Management and Personnel (ASD(FM&P)) and serves to monitor the progress of program elements, advises the Secretary of Defense on policies for EO matters, assists in developing policy guidance for education and training in EO and human relations for DoD personnel.

The Board of Visitors (BOV) for DEOMI is established as an advisory body to the ASD(FM&P). The BOV serves as an external source of expertise to ensure periodic review of the objectives, policies, and operations of DEOMI.

EFFECTIVE DATE: December 23, 1988.

FOR FURTHER INFORMATION CONTACT: SFC D.A. Jeczala, Office of the Assistant Secretary of Defense (Force Management and Personnel), the Pentagon, Washington, DC 20301–4000, telephone (202) 697–6381.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 51

Civil rights; Education; Equal employment opportunity; Military personnel.

Accordingly, title 32, chapter I, is amended to add part 51 as follows:

PART 51—THE DEPARTMENT OF DEFENSE MILITARY EQUAL OPPORTUNITY PROGRAM

Sec.
51.1 Purpose.
51.2 Applicability and scope.
51.3 Definitions.
51.4 Policy.
51.5 Responsibilities.
51.6 Information requirements.

Appendix A—Military Equal Opportunity Reporting Requirements

Appendix B—Organizations and Functions

Authority: Pub. L. 92–261, sec. 301, 80 Stat. 379 (5 U.S.C. 301, 10 U.S.C. 133).

§ 51.1 Purpose.

This part:

(a) Regulates the Department of Defense Military Equal Opportunity (EO) Program and assigns responsibilities for ensuring DoD-wide compliance with the broad program objectives outlined in DoD Human Goals Charter, March 21, 1988.

(b) Provides for education and training in EO and human relations.

(c) Prescribes the functions of the Defense Equal Opportunity Council (DEOC), the Defense Equal Opportunity Management Institute (DEOMI), and the Board of Visitors (BOV) to DEOMI.

§ 51.2 Applicability and scope.

This part:

(a) Applies to all military members of the Office of the Secretary of Defense (OSD), the Military Departments (including their National Guard and Reserve components), the Joint Staff, the Unified and Specified Commands, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components"). The term "Military Services," as used herein, refers to the Army, Navy, Air Force, and Marine Corps.

(b) Applies to DoD contracted organizations that provide services to military personnel and their families.

(c) Does not apply to civilian personnel, except as noted in paragraph (b) of this section.

§ 51.3 Definitions.

Affirmative Action. Methods used to achieve the objectives of the EO program. Processes, activities, and systems designed to identify, eliminate, prevent, and work to overcome the effects of discriminatory treatment as it affects the upward mobility and quality of life for DoD personnel.

Discrimination. Illegal treatment of a person or group based on handicap, race, color, national origin, age, religion, or gender.

VOL 54 ISS 211 NO 2 1989 UMI

DoD Military Equal Opportunity (EO) Program. The DoD-wide military program of equal opportunity that is accomplished through efforts by DoD Components. It provides an environment in which every member of the total force is ensured an opportunity to rise to as high a level of responsibility as possible in the military profession, dependent only on merit, fitness, and capability.

Equal Opportunity (EO). The right of all persons to participate in and benefit from programs and activities for which they are qualified. These programs and activities shall be free from social, personal, or institutional barriers that prevent people from rising to as high a level of responsibility as possible. Persons shall be evaluated only on individual merit, fitness, and capability, regardless of race, color, gender, national origin, age, or handicap except as prescribed by statute, or DoD/Service policy.

Ethinic Group. A segment of the population that possesses common characteristics and a cultural heritage based to some degree on the following:

(a) Common geographic origin;
(b) Race;
(c) Language or dialect;
(d) Religious faith or faiths;
(e) Shared traditions, values, or symbols;
(f) Literature, folklore, or music;
(g) An internal sense of distinctiveness; and/or
(h) An external perception of distinctiveness.

Ethnic and Racial Categories. The basic racial and ethnic categories for DoD reporting are defined as follows:

(a) *American Indian or Alaskan Native.* A person having origins in the original peoples of North America.

(b) *Asian or Pacific Islander.* A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes China, India, Japan, Korea, the Philippine Islands, and Samoa.

(c) *Black (Not of Hispanic Origin).* A person having origins in any of the original peoples of Africa.

(d) *Hispanic.* A person having origins in any of the original peoples of Mexico, Puerto Rico, Cuba, or Central or South America, or of other Spanish cultures, regardless of race.

(e) *White (Not of Hispanic Origin).* A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

National origin. An individual's or ancestor's place of origin. Also applies to a person who has the physical, cultural, or linguistic characteristics of a national group.

Race. A division of humans identified by the possession of traits that are transmissible by descent and that are sufficient to characterize as a distinctive human type.

Religion. A personal set or institutionalized system of attitudes, moral or ethical beliefs, and practices that are held with the strength of traditional religious views, characterized by ardor and faith, and generally evidenced through specific religious observances.

Sexual Harassment. A form of sex discrimination that involves unwelcomed sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when:

(a) Submission to or rejection of such conduct is made either explicitly or implicitly a term or condition of a person's job, pay, or career, or

(b) Submission to or rejection of such conduct by a person is used as a basis for career or employment decisions affecting that person, or

(c) Such conduct interferes with an individual's performance or creates an intimidating, hostile, or offensive environment.

Any person in a supervisory or command position who uses or condones implicit or explicit sexual behavior to control, influence, or affect the career, pay, or job of a military member or civilian employee is engaging in sexual harassment. Similarly, any military member or civilian employee who makes deliberate or repeated unwelcomed verbal comments, gestures, or physical contact of a sexual nature is also engaging in sexual harassment.

§ 51.4 Policy.

It is DoD policy to:

(a) Support the military EO program as an integral element in total force readiness, as defined in the Secretary of Defense Memorandum and enforce at all levels of activity the EO provisions of this part in developing operating EO policies and programs.

(b) Use the chain of command to promote, support, and enforce the military EO program. The chain of command is the primary and preferred channel for correcting discriminatory practices and for ensuring that human relations and EO matters are enacted.

(c) Ensure the Military Services (to include the Reserve components) maintain military EO and affirmative action programs. Discrimination that adversely affects persons or groups based on race, color, religion, gender, age, or national origin, and that is not supported legally, is contrary to good order and discipline, and is counterproductive to combat readiness and mission accomplishment. Discrimination of this nature shall not be condoned or tolerated.

(d) Provide education and training in EO and human relations at installation and fleet unit commands, Military Service accession points, and throughout the professional military education (PME) system, as part of the overall effort to achieve equal opportunity.

(e) Provide for an environment that is free from sexual harassment by eliminating this form of discrimination in the Department of Defense.

(f) Ensure that all on-base activities and, to the extent of the ability of DoD, any off-base activities available to military personnel are open to all military personnel and their authorized family members regardless of race, color, religion, age, physical or mental handicap, gender, or national origin, as called for by the DoD Human Goals Charter.

(1) Organizations or activities that do not meet this requirement shall be denied the use of military facilities and resources in accordance with 32 CFR part 237. This policy applies equally to those organizations that may discriminate based on the content of their constitutions, bylaws, rules or regulations, as well as to those which, in the judgment of the responsible commander(s), are engaging in de facto discrimination regardless of the content of their constitutions, bylaws, rules or regulations.

(2) Organizations that use on-base facilities, whether on a reimbursable basis or otherwise, must satisfy the responsible area or activity commander that they do not discriminate through their actual membership practices or in any of their activities.

(g) Oppose discrimination in off-base housing directed against military personnel and their authorized family members. Each commander shall take actions to overcome such discrimination and to impose off-limits sanctions in housing cases, as required by 32 CFR part 301.

(h) Impose, as required, the off-limits sanction according to the Armed Forces Disciplinary Control Board as stated in the Joint Regulation, in cases of discrimination involving places of public accommodations outside military installations.

§ 51.5 Responsibilities.

(a) The *Assistant Secretary of Defense (Force Management and Personnel)* (ASD(FM&P)) shall:

(1) Represent and advise the Secretary of Defense in military EO matters consistent with 32 CFR part 384.

(2) Chair the Defense Equal Opportunity Council.

(3) Provide guidance on developing all DoD programs to ensure equal opportunity for military personnel in the total force.

(4) Develop, execute, and monitor the effectiveness of military EO policies in support of national security objectives.

(5) Ensure that DoD Components fulfill the requirements of this part.

(6) Provide policy direction to DEOMI and select the Commandant of DEOMI from Military Service nominations.

(7) Establish categories and monitor specific goals to be included in the affirmative action programs and annual military EO assessments of each DoD Component.

(8) Review and act on (or refer to appropriate Military Service) all complaints of discrimination arising under this part (to include sexual harassment) referred to the Secretary of Defense.

(9) Ensure fair, impartial and timely investigation, resolution, and follow-up of all complaints of discrimination arising under this part.

(10) Establish a program to recognize individuals and organizations for outstanding achievement in one or more of the major EO areas covered by this part.

(b) The *Heads of DoD Components* shall be responsible for equal opportunity within their respective jurisdictions (to include their Reserve components) and shall:

(1) Ensure that all DoD EO policies and programs are understood and executed at all levels of military command.

(2) Establish affirmative action programs that identify and resolve EO problems through formulating, maintaining, and reviewing affirmative action plans (AAPs) with established objectives and milestones and including accountability in personnel management consistent with DoD Instruction 1350.3.[1]

(3) Forward a fiscal year report to the ASD(FM&P) outlining the progress being made to achieve the established military EO objectives of the AAP. This report shall be due each year on February 1, and is described further in DoD Instruction 1350.2.

(4) Establish policies that include specific actions to be taken against any individual who commits an act of discrimination, as defined in § 51.3.

(5) Rewrite documents and change practices that discriminate against military personnel based on race, religion, color, gender, or national origin. This requirement does not apply to those Military Service documents that implement statutes or DoD/Service policy requiring different treatment of military personnel based on age or gender.

(6) Establish policies and procedures to prevent sexual harassment and to ensure that appropriate action is taken against individuals who commit sexual harassment offenses, in accordance with the Secretary of Defense Memorandums.

(7) Ensure that all military personnel, including command-selectees and flag and general officers, receive training in equal opportunity, human relations, and prevention of sexual harassment on a recurring basis, and at all levels of PME.

(8) Establish and fill sufficient full-time staff positions and allocate sufficient resources to conduct all EO programs. Equal opportunity staff personnel shall be placed at a level that enables them to communicate effectively the goals and objectives of the program and obtain the understanding, support, and commitment of the organization's leaders.

(9) Ensure that all discrimination complaints are investigated in a fair, impartial, and prompt manner.

(10) Ensure that consideration of EO program support is included in the instructions that guide rating officials in preparing efficiency reports and/or evaluations on their subordinates.

(11) Develop management information and reporting systems to determine the progress for each AAP goal consistent with DoD Instruction 1350.3.

(12) Establish EO awards programs to recognize individuals and organizational units for outstanding achievement in any of the EO areas covered by this part or Military Service-unique programs.

§ 51.6 Information requirements.

An annual report is required and is assigned Report Control Symbol DD-FM&P(A)1760. Reporting requirements are contained in appendix A to this part and further amplified in DoD Instruction 1350.3.

Appendix A—Military Equal Opportunity Reporting Requirements

Each DoD Component shall submit an annual Military Equal Opportunity Assessment (MEOA) for the period ending September 30 to the ASD(FM&P) no later than February 1 of the following year. The report shall include the following information:

A. An executive summary, providing an overall assessment of each DoD Component's AAPs and EO Programs.

B. An assessment of each affirmative action in the following 10 categories shall be made an enclosure to the report. The assessment in each category should include quantitative data in the basic race/ethnic classifications for officers and enlisted personnel broken down by gender.

1. Recruiting/Accessions
2. Composition
3. Promotions
4. Professional Military Education (PME)
5. Separations
6. Augmentation/Retention
7. Assignments
8. Discrimination/Sexual Harassment Complaints
9. Utilization of Skills
10. Discipline

C. Requirements are further explained in DoD Instruction 1350.3.

Appendix B—Organizations and Functions

1. *The Defense Equal Opportunity Council (DEOC) shall:*

a. Coordinate policy and review the military and civilian EO programs.

b. Monitor progress of program elements.

c. Advise the Secretary of Defense on policies for EO matters.

d. Assist in developing policy guidance for education and training in EO and human relations for DoD personnel.

2. *The DEOC is Chaired by the Assistant Secretary of Defense/Force Management and Personnel (ASD(FM&P)).* Other members are the Assistant Secretary of Defense for Reserve Affairs (ASD(RA)); the Assistant Secretary of the Air Force for Manpower and Reserve Affairs (ASAF(M&RA)); the Assistant Secretary of the Army for Manpower and Reserve Affairs (ASA(MRA)); the Assistant Secretary of the Navy for Manpower and Reserve Affairs (ASN(M&RA)); and the Director of Administration and Management, Office of the Secretary of Defense (DA&M, OSD).

3. *DEOMI is a DoD Field Activity Operating Under the Supervision, Direction, and Policy Guidance of the ASD(FM&P).* Located as a tenant on an established military installation, DEOMI shall be supported administratively and logistically by the Military Department responsible for the host installation.

a. The mission of DEOMI is to enhance combat and/or operational readiness through improved leadership by functioning as the DoD center of excellence in all facets of military EO and human relations education and training to include the following:

(1) Providing primary training for all DoD military and civilian personnel assigned to military EO billets (to include the U.S. Coast Guard), and staff officers who directly manage EO and human relations programs.

(2) Performing EO and human relations research in conjunction with the Military Services and acting as a clearing house to monitor and disseminate research findings on EO and human relations.

(3) Providing assistance or consultation services in DoD organizations in developing

[1] Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, Attn: Code 1062, 5801 Tabor Avenue, Philadelphia, PA 19120.

VOL 54 ISS 2 11 NO 2 1989 UMI

specific curricula and training for EO and human relations education, and particular training for the PME systems within the Military Services; and serving in an advisory capacity to other Agencies in education, industry, and the private sector, as determined by the Commandant.

(4) Disseminating educational training materials to assist EO advisors and human relations instructors in remaining current in the EO subject area and in otherwise developing professionally.

(5) Performing special research-related projects in support of the DEOC.

(6) Operating and administering the Defense EO Electronic Bulletin Board to support EO advisors and specialists throughout the Military Services.

(7) Serving as a focal point and depository for data and research on the EO climate and sexual harassment in the Military Services.

b. The following applies to appointments to DEOMI:

(1) The Commandant shall be appointed by the ASD(FM&P). This position shall rotate among representatives nominated by the Departments of the Army, Navy, and Air Force.

(2) The ASD(FM&P) shall establish criteria for assigning officers and enlisted personnel from the Military Departments, including the Coast Guard, National Guard, and Reserves to faculty and staff positions at DEOMI.

4. The *DEOMI BOV is an Advisory Body to the ASD(FM&P).* The Board is established by charter and serves as an external source of expertise to ensure periodic review of the objectives, policies, and operations of DEOMI.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 147

[CGD11 89-19]

Safety Zone Regulations; Outer Continental Shelf; Santa Barbara Channel

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a safety zone in the Santa Barbara Channel around position 34-21-00.8N 120-16-44.7W. The zone is needed to protect the public and transiting vessels from safety hazards associated with the installation of oil platform Heritage. Entry into this zone is prohibited unless authorized by the Commander, Eleventh Coast Guard District.

EFFECTIVE DATES: This regulation becomes effective on October 13, 1989. It terminates on March 1, 1990 unless extended or sooner terminated by the Commander, Eleventh Coast Guard District. Comments on this regulation must be received on or before December 15, 1989.

ADDRESS: Comments should be mailed to Commander(m), Eleventh Coast Guard District, 400 Oceangate, Long Beach, California 90822-5399. The comments will be available for inspection and copying in the Union Bank Building, Room 709, 400 Oceangate, Long Beach, California 90822-5399. Normal office hours are between 7:30 a.m. and 4:00 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Commander Scott Porter, Eleventh Coast Guard District Marine Safety Division, Long Beach, California. Telephone number (213) 499-5330.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a Notice of Proposed Rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after **Federal Register** publication. Publishing a NPRM and delaying the regulation's effective date would be contrary to the public interest since immediate action is needed to minimize the hazards to vessels caused by the installation activity.

Although this regulation is published as a final rule without prior notice, an opportunity for public comment is nevertheless desirable to ensure that the regulation is both reasonable and workable. Accordingly, persons wishing to comment may do so by submitting written comments to the office listed under **"ADDRESS"** in this preamble. Commenters should include their name and address, identify the docket number (CGD11 89-19) for the regulation, and give reasons for their comments. Based upon the comments received, the regulation may be changed.

Drafting Information

The drafters of this regulation are Commander N.S. Porter, project officer for the Eleventh Coast Guard District Commander, and Lieutenant Commander G.R. Wheatley, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Regulation

On October 7, 1989 the jacket for oil platform Heritage was launched, upended, and positioned on the seabed in the Santa Barbara Channel off Gaviota, California. Over the next five months, Heerema Marine Contractors will continue the installation process by permanently affixing the platform to the ocean floor. Installation of the platform jacket will involve extensive pile driving operations. A semi-submersible crane vessel and several pile barges and attendant tugs will support and/or conduct those operations. A number of offshore supply vessels will also be operating in the area. The crane vessel will be anchored by twelve wire cables which extend out in all directions. These cables will be above, at, and below the water surface. Furthermore, the tugs and barges will frequently be attached to each other and the crane vessel by the use of cables. All of these activities present significant safety risks to vessels which might enter the area. A safety zone of 500 meters is considered necessary to minimize these risks.

This regulation is issued pursuant to 43 U.S.C. 1333(d)(1) as set out in the authority citation for all of part 147.

List of Subjects in 33 CFR Part 147

Outer Continental Shelf, Marine Safety, Navigation (water), Safety measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, part 147 of title 33, Code of Federal Regulations, is amended as follows:

PART 147—[AMENDED]

1. The authority citation for Part 147 continues to read as follows:

Authority: 43 U.S.C. 1333(d)(1); 49 CFR 1.46.

2. A new § 147.T1192 is added to read as follows:

§ 147.T1192 Platform Heritage safety zone.

(a) *Description.* All waters of the Pacific Ocean enclosed by a line drawn 500 meters around position 34-21-00.8N 120-16-44.7W.

(b) *Effective dates.* This regulation becomes effective on October 13, 1989. It terminates on March 1, 1990 unless extended or sooner terminated by the Commander, Eleventh Coast Guard District.

(c) *Regulations.* No vessel may enter or remain in this safety zone except for the following: (1) An attending vessel as defined in 33 CFR 147.1101 or (2) a vessel authorized by the Commander, Eleventh Coast Guard District.

Dated: October 13, 1989.

J.W. Kime,

Rear Admiral, U.S. Coast Guard, Commander, Eleventh Coast Guard District.

BILLING CODE 4910-14-M

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Parts 1 and 2

[Docket No. 90374-9161]

RIN 0651-AA38

Amendments to Patent and Trademark Rules To Implement Trademark Law Revision Act; Miscellaneous Trademark Rule Amendments

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Final rule; correction.

SUMMARY: The Patent and Trademark Office is correcting errors in the final rule which appeared in the **Federal Register** on Monday, September 11, 1989 (54 FR 37562).

1. On page 37565, in the second column, fifth full paragraph, "914" should read "904".

2. On page 37573, in the second column, in the seventh line, "an amendment" should read "a statement".

3. On page 37577, in the second column, the third line from the bottom should read "applicants to pay an additional fee".

4. On page 37581, in the third column, in the 19th line, "of" should read "or".

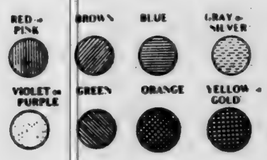
5. On page 37584, in the second column, in paragraph (6) the ninth line should read "statement of use or prior to the expiration of the time".

§ 2.33 [Corrected]

6. In § 2.33 on page 37589, in the second column, in the eight line of paragraph (b)(1) "entity" should read "entity,".

§ 2.52 [Corrected]

7. In § 2.52 on page 37591, in the color chart in paragraph (e) in the center of the page, the lines within the circles representing "RED or PINK", "BROWN", and "GREEN" should be solid lines, as follows:



§ 2.53 [Corrected]

8. In § 2.53 on page 37591, in the first column, remove the colon after the word "Sheet" in the fourth line.

Dated: October 25, 1989.

Donald J. Quigg,

Assistant Secretary and Commissioner of Patents and Trademarks.

[FR Doc. 89-25697 Filed 11-1-89; 8:45 am]

BILLING CODE 3510-16-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 8

RIN: 2900-AD75

National Service Life Insurance: Verbal Authorization of Premium Deduction Actions

AGENCY: Department of Veterans Affairs.

ACTION: Final regulation.

SUMMARY: The Department of Veterans Affairs (VA) is amending its regulations to reflect that an insured under a National Service Life Insurance (NSLI) policy may verbally authorize VA to establish, adjust or cancel a monthly deduction of premiums from VA benefits or military service retired pay. Currently such action may only be taken pursuant to a written authorization from an insured. By amending regulations in this manner insured veterans will be able to utilize the VA Insurance Service's toll-free telephone service to expedite their premium deduction action reports.

EFFECTIVE DATE: December 4, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Paul F. Koons, Assistant Director for Insurance, Department of Veterans Affairs Regional Office and Insurance Center, P.O. Box 8079, Philadelphia, PA 19101, (215) 951-5360.

SUPPLEMENTARY INFORMATION: On page 18550 of the **Federal Register** (54 FR 18550) of May 1, 1989, VA published proposed regulatory amendments providing that insured veterans may verbally authorize the establishment, adjustment or discontinuance of a premium deduction from their VA benefits or military service retired pay. Interested parties were given 30 days in which to submit written comments, suggestions, or objections regarding the proposed regulatory amendments.

One written comment was received during the comment period. The comment, dated May 22, 1989, agrees with the proposed regulations. The commenter suggests, however, that procedures be developed and put into place to verify the identity of callers. The Insurance Service does in fact already have a verification process in place. In addition, all Insurance Service phone operators have received training in this area.

The Secretary hereby certifies that these final regulations will not have a significant impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612. Pursuant to 5 U.S.C. 605(b) these final regulations are, therefore, exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that these final regulations will affect only certain NSLI policyholders. They will, therefore, have no significant direct impact on small entities in terms of compliance costs, paperwork requirements or effects on competition.

VA has also determined that these final regulations are nonmajor in accordance with Executive Order 12291, Federal Regulation. These regulations will not have a large effect on the economy, will not cause an increase of costs or prices, and will not otherwise have any significant adverse economic effects.

(The Catalog of Federal Domestic Assistance program number for this regulation is 64.101.)

List of Subjects in 38 CFR Part 8

Life insurance, Veterans.

Approved: October 6, 1989.

Edward J. Derwinski,

Secretary.

38 CFR Part 8, National Service Life Insurance, is amended to read as follows:

PART 8—[AMENDED]

1. In § 8.8, paragraphs (a) and (c) are revised and an authority citation is added at the end of the section to read as follows:

§ 8.8 Deduction of insurance premiums from compensation, retirement pay, or pension.

* * * * *

(a) The authorization may be made by an insured or the insured's legal representative. If the authorization is made by the insured's legal representative, it must be in writing over the signature of the representative and forwarded to the Department of Veterans Affairs along with a copy of the document which evidences the individual's authority to act on behalf of the insured. If an insured is incompetent and has no legal representative and has a spouse to whom benefits are being paid pursuant to section 3202(f) of title

VOL 54 ISS 211 NO 2 1989 UMI

38, United States Code, and § 13.57 of this chapter, the spouse may authorize payment of insurance premiums through the deduction system. If an insured is incompetent and has no legal representative and an institutional award has been made in his or her behalf, the authorization may be executed by the Director of the field facility in which the insured is hospitalized or receiving domiciliary care, and in appropriate cases by the chief officers of State hospitals or other institutions to whom similar awards may have been approved.

* * * * *

(c) The authorization may be cancelled by the insured at any time. Such cancellation will be effective on the first day of the month following the month in which it is received by the Department of Veterans Affairs.

* * * * *

(Authority: 38 U.S.C. 708)

2. Section 8.9 is revised and an authority citation is added to read as follows:

§ 8.9 Authorization for deduction of insurance premiums from compensation, retirement pay, or pension.

The authorization for deductions from disability compensation, death compensation, dependency and indemnity compensation, retirement pay, disability pension, or death pension, to be acceptable for the payment of insurance premiums, must be received by the Department of Veterans Affairs while the insurance is not lapsed. Such an authorization will be effective against the benefit payment for the month in which it is received by the Department of Veterans Affairs, unless the insured elects to have the authorization become effective against the benefit payment for a succeeding month. However, the deduction made from the benefit payment for the month in which the authorization becomes effective shall be for the insurance premium due in the succeeding calendar month. When premium deductions are authorized in accordance with the provisions of Department of Veterans Affairs regulations, the Department of Veterans Affairs will make monthly deductions from the benefit payment due and payable to the insured of an amount sufficient to pay the monthly insurance premium. Such deductions will continue so long as the benefit payment due and payable to the insured is sufficient to pay the monthly insurance premium or until the authorization is revoked by the veteran or otherwise terminated.

(Authority: 38 U.S.C. 708)

[FR Doc. 89-25767 Filed 11-1-89; 8:45 am]

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3676-6]

Approval and Promulgation of Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving amendments to rule 10 CSR 10-2.230 as a revision to the Air Pollution Control State Implementation Plan (SIP) of the state of Missouri. The purpose of this rule is to control the emissions of volatile organic compounds (VOC) from industrial surface coating operations in the Kansas City area. VOCs react in the atmosphere to form ozone. A reduction in VOC emissions is necessary for the Kansas City area to meet the National Ambient Air Quality Standards for ozone. EPA's approval will make the rule requirements federally enforceable.

EFFECTIVE DATE: This action is effective December 4, 1989.

ADDRESSES: The state submittal and EPA's technical support document are available for public inspection during normal business hours at the following locations: Environmental Protection Agency, Region VII, Air Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101; Missouri Department of Natural Resources, Air Pollution Control Program, Jefferson State Office Building, 205 Jefferson Street, Jefferson City, Missouri 65101; Environmental Protection Agency, Public Information Reference Unit, Room 2922, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Larry A. Hacker at (913) 236-2893 (FTS 757-2893).

SUPPLEMENTARY INFORMATION: The state of Missouri has submitted amendments to rule 10 CSR 10-2.230 as a SIP revision. This rule controls VOC emissions from industrial surface coating operations in the Kansas City, Missouri ozone nonattainment area. EPA's approval of these rule amendments will provide federal enforceability, which will ensure progress toward attainment nd maintenance of the ozone air quality standard in the Kansas City area.

On December 18, 1987, the state submitted corrections to its VOC control rules applicable to the Kansas City area; corrections to the industrial surface coating rule, 10 CSR 10-2.230, were included in this submittal. On June 30, 1988, EPA published a proposal to approve the Kansas City VOC rule corrections (53 FR 24735). Subsequent to this proposal, however, the state adopted further amendments to the surface coating rule and submitted these amendments to EPA on December 19, 1988. Therefore, EPA prepared a new proposed rulemaking, addressing both the original and subsequent surface coating rule amendments, which was published on May 12, 1989 (54 FR 20613). For a complete discussion of the rule amendments, the reader is referred to the above mentioned May 12, 1989, **Federal Register** notice.

No public comments were received on EPA's May 12, 1989, proposal. EPA did receive surface coating comments on its June 30, 1988, proposal. The rule amendments in the state's December 19, 1988, submittal addressed the commenters' concerns. Because no comments were received on the May 12 proposal, the surface coating comments on EPA's previous proposal (June 30) are no longer pertinent and, therefore, are not addressed herein.

EPA Action

In today's notice, EPA takes final action to approve Missouri's December 18, 1987, and December 19, 1988, submittals of amendments to rule 10 CSR 10-2.230.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214-2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for a period of two years.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the U.S. Court of Appeals for the appropriate circuit by January 2, 1990. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, and Ozone.

Note. Incorporation by reference of the State Implementation Plan for the state of Missouri was approved by the Director of the Federal Register on July 1, 1982.

Dated: August 30, 1989.

Morris Kay,

Regional Administrator.

40 CFR Part 52, Subpart AA, is amended as follows:

PART 52—[AMENDED]

Subpart AA—Missouri

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401-7642.

2. Section 52.1320 is amended by adding paragraph (c)(70) to read as follows:

§ 52.1320 Identification of plan.

* * * * *

(c) * * *

(70) The Missouri Department of Natural Resources submitted amendments to rule 10 CSR 10-2.230 on December 18, 1987, and December 19, 1988. The rule controls volatile organic compound emissions from industrial surface coating facilities in the Kansas City area. EPA approves these rule amendments with the following interpretations. The New Source Performance Standards commitment in note (2) does not supersede a more stringent emission limit which might be required in accord with the state's new source review rule, 10 CSR 10-6.060. In rule 10 CSR 10-2.230, the test method for determining the volatile and solids content of the coatings is 40 CFR Part 60, Appendix A, Reference Method 24. Compliance with the emission limits in rule 10 CSR 10-2.230 can be demonstrated: on a daily weighted average per coating line basis; through equivalency using a daily weighted average of VOC per gallon of coating solids per coating line; and through an alternative compliance plan whereby compliance is determined by a daily weighted average of emissions from a single or combination of source operations. Any such alternative compliance plans must be submitted and approved by EPA as individual SIP revisions. In the absence of such approval, the enforceable requirements of the SIP would be the emission limits stated in the rules.

(i) Incorporation by reference.

(A) Revision to rule 10 CSR 10-2.230, Control of Emissions from Industrial Surface Coating Operations, effective December 24, 1987, with amendments effective November 24, 1988.

[FR Doc. 89-25564 Filed 11-1-89; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 52

[FRL-3673-3]

Approval and Promulgation of Implementation Plans; Wisconsin

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Final rulemaking.

SUMMARY: USEPA is approving a site-specific revision to the Wisconsin State Implementation Plan (SIP) for ozone. The revision provides for a compliance date extension from December 31, 1985, until December 31, 1987, for Union Camp Corporation's (Union Camp) Tomah facility, which is located in Monroe County, Wisconsin. This SIP revision allows Union Camp additional time to reformulate to low solvent inks for use on flexible packaging materials. Under this SIP revision, the Tomah facility must comply with the emission limits contained in Section NR 154.13(4)(l) by December 31, 1987. This action is taken in response to an April 7, 1986, request from the Wisconsin Department of Natural Resources (WDNR).

USEPA is approving this revision because: (1) The Tomah facility is located in an attainment area for ozone; and (2) approval of the extension will not affect the maintenance of the ozone standard.

EFFECTIVE DATE: This final rulemaking becomes effective on December 4, 1989.

ADDRESSES: Copies of the SIP revision, public comments on the notice of proposed rulemaking and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Uylaine E. McMahan, at (312) 886-6031, before visiting the Region V Office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR-26), 230 South Dearborn Street, Chicago, Illinois 60604.

Wisconsin Department of Natural Resources, Bureau of Air Management, 101 South Webster, Madison, Wisconsin 53707.

A copy of today's revision to the Wisconsin SIP is available for inspection at: U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street, S.W., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 886-6031, FTS 886-6031.

SUPPLEMENTARY INFORMATION: On April 7, 1986, the WDNR submitted a proposed site-specific SIP revision to its ozone SIP for VOC emissions from Union Camp's four flexographic printing presses at the Tomah facility, located in Monroe County, Wisconsin. This revision consists of a compliance date extension from December 31, 1985, to December 31, 1987, for meeting the VOC emission limits contained in Wisconsin SIP regulation, NR 154.13(4)(l). USEPA has reviewed Wisconsin's request with respect to whether the compliance date extension affects the attainment and maintenance of the ozone National Ambient Air Quality Standard [1] (NAAQS) in Monroe County, Wisconsin.

Union Camp is a diversified extruder and converter of flexible packaging materials. Numerous grades of polyethylene are extruded, printed, and converted for packaging such items as ice, produce, baby formula, and a wide variety of industrial products. In addition, a variety of purchased laminated and co-extruded films are printed and converted. These include various combinations of foil, paper, cellophane, polyester, polypropylene and polyethylene.

Under the existing federally-approved SIP, each flexographic printing press is subject to the control requirements contained in Section NR 154.13(4)(l) of the Wisconsin Administrative Code. Section NR 154.13(4)(l) limits the VOC content of any ink, as applied, to 25 percent or less by volume of the volatile content or 40 percent or less by volume of the total content. USEPA approved this rule as meeting the reasonably available control technology (RACT) requirements under Part D of the Clean Air Act (Act) for non-attainment areas on June 21, 1982 (47 FR 26822).

Union Camp is located in Monroe County, an area designated attainment for ozone (40 CFR 81.350) under Section 107 of the Act. Since approval of this proposed SIP revision will not cause an increase in actual emissions, maintenance of the NAAQS will not be affected by the compliance date extension. USEPA, is therefore,

[1] The NAAQS were established to protect public health and welfare under Section 109 of the Clean Air Act.

VOL 54 NO 2 1989 ISS 211 UMI

approving this SIP revision extending the compliance schedule.[2]

In a February 27, 1987, **Federal Register** (52 FR 6007), USEPA proposed to approve Union Camp's compliance date extension until December 31, 1987. The notice explained that the revision would constitute a RACT relaxation in an ozone attainment/unclassified area, which would result in the removal of the accomodative ozone SIP for Monroe County.

During the 30-day public period, Union Camp submitted comments on the notice of proposed rulemaking. These comments are summarized below and are followed by USEPA's response.

Comment 1: Union Camp states that the revision should be approved as a site-specific RACT determination rather than a relaxation from RACT, because Union Camp progressed as quickly as possible in the development of complying inks.

USEPA Response: In order for an area to retain its accommodative SIP, the State must demonstrate that it is implementing RACT as expeditiously as practicable. USEPA policy guidance for evaluating whether or not a compliance schedule is expeditious is contained in an August 7, 1986, memorandum dealing with compliance date extensions in nonattainment areas (see the Illinois Georgia-Pacific November 6, 1988, (53 FR 45103) **Federal Register** notice, Appendix A). Therefore, although this source is not strictly subject to the requirements of the August 7, 1986, policy, USEPA is using the criteria contained in that policy to determine whether this compliance schedule is expeditious. The present VOC emissions from Union Camp's flexographic printing operations do not indicate a RACT-level of control, nor has Union Camp demonstrated to USEPA's satisfaction that development of complying coatings has progressed as expeditiously as practicable.

Comment 2: Union Camp states that if the accommodative SIP must be removed for Monroe County, it should only be removed for the duration of the variance.

USEPA Response: Because the revision is a temporary relaxation, the accommodative SIP is being removed for the duration of the relaxation and will be reinstated once the source demonstrates compliance with the RACT emission limits contained in Section NR 154.13(4)(1).

USEPA is approving this SIP revision as a temporary relaxation from RACT. Such a relaxation will eliminate the accommodative SIP for Monroe County for the period covered by the revision.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 2, 1990. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental Protection, Air pollution control, Incorporation by Reference, Ozone, Hydrocarbons, Intergovernmental relations.

Note: Incorporation by reference of the State Implementation Plan for the State of Wisconsin was approved by the Director of the Federal Register on July 1, 1982.

Dated: October 13, 1989.

William K. Reilly,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Wisconsin

Title 40 of the Code of Federal Regulations, Chapter I, Part 52, is amended as follows:

Subpart YY—Wisconsin

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.2570 is amended by adding a new paragraph (c)(48) to read as follows:

§ 52.2570 Identification of plan.

* * * * *

(c) * * *

(48) On April 7, 1988, the WDNR submitted a site-specific revision to its ozone SIP for VOC emissions from Union Camp's four flexographic printing presses at the Tomah facility, located in Monroe County, Wisconsin. It consists of a compliance date extension from December 31, 1985, to December 31, 1987, for meeting the VOC emission limits contained in Wisconsin SIP regulation, NR 154.13(4)(1).

(i) Incorporation by reference.

(A) January 8, 1988, RACT Variance Review for Union Camp Corporation 501 Williams Street, Tomah, Wisconsin 54660.

[FR Doc. 89-25476 Filed 11-1-89; 8:45 am]

BILLING CODE 6560-50-M

[2] Since Monroe County is designated attainment for ozone, today's proposal is being evaluated primarily with respect to the Clean Air Act's requirement under Section 110 that a revision must assure the attainment and maintenance of the NAAQS.

40 CFR Part 60

[AD-FRL-3619-3]

Standards of Performance for New Stationary Sources; Appendix A—Reference Methods; Amendments to the Introduction and Methods 6, 6C, 7A, 8, and 10A

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action amends the Introduction and Methods 6, 6C, 7A, 8, and 10A of Appendix A of 40 CFR part 60. Method 6 is amended by adding procedures for testing in the presence of ammonia; Method 6C is amended to expand the allowable ranges for the mid- and high-range calibration gases. Methods 7A and 10A are amended to revise inaccurate wording describing the sample storage times, and Method 8 is amended to add quality assurance (QA) and quality control (QC) procedures. These amendments will update portions of Appendix A to make them more applicable to current testing needs. These amendments were proposed in the **Federal Register** on October 31, 1988 (53 FR 33508).

DATES: *Effective date:* November 2, 1989.

Judicial Review: Under Section 307(b)(1) of the Clean Air Act, judicial review of the actions taken by this notice is available *only* by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this rule. Under Section 307(b)(2) of the Clean Air Act, the requirements that are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

ADDRESSES: *Docket.* Docket No. A–88–21, containing materials relevant to this rulemaking, is available for public inspection and copying between 8:30 a.m. and 3:30 p.m., Monday through Friday, at EPA's Air Docket Section, Room M–1500, 1st Floor, Waterside Mall, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Foston Curtis or Roger Shigehara, Emission Measurement Branch (MD–19), Technical Support Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–1063.

SUPPLEMENTARY INFORMATION:

I. The Rulemaking

This rulemaking does not impose emission measurement requirements beyond those specified in the current regulations, nor does it change any emission standard. Rather, the rulemaking would simply amend existing test methods associated with emission measurement requirements that would apply irrespective of this rulemaking.

II. Public Participation

The opportunity to hold a public hearing on September 21, 1988 at 10:00 a.m. was presented in the proposal notice, but no one desired to make an oral presentation. The public comment period was from August 31, 1988 to November 14, 1988.

III. Significant Comments and Changes to the Proposed Rulemaking

No comment letters were received from the proposal of the rulemaking. Minor changes based on comments received by telephone were made to the Method 6 amendment. This change will add clarity to the new procedure for handling ammonia and will list a source for the needed probe filter which may be difficult to locate otherwise.

IV. Administrative

The docket is an organized and complete file of all the information considered by EPA in the development of this rulemaking. The docket is a dynamic file, since material is added throughout the rulemaking development. The docketing system is intended to allow members of the public and industries involved to identify readily and locate documents so that they can effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated test method revisions and EPA responses to significant comments, the contents of the docket, except for interagency review materials, will serve as the record in case of judicial review [Section 307(d)(7)(A)].

Under Executive Order 12291, EPA is required to judge whether a regulation is a "major rule" and, therefore, subject to the requirements of a regulatory impact analysis. The Agency has determined that this regulation would result in none of the adverse economic effects set forth in Section 1 of the Order as grounds for finding a regulation to be a "major rule." The Agency has, therefore, concluded that this regulation is not a "major rule" under Executive Order 12291.

The Regulatory Flexibility Act (RFA) of 1980 requires the identification of potentially adverse impacts of Federal regulations upon small business entities. The Act specifically requires the completion of a RFA analysis in those instances where small business impacts are possible. Because this rulemaking imposes no adverse economic impacts, an analysis has not been conducted.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the promulgated rule will not have an impact on small entities because no additional costs will be incurred.

This rule does not change any information collection requirements currently approved by OMB under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Information requirements contained in 40 CFR part 60, Appendix A are cleared under OMB control number 2060–0022.

List of Subjects in 40 CFR Part 60

Air pollution control, Intergovernmental relations, Petroleum refineries, Kraft pulp mills, Reporting and recordkeeping requirements, and Incorporation by reference.

Dated: October 2, 1989.

William K. Reilly,

Administrator.

PART 60—[AMENDED]

40 CFR part 60, Appendix A is amended as follows:

1. The authority for 40 CFR part 60 continues to read as follows:

Authority: 42 U.S.C. 7401, 7411, 7414, 7416, 7601.

Appendix A—[Amended]

2. By revising the title of Appendix A from "Reference Methods" to read "Test Methods."

3. By amending the introduction which follows the list of test methods as follows:

a. By revising the first sentence of the second paragraph to read as follows:

Within each standard of performance, a section title "Test Methods and Procedures" is provided to: (1) Identify the test methods to be used as reference methods to the facility subject to the respective standard and (2) identify any special instructions or conditions to be followed when applying a method to the respective facility.

b. By revising the last sentence of the second paragraph to read as follows:

Similarly, for sources subject to emission monitoring requirements, specific instructions pertaining to any use of a test method as a reference method are provided in the subpart or in Appendix B.

c. By removing the word "reference" wherever it occurs, and in its place, inserting the word "test" in the following places:

(1) First paragraph, first and second sentences.

(2) Second paragraph, second sentence.

(3) Fourth paragraph, first sentence.

(4) Fifth paragraph, first, second, and fourth sentences.

(5) Sixth paragraph, first and fifth sentences, and second from last sentence.

4. By amending Method 6 as follows:

a. By removing the last sentence in Section 1.2 and inserting, in its place, the following sentence: "If free ammonia is present (this can be determined by knowledge of the process and the presence of white particulate matter in the probe and isopropanol bubbler), the alternative procedures in Section 7.2 shall be used."

b. In Section 3.1.1, by adding a sentence at the end of the section to read as follows:

"Unless otherwise specified, this water shall be used throughout this method."

c. By removing the words "deionized, distilled" or "distilled", wherever they occur in the following places:

(1) Section 3.1.2, first and third sentences.

(2) Section 3.1.3, first sentence.

(3) Section 3.1.4, first sentence.

(4) Section 3.2.2, first sentence.

(5) Section 3.3.3, first sentence.

(6) Section 3.3.4, first sentence.

(7) Section 4.2, fourth sentence.

(8) Section 4.3, second paragraph, first sentence.

d. By revising Section 3.2.1 to read as follows:

3.2.1 Water. Same as in Section 3.1.1.

e. By revising Section 3.3.1, to read as follows:

3.3.1 Water. Same as in Section 3.1.1.

f. By adding a new Section 3.3.7 to read as follows:

3.3.7 Hydrochloric Acid (HCl) Solution, 0.1 N (for use in Section 7.2). Carefully pipette 8.6 ml of concentrated HCl into a 1-liter volumetric flask containing water. Dilute to volume with mixing.

g. By adding new Sections 7.3 and 7.3.1 through 7.3.3 to read as follows:

7.3 *Elimination of Ammonia Interference.* The following alternative procedures shall be used in addition to those specified in the method when sampling at sources having ammonia emissions.

7.3.1 *Sampling.* The probe shall be maintained at 275 °C and equipped with a high-efficiency in-stack filter (glass fiber) to remove particulate matter. The filter material

BEST COPY AVAILABLE

VOL 54 ISS 211 NOV 2 1989 UMI

shall be unreactive to SO_2. Whatman 934AH (formerly Reeve Angel 934AH) filters treated as described in Citation 10 of the Method 5 bibliography is an example of a filter that has been shown to work. Where alkaline particulate matter and condensed moisture are present in the gas stream, the filter shall be heated above the moisture dew point but below 225 °C.

7.3.2 *Sample Recovery.* Recover the sample according to Section 4.2 except for discarding the contents of the midget bubbler. Add the bubbler contents, including the rinsings of the bubbler with water, to the polyethylene bottle containing the rest of the sample. Under normal testing conditions where sulfur trioxide will not be present significantly, the tester may opt to delete the midget bubbler from the sampling train. If an approximation of the sulfur trioxide concentration is desired, transfer the contents of the midget bubbler to a separate polyethylene bottle.

7.3.3 *Sample Analysis.* Follow the procedures in Section 4.3, except add 0.5 ml of 0.1 N HCl to the Erlenmeyer flask and mix before adding the indicator. The following analysis procedure may be used for an approximation of the sulfur trioxide concentration. The accuracy of the calculated concentration will depend upon the ammonia to SO_3 ratio and the level of oxygen present in the gas stream. A fraction of the SO_2 will be counted as sulfur trioxide as the ammonia to SO_3 ratio and the sample oxygen content increases. Generally, when this ratio is 1 or less and the oxygen content is in the range of 5 percent, less than 10 percent of the SO_2 will be counted as sulfur trioxide. Analyze the peroxide and isopropanol sample portions separately. Analyze the peroxide portion as described above. Sulfur trioxide is determined by difference using sequential titration of the isopropanol portion of the sample. Transfer the contents of the isopropanol storage container to a 100-ml volumetric flask, and dilute to exactly 100 ml with water. Pipette a 20-ml aliquot of this solution into a 250-ml Erlenmeyer flask, add 0.5 ml of 0.1 N HCl, 80 ml of 100 percent isopropanol, and two to four drops of thorin indicator. Titrate to a pink endpoint using 0.0100 N barium perchlorate. Repeat and average the titration volumes that agree within 1 percent or 0.2 ml, whichever is larger. Use this volume in Equation 6–2 to determine the sulfur trioxide concentration. From the flask containing the remainder of the isopropanol sample, determine the fraction of SO_2 collected in the bubbler by pipetting 20-ml aliquots into 250-ml Erlenmeyer flasks. Add 5 ml of 3 percent hydrogen peroxide, 100 ml of 100 percent isopropanol, and two to four drops of thorin indicator, and titrate as before. From this titration volume, subtract the titrant volume determined for sulfur trioxide, and add the titrant volume determined for the peroxide portion. This final volume constitutes V_t, the volume of barium perchlorate used for the SO_2 sample.

5. By revising Sections 5.3.1 and 5.3.2 of Method 6C to read as follows:

5.3.1 High-Range Gas. Concentration equivalent to 80 to 100 percent of the span.

5.3.2 Mid-Range Gas. Concentration equivalent to 40 to 60 percent of the span.

6. In Method 7A, by deleting the word "analysis" in the last sentence of Section 4.2 and inserting, in its place, the word "recovery."

7. In Method 6, by adding new Sections 3.3.6, 4.4, 4.5, and 6.10 to read as follows:

3.3.6 Quality Assurance Audit Samples. Same as in Method 6, Section 3.3.6.

* * * * *

4.4 Quality Control Procedures. Same as in Method 5, Section 4.4.

4.5 Audit Sample Analysis. Same as in Method 6, Section 4.4.

* * * * *

6.10 Relative Error (RE) for QA Audit Samples. Same as in Method 6, Section 6.4.

8. In Method 10A, by deleting the word "month" in the last sentence of Section 1.5.3 and inserting, in its place, the word "week."

40 CFR Part 60

[AD–FRL–3615–9]

Standards of Performance for New Stationary Sources; Appendix A—Reference Methods; Amendments to Methods 15 and 16

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action amends Methods 15 and 16 of Appendix A of 40 CFR Part 60 by revising obsolete portions and updating the test methods to reflect current technology. The revisions will add simplicity to total reduced sulfur testing at petroleum refineries and kraft pulp mills when these methods are used. These amendments were proposed in the **Federal Register** on September 7, 1988 (53 FR 34551).

DATES: *Effective Date:* November 2, 1989.

Judicial Review: Under Section 307(b)(1) of the Clean Air Act, judicial review of the actions taken by this notice is available *only* by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this rule. Under Section 307(b)(2) of the Clean Air Act, the requirements that are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

ADDRESSES: *Docket.* Docket No. A–88–01, containing materials relevant to this rulemaking, is available for public inspection and copying between 8:30 a.m. and 3:30 p.m., Monday through Friday, at EPA's Air Docket Section, Room M–1500, 1st Floor, Waterside Mall, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Foston Curtis or Roger Shigehara, Emission Measurement Branch (MD–19), Technical Support Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–1063.

SUPPLEMENTARY INFORMATION:

I. The Rulemaking

This rulemaking does not impose emission measurement requirements beyond those specified in the current regulations, nor does it change any emission standard. Rather, the rulemaking would simply amend two existing test methods associated with emission measurement requirements that would apply irrespective of this rulemaking.

II. Public Participation

The opportunity to hold a public hearing on October 24, 1988, at 10:00 a.m., was presented in the proposal notice, but no one desired to make an oral presentation. The public comment period was from September 7, 1988, to November 21, 1988.

III. Significant Comments and Changes to the Proposed Rulemaking

Three comment letters were received from the proposal of the rulemaking. The major comments and responses are summarized in this preamble. The comment letters contained multiple comments. The significant comments and subsequent method changes are listed here.

1. Several comments centered around the proposed repositioning of the scrubber behind the probe which would also serve as a moisture trap and allow deletion of the heated sample line and dilution system. It was felt that a variety of alternative methods of moisture removal such as the traditional heated sample system, dilution with dry air to lower the dew point, or permeation dryers should be included to preclude making the methods overly restrictive. One commenter suggested that references to sample dilution and moisture content in the procedures, diagrams, and calculations be retained for those testers who prefer to continue to use a dilution system.

The repositioning of the scrubber was intended to add sampling convenience by eliminating unnecessary components which themselves could introduce sampling errors. In addition to its removal of interferences and moisture at an initial sampling point, the added benefits include neither having to heat the sample line, use a dilution system, nor determine moisture. Notwithstanding, some testers, due to equipment that is already in place, may prefer the traditional practice of preventing moisture condensation during sampling with subsequent sample correction for its presence. This procedure is still acceptable. Alternative methods are also allowed provided other criteria within the methods are met. This is stated in the introductory paragraph to the method. To make this acceptability criteria more specific, the paragraph will be amended to require that alternative equipment and procedures meet the calibration and post-test criteria stated in each methods. References throughout the methods to sample dilution and moisture content will be deleted except where critical to sampling and calculation needs.

2. Two commenters thought the specifications for the citrate scrubber were unnecessarily restrictive and may be rigidly enforced by regulatory agency observers. It was felt that most scrubbers made with glass or Teflon impingers in series, with the first two containing citrate buffer, would be capable of removing interferences. The mention of monitoring the scrubber pH between 5.4 and 5.6 was thought to be unnecessary.

The introductory paragraphs to the methods allow acceptable variations to the scrubber design. It should be noted, however, that sample losses may be incurred from using glass impingers. Deviations from the prescribed scrubber volumes and impinger sizes may also hinder performance and result in unacceptable post-test checks. We agree that the statement mentioning pH monitoring should be deleted. The scrubber is normally replaced after each 3-hour run, and drastic pH variations are not anticipated for the duration of single run. Unusual cases of sample losses due to pH increase from alkali mist and moisture collection would be detected in the line-loss test after the run.

3. All commenters questioned the availability of "NBS-traceable" line-loss gas and "certified" permeation devices proposed for calibration. It was preferred that permeation devices "of known permeation rates" be used for calibration and line-loss gases be calibrated against these devices or by the procedure in Section 7 of Method 16A.

We agree with the commenters on these points since no standardized NBS-traceable gases or certified permeation devices currently exist.

4. It was brought to our attention that passing diluent air over hydrogen sulfide (H_2S) permeation tubes causes oxidation of liquid H_2S inside the tubes. This, in turn, affects the measured permeation rate. It was also noted that calibration gases of H_2S in air are unstable. These will be remedied by specifying that nitrogen be used in place of air as the diluent for permeation devices and standard gases.

5. The revision to remove the need for recalibration if a subsequent line-loss test is 10 percent or less was criticized. It was felt that system recovery and instrument calibration drift should remain as separate measurements of system accuracy. This way, any periodic sample losses caused by component interactions and changes in analyzer sensitivity due to detector gas flows or column degradation can be separately accounted for. It was also recommended that the calibration drift specification cover periods shorter than 24 hours. This would prevent confusion and inaccuracy in those cases where recalibration is needed at shorter intervals.

We agree that calibration drift and line-loss tests should remain as separate tests. This would also eliminate the possibility of achieving an acceptable combined test when the individual drift and line-loss errors are unacceptable but of comparable magnitude and direction. It will be stated that calibration drift measurements be made after each run or series of runs within a 24-hour period.

6. The commenters felt the components used in the dilution system and rotary gas valves should be composed of inert materials instead of strictly Teflon. Although Teflon is relatively inert, it offers poor dimensional stability when used in the dilution system, especially when heated. This could potentially lead to leaks and changes in flow rates. Rotary valves made of Teflon were not believed to be commercially available.

This change will be made with the dilution system for the stated reasons. A study of the sample dilution system has indicated that glass and stainless-steel component parts are acceptable. Teflon-lined rotary valves are commercially available and should be used.

IV. Administrative

The docket is an organized and complete file of all the information considered by EPA in the development of this rulemaking. The docket is a dynamic file, since material is added throughout the rulemaking development. The docketing system is intended to allow members of the public and industries involved to identify readily and locate documents so that they can effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated test method revisions and EPA responses to significant comments, the contents of the docket, except for interagency review materials, will serve as the record in case of judicial review [Section 307(d)(7)(A)].

Under Executive Order 12291, EPA is required to judge whether a regulation is a "major rule" and, therefore, subject to the requirements of a regulatory impact analysis. The Agency has determined that this regulation would result in none of the adverse economic effects set forth in Section 1 of the Order as grounds for finding a regulation to be a "major rule." The Agency has, therefore, concluded that this regulation is not a "major rule" under Executive Order 12291.

The Regulatory Flexibility Act (RFA) of 1980 requires the identification of potentially adverse impacts of Federal regulations upon small business entities. The Act specifically requires the completion of an RFA analysis in those instances where small business impacts are possible. Because this rulemaking imposes no adverse economic impacts, an analysis has not been conducted.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the promulgated rule will not have an impact on small entities because no additional costs will be incurred.

This rule does not change any information collection requirements currently approved by OMB under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Information requirements contained in 40 CFR part 60, Appendix A are cleared under OMB Control Number 2060–0022.

List of Subjects in 40 CFR Part 60

Air pollution control, Intergovernmental relations, Petroleum refineries, Kraft pulp mills, Reporting and recordkeeping requirements, and Incorporation by reference.

Dated: October 2, 1989.

William K. Reilly,

Administrator.

PART 60—[AMENDED]

40 CFR Part 60, Appendix A is amended as follows:

1. The authority for 40 CFR part 60 continues to read as follows:

Authority: 42 U.S.C. 7401, 7411, 7414, 7416, 7601.

Appendix A—[Amended]

5. * * *

5.1 Sampling (Figure 15–1).

5.1.1 Probe. The probe shall be made of Teflon or Teflon-lined stainless steel and heated to prevent moisture condensation. It shall be connected directly to the scrubber.

5.5 Calibration System (Figure 15–3). The gas chromatograph shall be calibrated with the sample loop used for sample analysis.

* * * * *

$$\text{Average } SO_2 \text{ equivalent} = \frac{\sum_{i=1}^{N} SO_2 \text{ equiv}_i}{N}$$

3. In Method 15, by removing "(approximately 0.05 to 1.0 ppm)" from the first sentence of Section 8.3 and adding in its place, "(approximately 0.5

6. In Method 15, by removing Sections 12 and 12.1 through 12.4 and redesignating Sections 13 and 13.1 through 13.6 as Sections 12 and 12.1

Authority: 42 U.S.C. 7401, 7411, 7414, 7416, 7601.

Appendix A—[Amended]

2. In Method 15 of Appendix A, the Introduction, Sections 3.1, 3.3, 4.2, 5.1, 5.1.1, 5.1.2, 5.1.3, 5.2, 5.3, 5.5.1, 5.5.2, 5.5.3, 9.2.2, and 11.3 are revised; new Sections 3.4, 3.5, 5.1.3.1, 5.1.3.2, 5.1.4, 5.1.5, 5.3.4.4, 5.5, 6.6, and 6.7 are added; Section 5.5.4 is removed, and a sentence is added to the end of the paragraphs in Sections 7.1.1 and 8.4 as follows:

Method 15—Determination of Hydrogen Sulfide, Carbonyl Sulfide, and Carbon Disulfide Emissions From Stationary Sources

Introduction

The method described below uses the principle of gas chromatographic separation and flame photometric detection (FPD). Since there are many systems or sets of operating conditions that represent useable methods of determining sulfur emissions, all systems which employ this principle, but differ only in details of equipment and operation, may be used as alternative methods, provided that the calibration precision and sample-line loss criteria are met.

* * * * *

3. * * *

3.1 Moisture Condensation. Moisture condensation in the sample delivery system, the analytical column, or the FPD burner block can cause losses or interferences. This potential is eliminated by heating the probe, filter box, and conncections, and by maintaining the SO_2 scrubber in an ice water bath. Moisture is removed in the SO_2 scrubber and heating the sample beyond this point is not necessary provided the ambient temperature is above 0°C. Alternatively, moisture may be eliminated by heating the sample line, and by conditioning the sample with dry dilution air to lower its dew point below the operating temperature of the GC/FPD analytical system prior to analysis.

* * * * *

3.3 Elemental Sulfur. The condensation of sulfur vapor in the sampling system can lead to blockage of the particulate filter. This problem can be minimized by observing the filter for buildup and changing as needed.

3.4 Sulfur Dioxide (SO_2). Sulfur dioxide is not a specific interferent but may be present in such large amounts that it cannot be effectively separated from the other compounds of interest. The SO_2 scrubber described in Section 5.1.3 will effectively remove SO_2 from the sample.

3.5 Alkali Mist. Alkali mist in the emissions of some control devices may cause a rapid increase in the SO_2 scrubber pH to give low sample recoveries. Replacing the SO_2 scrubber contents after each run will minimize the chances of interference in these cases.

4. * * *

4.2 Calibration Drift. The calibration drift determined from the mean of three injections made at the beginning and end of any run or series of runs within a 24-hour period shall not exceed ±5 percent.

* * * * *

5. * * *

5.1 Sampling (Figure 15–1).

5.1.1 Probe. The probe shall be made of Teflon or Teflon-lined stainless steel and heated to prevent moisture condensation. It shall be designed to allow calibration gas to enter the probe at or near the sample point entry. Any portion of the probe that contacts the stack gas must be heated to prevent moisture condensation. The probe described in Section 2.1.1 of Method 16A having a nozzle directed away from the gas stream is recommended for sources having particulate or mist emissions. Where very high stack temperatures prohibit the use of Teflon probe components, glass or quartz-lined probes may serve as substitutes.

Note.—Mention of trade names or specific products does not constitute an endorsement by the Environmental Protection Agency.

5.1.2 Particulate Filter. 50-mm Teflon filter holder and a 1- to 2-micron porosity Teflon filter (available through Savillex Corporation, 5325 Highway 101, Minnetonka, Minnesota 55343). The filter holder must be maintained in a hot box at a temperature of at least 120° C (248°F).

5.1.3 SO_2 Scrubber.

5.1.3.1 Three 300-ml Teflon segment impingers connected in series with flexible, thick-walled, Teflon tubing. (Impinger parts and tubing available through Savillex.) The first two impingers contain 100 ml of citrate buffer, and the third impinger is initially dry. The tip of the tube inserted into the solution should be constricted to less than 3-mm (⅛-in.) ID and should be immersed to a depth of at least 5 cm (2 in.). Immerse the impingers in an ice water bath and maintain near 0° C. The scrubber solution will normally last for a 3-hour run before needing replacement. This will depend upon the effects of moisture and particulate matter on the solution strength and pH.

5.1.3.2 Connections between the probe, particulate filter, and SO_2 scrubber shall be made of Teflon and as short in length as possible. All portions of the probe, particulate filter, and connections prior to the SO_2 scrubber (or alternative point of moisture removal) shall be maintained at a temperature of at least 120 C° (248 °F).

5.1.4 Sample Line. Teflon, no greater than 1.3-cm (½-in.) ID. Alternative materials, such as virgin Nylon, may be used provided the line loss test is acceptable.

5.1.5 Sample Pump. The sample pump shall be a leakless Teflon-coated diaphragm type or equivalent.

5.2 Dilution System. The dilution system must be constructed such that all sample contacts are made of Teflon, glass, or stainless-steel. It must be capable of approximately a 9:1 dilution of the sample.

5.3 Gas Chromatograph (Figure 15–2). The gas chromatograph must have at least the following components:

* * * * *

5.3.4.4 Rotary Gas Valves. Multiport Teflon-lined valves equipped with sample loop. Sample loop volumes shall be chosen to provide the needed analytical range. Teflon tubing and fittings shall be used throughout to present an inert surface for sample gas. The gas chromatograph shall be calibrated with the sample loop used for sample analysis.

* * * * *

5.5 Calibration System (Figure 15–3). The calibration system must contain the following components.

5.5.1 Flow System. To measure air flow over permeation tubes within ±2 percent. Each flowmeter shall be calibrated after a complete test series with a wet-test meter. If the flow measuring device differs from the wet-test meter by more than 5 percent, the completed test shall be discarded. Alternatively, the tester may elect to use the flow data that will yield the lowest flow measurement. Calibration with a wet-test meter before a test is optional. Flow over the permeation device may also be determined using a soap bubble flowmeter.

5.5.2 Constant Temperature Bath. Device capable of maintaining the permeation tubes at the calibration temperature within 0.1 °C.

5.5.3 Temperature Gauge. Thermometer or equivalent to monitor bath temperature within 0.1 °C.

6. * * *

6.6 Citrate Buffer. Dissolve 300 g of potassium citrate and 41 g of anhydrous citric acid in 1 liter of water. Alternatively, 284 g of sodium citrate may be substituted for the potassium citrate. Adjust the pH to between 5.4 and 5.6 with potassium citrate or citric acid, as required.

6.7 Sample Line Loss Gas (Optional). As an alternative, H_2S cylinder gas may be used for the sample line loss test. The gas shall be calibrated against permeation devices having known permeation rates or by the procedure in Section 7 of Method 16A.

7. * * *

7.1.1 * * * As an alternative to the initial leak-test, the sample line loss test described in Section 10.1 may be performed to verify the integrity of components.

* * * * *

8. * * *

8.4 * * * Alternatively, a least squares equation may be generated from the calibration data using concentrations versus the appropriate instrument response units.

* * * * *

9. * * *

9.2.2 Observation for Clogging of Probe or Filter. If reductions in sample concentrations are observed during a sample run that cannot be explained by process conditions, the sampling must be interrupted to determine if the probe or filter is clogged with particulate matter. If either is found to be clogged, the test must be stopped and the results up to that point discarded. Testing may resume after cleaning or replacing the probe and filter. After each run, the probe and filter shall be inspected and, if necessary, replaced.

* * * * *

11. * * *

11.3 Average SO_2 Equivalent. This is determined using the following equation. Systems that do not remove moisture from the sample but conditions the gas to prevent condensation must correct the average SO_2 equivalent for the fraction of water vapor present.

$$\text{Average } SO_2 \text{ equivalent} = \frac{\sum_{i=1}^{N} SO_2 \text{ equiv}_i}{N}$$

Eq. 15-3

where:

Average SO_2 equivalent = Average SO_2 equivalent in ppm, dry basis.

Average SO_2 equivalent$_i$ = SO_2 in ppm as determined by Equation 15–2.

N = Number of analyses performed.

* * * * *

3. In Method 15, by removing "(approximately 0.05 to 1.0 ppm)" from the first sentence of Section 8.3 and adding in its place, "(approximately 0.5 to 10 ppm for a 1 = ml sample)".

4. In Method 15, by removing the word "four" in the first sentence of Section 8.3 and inserting in its place, "three."

5. In Method 15, by revising the seventh sentence in Section 10.1 to read as follows: "Alternatively, cylinders of hydrogen sulfide mixed in nitrogen and verified according to Section 6.7 may be used."

6. In Method 15, by removing Sections 12 and 12.1 through 12.4 and redesignating Sections 13 and 13.1 through 13.6 as Sections 12 and 12.1 through 12.6.

7. In Method 15, by revising Figure 15–1 as set forth below and placing it at the end of Section 5.2.

8. In Method 15, by transferring Figure 15–2 to the end of Section 5.3.4.3 and by transferring Figure 15–3 to the end of Section 5.5.4.

BILLING CODE 6560-50-M

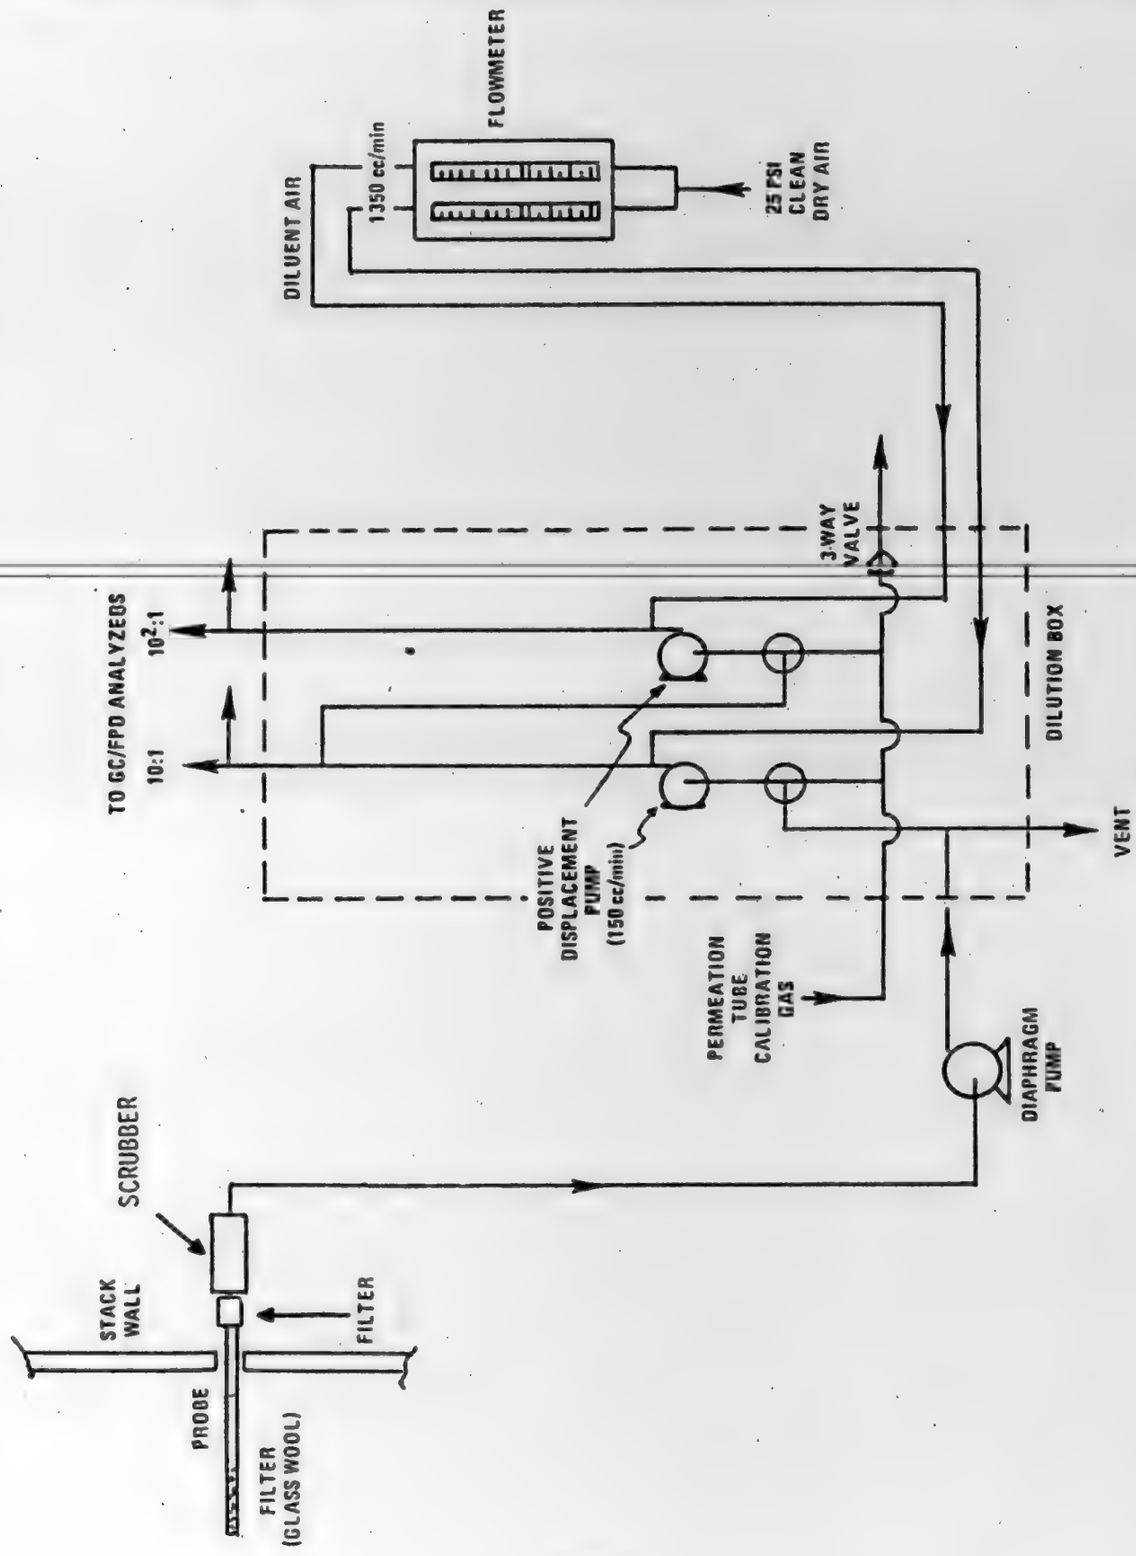

Figure 15-1. Sampling and dilution apparatus.

BILLING CODE 6560-50-C

9. In Method 16, the Introduction, Sections 1.1, 2.1, 3.1, 3.4, 4.2, 5.1.1, 5.1.2, 5.1.3, 5.2, 6.4, 8.3, 9.1, 9.2, 9.2.2, and 10.2 are revised; new Sections 5.1.1.1, 5.1.1.2, 5.1.1.3, 5.1.3.1, 5.1.3.2, 5.1.4, 5.1.5, 5.4.4.4 and 6.7 are added; and new sentences are added to the end of the paragraphs in Sections 6.6, 7.1.1, and 8.4 as follows:

METHOD 16—SEMICONTINUOUS DETERMINATION OF SULFUR EMISSIONS FROM STATIONARY SOURCES

Introduction

The method described below uses the principle of gas chromatographic separation and flame photometric detection (FPD). Since there are many systems or sets of operating conditions that represent useable methods of determining sulfur emissions, all systems which employ this principle, but differ only in details of equipment and operation, may be used as alternative methods, provided that the calibration precision and sample line loss criteria are met.

1. * * *

1.1 *Principle.* A gas sample is extracted from the emission source and an aliquot is analyzed for hydrogen sulfide (H_2S), methyl mercaptan (MeSH), dimethly sulfide (DMS), and dimethyl disulfide (DMDS) by gas chromatographic (GC) separation and flame photometric detection (FPD). These four compounds are know collectively as total reduced sulfur (TRS).

* * * * *

2. * * *

2.1 *Range.* The analytical range will vary with the sample loop size. Typically, the analytical range may extend from 0.1 to 100 ppm using 10 to 0.1-ml sample loop sizes. This eliminates the need for sample dilution in most cases.

* * * * *

3. * * *

3.1 *Moisture Condensation.* Moisture condensation in the sample delivery system, the analytical column, or the FPD burner block can cause losses or interferences. This is prevented by maintaining the probe, filter box, and connections at a temperature of at least 120°C (248°F). Moisture is removed in the SO_2 scrubber and heating the sample beyond this point is not necessary provided the ambient temperature is above 0°C. Alternatively, moisture may be eliminated by heating the sample line, and by conditioning the sample with dry dilution air to lower its dew point below the operating temperature of the GC/FPD analytical system prior to analysis.

* * * * *

3.4 *Sulfur Dioxide (SO_2).* Sulfur dioxide is not a specific interferent but may be present in such large amounts that it cannot be effectively separated from the other compounds of interest. The SO_2 scrubber described in Section 5.1.3 will effectively remove SO_2 from the sample.

* * * * *

4.2 *Calibration Drift.* The calibration drift determined from the mean of three injections made at the beginning and end of any run or series of runs within a 24-hour period shall not exceed ±5 percent.

* * * * *

5. * * *

5.1.1 Probe.

5.1.1.1 *Teflon or Teflon-lined stainless steel.* The probe must be heated to prevent moisture condensation. It shall be designed to allow calibration gas to enter the probe at or near the sample point entry. Any portion of the probe that contacts the stack gas must be heated to prevent moisture condensation.

5.1.1.2 Figure 16–1 illustrates the probe used in lime kilns and other sources where significant amounts of particulate matter are present. The probe is designed with the deflector shield placed between the sample and the gas inlet holes to reduce clogging of the filter and possible adsorption of sample gas. As an alternative, the probe described in Section 2.1.1 of Methods 16A having a nozzle directed away from the gas stream may be used at sources having significant amounts of particulate matter.

5.1.1.3 Note: Mention of trade names or specific products does not constitute an endorsement by the Environmental Protection Agency.

5.1.2 Particulate Filter. 50-mm Teflon filter holder and a 1- to 2-micron porosity Teflon filter (available through Savillex Corporation, 5325 Highway 101, Minnetonka, Minnesota 55343). The filter holder must be maintained in a hot box at a temperature of at least 120 °C (248 °F).

5.1.3 SO_2 Scrubber.

5.1.3.1 Three 300-ml Teflon segmented impingers connected in series with flexible, thick-walled, Teflon tubing. (Impinger parts and tubing available through Savillex.) The first two impingers contain 100 ml of citrate buffer and the third impinger is initially dry. The tip of the tube inserted into the solution should be constricted to less than 3-mm (⅛-in.) ID and should be immersed to a depth of at least 5 cm (2 in.). Immerse the impingers in an ice water bath and maintain near 0 °C. The scrubber solution will normally last for a 3-hour run before needing replacement. This will depend upon the effects of moisture and particulate matter on the solution strength and pH.

5.1.3.2 Connections between the probe, particulate filter, and SO_2 scrubber shall be made of Teflon and as short in length as possible. All portions of the probe, particulate filter, and connections prior to the SO_2 scrubber (or alternative point of moisture removal) shall be maintained at a temperature of at least 120 °C (248 °F).

5.1.4 *Sample Line.* Teflon, no greater than 1.3-cm (½-in.) ID. Alternative materials, such as virgin Nylon, may be used provided the line loss test is acceptable.

5.1.5 *Sample Pump.* The sample pump shall be leakless Teflon-coated diaphragm type or equivalent.

5.2 *Dilution System. Needed only for high sample concentrations. The dilution system must be constructed such that all sample contacts are made of Teflon, glass, or stainless steel.*

* * * * *

5.4.4.4 *Rotary Gas Valves.* Multiport Teflon-lined valves equipped with sample loop. Sample loop volumes shall be chosen to provide the needed analytical range. Teflon tubing and fittings shall be used throughout to present an inert surface for sample gas. The gas chromatograph shall be calibrated with the sample loop used for sample analysis.

* * * * *

6. * * *

6.4 *Diluent (If required).* Air containing less than 50 ppb total sulfur compounds and less than 10 ppm each of moisture and total hydrocarbons.

* * * * *

6.6. * * * Adjust the pH to between 5.4 and 5.6 with potassium citrate or citric acid, as required.

6.7 *Sample Line Loss Gas (Optional).* As an alternative to permeation gas, H_2S cylinder gas may be used for the sample line loss test. The gas shall be calibrated against permeation devices having known permeation rates or by the procedure in Section 7 of Method 16A.

7. * * *

7.1.1 * * * As an alternative to the initial leak-test, the sample line loss test described in Section 10.1 may be performed to verify the integrity of components.

* * * * *

8. * * *

8.3 *Calibration of Analysis System.* Generate a series of three or more known concentrations spanning the linear range of the FPD (approximately 0.5 to 10 ppm for a 1-ml sample) for each of the four major sulfur compounds. Inject these standards into the GC/FPD analyzer and monitor the responses. Three injects for each concentration must not vary by more than 5 percent from the mean of the three injections. Failure to attain this precision is an indication of a problem in the calibration or analytical system. Any such problem must be identified and corrected before proceeding.

8.4 * * * Alternatively, a least squares equation may be generated from the calibration data using concentrations versus the appropriate instrument response units.

* * * * *

9. * * *

9.1 *Sampling.* Insert the sampling probe into the test port making certain that no dilution air enters the stack through the port. Begin sampling. Condition the entire system with sample for a minimum of 15 minutes prior to commencing analysis.

9.2 *Analysis.* Aliquots of sample are injected into the GC/FPD analyzer for analysis.

9.2.1 * * *

9.2.2 *Observation for Clogging of Probe or Filter.* If reductions in sample concentrations are observed during a sample run that cannot be explained by process conditions, the sampling must be interrupted to determine if the probe or filter is clogged with particulate matter. If either is found to be clogged, the test must be stopped and the results up to that point discarded. Testing may resume after cleaning or replacing the probe and filter. After each run, the probe and filter shall be inspected and, if necessary, replaced.

VOL 54 ISS 211 NO 2 1989 UMI

10. Post-Test Procedures

10.1 * * *

10.2 *Recalibration.* After each run, or after a series of runs made within a 24-hour period, perform a partial recalibration using the procedures in Section 8. Only H_2S (or other calibration gas) need be used to recalibrate the GC/FPD analysis system (Section 6.3).

* * * * *

10. In Method 16, by deleting "9:1" from the first sentence in Section 3.2.

11. In Method 16, by revising the second sentence in Section 3.3 to read as follows: "This interference is eliminated by using the Teflon filter after the probe."

12. In Method 16, be revising the title of Section 4.1 to read as follows: "GC/FPD Calibration Precision."

13. In Method 16, by removing Section 5.3.

14. By redesignating Sections 5.4 through 5.4.4.4 as 5.3 through 5.3.4.4.

15. In Method 16, by redesignating Section 5.5 as 5.4 and revising the third sentence in the second paragraph of newly designated section 5.4 to read as follows: "Baseline separation is defined as a return to zero ±5 percent in the interval between peaks.".

16. In Method 16, by redesignating Sections 5.6 and 5.6.1 as 5.5 and 5.5.1, respectively, and adding "(Figure 16–2)" to the end of the last sentence of newly designated Section 5.5.

17. In Method 16, by redesignating Section 5.6.2 as 5.5.2 and adding the following sentence to the end of the newly redesignated section 5.5.2: "Flow over the permeation device may also be determined using a soap bubble flowmeter."

18. In Method 16, by redesignating Sections 5.6.3 and 5.6.4 as 5.5.3 and 5.5.4, respectively.

19. In Method 16, by adding "(if applicable)" to the end of the first sentence in Section 8.1.

20. In Method 16, by removing Section 8.5.

21. In Method 16, by revising the first two sentences in the first paragraph of section 10.1 to read as follows:

A known concentration of hydrogen sulfide at the level of the applicable standard, ±20 percent, must be introduced into the sampling system at the opening of the probe in sufficient quantities to ensure that there is an excess of sample which must be vented to the atmosphere. The sample must be transported through the entire sampling system to the measurement system in the normal manner. (See figure 16–1).

22. In Method 16, by revising the fifth sentence in the second paragraph of Section 10.1 to read as follows:

Alternatively, cylinders of hydrogen sulfide mixed in nitrogen and certified according to Section 6.7 may be used.

23. In Method 16, by removing "wet basis" and adding "dry basis" in the line beginning "TRS=" of Section 11.2.

24. In Method 16, by redesignating Eq. 16–3 as Eq. 16–4.

25. In Method 16, by removing Sections 12 and 12.1 through 12.4.1.2 and redesignating Sections 13 and 13.1 through 13.6 as Sections 12 and 12.1 through 12.6.

26. In Method 16, Figure 16.1 is transferred to the end of Section 5.1.1.

27. In Method 16, by revising Figure 16–2 as set forth below and placing it at the end of Section 10.1.

28. In Method 16, by removing Figures 16–3 through 16–5.

executive agencies) for prescribing policies and methods of procurement and supply of personal property and nonpersonal services, including related functions such as transportation and

Authority: Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486(c)).

2. Section 101–40.001 is revised to read as follows:

moves. The agency shall furnish the GSA such pertinent information concerning the proposed relocation as origin, destination, moving date, an

should contact the General Services Administration, Traffic and Travel Services Zone Office (6FBT), 4400 College Boulevard, Suite 175, Overland

8. Section 101–40.207 is amended by revising paragraph (b) to read as follows:

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101–40

[FPMR Amdt. G–92]

Transportation and Traffic Management

AGENCY: Federal Supply Service, GSA.

ACTION: Final rule.

SUMMARY: The General Services Administration (GSA) amends 41 CFR part 101–40, Transportation and Traffic Management, by updating certain references which have become outdated due to organizational and regulatory changes. This amendment also implements the provisions of Public Law 100–565 which increased the maximum amount the United States may pay in settlement of a claim against the United States by a member of the uniformed services or by an officer or employee of the Government, and clarifies the contracting requirements in arranging local office relocation services.

EFFECTIVE DATE: November 2, 1989.

FOR FURTHER INFORMATION CONTACT: Boyce Steiner, Transportation Management Division, Freight Management Branch (FBXF), FTS 557–7978 or commercial 703–557–7978.

SUPPLEMENTARY INFORMATION: Section 201(a) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 481(a)), details GSA's responsibility (with respect to executive agencies) for prescribing policies and methods of procurement and supply of personal property and nonpersonal services, including related functions such as transportation and traffic management.

The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for and consequences of this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101–40

Freight, Government property management, Moving of household goods, Office relocation, Transportation.

For the reasons set forth in the preamble, 41 CFR part 101–40 is amended as follows:

PART 101–40—TRANSPORTATION AND TRAFFIC MANAGEMENT

1. The authority citation for part 101–40 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486(c)).

2. Section 101–40.001 is revised to read as follows:

§ 101–40.001 Definitions.

"GSA Central Office" means the General Services Administration (GSA), Federal Supply Service, Office of Transportation and Property Management, Transportation Management Division, Freight Management Branch (FBXF), Washington, DC 20406.

"GSA regional office" means the GSA Traffic and Travel Services Zone Office(s), Federal Supply Service Bureau, specified in § 101–40.101–1(a).

SUBPART 101–40.1—GENERAL PROVISIONS

3. Section 101–40.101–1 is amended by revising paragraph (a) to read as follows:

§ 101–40.101–1 Freight transportation management assistance.

(a) Executive agencies may obtain traffic management assistance in the transportation of goods (other than household goods moving from, to, and between foreign countries) by contacting the following GSA zone offices serving agencies located within the jurisdictional areas noted:

Zone	Jurisdiction	Address and telephone
Eastern	AL, CT, DE, FL, GA, KY, MA, MD (note A), ME, MS, NC, NH, NJ, NY, PA, Puerto Rico, RI, SC, TN, VY, VA (note B), Virgin Islands, WV.	GSA, Attn: 4FBT, 75 Spring Street, SW., Atlanta, GA 30303. FTS 242–5121, CML 404–331–5121.
Central	IA, IL, IN, KS, MI, MN, MO, NE, OH, WI	GSA, Attn: 6FBT, 4400 College Blvd., Suite 175, Overland Park, KS 66211. FTS 757–2510, CML 913–236–2510.
Southwestern	AR, CO, LA, MT, ND, NM, OK, SD, TX, UT, WY	GSA, Attn: 7FBT, 819 Taylor Street, Fort Worth, TX 76102. FTS 334–2737, CML 817–334–2737.
Western	AK, American Samoa, AZ, CA, GU, HI, ID, NV, Northern Mariana Islands, OR, Pacific Trust Territories, WA.	GSA, Attn: 9FBT, 525 Market Street, San Francisco, CA 94105. FTS 484–8012, CML 415–744–8012.
National Capital Region (NCR).	DC, MD (note C), VA (note D)	GSA, Attn: WFBT, 7th & D Streets, SW., Washington, DC 20407. [1] FTS 472–1626, [1] CML 202–472–1626, [2] FTS 472–1944, [2] CML 202–472–1944.

[1] Other than household goods/office relocation.
[2] Household goods/office relocation only.
Note A—Except for counties under NCR jurisdiction as listed in note C.
Note B—Except for cities and counties under NCR jurisdiction as listed in note D.
Note C—Counties of Prince Georges and Montgomery only.
Note D—Cities of Alexandria, Fairfax, Manassas, and Manassas Park, and counties of Arlington, Fairfax, Loudoun, and Prince William only.

* * * * *

4. Section 101–40.109–2 is amended by revising paragraphs (a) and (b) to read as follows:

§ 101–40.109–2 Office relocation contracts.

(a) Prior to entering into office relocation contracts, agencies should ensure they are complying with the provisions of FPMR Temp. Reg. D–73, or reissues thereof. (See 41 CFR Appendix to Subchapter D.) Compliance assistance may be obtained from the respective regional directors of the GSA Public Buildings Service, Real Estate Division.

(b) An agency may either enter into its own office relocation contracts or request the appropriate GSA regional office to enter into office relocation contracts on the agency's behalf. Requests to GSA should be made as soon as possible and at least 120 calendar days before the proposed date of the move for local office relocation moves. The agency shall furnish the GSA such pertinent information concerning the proposed relocation as origin, destination, moving date, an itemized inventory of property to be moved, and the name and telephone number of the agency relocation coordinator.

(1) Arrangements for moving services, other than local office relocation moves, will be contracted for using competitive procedures or other appropriate relocation arrangements including Government tenders pursuant to section 10721 of the Interstate Commerce Act (49 U.S.C. 10721).

(2) Local office relocation moves must be acquired by contract, since such moves qualify as transportation within "commercial zones or terminal areas" and are excepted from rate regulation by the Interstate Commerce Commission. Neither the statutory exemption provided for in paragraph (3) of section 7 of the McNamara-O'Hara Service Contract Act of 1965 (Service Contract Act) (41 U.S.C. 351 *et seq.*) exempting "any contract for the carriage of freight or personnel * * * where published tariff rates are in effect" nor the administrative exemption for contracts for the carriage of freight or personnel subject to rates covered by section 10721 of the Interstate Commerce Act is applicable. (See 29 CFR 4.123.) The Service Contract Act applies to local office relocation moves where transportation costs (such as packing, crating, handling, loading, and/or storage of goods prior to or following line-haul transportation) are incidental to the principal purpose of the contract. (See 29 CFR 4.118.)

* * * * *

Subpart 101–40.2—Centralized Household Goods Traffic Management Program

5. Section 101–40.202 is revised to read as follows:

§ 101–40.202 The General Services Administration Household Goods Tender of Service (TOS) agreement.

As part of the centralized household goods traffic management program, GSA has developed a master household goods tender of service (TOS) agreement. This agreement establishes carrier service and performance standards which participating carriers agree to provide. Commercial carriers desiring to participate in this program must enter into individual TOS agreements with GSA, acting on behalf of executive agencies. Carriers that desire to enter into a TOS agreement or agencies desiring additional information should contact the General Services Administration, Traffic and Travel Services Zone Office (6FBT), 4400 College Boulevard, Suite 175, Overland Park, KS 66211.

6. Section 101–40.203–3 is revised as follows:

§ 101–40.203–3 The commuted rate system.

The commuted rate system is the method whereby employees who are authorized to transport their household goods at Government expense make their own shipping arrangements and are reimbursed by the Government according to the commuted rate allowances published in the GSA Commuted Rate Schedule. In addition to transportation allowances, the commuted rate schedule includes allowances for various related accessorial expenses, such as packing and crating, storage-in-transit, carrier labor charges, appliance servicing, and piano/organ handling. Under the commuted rate system, employees shipping via commercial carriers are responsible for making all arrangements with the carrier, filing loss and damage claims with the carrier, and making payment to the carrier after the shipment has been completed. Under the commuted rate system, the shipment is moved using commercial documents, or employees may elect to transport their household goods in a rental vehicle or by private conveyance. The use of household goods rate tenders (see § 101–40.203–1) is not authorized when household goods are shipped under the commuted rate system.

7. Section 101–40.203–4 is amended by revising paragraph (a) to read as follows:

§ 101–40.203–4 Cost comparisons.

(a) Under the centralized household goods traffic management program, agencies shall obtain cost comparisons between the GBL method and the commuted rate system from the appropriate GSA regional office. Section 302–8.3(c)(4)(i) of the Federal Travel Regulation (41 CFR chapters 301 through 304) provides that the commuted rate system shall be used for individual employee transfers without consideration being given to the GBL method, except that the GBL method may be used if the actual transportation costs (including the costs of packing and other accessorial services) to be incurred by the Government are predetermined and can be expected to result in a real saving to the Government of $100 or more.

* * * * *

8. Section 101–40.207 is amended by revising paragraph (b) to read as follows:

§ 101–40.207 Household goods loss and damage claims.

* * * * *

(b) Under 31 U.S.C. 3721 (the Military Personnel and Civilian Employees' Claims Act of 1964, as amended), employees who sustain a loss or damage to their household goods (transported incident to service) that exceeds the amount recovered from a carrier in settlement of a claim may file claim against the United States for the difference. Pursuant to Public Law 100–565, agencies may compensate employees up to $40,000 on claims arising on or after October 31, 1988. When it is the policy of the agency not to compensate its employees under the Act, the agency should advise employees of the options available to them for insuring their household goods against greater monetary loss. (See § 101–40.206(b) of this subpart.)

Dated: October 16, 1989.

Richard G. Austin,

Acting Administrator of General Services.

[FR Doc. 89–25624 Filed 11–1–89; 8:45 am]

BILLING CODE 6820–24–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6852]

List of Communities Eligible for the Sale of Flood Insurance; Michigan et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities has applied to the program and have agreed to enact certain floodplain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATE: The dates listed in the third column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: Post Office Box 457, Lanham, Maryland 20706, Phone: (800) 638–7418.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a

publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the

State and location	Community No.	Effective date authorization/cancellation of sale of Flood Insurance in community	Current effective map date
North Dakota: Souris, city of, Bottineau County	380010	Aug. 12, 1977, Emerg.; Mar. 18, 1986, Reg.; July 4, 1989, Susp.; Sept. 18, 1989, Rein.	Do.

(NFIP) at: Post Office Box 457, Lanham, Maryland 20706, Phone: (800) 638-7418.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646-2717, Federal Center Plaza, 500 C Street SW., Room 417, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insuance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance."

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance and floodplains.

1. The authority citation for part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq., . Reorganization Plan No. 3 of 1978, E.O. 12127.

2. Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

State and location	Community No.	Effective date authorization/cancellation of sale of Flood Insurance in community	Current effective map date

BILLING CODE 6718-21-M

Federal Insurance Administration

44 CFR Part 65

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below.

These modified elevations will be used in calculating flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

DATES: The effective dates for these modified base flood elevations are indicated on the following table and amend the Flood Insurance Rate Map(s) (FIRM) in effect for each listed community prior to this date.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed on the following table.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of modified flood elevations for each community listed. These modified elevations have been published in newspaper(s) of local

circulation and ninety (90) days have elapsed since that publication. The Administrator has resolved any appeals resulting from this notification.

Numerous changes made in the base (100-year) flood elevations on the FIRMs for each community make it administratively infeasible to publish in this notice all of the changes contained on the maps. However, this rule includes the address of the Chief Executive Officer of the community, where the modified base flood elevation determinations are available for inspection.

The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968, (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR part 65.

For rating purposes, the revised community number is shown and must be used for all new policies and renewals.

The modified base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the floodplain management measures required by 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State or regional entities.

These modified base flood elevations shall be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

The changes in the base flood elevations are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

BILLING CODE 6718-03-M

FEDERAL MARITIME COMMISSION

46 CFR Part 572

[Petition No. P2-89; Docket No. 89-22]

Cruise Lines International Association; Application for Section 16 Exemption

Served: October 30, 1989.

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: This exempts membership changes in certain passenger vessel operator agreements from the notice and waiting period requirements of section 6 of the Shipping Act of 1984 and the Information Form, notice and waiting period requirements of 46 CFR part 572. This exemption, which was requested by Cruise Lines International Association, will enable such membership changes to become effective upon filing with the Federal Maritime Commission.

EFFECTIVE DATE: November 2, 1989.

FOR FURTHER INFORMATION CONTACT: Austin L. Schmitt, Director, Bureau of Trade Monitoring, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5787.

SUPPLEMENTARY INFORMATION: On July 11, 1989, Cruise Lines International Association ("CLIA") [1] filed an Application for an exemption pursuant to section 16 of the Shipping Act of 1984, 46 U.S.C. app. 1715 ("1984 Act") and the implementing regulations of the Federal Maritime Commission ("Commission"),

[1] CLIA is a cooperative working agreement (Federal Maritime Commission Agreement No. 003-010071) among passenger vessel operators to meet and discuss matters of common interest, including marketing strategies for ocean cruise travel, and to train, bond and deal with travel agents.

46 CFR 572.301. CLIA seeks an exemption from the notice and waiting period requirements of section 6 of the 1984 Act, 46 U.S.C. app. 1705, and the Information Form, notice and waiting

discriminatory, result in a substantial reduction in competition, or be detrimental to commerce.

The Commission has determined that this Final Rule is not a "major rule" as

and sections 5, 16 and 17 of the Shipping Act of 1984, 46 U.S.C. 1704, 1715, 1716, in order to exempt membership changes in certain passenger vessel discussion agreements from certain requirements of

can be allotted to Fort Madison, Iowa, in compliance with the Commission's minimum distance separation requirements and can be used at Station KBKB(FM)'s present transmitter site.

47 CFR Part 73

[MM Docket No. 87-597, RM-5875 and RM-6309]

Radio Broadcasting Services;

47 CFR Part 73

[MM Docket No. 89-42; RM-6505]

Radio Broadcasting Services; Bolivar,

VOL 54 ISS 211 NO 2 1989 UMI

46 CFR 572.301. CLIA seeks an exemption from the notice and waiting period requirements of section 6 of the 1984 Act, 46 U.S.C. app. 1705, and the Information Form, notice and waiting period requirements of 46 CFR Part 572, for membership changes to passenger vessel discussion agreements open to all passenger vessels of a class defined in the agreements and consisting of 15 or more members, which do not contain ratemaking, pooling or joint service authority. The exemption would enable membership changes in such agreements to become effective upon filing with the Commission.

By Notice published in the **Federal Register** on July 25, 1989 (54 FR 30939), the Commission announced CLIA's Application and requested comments from interested persons. No comments on CLIA's Application were received. After consideration of CLIA's Application, the Commission has determined to grant the essential exemption requested by CLIA, with some modifications.

The scope of the exemption sought by CLIA is limited to exclude membership changes in passenger vessel operator agreements containing ratemaking, pooling or joint service authority. However, CLIA's Application did not address the proposed exemption's treatment of membership changes in passenger vessel operator agreements containing sailing or space chartering authority. The passenger vessel operator agreements currently on file with the Commission do not contain sailing or space chartering authority. However, were any such agreement to become effective under the 1984 Act, the Commission believes that membership changes should be reviewed under the 1984 Act's standards before they become effective, as is now the case with membership changes in non-passenger vessel operator agreements containing such authority. Accordingly, the scope of this rule's exemption has been further limited to exclude membership changes in passenger vessel operator agreements containing sailing or space chartering authority, in addition to those containing ratemaking, pooling or joint service authority. Other, less substantive changes have also been made to the text proposed by CLIA to improve the exemption's clarity and definiteness.

In accordance with section 16 of the 1984 Act, the Commission finds that the exemption granted herein will not substantially impair effective regulation by the Commission, be unjustly discriminatory, result in a substantial reduction in competition, or be detrimental to commerce.

The Commission has determined that this Final Rule is not a "major rule" as defined in Executive Order 12291 dated February 17, 1981, because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effect on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Acting Chairman of the Commission certifies pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, that this rule will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units or small governmental jurisdictions. The primary economic impact of this rule will be on passenger vessel operating ocean common carriers, which generally are not small entities. A secondary impact may fall on passengers and travel agents, some of whom may be small entities, but that impact is not considered to be significant.

The Commission has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, no environmental assessment or environmental impact statement was prepared.

The Paperwork Reduction Act, 44 U.S.C. 3501–3520, does not apply to this Final Rule because the amendment to part 572 of title 46, Code of Federal Regulations, does not impose any additional reporting or recordkeeping requirements or change the collection of information from members of the public which require the approval of the Office of Management and Budget.

The Commission has determined that this rule is excepted from the 30-day effective date requirement of 5 U.S.C. 553 because it grants an exemption and relieves a restriction from existing requirements.

Lists of Subjects in 46 CFR Part 572

Antitrust, Contracts, Maritime carriers, Administrative practice and procedure, Rates and fares.

Therefore, pursuant to 5 U.S.C. 553, and sections 5, 16 and 17 of the Shipping Act of 1984, 46 U.S.C. 1704, 1715, 1716, in order to exempt membership changes in certain passenger vessel discussion agreements from certain requirements of the 1984 Act, and the Commission's implementing regulations thereof, part 572 of Title 46 of the Code of Federal Regulations is amended as follows:

PART 572—[AMENDED]

1. The authority citation to Part 572 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 1701–1707, 1709–1710, 1712 and 1714–1717.

2. Section 572.309 is amended by revising paragraph (a)(2)(i) to read as follows:

§ 572.309 Miscellaneous modifications to agreements—exemptions.

(a) * * *

(2) * * *

(i) *Article 3*—Parties to the agreement (limited to conference agreements, and discussion agreements among passenger vessel operating ocean common carriers which are open to all ocean common carriers operating passenger vessels of a class defined in the agreements and consisting of 15 or more members, which do not contain ratemaking, pooling, joint service, sailing or space chartering authority).

BILLING CODE 6730-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 87–29, RM–5594; RM–5685]

Radio Broadcasting Services; Fort Madison, IA; Louisiana, MO

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Talley Broadcasting Company, substitutes Channel 269C2 for Channel 269A at Fort Madison, Iowa, and modifies its license for Station KBKB(FM) to specify operation on the higher powered channel. In addition, Channel 271A is substituted for Channel 269A at Louisiana, Missouri, and the license of Foxfire Communications, Inc. is modified accordingly. Channel 269C2 can be allotted to Fort Madison, Iowa, in compliance with the Commission's minimum distance separation requirements and can be used at Station KBKB(FM)'s present transmitter site. The coordinates for this allotment are North Latitude 40–39–30 and West Longitude 91–16–20. This allotment requires Good News Broadcasters, Inc. to amend its pending application for Channel 268A at Augusta, Illinois, to specify a non-shortspaced transmitter site. Channel 271A can be allotted to Louisiana, Missouri, in compliance with the Commission's minimum distance separation requirements and can be used at Station KJFM's present transmitter site. The coordinates for Channel 271A at Louisiana, Missouri, are North Latitude 39–26–29 and West Longitude 91–02–19. With this action, the proceeding is terminated.

EFFECTIVE DATE: December 11, 1989.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 87–29, adopted September 29, 1989, and released October 27, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

[MM Docket No. 89–42; RM–6508]

Radio Broadcasting Services; Bolivar, TN

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots Channel 234A to Bolivar, Tennessee, as that community's second local FM service, at the request of Opel J. Shaw. See 54 FR 8767, March 2, 1989. Channel 234A can be allotted to Bolivar in compliance with the Commission's minimum distance separation requirements at the city reference coordinates, which are 35–15–30 and 88–59–30. With this action, this proceeding is terminated.

DATES: Effective December 11, 1989. The window period for filing applications will open on December 12, 1989, and close on January 11, 1990.

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 89–42, adopted September 29, 1989, and released October 27, 1989. Insurer Reporting Requirements; List of Insurers Required To File Reports in October 1989

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: Title VI of the Motor Vehicle Information and Cost Savings Act requires each passenger motor vehicle insurer to file annual reports with NHTSA, unless the agency exempts the insurer from filing such reports. The law stipulates that NHTSA can exempt those insurance companies whose market share is below certain percentages in each individual State and for the nation as a whole. To carry out these statutory provisions, the agency has exempted those insurance companies that are lawfully eligible to be exempted and is hereby publishing an updated listing of those insurance companies subject to the reporting requirements. Those insurance companies included on the list are required to file reports for the 1988 calendar year not later than October 25, 1989. Any insurance company omitted from this list is not required to file a report for the 1988 calendar year.

EFFECTIVE DATE: The final rule on this subject will be effective December 4, 1989.

FOR FURTHER INFORMATION CONTACT: Barbara A. Kurtz, Office of Market Incentives, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Ms. Kurtz's telephone number is (202) 366-4808.

SUPPLEMENTARY INFORMATION:

Background

Section 612 of the Motor Vehicle Information and Cost Savings Act (the Act)(15 U.S.C. 2032) requires each insurer to file an annual report with NHTSA unless the agency exempts the insurer from filing such reports. The reports include information about thefts and recoveries of motor vehicles, the rating rules used by the insurers to establish premiums for comprehensive coverage, the actions taken by insurers to reduce such premiums, and the actions taken by insurers to reduce or deter theft.

Section 612(a)(5) provides that the agency shall exempt small insurers from the reporting requirements if NHTSA finds that such exemptions will not significantly affect the validity or usefulness of the information collected and compiled in the reports, either nationally or on a State-by-State basis. The term "small insurer" is defined in section 612(a)(5)(C) as an insurer whose premiums account for less than 1 percent of the total premiums for all forms of motor vehicle insurance issued by insurers within the United States. However, that section also stipulates that if an insurance company satisfies this definition of a "small insurer," but accounts for 10 percent or more of the total premiums for all forms of motor vehicle insurance issued by insurers within a particular State, such an insurer must report the required information about its operations in that State.

To implement these statutory criteria for exempting small insurers, NHTSA has used the data voluntarily supplied by insurance companies to A.M. Best to determine the insurer's market shares nationally and in each State. The A.M. Best data base was chosen because it is both accurate and timely, and because its use imposes no additional burdens on any party.

After examining the A.M. Best data, NHTSA has determined, first, that the report data to be provided by the large insurance companies will be sufficient for NHTSA to carry out its activities and responsibilities under title VI of the Act, and, second, that exempting all those insurance companies that qualify as small insurers will not affect the validity and usefulness of the information collected and compiled under this section, either nationally or on a State-by-State basis.

In the final rule for insurer reports published January 2, 1987, (52 FR 59), the agency listed, as Appendix A, the 20 insurance companies that had premiums that accounted for 1 percent or more of all motor vehicle insurance premiums paid nationally. Those companies were required to report on their operations for every State in which they did business. In Appendix B, the agency listed the eleven insurance companies with premiums that accounted for 10 percent or more of the total motor vehicle insurance premiums within a particular State or States. Such companies were required to report on their operations only for those States in which their premiums accounted for 10 percent or more of the total premiums.

The market shares for each of the insurance companies listed in the January 2, 1987, final rule were derived from the A.M. Best data for 1984, the most recent year for which the A.M. Best data were available as of the date the final rule was published. In issuing the rule, NHTSA stated that it would update the appendices as revised listings become available. Since that time, A.M. Best data for more recent calendar years have become available.

Accordingly, the agency published a Notice of Proposed Rulemaking (NPRM) on May 30, 1989 (54 FR 22921), proposing an updated listing of insurance companies that must provide annual insurer reports to the agency for the 1988 calendar year. That NPRM used the A.M. Best data for 1987 to determine which insurance companies are statutorily required to file reports by October 25, 1989. The notice proposed that all insurance companies that were statutorily eligible for an exemption from these reporting requirements should be exempted.

No comments were received on the proposed rule. For the reasons set forth above and in the NPRM, this final rule adopts the proposed listings for both Appendix A and Appendix B.

This rule is effective 30 days after publication in the **Federal Register**. As noted earlier in this preamble, section 612 of the Cost Savings Act (15 U.S.C. 2032) imposes a statutory duty on insurers that were not exempted from these reporting requirements to file a report for the 1988 calendar year no later than October 25, 1989.

Regulatory Impacts

1. Costs and Other Impacts

NHTSA has analyzed this rule and determined that it is neither "major" within the meaning of Executive Order 12291 nor "significant" within the meaning of the Department of Transportation regulatory policies and procedures. This final rule implements the agency's policy of ensuring that all insurance companies that are statutorily eligible for exemption from the insurer reporting requirements are in fact exempted from those requirements. On the other hand, those companies that are not statutorily eligible for an exemption are expressly required to file reports.

NHTSA does not believe that this rule, reflecting more current A.M. Best data, affects the impacts described in the final regulatory evaluation prepared for 49 CFR part 544. Accordingly, a separate regulatory evaluation has not been prepared for this rulemaking action. Using the cost estimates in the final regulatory evaluation for part 544, the agency estimates that it will cost any company that is added to Appendix B about $20,000. Therefore, the net total impact of these changes is estimated to be a cost increase of approximately $20,000 for insurance companies. This is well below the threshold of $100 million for classifying a rulemaking action as "major" under the Executive Order.

As noted above, a full regulatory evaluation was prepared for the final rule establishing 49 CFR part 544. Interested persons may wish to examine that evaluation in connection with this rule. Copies of that evaluation have been placed in Docket No. T86-01; Notice 2. Any interested person may obtain a copy of this evaluation by writing to NHTSA, Docket Section, Room 5109, 400 Seventh Street, SW., Washington, DC 20590, or by calling at (202) 366-4949.

2. Paperwork Reduction Act

The information collection requirements in this rule have been submitted to and approved by the Office of Management and Budget (OMB) pursuant to the requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). These requirements have been approved through July 31, 1990 (OMB approval number 2127-0547).

3. Regulatory Flexibility Act

The agency has also considered the effects of this rulemaking under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Section 612(a)(5)(C) defines "small insurer" in part as any insurer whose premiums for motor vehicle insurance account for less than one percent of the total premiums for all forms of motor vehicle insurance issued by insurers within the United States, or any insurer whose premiums within any State, account for less than 10 percent of the total premiums for all forms of motor vehicle insurance issued by insurers within the State. None of the 28 companies listed in Appendices A or B is a self-insured motor vehicle rental or leasing company and all these companies exceed the "small insurer" standards outlined in section 612(a)(5)(C). Therefore, I certify that the final rule will not have a significant economic impact on a substantial number of small entities.

4. Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

5. Environmental Impacts

In accordance with the National Environmental Policy Act, NHTSA has considered the environmental impacts of this rule and determined that it will not have a significant impact on the quality of the human environment.

List of Subjects in 49 CFR Part 544

Crime insurance, insurance, insurance companies, motor vehicles, reporting and recordkeeping requirements.

In consideration of the foregoing, 49 CFR part 544 is amended as follows:

PART 544—[AMENDED]

1. The authority citation for part 544 would continue to read as follows:

Authority: 15 U.S.C. 2032; delegation of authority at 49 CFR 1.50.

2. Appendix A to part 544 is revised to read as follows:

Appendix A—Issuers of Motor Vehicle Insurance Policies Subject to the Reporting Requirements in Each State in Which They Do Business

State Farm Group
Allstate Insurance Group
Farmers Insurance Group
Nationwide Group
Aetna Life & Casualty Group
Liberty Mutual Group
Travelers Insurance Group
Hartford Insurance Group
USAA Group
United States F & G Group
Geico Corporation Group
American International Group
CIGNA Group
Continental Group
Fireman's Fund Group
CNA Insurance Companies
California State Auto Association
American Family Group
Progressive Group
Crum & Forster Companies

3. Appendix B to part 544 is revised to read as follows:

Appendix B—Issuers of Motor Vehicle Insurance Policies Subject to the Reporting Requirements Only in Designated States

Alfa Insurance Group (Alabama)
Island Insurance Group (Hawaii)
Kentucky Farm Bureau Group (Kentucky)
Commercial Union Assurance Group (Maine)
Auto Club of Michigan Group (Michigan)
Southern Farm Bureau Group (Mississippi)
Amica Mutual Insurance Company (Rhode Island)
Concord Group Insurance Company (Vermont)

Issue date: October 27, 1989.

RIN: 2127-AC85

Motor Vehicle Safety Standards; Vehicle Identification Number; Basic Requirements

AGENCY: National Highway Traffic Safety Administration (NHTSA), (DOT).

ACTION: Final rule.

SUMMARY: In this final rule, NHTSA changes vehicle identification number and certification requirements for motor vehicles that were not originally manufactured for sale in this country, do not comply with the Federal motor vehicle safety standards, and are imported into the United States by businesses unaffiliated with the original manufacturer. This final rule would make it clear that the importer of such vehicles would be required to use one of the unique coding identifiers that the original manufacturer assigned to the vehicle, in lieu of using the 17-character U.S. vehicle identification number (VIN) required to be placed on vehicles originally manufactured for sale in this country. The direct importer must place the original manufacturer's identifier on a plate that would appear inside the passenger compartment of the motor vehicle, so that the number may be observed through the glazing, and adjacent to the left windshield pillar.

EFFECTIVE DATE: The changes made in this rule become effective December 4, 1989 for vehicles imported after that date.

FOR FURTHER INFORMATION CONTACT: Mr. Kenneth Rutland, Crash Avoidance Division, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. Mr. Rutland's telephone number is (202) 366-5267.

SUPPLEMENTARY INFORMATION:

Background

Under section 108(b)(3) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1397(b)(3)), a vehicle that does not conform with applicable safety standards may nonetheless enter the United States under "such terms and conditions" as the Secretaries of Transportation and Treasury prescribe. Title 19 CFR 12.80 is a joint Transportation/Treasury regulation setting forth those terms and conditions. Subparagraph (b)(1)(iii) of that regulation requires that a person seeking to bring a nonconforming import (direct import vehicle) into the United States file a declaration that the vehicle

VOL 54 ISS 211 NOV 2 1989 UMI

will be modified so as to conform with applicable Federal Motor Vehicle Safety Standards. Among those Standards is 115, *Vehicle Identification Number—Basic Requirements.*

In order to comply with Standard 115 requirements, many direct importers have been applying a "homemade" VIN plate to their imported vehicles. The VINs added by direct importers are so different in appearance from VINs on similar vehicles manufactured for sale in the United States that law enforcement officials have mistaken them for altered VINs. Other concerns presented by these "homemade" VIN plates are identification problems that have been created for insurance investigators and encoding errors that compromise the integrity of the VIN system.

This rulemaking arose when the agency granted a petition submitted by the National Automobile Theft Bureau (NATB or petitioner) to amend Standard 115 to address problems arising when direct importers create a VIN and a VIN plate using an identification number and plate production process other than the ones which the original vehicle manufacturer uses. Among problems noted by the NATB were an increased prospect of encoding errors in a homemade VIN, law enforcement officials mistaking homemade VIN plates for altered plates, and the resulting risk that individuals lawfully possessing direct import vehicles may be subjected to criminal charges.

The petitioner recommended that NHTSA take action to prevent the direct importer from creating its own VIN. In place of its own VIN, the importer would be required to follow one of two alternative means of identifying a vehicle. First, if the original manufacturer had placed any kind of identification number plate in the passenger compartment where Standard 115 would otherwise require a 17-character VIN plate, the importer would retain the original manufacturer's plate as the vehicle's VIN plate. Among the original-manufacturer identification numbers that one might use in place of the United States VIN are the European vehicle identification number (EuroVIN), the World Market vehicle identification number (WorldVIN), the chassis number, or the vehicle serial number. Second, if the original manufacturer had not affixed a plate of the type and in the location described at S4.6 of Standard 115 (49 CFR 571.115), then the importer would be required to affix a plate in that location stating that the vehicle is "partially exempt" from Standard 115. This plate would refer a person to the driver's door post, where the importer would be required to affix a label with information that cited the joint Transportation/Treasury regulation under which a person directly imports a noncomplying vehicle, identified the location on the vehicle of the original manufacturer's number to be used in lieu of the 17 character VIN, gave the name and address of those bringing the vehicle into compliance with Standard 115, stated the date of importation and of certification, and gave the name and address of the person who made the certification.

Notice of Proposed Rulemaking

In the notice of proposed rulemaking (NPRM) published May 13, 1988 (53 Federal Register 17088), the agency acknowledged the problems with VINS on direct import vehicles and proposed to amend Standard 115 so that a direct importer need not create a VIN or VIN plate in order to comply with United States vehicle identification requirements under Standard 115. NHTSA could not agree that any extant original manufacturer identifier in the S4.6 location would obviate the need for some notice that the vehicle is partially exempt from Standard 115.

The agency believed it would be a relatively simple matter to affix a plate informing an interested person that a vehicle is partially exempt, and refer the person to another label on the door post that would specify the unique identifying number for the vehicle. The agency therefore proposed to require such a plate on any vehicle that did not have the 17-character United States VIN. Because of this proposed approach, the agency believed it was unnecessary to consider NATB's suggestion that a EuroVIN, WorldVIN, chassis, or serial number be exempted from the readability and location requirements in S4.6.

A second way in which NHTSA's proposal varied from the NATB petition was that the agency did not propose to require a lengthy label with a citation to 19 CFR 12.80, and information about the person performing work to bring the vehicle into compliance with Standard 115. The agency proposed instead to require a simplified label that stated where an interested person could find the unique manufacturer identifying number that would be used in lieu of the United States VIN. Further, for consistency, the agency proposed to include labeling requirements under Part 567. It was proposed that paragraph (k) of section 567.4 be deleted and that sections 567.5, 567.6 and 567.7 be redesignated as sections 567.6, 567.7, and 567.8, respectively. Under a new section 567.5 (for the most part former section 567.4(k)), the language regarding labeling requirements for high theft lines imported into the United States would be retained, with minor changes, as section 567.5(a). The proposed section 567.5(b) outlined a requirement for a label for direct import vehicles that would be affixed in one of three locations. This label would state: "Original Manufacturer's Identification Number Substituting for U.S. VIN is located," and direct the reader to the location on the vehicle where the original manufacturer's identification number, placed by the original manufacturer, could be found.

NHTSA also sought comment, particularly from law enforcement officials, on two issues:

(1) Whether the proposed changes could, in some circumstances, increase the fraudulent use of VINs or impede law enforcement actions. As an example, the agency noted that in certain circumstances, vehicles with the proposed FMVSS 115 exemption label would no longer have a VIN visible through the glazing. NHTSA requested comment on whether this situation would create a law enforcement problem by precluding the inspection of VINs on parked and locked vehicles.

(2) Whether the proposal could lead to improper use of VIN exemption plates (e.g., replacing a legitimate VIN), since, under certain circumstances, it would allow an exemption plate where the VIN would be if it had been a passenger car built for the U.S. market.

The Comments and the Agency Response

The agency received eight responses to the NPRM. Four commenters addressed the first question presented in the NPRM, concerning using an exemption plate in lieu of a VIN or other identification number in the S4.6 location. The Automobile Importers of America, Inc. (AIA), Porsche, the International Association of Auto Theft Investigators (IAATI), and the National Automotive Theft Bureau (NATB) recommended that NHTSA require each vehicle to have an identification number visible from the outside of the vehicle. In response to these comments, the agency has adopted a requirement for a plate or label containing the original manufacturer's identification number in the S4.6 location, with a reference to Standard 115.

The agency believes that this solution addresses the agency's initial concern about the possibility of transcription errors while at the same time maintaining an identification number in the place where law enforcement officials are accustomed to see it. In cases where the original manufacturer's identification number is in the S4.6 location and does not conform to part 565, the presence of the identifying notice alongside it will serve to inform law enforcement personnel that the vehicle is a direct import vehicle that has been modified to conform to U.S. safety standards. Any transcription errors would be immediately evident, since the number on the identifying notice should be identical to the original number alongside it. Where the original manufacturer's identification is located elsewhere, the identifying notice will provide the number and also alert an investigating officer that the number is a substitute for the number ordinarily required by FMVSS 115.

Further investigation by the agency has not found any evidence indicating that direct importers have been using a 17-character VIN that they have created themselves; conformity bonds are not released if they do. However, they do create another plate using the original manufacturer's identification number that they install behind the windshield, in the S4.6 location. In the interest of clarity and to the extent direct imports have been a problem to theft investigators and other interested parties, the requirement is being amended. Also, in the NPRM, the notice in the S4.6 location was proposed to read: "FMVSS 115 EXEMPT VEHICLE. SEE DRIVER'S SIDE DOOR POST." After reevaluation, the agency has determined that the wording "FMVSS 115 EXEMPT VEHICLE" may imply that direct importers are being exempted from all aspects of FMVSS 115. It is more accurate to state that the original manufacturer's identification number is used as a substitute for a VIN, required by FMVSS 115.

The following language will therefore be required in the final rule:

SUBSTITUTE FOR U.S. VIN: _____.

SEE FMVSS 115.

With this alternative, law enforcement officials would also know that the passenger car in question does not have a U.S. VIN.

The second question raised in the NPRM, whether the proposal would lead to improper use of VIN exemption plates, was addressed by one commenter. The NATB expressed a belief that it would be very important to prevent any VIN exemption plate from being overlaid on the original manufacturer's identifier in the S4.6 position. NATB commented: "Unless there is a specific anti-overlayment provision included in FMVSS 115 it is a virtual certainty that organized theft perpetrators will take advantage of the situation and affix the VIN exemption notice over the location of the legitimate VIN plate." NATB suggested that the notice be required to be affixed in a location other than the location used by the vehicle's original manufacturer for affixing VIN plates in the same or similar vehicle lines. The agency agrees, and has accordingly adopted the following language in the final rule as paragraph S4.9(c) to ensure the original manufacturer's identification number will not be covered, obscured, or overlaid:

(c) The plate or label required by (b) shall be permanently affixed in a location that conforms to S4.6, in such manner as not to cover, obscure, or overlay any part of any identification number affixed by the original manufacturer, and shall conform to S4.7 and S4.8.

Two commenters expressed concern about the lack of a check digit in the original manufacturer's identification number. Besides noting that lack of a check digit could be a problem, AIA cited errors in transcription which are not caught despite a check digit system, resulting in vehicles with incorrect VINs. AIA suggested that the solution to this problem is to ensure that all entries are transcribed correctly, and that all other regulations are complied with.

In noting that original manufacturer's identification numbers from various makes would not have the benefit of a check digit, Porsche asserted that "[t]his lack of a check-digit negates another of the prime features of the current VIN—the ability to rapidly check for transcription mistakes." Although the agency believes that a check-digit is useful in preventing transcription errors, it regards the risk of error from "home made" VINs as significantly greater. It has therefore concluded that the original manufacturer's identification number should be retained by the direct importer.

Besides the comments summarized above, AIA pointed out to the agency that there is no concept of "model year" in Europe. AIA believed that for this reason, "gray market importers cannot possibly discern a model year to put on the label." NHTSA has accepted this comment from AIA. Accordingly, § 567.4(k)(4)(i) has been amended to read: "Model year (if applicable) or year of manufacture, and line of the vehicle as reported by the manufacturer that produced or assembled the vehicle." Also included is a statement that " 'Model year' is used as defined in § 565.3(h) of this chapter."

IAATI also recommended a separate label that would provide information on the person who performed the work bringing the vehicle into compliance with Standard 115. The rationale for this recommendation is that it would give an investigator a starting point to trace the vehicle through the person performing the compliance work and back to the original manufacturer. The agency believes it is already requiring enough information, on as many as three labels at the door post or alternate positions, without requiring this information also. In the few instances where law enforcement officers or other investigators need this information, they would obtain information about who did the compliance work by contacting the direct importer or NHTSA.

In addition to the comments recommending specific changes in the final rule, the agency also received several comments from Allstate Insurance Company and the Highway Loss Data Institute in general support of the rulemaking. The National Automobile Dealers Association supported the NHTSA proposal and urged NHTSA "to consider the need to readily and clearly identify these vehicles as being direct imports." They believed that the proposed amendments to the VIN standards would "serve to establish a nationally recognized gray market identifier on each vehicle."

Volkswagen of America, Inc. encouraged NHTSA to "promote enforcement of the safety standards for all vehicles regardless of who the manufacturer or importer may be." They noted that although the proposal would eliminate encoding errors in "homemade" VINs, the same result could be had by enforcement of the existing regulation requiring display of the correct VIN on all vehicles.

The agency is aware that this rule will be more effectual for original manufacturer identifiers utilizing Roman letters or Arabic numerals than for manufacturer identifiers which may be used in countries with non-Roman letters. If the use of non-Roman letters becomes a source of confusion, the agency may undertake further remedial action.

Other Changes in the Final Rule

Redesignation of Sections in Part 567

The NPRM proposed that § 567.4(k) be dropped, that §§ 567.5, 567.6, and 567.7 be redesignated as §§ 567.6, 567.7, and 567.8, respectively, and that a new § 567.5 *Special requirements for motor vehicles admitted under 19 CFR 12.80* be added. Upon reevaluation, the agency has decided that rather than redesignating existing provisions in part

567, and adding new sections with whole paragraphs that are identical to old paragraphs, the same end would be accomplished more simply by adding a new § 567.4(1) (that would require identification on the vehicle of the original manufacturer's number) after § 567.4(k). This new § 567.4(1) is the same in substance as § 567.5(b) in the notice of proposed rulemaking.

High Theft Lines

49 CFR Part 541 requires that 14 major parts of designated passenger motor vehicle lines be marked with Vehicle Identification Numbers, even if the vehicle was not originally manufactured for the U.S. market. FMVSS 115 does not exempt importers of vehicles not manufactured for sale in the U.S. from complying with the parts-marking requirements of 49 CFR Part 541 for the car lines listed in Appendix A to Part 541. As a result of the agency's decision to require retention of the original manufacturer's VIN, the fourteen designated major parts (§ 541.5(a)) must be marked with the original VIN assigned to the car by its original manufacturer. The subject vehicle *must* be in compliance with the theft prevention standard before it is imported into the United States. The markings must be affixed or inscribed in accordance with the target area requirements designated by the manufacturer that is the original producer who installs or assembles the covered major parts on a line.

Section 567.5(k) applies to direct import high theft lines. § 567.5(1) refers to direct import vehicles without 17-character U.S. VINs. Therefore, if there should be high theft lines that are brought to the U.S. by direct importers, they would have to have three labels in the positions in the passenger car designated in § 567.4(c), namely, the certification label required by § 567.4(a), the compliance with Federal motor vehicle theft prevention standard label required by § 567.4(k), and the label designating where the original manufacturer's identification number may be found, as required by § 567.4(1).

Impact Assessments

A. Executive Order 12291

NHTSA has considered costs and other factors associated with this rule, and concludes that this rule is non-major under Executive Order 12291. The agency expects this rule to affect a small segment of the automotive community: those who import nonconforming vehicles into the United States under a promise to bring them into compliance. NHTSA estimates that there will be fewer than 3000 vehicles imported per year that will be subject to this rule.

The amendment requires a plate or label on the dash in lieu of the 17-character VIN plate the Standard previously required, and a statement informing an interested person where to look for the original manufacturer's unique identifying number that is used in place of the 17 character United States VIN. NHTSA estimates that the per vehicle cost of implementing this amendment will not be significant, i.e., the amount expended by importers for the labels designating where the original manufacturer's identification number may be found, as required by § 567.4(1).

The rule therefore would not have an annual effect on the economy of $100 million; would not result in a major increase either in motor vehicle production costs or prices; and would not have significant adverse impacts on competition or market incentives.

B. Department of Transportation Procedures for Improving Government Regulations

For the reasons set out in the preceding discussion, the agency has determined that this rule is not significant under DOT procedures. Further, the costs associated with this final rule, would be so minimal that preparation of a full regulatory evaluation is unwarranted.

C. Small Business Impact

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires agencies to evaluate the potential effects of their proposed and final rules on small businesses, small organizations, and small governmental jurisdictions. A substantial number of direct importers are individuals importing cars for their own use. There are small entities in the direct import business. However, NHTSA finds that when this rule goes into effect, it will not create a new net cost increase since under existing regulations, importers must create a plate with a vehicle identification number. Therefore, the final rule should not result in other than nominal costs either to small direct import businesses, or to small entities that may purchase vehicles from any such business. For the preceding reasons, I certify that this final rule will not have a significant economic impact on a substantial number of small entities.

D. Environmental Impact

Under the National Environmental Policy Act of 1969, NHTSA has considered the environmental impact of this final rule, and has determined that this final rule would not be a major Federal action significantly affecting the quality of the human environment.

E. Executive Order 12612

The agency has analyzed this action under the principles and criteria of Executive Order 12612, and has determined that this rule does not have sufficient Federalism implications to warrant preparing a Federalism Assessment.

F. Paperwork Reduction Act

The information collection requirements in this rule have been submitted to and approved by the Office of Management and Budget (OMB), pursuant to the requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). The OMB control number is 2127–0510, and the information collection authority has been approved through November 30, 1991.

List of Subjects

49 CFR Part 567

Labeling, Motor vehicle safety, Reporting and recordkeeping requirements.

49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, title 49 CFR part 567, *Certification,* and 49 CFR part 571, *Federal Motor Vehicle Safety Standards,* are amended as follows:

PART 567—[AMENDED]

1. The authority citation for part 567 is revised to read as follows:

Authority: 15 U.S.C. 1392, 1397, 1401, 1403, and 1407; 15 U.S.C. 1912 and 1915; 15 U.S.C. 2021, 2022, and 2026; delegation of authority at 49 CFR 1.50.

2. Paragraph (k)(4)(i) of § 567.4 is revised to read as follows:

§ 567.4 [Amended]

* * * * *

(k) * * *

(4) * * *

(i) Model year (if applicable) or year of manufacture and line of the vehicle, as reported by the manufacturer that produced or assembled the vehicle. "Model year" is used as defined in § 565.3(h) of this chapter. "Line" is used as defined in § 541.4 of this chapter.

* * * * *

3. A new paragraph (l) is added to § 567.4 as follows:

* * * * *

(l)(1) In the case of a passenger car imported into the United States under 19 CFR 12.80(b)(1)(iii) or 49 CFR part 591 which does not have an identification number that complies with paragraph S4.2, S4.3, and S4.7 of 49 CFR 571.115 at the time of importation, the importer shall permanently affix a label to the vehicle in such a manner that, unless the label is riveted, it cannot be removed without being destroyed or defaced. The label shall be in addition to the label required by paragraph (a) of this section, and shall be affixed to the vehicle in a location specified in paragraph (c) of this section.

(2) The label shall contain the following statement, in the English language, lettered in block capitals and numerals not less than three thirty-seconds of an inch high, with the location on the vehicle of the original manufacturer's identification number provided in the blank: ORIGINAL MANUFACTURER'S IDENTIFICATION NUMBER SUBSTITUTING FOR U.S. VIN IS LOCATED _____.

PART 571—[AMENDED]

4. The authority citation for part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.115 [Amended]

5. S.2 is amended by adding the words "or 49 CFR 591" after the words "19 CFR 12.80(b)(1)(iii)."

6. A new paragraph S4.9 is added to § 571.115 to read as follows:

* * * * *

S4.9(a) A passenger car imported into the United States under 19 CFR 12.80(b)(1)(iii) or 49 CFR part 591 shall retain any identification number affixed by the original manufacturer.

(b) A vehicle described in paragraph (a) of this section shall have a plate or label that contains the following statement in characters with a minimum height of 4 mm, with the identification number assigned by the original manufacturer provided in the blank: SUBSTITUTE FOR U.S. VIN: _____. SEE FMVSS 115.

(c) The plate or label required by paragraph (b) of this section shall be permanently affixed in a location that conforms to S4.6, in such manner as not to cover, obscure, or overlay any part of any identification number affixed by the original manufacturer, and shall conform to S4.7 and S4.8.

Issued on: October 26, 1989.

Barry Felrice,

Associate Administrator for Rulemaking.

49 CFR Part 571

[Docket No. 87-09; Notice 5]

RIN 2127-AD12

Federal Motor Vehicle Safety Standards; Occupant Crash Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes a new requirement for lap/shoulder safety belts to be installed in all forward-facing rear outboard seating positions in convertible passenger cars, light trucks and multipurpose passenger vehicles (e.g., passenger vans and utility vehicles), and small buses. Rear-seat lap/shoulder belts are estimated to be even more effective than rear-seat lap-only belts in reducing fatalities and moderate-to-severe injuries. As safety belt use in the rear seat of these vehicle types increases, the greater effectiveness of rear-seat lap/shoulder belts should yield progressively greater safety benefits. NHTSA also anticipates that this rule will achieve benefits by helping to increase safety belt use in rear seating positions of these vehicle types, by providing rear-seat occupants with maximum safety protection when they buckle up.

This rule also establishes a requirement for lap/shoulder belts to be installed at the driver's seat and at any other front outboard seating position in small buses. NHTSA believes that lap/shoulder safety belts in these small buses will offer the same benefits as lap/shoulder belts in those positions offer to occupants of passenger cars, light trucks, and light multipurpose passenger vehicles.

DATES: The amendments of S7.1.1.3 and S7.1.1.5 are effective on September 1, 1991. All the other amendments made by this rule take effect on May 1, 1990. These requirements apply to convertible passenger cars, light trucks, light multipurpose passenger vehicles, and small buses manufactured on or after September 1, 1991. Convertible passenger cars, light trucks, light multipurpose passenger vehicles, and small buses manufactured before September 1, 1991 may also comply with these requirements.

Any petitions for reconsideration of this rule must be received by NHTSA no later than December 4, 1989.

ADDRESS: Any petitions for reconsideration should refer to Docket No 87-09; Notice 5 and be submitted to: Administrator, NHTSA, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Dr. Richard Strombotne, Chief, Crashworthiness Division, NRM-12, Room 5320, NHTSA, 400 Seventh Street, SW., Washington, DC 20590 (202-366-2264).

SUPPLEMENTARY INFORMATION:

Background

On January 1, 1968, the initial Federal Motor Vehicle Safety Standards took effect. One of those standards was Standard No. 208, Occupant Crash Protection (49 CFR 571.208), which required the installation of lap/shoulder safety belts at the driver's and right front passenger's seating positions of passenger cars, and either lap-only or lap/shoulder safety belts at every other designated seating position. Another of the initial safety standards that took effect on January 1, 1968 was Standard No. 210, Seat Belt Assembly Anchorages (49 CFR 571.210), which specified location and strength requirements for the anchorages used to hold the safety belts to the passenger car during a crash. Standard No. 210 required passenger car manufacturers to provide anchorages for lap/shoulder belts for each forward-facing front and rear outboard seating position in all cars other than convertibles. NHTSA subsequently amended both of these standards to extend their applicability to trucks, multipurpose passenger vehicles (MPVs), and buses. However, when Standard No. 210 was extended to these additional vehicle types, NHTSA did not require the manufacturers to provide upper torso (i.e., shoulder belt) anchorages for rear outboard seating positions in these other vehicle types or in convertible passenger cars.

Studies of occupant protection from 1968 forward show that the lap-only safety belts installed in rear seating positions are effective in reducing the risk of death and injury. See, for example, the studies cited in the ANPRM on this subject; 52 FR 22820, June 16, 1987. However, the agency believes that rear-seat lap/shoulder safety belts would be even more effective. NHTSA estimates that rear-seat lap-only belts reduce the risk of death by 24–40 percent, while rear seat lap/shoulder belts reduce that risk by 32–50 percent. The somewhat greater effectiveness of lap/shoulder belts vs. lap-only belts in the rear seat results in progressively greater actual safety benefits for rear-seat occupants, to the extent that those safety belts are, in fact, used. As recently as 1981–82, only two percent of rear-seat occupants used their safety belts. At that level of belt use, there are very few safety benefits from

VOL

NO
2
1989
UMI

requiring rear-seat lap/shoulder belts instead of lap-only belts. However, belt use in the rear seat has steadily risen, with 16 percent of rear seat occupants buckling up in 1987. As rear-seat belt use continues to rise, the incremental benefits of rear-seat lap/shoulder belts can be realized.

The increase in belt use in rear seats was one of the factors reflected in the agency's decision to grant a petition by the Los Angeles Area Child Passenger Safety Association asking NHTSA to establish a requirement for rear-seat lap/shoulder safety belts. After granting this petition, NHTSA published an advance notice of proposed rulemaking (ANPRM) on June 16, 1987 (52 FR 22818). Thirty-four commenters responded to the ANPRM's request for comments on the need for rulemaking action to require lap/shoulder safety belts in rear seating positions.

After considering these comments, NHTSA concluded that several factors had changed since the agency had previously examined this issue and determined that it was appropriate to give vehicle manufacturers the option of installing either lap-only belts or lap/shoulder belts in rear seats. Among the changed factors were the substantial increase in rear seat safety belt use and the substantial decrease in costs of a requirement for rear-seat lap/shoulder belts, because of manufacturers voluntarily equipping more and more of their vehicles with rear seat lap/shoulder belts. After analyzing the effects of these changed factors and the comments on the ANPRM, NHTSA tentatively determined that a requirement for lap/shoulder belts would now be appropriate. Accordingly, NHTSA published a notice of proposed rulemaking (NPRM) on November 29, 1988 (53 FR 47982).

This NPRM was a comprehensive proposal that proposed requirements for passenger cars and light trucks, MPVs, and small buses to be equipped with lap/shoulder safety belts at all forward-facing rear outboard seating positions. Additionally, the NPRM proposed that these lap/shoulder safety belts be equipped with a particular type of retractor, that such belts be integral (i.e., the shoulder belt could not be detachable from the lap belt), and that such belts comply with some of the comfort and convenience requirements specified in section S7.4 of Standard No. 208.

More than 70 comments were received on this NPRM. The issue of whether passenger cars other than convertibles should be equipped with rear seat lap/shoulder belts was straightforward and noncontroversial, with only two commenters suggesting some modifications of the agency's proposal to require all 1990 and subsequent model year passenger cars to be equipped with rear seat lap/shoulder belts. To ensure the earliest possible implementation of a requirement for rear-seat lap/shoulder belts in passenger cars, on June 14, 1989, NHTSA published a final rule addressing only those vehicles (54 FR 25275). That rule requires rear-seat lap/shoulder belts in all passenger cars manufactured on or after December 11, 1989.

This rule addresses all of the other issues that were presented in the November, 1988 NPRM on this topic. For the convenience of the reader, this rule uses the same organization and format as the NPRM did.

Requirements of this Rule

1. Seating Positions Subject to These Requirements

The NPRM proposed that lap/shoulder belts be required in rear seats at outboard seating positions only. Some commenters suggested that technologies and designs are available to provide lap/shoulder belts at rear center seating positions, and that NHTSA should further examine this issue. The agency explained in the NPRM that there are more technical difficulties associated with any requirement for lap/shoulder belts at center rear seating positions, and that lap/shoulder belts at center rear seating positions would yield small safety benefits and substantially greater costs, given the lower center seat occupancy rate and the more difficult engineering task. Accordingly, this rulemaking excluded further consideration of a requirement for center rear seating positions. None of the commenters presented any new data that would cause the agency to change its tentative conclusion on this subject that was announced in the NPRM.

The NPRM also noted that seating positions adjacent to aisleways in some vans might not be "outboard designated seating positions" as defined at 49 CFR 571.3, because those aisle seats could be more than 12 inches from the inside of the vehicle. General Motors (GM) stated its belief that this discussion showed the agency's intent to exclude seats that border aisleways from the lap/shoulder belt requirement. GM suggested that the reasons for excluding these seating positions from the lap/shoulder belt requirement were the costs and/or practical difficulties that would be presented if aisleway seating positions were required to be equipped with lap/shoulder belts. Specifically, GM stated that locating the anchorage for the upper end of the shoulder belt on the aisle side of the vehicle would stretch the shoulder belt across the aisleway and cause entry and exit problems for occupants of seating positions to the rear of the aisleway seating position. To avoid such difficulties, the anchorage for the upper end of the shoulder belt could be moved to the roof of the vehicle. However, roof structural modifications would have to be made to accommodate the anchorage, and these modifications would impose disproportionately high costs. GM stated in its comments that these reasons would apply with equal force to all seats adjacent to aisleways, regardless of whether such seats were more than or less than 12 inches from the inside of the vehicle.

NHTSA has determined that these comments have merit. The agency did not mean to suggest that shoulder belts should be required at seating positions where they would obstruct an aisle designed to give access to rear seating positions. Accordingly, this rule has been modified from the proposal to specify that these rear-seat lap/shoulder belt requirements apply to rear outboard seating positions except any outboard seating positions that are adjacent to a walkway located between the seat and the side of the vehicle to allow access to more rearward seating positions. Of course, in those cases where manufacturers are able to design and install lap/shoulder belts at seating positions adjacent to aisleways without interfering with the aisleway's purpose of allowing access to more rearward seating positions. NHTSA encourages the manufacturers to do so. It should also be noted that those rear seating positions at which lap/shoulder belts are not installed voluntarily or in response to a regulatory requirement are required by Standard No. 208 to be equipped with lap-only safety belts, which have been proven effective in reducing the risk of death and injury.

2. Types of Rear Seats Subject to These Requirements

The NPRM proposed limiting these requirements to forward-facing rear outboard seats, because the agency is unaware of any data showing that occupants of center-facing or rear-facing seating positions would be significantly better protected by lap/shoulder belts than by lap-only belts. The NPRM also referred to an April 8, 1988 letter to Mr. Ohdaira of Isuzu Motors, in which NHTSA stated that S7.1.1 of Standard No. 208 requires safety belts on swivel seats installed at front outboard seating positions to adjust to fit occupants "with the seat in any position." Because the same regulatory language would apply to swivel seats installed at rear outboard seating positions if the proposal were adopted as a final rule, the NPRM proposed to add express regulatory language to S7.1.1 to codify the interpretation.

Three commenters responded to this discussion in the NPRM. Ford, Nissan, and Toyota raised substantially the same points in their comments. These commenters all suggested that the agency ought to require swivel seats to provide lap/shoulder belts for occupants when the seats are forward-facing, but permit occupants to be restrained by lap-only belts when the swivel seats are adjusted to some position other than forward-facing. These manufacturers argued that the overall protection of upper torso restraints (i.e., shoulder belts) on occupants of center-facing seating positions is unclear. For example, in certain instances, the design standard in Australia prohibits manufacturers from providing upper torso restraints at center-facing seating positions. Further, these manufacturers stated that they knew of no crash data suggesting the need for such a requirement. According to these commenters, the absence of demonstrable safety benefits associated with such a requirement combined with the demonstrable technological problems and costs associated with such a requirement should lead the agency to require only lap belts when swivel seats are adjusted to a position other than forward-facing.

NHTSA was persuaded by these comments. Indeed, as Ford noted in its comments, just as the NPRM stated that no data show that occupants of center-facing or rear-facing seats would be significantly better protected by lap/shoulder belts instead of lap-only belts, no data show that occupants of swivel seats adjusted to the center-facing or rear-facing positions would be significantly better protected by lap/shoulder belts instead of lap-only belts. Accordingly, this final rule adds language to Standard No. 208 that requires swivel seats to provide lap/shoulder belts for occupants when the seat is adjusted to the forward-facing position and permits swivel seats to provide lap-only belts for occupants when the seat is adjusted to some position other than forward-facing. The Ohdaira interpretation is, therefore, overruled to the extent that it is inconsistent with this new language in Standard No. 208.

In its comments, Ford indicated that it would be appropriate for this preamble to discuss a type of seat Ford is considering installing in future vehicle models. This seat was described as a bench seat that converts from forward-facing to rear-facing. Under the language added to Standard No. 208 by this rule, all seats that can be adjusted to a forward-facing position and some other position, regardless of whether such seats are swivel seats, convertible seats of the sort described in Ford's comment, or any other such seat, must provide lap/shoulder belts when in the forward-facing position and may provide lap-only belts when adjusted to some position other than forward-facing.

3. Vehicle Types Subject to These Requirements

a. Passenger Cars

In the NPRM, the agency proposed to make the requirement for rear seat lap/shoulder belts apply to all passenger cars, including convertibles. As previously discussed, the requirements for passenger cars other than convertibles were published in a June 14, 1989 final rule (54 FR 25275). The NPRM proposed that rear seat lap/shoulder belts be required on convertible passenger cars manufactured on or after September 1, 1991.

In its comments, Volkswagen asked for an additional year of leadtime, until September 1, 1992, before rear seat lap/shoulder belts must be installed in convertible passenger cars. According to this commenter, the convertible version of its Golf model (the Cabriolet) is not currently equipped with rear seat lap/shoulder belts, was not originally designed to accommodate such belts, and will need substantial modifications to its current design if the car is to accommodate such belts.

No change has been made in response to this comment. The NPRM noted that it was more difficult to install rear seat lap/shoulder belts in convertibles than in other passenger cars, but that, in spite of these difficulties, at least three different manufacturers had rear-seat lap/shoulder belts in their 1988 model year convertibles. Accordingly, the agency proposed to require convertible passenger cars to be equipped with rear seat lap/shoulder belts, but to allow two years more leadtime than was proposed for other passenger cars, in recognition of the greater technical difficulties. Volkswagen's comment appears to be that more than two years of additional leadtime is needed to overcome the greater technical difficulties associated with convertibles, although the comment does not include any explanation or analysis of why this is so. A manufacturer's unsubstantiated desire for additional leadtime is not a sufficient basis for the agency to postpone the proposed September 1, 1991 effective date for rear seat lap/shoulder belts in convertibles. Therefore, this rule adopts the proposed requirement.

b. Light Multipurpose Passenger Vehicles

This vehicle type consists primarily of passenger vans with a seating capacity of 10 persons or less and utility vehicles and other off-road vehicles. None of the commenters suggested any particular problems that a requirement for rear-seat lap/shoulder belts would impose on MPVs in general. Toyota repeated its position that the voluntary installation of rear-seat lap/shoulder belts by manufacturers in all vehicle types made it unnecessary for NHTSA to proceed with this rulemaking. NHTSA responded at length to similar comments by the vehicle manufacturers in the preamble to the NPRM; *see* 53 FR 47984.

Ford did not object to the proposed general requirement for rear-seat lap/shoulder belts in light MPVs, but asked that open-body type MPVs be excluded from the requirement. Ford explained its comment by stating that its Bronco II utility vehicle has a removable roof over the rear passenger and cargo area. According to Ford's comments, "Because the removable roof on this vehicle extends below the shoulder reference point, it would be impossible to obtain a good shoulder belt fit if the shoulder belt anchorages were to be located on the non-removable side panels of the vehicle." For these reasons, Ford suggested that open-body type MPVs be exempted from these requirements or that the proposed requirements be revised to make clear that rear-seat lap/shoulder belts are not required in open-body type MPVs when the roof is removed.

NHTSA agrees with Ford's assertions that open-body type MPVs present greater technical difficulties for the installation of rear seat lap/shoulder belts than other MPVs or convertible passenger cars. For example, the rear seats are closer to the rear of the vehicle and the rear seats are higher in relation to the vehicle floor and sides in most open body type MPVs than in most convertible passenger cars. The agency concurs with Ford's assertion that these factors tend to make the shoulder belt geometry more difficult in open-body type MPVs. However, the agency does not believe that these factors present insurmountable engineering difficulties. Instead, NHTSA believes that these problems can be solved in a relatively

VOL
54
ISS
2
1
1
NO
2
1989
UMI

straightforward manner. While manufacturers cannot use the exact same designs used for convertible passenger cars on open-body type MPVs, the convertible passenger car designs can be modified for use in open-body type MPVs. NHTSA concludes that if it is practicable to offer the increased protection of shoulder belts at rear outboard seating positions, and the added costs are comparable to the costs for other MPVs and convertible passenger cars, there is no reason to exclude open-body type MPVs from the requirement for rear seat lap/shoulder belts in MPVs. Hence, no change has been made to the proposed requirements for MPVs in response to this comment by Ford.

The agency notes that this means that lap/shoulder belts will be required in the rear outboard seats of open-body type MPVs, while lap-only belts will be permitted in front outboard seats of those vehicles. (In practice, however, manufacturers have voluntarily provided front-seat lap/shoulder belts in these vehicles.) NHTSA is in the process of re-examining the occupant protection requirements for the front seating positions in open-body type MPVs and other light trucks and vans, with particular consideration of whether automatic occupant protection should be required in these vehicles. NHTSA will address the discrepancy between the regulatory requirements for front and rear seat occupant protection in open-body type MPVs in the course of that re-examination.

c. Light Trucks and Small Buses

All commenters that addressed the proposed requirements for rear-seat lap/shoulder belts in light trucks supported the proposal. Similarly, no commenters raised any objections to the proposed rear seat lap/shoulder belt requirements in small buses other than school buses. Thus, those proposed requirements are adopted, for the reasons explained in the NPRM.

However, several commenters, primarily school bus manufacturers and operators, objected to the proposed requirements for rear-seat lap/shoulder belts in small school buses. Thomas Built, a school bus manufacturer, questioned the effectiveness of rear-seat lap/shoulder belts in certain small school buses ("body on chassis" buses). The Connecticut Operators of School Transportation Association (COSTA) also questioned the effectiveness of lap/shoulder belts in small school buses, by voicing concerns about how the additional stress on the side walls of a small school bus would affect its compliance with Standard No 221, School Bus Body Joint Strength (49 CFR 571.221). Thomas Built also raised the issue of different levels of safety protection for passengers on small school buses, with lap/shoulder belts for outboard seating positions and lap-only belts for the inboard seating positions. The National School Transportation Association (NSTA) likewise objected to the different levels of occupant protection that would result if some seating positions were equipped with lap/shoulder belts while others were equipped with lap-only belts. Blue Bird, another school bus manufacturer, raised similar objections, claiming that NHTSA occupant protection standards for school buses are "disorganized and confusing," and suggested that the agency undertake rulemaking to separate the occupant protection requirements for school buses from the occupant protection standards for passenger cars and light trucks. Additionally, Blue Bird argued the requirements proposed in the NPRM would require too many varieties of occupant protection for small school buses.

NHTSA is concerned if Blue Bird or any other school bus manufacturer is having difficulty understanding the occupant protection requirements applicable to the different types of vehicles that can be used to transport school children. A brief summary of those requirements might be helpful. If school systems use a nine or fewer passenger vehicle to transport school children, that vehicle is not a "school bus" for the purposes of the Federal motor vehicle safety standards. Accordingly, that vehicle is not subject to any of the requirements in Standard No. 222, School Bus Passenger Seating and Crash Protection (49 CFR 571.222). Instead, that vehicle would have to comply with the applicable requirements in Standard No. 208. As a result of this rule published today and the agency's previous rulemakings, all front and rear outboard seating positions in nine-passenger light vehicles must be equipped with lap/shoulder safety belts, irrespective of whether the nine-passenger light vehicle is classified as a passenger car, truck, or an MPV.

If the vehicle used to transport school children can accommodate 10 or more passengers, the vehicle is a "school bus" for the purposes of the Federal motor vehicle safety standards. Every vehicle that is a "school bus" must comply with the occupant protection requirements of Standard No. 222. In the case of school buses with a gross vehicle weight rating (GVWR) of more than 10,000 pounds, no safety belts are required at seating positions other than the driver's seat. Instead, Standard No. 222 sets forth requirements that protect occupants of rear seating positions in large school buses by means of a concept called "compartmentalization." Persons interested in learning more about the concept of compartmentalization and occupant protection in large school buses may wish to review the agency's notice terminating rulemaking to specify installation requirements for voluntarily installed safety belts on large school buses. This notice was published March 22, 1989 at 54 FR 11765.

In the case of school buses with a GVWR of 10,000 pounds or less, Standard No. 222 requires that occupants be protected both by safety belts at seating positions other than the driver's seat and by most of the features of compartmentalization. This double means of occupant protection reflects the more severe "crash pulse" or deceleration experienced by lighter vehicles as compared with heavier vehicles in similar collisions. Section S5(b) of Standard No. 222 requires that small school buses meet the requirements of Standard No. 208 as those requirements apply to MPVs. The provisions of Standard No. 208 currently require MPVs (and small school buses, since the requirements for these two vehicle types are linked) to be equipped with lap/shoulder safety belts at front outboard seats and either lap/shoulder belts or lap-only belts at all other seating positions.

Upon further consideration, NHTSA has determined that the occupant protection requirements for small school buses should be considered separately, not as an aspect of this rulemaking action. In the past, NHTSA has recognized the special importance of issues related to school buses by examining many of those issues in rulemaking actions focused exclusively on school buses, instead of examining those issues as one part of a rulemaking addressing many types of vehicles. This policy has allowed both the agency and the public to consider fully the implications of any proposed action on school bus safety. NHTSA believes it is appropriate to continue following this policy. Accordingly, this rule continues to permit small school buses to be equipped with either lap-only or lap/shoulder safety belts at all rear seating positions, but small school buses must also comply with most of the compartmentalization requirements for large school buses. All other small buses will be required to be equipped with rear-seat lap/shoulder safety belts, but will not be required to comply with the compartmentalization requirements.

The NPRM acknowledged that small buses other than school buses are not currently required to have lap/shoulder safety belts at front outboard seating positions, even though front seats generally present a more hostile crash environment than rear seats. As noted above, small school buses are subject to the occupant protection requirements for MPVs, and small MPVs have long been required to have lap/shoulder safety belts at front outboard seating positions. No commenters suggested any reasons why front-seat lap/shoulder belts should not be required in small buses, just as they are required in small school buses. This rule adopts such a requirement.

4. Vehicle Types Not Subject to These Requirements

a. Vehicles with a GVWR of More Than 10,000 Pounds

NHTSA has traditionally used GVWRs as dividing lines for the purposes of applying occupant crash protection standards. These groupings reflect the differences in the vehicles' functions and crash responses and exposure. The NPRM proposed to use such a dividing line by limiting the rear seat lap/shoulder belt requirements to vehicles with a GVWR of 10,000 pounds or less. No commenters addressed this issue, and this rule adopts the proposal.

b. Motor Homes

The NPRM proposed to exclude vehicles that are "motor homes" from the rear-seat lap/shoulder belt requirements, because lap/shoulder belts at rear seating positions might interfere with the residential purposes of those seats and because the agency had no evidence of significant potential benefits from lap/shoulder belts, instead of the currently permitted option for lap/shoulder or lap-only belts, at these seating positions. The NPRM also proposed a specific definition of "motor home." These proposed requirements are adopted in this rule.

5. Retractor Types Required for Rear Seat Lap/Shoulder Belts

Retractors at driver's seat in small buses. The NPRM proposed to require that the lap/shoulder belt assembly installed at the driver's seating position of small buses include an anti-cinch automatic locking retractor (ALR) on the lap belt portion. Both Ford and Chrysler objected to this proposed requirement, stating that it would preclude the use of the continuous loop lap/shoulder belt system in small buses. The continuous loop system, currently used on most manual lap/shoulder belt systems in passenger cars, uses a single emergency locking retractor (ELR) on one end of the belt system and the other end of the belt system is fixed. The ELR then retracts both the lap and shoulder belt portions of the belt system. Ford and Chrysler each commented that they currently use a continuous loop system for the lap/shoulder belts that they voluntarily install at the front outboard seating positions of their small buses, and that they knew of no safety justification for a requirement that would prohibit the use of continuous loop system in small buses, as the proposed requirement for an ALR for the lap belt would have the effect of doing. NHTSA was persuaded by these comments. This rule has been amended to permit the belt systems at front outboard seating positions in small buses to be equipped with either an ELR or an anti-cinch ALR for the lap belt portion.

Retractors for rear seats and child safety seats. The NPRM contained a detailed discussion of the agency's previous statements on this subject, and repeated the agency's previous conclusion that only ELRs should be permitted as the retractor for the lap belt portion of the lap/shoulder belt system. *See* 53 FR 47987–47989; November 29, 1988 The agency's conclusion was based on the fact that ELRs for the lap belt made the belt system more comfortable and convenient for adult occupants, thereby tending to increase use of the belt system. Although active children can make some child restraint systems unstable if the child restraint is secured by a lap belt that incorporates an ELR, NHTSA knew of no data to show that this potential instability would affect the safety performance of the child restraint in motor vehicle crashes. Those parents that wanted to eliminate the potential instability of child restraints, even if the instability did not have any demonstrable effect on safety, could purchase locking clips. These locking clips can prevent movement of belts equipped with an ELR.

NHTSA received many comments on this discussion and the accompanying proposal. Many pediatricians and other medical professionals, as well as advocates of child safety, associations representing the insurance industry, and manufacturers of child safety seats, commented that it was important that the belt system in the vehicle be capable of tightly securing a child seat, without resort to any additional hardware like locking clips. The commenters suggested differing means of achieving this end. Some of these commenters advocated that this rule should specify the use of only ALRs in the lap belt portion, because ALRs automatically tighten down to secure the child seat. Other of these commenters, such as the Los Angeles Area Child Passenger Safety Association, urged the agency to draft this rule to require the use of convertible retractors similar to those installed in some General Motors vehicles. These convertible retractors function as ELRs normally, to ensure comfort for adult occupants. When the belt webbing is fully extended, however, the retractors convert to ALRs, to tightly secure child seats. Other of these commenters suggested that the agency could ensure that these rear-seat lap/shoulder belt systems would tightly secure child seats by following the course of action being considered for recommendation by a Society of Automotive Engineers (SAE) Task Force. That task force may recommend that safety belts which incorporate ELRs in the lap belt or lap belt portion of a belt assembly shall include a means for locking the lap belt when it is used with a child seat. Instead of specifying the use of some specific technology, like ALRs or convertible retractors, this approach sets forth the desired goal and permits manufacturers to use any available technology to achieve that goal.

Some of the vehicle manufacturers, such as Nissan and Toyota, believe that there is no need for any further requirements. According to these commenters, any persons wishing to secure a child seat at a seating position whose lap belt is equipped with an ELR can cause the retractor to perform like an ALR simply by using a locking clip. Volvo commented that the agency ought to permit the use of a continuous loop lap/shoulder belt. Volvo asserted that its design of the continuous loop system uses friction at the loop in the buckle to achieve an effect similar to that which would be obtained by using a locking clip. In Volvo's opinion, this lap/shoulder belt system is the best means of both securing child safety seats and ensuring comfort for other occupants of the belt system. Chrysler commented that it was considering modifications to the buckle latchplate as a means of accomplishing the same effect as would locking clips for its belt assemblies equipped with ELRs.

NHTSA has reached the following conclusions after reexamining the available information in light of these comments. Nothing in these comments or the available information shows that low-speed movement of child safety seats actually reduces to any significant extent the effectiveness of those seats in crashes. However, the low-speed

VOL 54 ISS 211 NO 2 1989 UMI

movement of child safety seats held by lap belts that use an ELR seems to have given rise to questions and concerns about the safety and effectiveness of child seats when used with a belt that incorporates an ELR. Even if these questions and concerns have not been substantiated, the public may not be as likely to use child safety seats if there are perceived questions about the effectiveness of those seats. NHTSA has concluded that it is appropriate to take action to remove these perceived questions, so as to maintain public trust and confidence in the efficacy of child seats.

The agency was persuaded by the comments asserting that it would be unnecessarily restrictive to require the use of ALRs on the lap belt portion of rear seat lap/shoulder belts, because there are design features other than incorporating an ALR that are as effective in ensuring that the belt system can tightly secure a child safety seat and because such a feature could reduce safety belt use by adult occupants. NHTSA has devised an approach in this final rule that will ensure comfort for adult occupants and tight securing of child safety seats. First, this rule requires that any lap belt or lap belt portion of a lap/shoulder belt installed at an outboard designated seating position in compliance with Standard No. 208 shall be equipped with an ELR. This requirement will take effect on September 1, 1991 for passenger cars, as well as the vehicle types addressed in this rule.

Second, this final rule requires that safety belts that incorporate an ELR in the lap belt or lap belt portion of a lap/shoulder belt shall provide some means other than an external device that requires manual attachment or activation that will prevent any further webbing from spooling out until that means is released or deactivated. This requirement will also take effect on September 1, 1991 for passenger cars and the vehicle types addressed in this rule. The purpose of this requirement is to ensure that child safety seats can be tightly secured. This requirement will not allow vehicle manufacturers to provide "locking clips" to comply with this requirement. However, any means that can function without additional manual actions can satisfy this requirement. For instance, the convertible retractors on some GM vehicles would comply with this requirement. Additionally, devices like Volvo's are acceptable if those devices do not require any further manual actions to prevent webbing spool out. This approach is intended to allow vehicle manufacturers the freedom to choose whatever approach they prefer to prevent webbing spool out for ELRs, while ensuring that whatever approach is chosen will be effective.

6. The Requirements With Which Rear Seat Lap/Shoulder Belts Must Comply

The NPRM did not propose to require any crash testing requirements for rear-seat lap/shoulder belts, for several reasons. First, neither dummy positioning procedures nor testing procedures for rear seat occupants have yet been developed. In fact, the rear seats are generally removed from vehicles when conducting compliance testing for occupant protection for the front seating positions, to allow the specified weight distribution to be more easily achieved and to permit the installation of additional instrumentation. Second, the rear seating positions offer a generally more benign crash environment than the front seating positions. Accordingly, the agency concluded that it could not justify delaying a proposal for rear-seat lap/shoulder belts until it was able to propose a requirement for dynamic testing of those safety belts. Several commenters stated that they agreed with the agency's decision not to delay this rulemaking, but suggested that the agency ought to move expeditiously to establish crash testing requirements for rear seat occupants. NHTSA will consider these comments when it establishes its priorities for future activities in the area of occupant protection.

As an adjunct to the decision not to require crash testing of rear-seat lap/shoulder belts, the agency proposed to require that rear-seat lap/shoulder belts be integral. Section S4.1.2.3.1 of Standard No. 208 specifies that manual safety belts installed at front outboard seating positions must be either (a) integral lap/shoulder belts or (b) crash-tested lap-only belts such that the car complies with the occupant protection requirements with test dummies restrained only by the lap belts. However, since the agency cannot at this time promulgate any crash testing requirements for rear-seat safety belts, NHTSA believes it is appropriate to require that rear-seat lap/shoulder belts installed in compliance with this rule be integral; i.e., the lap belt must not be detachable from the shoulder belt.

Several commenters suggested that the requirement for integral lap/shoulder belts should not apply to certain types of seats or vehicles, because of special difficulties posed for those seats or vehicles. In response to these comments, NHTSA has carefully reexamined its proposal to require that all rear seat lap/shoulder belts installed in compliance with this rule be integral. The agency prefers to retain the proposed requirement, for the same reasons that the requirement was proposed. That is, to the extent that the lap belt is detachable from the shoulder belt and the lap belt is used without the shoulder belt, the enhanced safety protection offered by lap/shoulder belts will not be achieved. The agency's responses to the comments suggesting that there are some seating positions or vehicles in which rear outboard lap/shoulder belts should not be required to be integral are as follows:

a. *Convertible Passenger Cars.* ASC, Inc., a company that converts hardtops into convertibles, commented that it did not believe that rear-seat lap/shoulder belts installed in convertibles should be required to be integral. According to ASC's comments, a detachable shoulder belt that is not buckled would still offer the occupant the protection of the lap-only belt. While this comment is true, the purpose of this rulemaking is to ensure that rear-seat occupants will enjoy even greater safety protection than is afforded by lap-only belts. Detachable shoulder belts would not serve this purpose.

ASC's comment then asserted that "the detachability feature is essential for ASC to continue to manufacture at a competitive price a majority of its present convertible production which is already equipped with three point lap-shoulder safety belts." Accordingly, ASC believed that a requirement for integral rear-seat lap/shoulder belts would have a "significant negative impact on its business." The agency has previously stated that it is typically more difficult to install rear-seat lap/shoulder belts in convertibles than in sedans or coupes. However, the 1988 convertible models produced by BMW, Mercedes-Benz, and Saab were all equipped with integral lap/shoulder belts at rear outboard seating positions. These voluntary actions by convertible manufacturers showed that the technical difficulties associated with integral rear seat lap/shoulder belts in convertibles can be overcome. It may well cost ASC, Inc. or other converters more to equip a convertible with integral rear-seat lap/shoulder belts than it would cost a high volume manufacturer. However, ASC provided no data or cost estimates that would permit the agency to estimate the cost differential for rear-seat lap/shoulder belts installed by high volume manufacturers and converters. Based on the available information, NHTSA concludes that it is unlikely that any such cost differential would have more than an insignificant effect on the demand for convertibles produced by converters.

NHTSA repeats its previous acknowledgements that that it will cost manufacturers more to equip convertibles with integral rear seat lap/shoulder belts than it will cost to equip sedans and coupes with those safety belts. In its comments, Volkswagen stated that it would have to incur tooling costs of $1.2 million to install integral rear-seat lap/shoulder belts in its convertibles, with variable costs of an additional $60 per vehicle to install integral lap/shoulder belts instead of lap-only belts. NHTSA estimates that these costs would result in a consumer cost increase of $90 per vehicle. Even accepting these costs as accurate, NHTSA does not believe that a $90 cost increase for convertibles, which already cost substantially more than the hardtop version of the same vehicle, will have any significant negative impacts on the demand for convertibles, even those produced by converters.

To the extent that these costs result in some relatively minor economic impacts, the agency concludes that those costs and impacts are reasonable. The occupants of rear seating positions in convertibles are exposed to at least the same degree of risk of death and injury in a motor vehicle crash as occupants of rear seating positions in other light vehicles. In these circumstances, NHTSA has concluded it is appropriate to provide those occupants with the same amount of safety protection. Therefore, a requirement that convertible passenger cars manufactured on or after September 1, 1991 be equipped with integral lap/shoulder belts at rear outboard seating positions is adopted as proposed.

Fiat filed comments on behalf of Ferrari to the effect that it was possible to comply with the requirement for integral lap/shoulder belts for convertibles that were designed to include those safety belt systems. However, Fiat asserted that the steps needed to modify an existing convertible design to accept the upper anchorages for rear seat lap/shoulder belts "would be financially intolerable." Fiat asked that this final rule be structured to provide an exemption for at least two years for existing convertible designs "which cannot be made to comply without extreme economic and technical hardships." NHTSA has not done so. Section 123 of the Safety Act (15 U.S.C. 1410) and 49 CFR part 555 set forth procedures for obtaining temporary exemptions from any of the generally applicable requirements set forth in the safety standards. If Fiat is statutorily eligible for such an exemption and can make the requisite showings, it can obtain the temporary exemption it seeks in accordance with those statutory and regulatory requirements.

b. *Readily Removable Seats.* In the NPRM for this rule, the agency summarized Ford's comment to the ANPRM asserting that lap/shoulder belts installed for readily removable seats should be permitted to be nonintegral, since that would be more convenient for persons using the vehicle especially with the seats removed. NHTSA concurred with this assertion, but noted that permitting detachable shoulder belts would result in lower usage of the shoulder belts and lower safety benefits for this rule. The agency suggested that manufacturers are capable of designing an integral lap/shoulder belt system that is nearly as convenient as safety belt systems with nonintegral shoulder belts. The NPRM suggested: "For instance, a shoulder belt that is readily detachable at the anchorage could be used for the outboard seating positions." 53 FR 47990, November 29, 1988.

Both Ford and GM suggested in their comments that permitting belts to be detachable at the upper anchorage would ease the problems of providing integral lap/shoulder belts at outboard seating positions of readily removable seats. However, both these commenters also stated that a March 1, 1985 interpretation letter from NHTSA's Chief Counsel to Mr. Hiroshi Shimizu of Tokai Rika Co. appeared to state that the provisions of Standard No. 208 forbid the use of a lap/shoulder safety belt that is detachable at the upper anchorage.

Mr. Shimizu provided a diagram with his letter that illustrated the safety belt design in question. This diagram showed two reasons why this design would not comply with the requirements of Standard No. 208. First, because of the location of the retractor and the separate buckles for the lap and shoulder belt portions of this belt system, an occupant could release the shoulder belt buckle and use this system solely as a lap belt with no dangling shoulder belt webbing to alert the occupant to the need to fasten the shoulder belt buckle. Alternatively, an occupant could release the lap belt buckle and use the system solely as a shoulder belt with no dangling webbing to alert the occupant to the need to fasten the lap belt buckle. NHTSA stated that this design would not satisfy the requirement in S4.1.2.3.1 and S4.2.2 of Standard No. 208 that nondetachable shoulder belts be provided on some belt assemblies.

Second, section S7.2 of Standard No. 208 requires that the latch mechanism of seat belt assemblies shall release both the lap and shoulder belt simultaneously and release at a single point by a pushbutton action. When both the lap and shoulder belt portions of Mr. Shimizu's design were buckled, the occupant would have to release both buckles to get out of the belt system. Hence, this belt system could not comply with Standard No. 208 because the release from the lap and shoulder belt would not be simultaneous, nor would it be at a single point.

NHTSA does not believe that the Shimizu interpretation forecloses all safety belt system designs that detach at the upper anchorage. The language of section S7.2 plainly requires that any such safety belt system must use a single, pushbutton buckle that releases the occupant from the lap belt and shoulder belt simultaneously. There is nothing inherent in the design of a safety belt system detachable at the upper anchorage that makes it impossible to comply with these requirements. Similarly, a shoulder belt could be detachable at the upper anchorage without incorporating an additional point at which the belt could be released by the seat occupant, such as the buckle in Mr. Shimizu's design. For example, manufacturers could install some type of spring operated "dog leash" device that would not be equipped with a push button release mechanism. By a "dog leash" device, NHTSA is referring to a device that does not use any form of push button release. Such devices rely on other actions such as a slide button or slide collar to mechanically uncouple the belt system from the upper anchorage. Such a design would not be prohibited by Standard No. 208 nor anything in the Shimizu interpretation. To make this more clear, this rule adopts language in Standard No. 208 expressly stating that vehicles with readily removable rear seats may use a shoulder belt that detaches at the upper anchorage point to meet the requirements for an integral rear-seat lap/shoulder belt.

c. *Swivel seats.* As previously noted, swivel seats and other seats that can be adjusted to be forward-facing and to face some other direction will be required to provide lap/shoulder belts only when in the forward-facing position and may provide lap-only belts when adjusted to face other directions. The agency had to consider the question of

what requirements should be specified for the detachable shoulder belt. NHTSA could have required those belts to be detachable at the upper anchorage determine compliance with the comfort and convenience provisions with reference to a test dummy. Additionally, the NPRM announced that the agency owner's manual to include an explanation of how the tension-relieving device works and a recommendation of the maximum amount of slack to be

passenger van has a sliding door on the right side of the vehicle that is designed as the means of entry and egress for all rear seat passengers, slack for rear-seat assembly (lap/shoulder belt) shall be installed for each forward-facing outboard designated seating position in passenger cars other than convertibles, requirements included a requirement that rear-seat lap/shoulder belts be integral and that the upper anchorage for the rear-seat lap/shoulder belt

VOL

1
NO
2
1989
UMI

what requirements should be specified for the detachable shoulder belt. NHTSA could have required those belts to be detachable at the upper anchorage point, by establishing requirements such as were established for readily removable seats. However, that would have left the occupant of the swivel seat with webbing in his or her lap every time the occupant adjusted the seat to some position other than forward-facing. The shoulder belt webbing could become soiled, so that the occupant of the swivel seat would not use either the lap belt alone or the belt as a lap/shoulder belt.

To prevent this, NHTSA has decided that seats that adjust to be forward-facing and to face in some other direction are the only rear outboard seating positions that will not be required to be equipped with integral lap/shoulder belts. Instead, those seating positions may be equipped with a shoulder belt that is detachable at the latchplate.

However, this rule establishes an additional requirement that any such non-integral shoulder belt portion be equipped with an ELR, so that the shoulder belt portion will be available for use by all occupants of the seat in its retracted position, and will be less likely to become soiled. This will ensure that those occupants of adjustable seating positions that want the added protection of a lap/shoulder belt in these seating positions will have that protection.

The agency acknowledges that this requirement is likely to result in lower shoulder belt use at these seating positions than at other rear outboard seating positions. However, the agency concludes that belt use at these adjustable seating positions would be lower still if the agency were to require that the lap/shoulder belts be integral and the shoulder belt webbing were in the occupant's lap or on the floor of the vehicle. On balance, the agency concludes that the interests of occupants of adjustable rear seating positions will be best served by permitting the shoulder belt portion of the lap/shoulder belt system to be detachable at the buckle, i.e., non-integral, while including a requirement for a shoulder belt retractor so that a lap/shoulder belt will always be available for those persons.

7. Comfort and Convenience

The NPRM stated that compliance with the provisions in S7.4.2(a), S7.4.3, S7.4.4, and S7.4.5 of Standard No. 208 is determined with reference to a test dummy for the front seating positions. As noted above, there are no dummy positioning procedures for the rear seating positions, so the agency cannot determine compliance with the comfort and convenience provisions with reference to a test dummy. Additionally, the NPRM announced that the agency has not yet developed any alternative surrogate measurements for comfort and convenience in rear seating positions. As was the case with crash testing requirements discussed above, NHTSA did not believe it would be appropriate to delay this rulemaking to allow the agency to develop a full set of comfort and convenience requirements.

NHTSA noted that the requirements in S7.4.6 for seat belt guides and hardware would apply to rear-seat lap/shoulder belts without proposing any changes to accomplish that. No commenters objected to this result, so safety belts installed in compliance with this rule are subject to those requirements.

The remaining issue in this area concerned tension-relieving devices on rear-seat lap/shoulder belts. In the NPRM, the agency expressed its tentative conclusion that the same considerations should apply to rear seating positions with tension-relieving devices on safety belts as already apply to front seating positions with tension-relieving devices on the safety belts. That is, tension-relieving devices are permitted to be installed on front seat safety belts if vehicles that have tension-relieving devices at those seating positions comply with certain special conditions intended to reduce the likelihood of misuse of the tension-relieving devices. Those special conditions are set forth in S7.4.2 as follows:

1. The vehicle owner's manual must include an explanation of how the tension-relieving device works and recommend a maximum amount of slack that should be introduced into the belt under normal circumstances (S7.4.2(b));
2. The vehicle must comply with the injury criteria specified in S5.1 of Standard No. 208 during a barrier crash test with the shoulder belt webbing adjusted to introduce the maximum amount of slack recommended by the manufacturer (S7.4.2(a)); and
3. The vehicle must have an automatic means to cancel any shoulder belt slack introduced into the belt system by a tension-relieving device (S7.4.2(c)).

The NPRM explained that the second requirement listed above could not be applied to rear-seat lap/shoulder belts, because the agency could not develop dynamic testing procedures for the rear seating positions at this time. However, the notice proposed to apply the other two requirements listed above to rear-seat lap/shoulder belts equipped with tension-relieving devices.

None of the commenters addressed the proposal to require the vehicle owner's manual to include an explanation of how the tension-relieving device works and a recommendation of the maximum amount of slack to be introduced into the safety belt. Hence, that requirement is adopted as proposed, for the reasons explained in the NPRM.

In its comments, GM objected to the proposed requirement for automatic cancellation of slack. GM indicated that automatic cancellation of slack in front-seat lap/shoulder belts is accomplished by either of two means. If the retractor is mounted on the floor or on the pillar near the adjacent door, the manufacturer generally uses a simple cable, which operates when the door is opened to cancel the slack. If there are dual spool retractors on the safety belt system, a simple mechanical device triggered by retraction of the lap belt is used to cancel the slack in the shoulder belt. According to GM, "cable routing concerns" make it difficult to use a cable and the current size of dual spool retractors precludes the use of that technology in rear seating positions. This comment concluded by alleging that only "complex, expensive mechanisms" could be used for slack cancellation in rear seating positions. Ford also suggested in its comments that it would be very complex to develop an automatic means for slack cancellation. Ford stated that all of its slack cancellation mechanisms are activated by opening the adjacent door. Ford also stated that electric slack cancellation mechanisms would be impracticable for rear-seat lap/shoulder belts.

In response to these comments, NHTSA has reexamined its proposal. That proposal was that slack be automatically cancelled either when the belt is unbuckled or when the adjacent door is opened. Although not expressly stated by either GM or Ford, the manufacturers' concern appears to be that there is no adjacent door for rear seating positions in many of the vehicles that will be subject to these requirements. The effect of the proposal, then, would be to force manufacturers that chose to install tension-relieving devices in rear-seat lap/shoulder belts for passenger vans, extended cab pickups, and the like, to cancel the slack every time the latchplate was unbuckled, because there is no door adjacent to those seating positions.

The agency did not intend such a result. Instead, the agency's intent was to permit the slack to be cancelled either every time the latchplate was unbuckled or each time the door is opened that is designed to allow the occupant of the seating position in question entry and egress to and from the seat. Thus, if a passenger van has a sliding door on the right side of the vehicle that is designed as the means of entry and egress for all rear seat passengers, slack for rear-seat lap/shoulder belts in that van must be cancelled either when that sliding door is opened or when the belt latchplate is unbuckled. Similarly, if a two-door convertible has tension-relieving devices for its rear-seat lap/shoulder belts, slack in the rear-seat lap/shoulder belts must be cancelled either when the latchplate is unbuckled or when the door is opened on the same side of the vehicle as the rear outboard seating position.

This approach will permit manufacturers to use, with appropriate modifications, the same slack cancellation mechanism that is activated by the opening of an adjacent door in seating positions that are not immediately adjacent to the door. The agency is not aware of any reasons why cable routing concerns would present any insuperable difficulties for slack cancellation for rear seat lap/shoulder belt systems that are not adjacent to a door. Accordingly, S7.4.2(c) of Standard No. 208 has been amended to provide that slack must be cancelled automatically either when the latchplate is unbuckled or when the door that is designed to provide entry and egress for that seating position is opened.

Both Ford and GM also commented that there was no safety need for automatic cancellation of slack in rear-seat lap/shoulder belts. GM stated that it was not aware of any data showing a safety need for automatic slack cancellation. Ford commented that there was no possibility of safety belts getting tangled in the door when there was no door adjacent to the seating position at which the tension-relieving device is installed.

NHTSA has previously explained the safety need for automatic slack cancellation in belts equipped with tension-relieving devices. Persons interested in reviewing those discussions may examine 50 FR 14560; April 12, 1985 and 54 FR 29047; July 11, 1989. Ford and GM did not raise any new arguments that have not already been considered and rejected by the agency. Accordingly, this rule incorporates a requirement for automatic slack cancellation. NHTSA notes that it is currently reviewing a petition that asks the agency to prohibit tension-relieving devices altogether.

8. Relationship of This Rule to Standard No. 210

As noted in the NPRM, section S4.1.1 of Standard No. 210 provides that seat belt anchorages for a Type 2 seat belt assembly (lap/shoulder belt) shall be installed for each forward-facing outboard designated seating position in passenger cars other than convertibles, and for each designated seating position for which a Type 2 seat belt assembly is required by Standard No. 208 in vehicles other than passenger cars. The NPRM proposed to delete Standard No. 210's exemption for convertibles, because the agency was proposing to amend Standard No. 208 to require rear-seat lap/shoulder belts in convertibles. Obviously, there would be lesser benefits from requiring rear-seat lap/shoulder belts in convertibles if those lap/shoulder belts are not required to be effectively anchored to the vehicle. No commenter objected to this proposal, so it is adopted as proposed.

No amendment is needed to ensure that the rear-seat lap/shoulder belts required in other vehicle types covered by this rule will be effectively anchored to the vehicle. As explained above, the existing language of S4.1.1 of Standard No. 210 automatically requires anchorages for lap/shoulder belts to be provided at seating positions required by Standard No. 208 to have lap/shoulder belts.

9. Timing for Applying These New Requirements

Some of the requirements specified in this rule apply to both the vehicle types addressed exclusively in this rule (convertible passenger cars, light trucks, MPVs, and small buses) and to the vehicle type previously addressed in NHTSA's June 14, 1989 final rule (passenger cars other than convertibles). These requirements include the types of retractors that can be installed on rear-seat lap/shoulder belts and special performance requirements for tension-relieving devices installed on rear seat-lap/shoulder belts.

The NPRM proposed that these general requirements, as well as the new requirement that rear-seat lap/shoulder belts be installed, apply to the vehicle types addressed exclusively in this rule for all such vehicles manufactured on or after September 1, 1991. None of the commenters has provided any evidence demonstrating that amount of leadtime would be inadequate. Accordingly, the requirements in this rule will apply to convertible passenger cars, light trucks, MPVs, and small buses as of September 1, 1991, as was proposed. Earlier compliance is also permitted and encouraged.

With respect to passenger cars, the June 14, 1989 final rule established certain general requirements applicable to cars manufactured on or after September 1, 1990. These general requirements included a requirement that rear-seat lap/shoulder belts be integral and that the upper anchorage for the rear-seat lap/shoulder belt comply with the location requirements of Standard No. 210. The general requirements of this rule for rear-seat lap/shoulder belts (retractor type and special requirements for tension-relieving devices) will apply on or after September 1, 1991, the same date as the other requirements mandated by this rule take effect. The general requirements of this rule will require greater changes, and thus longer leadtime, than the general requirements announced in the June 14, 1989 rule. Accordingly, passenger cars manufactured on or after September 1, 1991 must comply with the retractor type and tension-relieving device requirements set forth in this rule.

Economic and Other Impacts of This Rule

NHTSA has analyzed this rule and determined that it is not major within the meaning of Executive Order 12291, but that it is significant within the meaning of the Department of Transportation regulatory policies and procedures because of the public interest in this rule. Because the rule is significant, NHTSA has prepared a Final Regulatory Evaluation (FRE), and a copy of the FRE has been placed in the docket for this rulemaking action. A copy of the FRE may be obtained by writing to: Docket Section, NHTSA, Room 5109, 400 Seventh Street, SW., Washington, DC 20590.

Additionally, the agency has analyzed the effects of this rule on small entities, in accordance with the Regulatory Flexibility Act. Based on this analysis, I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities. To the extent that any vehicle manufacturers qualify as small entities, their number would not be substantial. These requirements will not affect the manufacturing process of any safety belt manufacturers that are small entities, nor will it significantly affect the retail price of vehicles purchased by any small organizations or small governmental units.

The agency has also analyzed this rule under the National Environmental Policy Act and determined that it will not have a significant effect on the human environment.

This rule has also been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and NHTSA has determined that this rule does not have sufficient

VOL 54 ISS 211 NOV 2 1989 UMI

federalism implications to warrant the preparation of a Federalism Assessment.

As noted in the NPRM, the requirements for vehicle owner's manuals to include information about tension-relieving devices on rear seat lap/shoulder belts are information collection requirements, as that term is defined by the Office of Management and Budget (OMB) in 5 CFR part 1320. Pursuant to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the information collection requirements in this rule have been submitted to and approved by OMB. The approval number is OMB #2127–0541, and the approval is valid through March 31, 1992.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, 49 CFR part 571 is amended as follows:

PART 571—[AMENDED]

1. The authority citation for part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

571.208 [Amended]

2. S4.1.4 of Standard No. 208 is revised to read as follows:

S4.1.4 *Passenger cars manufactured on or after September 1, 1989.*

S4.1.4.1 Except as provided in S4.1.4.2, each passenger car manufactured on or after September 1, 1989 shall comply with the requirements of S4.1.2.1. Any passenger car manufactured on or after September 1, 1989 and before September 1, 1993 whose driver's designated seating position complies with the requirements of S4.1.2.1(a) by means not including any type of seat belt and whose right front designated seating position is equipped with a manual Type 2 seat belt so that the seating position complies with the occupant crash protection requirements of S5.1, with the Type 2 seat belt assembly adjusted in accordance with S7.4.2, shall be counted as a vehicle complying with S4.1.2.1. A vehicle shall not be deemed to be in noncompliance with this standard if its manufacturer establishes that it did not know in the exercise of due care that such vehicle is not in conformity with this standard.

S4.1.4.2 (a) Each passenger car, other than a convertible, manufactured before December 11, 1989 may be equipped with, and each passenger car, other than a convertible, manufactured on or after December 11, 1989 and before September 1, 1990 shall be equipped with a Type 2 seat belt assembly at every forward-facing rear outboard designated seating position. Type 2 seat belt assemblies installed pursuant to this provision shall comply with Standard No. 209 (49 CFR 571.209) and with S7.1.1 of this standard.

(b) Except as provided in S4.1.4.2.1, each passenger car other than a convertible manufactured on or after September 1, 1990 and each convertible passenger car manufactured on or after September 1, 1991 shall be equipped with an integral Type 2 seat belt assembly at every forward-facing rear outboard designated seating position. Type 2 seat belt assemblies installed in compliance with this requirement shall comply with Standard No. 209 (49 CFR 571.209) and with S7.1 and S7.2 of this standard. If a Type 2 seat belt assembly installed in compliance with this requirement incorporates any webbing tension-relieving device, the vehicle owner's manual shall include the information specified in S7.4.2(b) of this standard for the tension-relieving device, and the vehicle shall comply with S7.4.2(c) of this standard.

S4.1.4.2.1 Any rear outboard designated seating position with a seat that can be adjusted to be forward-facing and to face some other direction shall either:

(i) Meet the requirements of S4.1.4.2 with the seat in any position in which it can be occupied while the vehicle is in motion; or

(ii) When the seat is in its forward-facing position, have a Type 2 seat belt assembly with an upper torso restraint that conforms to S7.1 and S7.2 of this standard and that adjusts by means of an emergency locking retractor that conforms with Standard No. 209 (49 CFR 571.209), which upper torso restraint may be detachable at the buckle, and, when the seat is in any position in which it can be occupied while the vehicle is in motion, have a Type 1 seat belt or the pelvic portion of a Type 2 seat belt assembly that conforms to S7.1 and S7.2 of this standard.

S4.1.4.2.2 Any rear outboard designated seating position with a readily removable seat (that is, a seat designed to be easily removed and replaced by means installed by the manufacturer for that purpose) shall meet the requirements of S4.1.4.2. and may use an upper torso belt that detaches, at the upper anchorage point to meet those requirements.

3. A new S4.2.4 is added to Standard No. 208, to read as follows:

S4.2.4 *Trucks and multipurpose passenger vehicles manufactured on or after September 1, 1991 with a GVWR of 10,000 pounds or less.* Except as provided in S4.2.4.2, each truck and each multipurpose passenger vehicle, except a motor home, manufactured on or after September 1, 1991 that has a gross vehicle weight rating of 10,000 pounds or less shall be equipped with an integral Type 2 seat belt assembly at every forward-facing rear outboard designated seating position. Type 2 seat belt assemblies installed in compliance with this requirement shall comply with Standard No. 209 (49 CFR 571.209) and with S7.1 and S7.2 of this standard. If a Type 2 seat belt assembly installed in compliance with this requirement incorporates any webbing tension-relieving device, the vehicle owner's manual shall include the information specified in S7.4.2(b) of this standard for the tension-relieving device, and the vehicle shall comply with S7.4.2(c) of this standard.

S4.2.4.1 As used in this section—

(a) *Motor home* means a motor vehicle with motive power that is designed to provide temporary residential accommodations, as evidenced by the presence of at least four of the following facilities: cooking; refrigeration or ice box; self-contained toilet; heating and/or air conditioning; a potable water supply system including a faucet and a sink; and a separate 110–125 volt electrical power supply and/or an LP gas supply.

(b) *Rear outboard designated seating position* means any "outboard designated seating position" (as that term is defined at 49 CFR 571.3) that is rearward of the front seat(s), except any designated seating positions adjacent to a walkway located between the seat and the side of the vehicle, which walkway is designed to allow access to more rearward seating positions.

S4.2.4.2 Any rear outboard designated seating position with a seat that can be adjusted to be forward-facing and to face some other direction shall either:

(i) Meet the requirements of S4.2.4 with the seat in any position in which it can be occupied while the vehicle is in motion; or

(ii) When the seat is in its forward-facing position, have a Type 2 seat belt assembly with an upper torso restraint that conforms to S7.1 and S7.2 of this standard and that adjusts by means of an emergency locking retractor that conforms with Standard No 209 (49 CFR 571.209), which upper torso restraint may be detachable at the buckle, and, when the seat is in any position in which it can be occupied while the vehicle is in motion, have a Type 1 seat belt or the pelvic portion of a Type 2 seat belt assembly that conforms to S7.1 and S7.2 of this standard.

S4.2.4.3 Any rear outboard designated seating position with a readily removable seat (that is, a seat designed to be easily removed and replaced by means installed by the manufacturer for that purpose) shall meet the requirements of S4.2.4, and may use an upper torso belt that detaches at the upper anchorage point to meet those requirements.

4. A new S4.4.3 is added to Standard No. 208, to read as follows:

S4.4 *Buses.*

* * * * *

S4.4.3 *Buses manufactured on or after September 1, 1991.*

S4.4.3.1 Each bus with a gross vehicle weight rating of more than 10,000 pounds shall comply with the requirements S4.4.2.1 or S4.4.2.2.

S4.4.3.2 Except as provided in S4.4.3.2.2, each bus with a gross vehicle weight rating of 10,000 pounds or less, except a school bus, shall be equipped with an integral Type 2 seat belt assembly at the driver's designated seating position and at the front and every rear forward-facing outboard designated seating position, and with a Type 1 or Type 2 seat belt assembly at all other designated seating positions. Type 2 seat belt assemblies installed in compliance with this requirement shall comply with Standard No. 209 (49 CFR 571.209) and with S7.1 and S7.2 of this standard. If a Type 2 seat belt assembly installed in compliance with this requirement incorporates any webbing tension-relieving device, the vehicle owner's manual shall include the information specified in S7.4.2(b) of this standard for the tension-relieving device, and the vehicle shall comply with S7.4.2(c) of this standard.

S4.4.3.2.1 As used in this section, a "rear outboard designated position" means any "outboard designated seating position" (as that term is defined at 49 CFR 571.3) that is rearward of the front seat(s), except any designated seating positions adjacent to a walkway located between the seat and the side of the vehicle, which walkway is designed to allow access to more rearward seating positions.

S4.4.3.2.2 Any rear outboard designated seating position with a seat that can be adjusted to be forward-facing and to face some other direction shall either:

(i) Meet the requirements of S4.4.3.2 with the seat in any position in which it can be occupied while the vehicle is in motion; or

(ii) When the seat is in its forward-facing position, have a Type 2 seat belt assembly with an upper torso restraint that conforms to S7.1 and S7.2 of this standard and that adjusts by means of an emergency locking retractor that conforms with Standard No. 209 (49 CFR 571.209), which upper torso restraint may be detachable at the buckle, and, when the seat is in any position in which it can be occupied while the vehicle is in motion, have a Type 1 seat belt or the pelvic portion of a Type 2 seat belt assembly that conforms to S7.1 and S7.2 of this standard.

S4.4.3.2.3 Any rear outboard designated seating position with a readily removable seat (that is, a seat designed to be easily removed and replaced by means installed by the manufacturer for that purpose) shall meet the requirements of S4.4.3.2, and may use an upper torso belt that detaches at the upper anchorage point to meet those requirements.

S4.4.3.3 Each school bus with a gross vehicle weight rating of 10,000 pounds or less shall be equipped with an integral Type 2 seat belt assembly at the driver's designated seating position and at the right front passenger's designated seating position (if any), and with a Type 1 or Type 2 seat belt assembly at all other designated seating positions. Type 2 seat belt assemblies installed in compliance with this requirement shall comply with Standard No. 209 (49 CFR 571.209) and with S7.1 and S7.2 of this standard. The lap belt portion of a Type 2 seat belt assembly installed at the driver's designated seating position and at the right front passenger's designated seating position (if any) shall include either an emergency locking retractor or an automatic locking retractor, which retractor shall not retract webbing to the next locking position until at least ¾ inch of webbing has moved into the retractor. In determining whether an automatic locking retractor complies with this requirement, the webbing is extended to 75 percent of its length and the retractor is locked after the initial adjustment. If a Type 2 seat belt assembly installed in compliance with this requirement incorporates any webbing tension-relieving device, the vehicle owner's manual shall include the information specified in S7.4.2(b) of this standard for the tension-relieving device, and the vehicle shall comply with S7.4.2(c) of this standard.

5. S7.1.1 of Standard No. 208 is amended by revising S7.1.1.3 and by adding a new S7.1.1.5, to read as follows:

S7.1 *Adjustment.*

* * * * *

S7.1.1.3 A Type 1 lap belt or the lap belt portion of any Type 2 seat belt assembly installed at any outboard designated seating position of a vehicle with a gross vehicle weight rating of 10,000 pounds or less to comply with a requirement of this standard, except walk-in van-type vehicles and school buses, shall meet the requirements of S7.1 by means of an emergency locking retractor that conforms to Standard No. 209 (49 CFR 571.209).

* * * * *

S7.1.1.5 Seat belt assemblies installed at a seating position other than the driver's position that incorporate an emergency locking retractor in the lap belt or the lap belt portion of a Type 2 seat belt assembly shall provide some means other than an external device that requires manual attachment or activation to lock the lap belt or lap belt portion, by preventing additional webbing from spooling out, so that the seat belt assembly can be used to tightly secure a child restraint system.

6. S7.4.2 of Standard No. 208 is amended by revising the introductory text and S7.4.2(c), to read as follows:

S7.4.2 *Webbing tension-relieving device.* Each vehicle with an automatic seat belt assembly or with a Type 2 manual seat belt assembly that must meet the occupant crash protection requirements of S5.1 of this standard installed at a front outboard designated seating position, and each vehicle with a Type 2 manual seat belt assembly installed at a rear outboard designated seating position in compliance with a requirement of this standard, that has either automatic or manual tension-relieving devices permitting the introduction of slack in the webbing of the shoulder belt (e.g., "comfort clips" or "window-shade" devices) shall:

* * * * *

(c) Have, except for open-body vehicles with no doors, an automatic means to cancel any shoulder belt slack introduced into the belt system by a tension-relieving device. In the case of an automatic safety belt system, cancellation of the tension-relieving device shall occur each time the adjacent vehicle door is opened. In the case of a manual seat belt required to meet S5.1, cancellation of the tension-relieving device shall occur, at the manufacturer's option, either each time the adjacent door is opened or each time the latchplate is released from the buckle. In the case of a Type 2 manual seat belt assembly installed at a rear outboard designated seating position, cancellation of the tension-relieving device shall occur, at the manufacturer's option either each time the door designed to allow the occupant of that

seating position entry and egress of the vehicle is opened or each time the latchplate is released from the buckle. In the case of open-body vehicles with no

seating position entry and egress of the vehicle is opened or each time the latchplate is released from the buckle. In the case of open-body vehicles with no doors, cancellation of the tension-relieving device may be done by a manual means.

§ 571.210 [Amended]

7. S4.1.1 of Standard No. 210 is revised to read as follows:

S4.1.1 Seat belt anchorages for a Type 2 seat belt assembly shall be installed for each forward-facing outboard designated seating position in passenger cars other than convertibles and for each designated seating position for which a Type 2 seat belt assembly is required by Standard No. 208 (49 CFR 571.208) in vehicles other than passenger cars. Seat belt anchorages for a Type 2 seat belt assembly shall be installed for each rear forward-facing outboard designated seating position in convertible passenger cars manufactured on or after September 1, 1991.

§ 571.222 [Amended]

8. S5(b) of Standard No. 222 is revised to read as follows:

S5. *Requirements.* * * *

(b) Each vehicle with a gross vehicle weight rating of 10,000 pounds or less shall be capable of meeting the following requirements at all seating positions other than the driver's seat:

(1)(A) In the case of vehicles manufactured before September 1, 1991, the requirements of §§ 571.208, 571.209, and 571.210 as they apply to multipurpose passenger vehicles; or

(B) In the case of vehicles manufactured on or after September 1, 1991, the requirements of S4.4.3.3 of § 571.208 and the requirements of §§ 571.209 and 571.210 as they apply to school buses with a gross vehicle weight rating of 10,000 pounds or less; and

(2) The requirements of S5.1.2, S5.1.3, S5.1.4, S5.1.5, and S5.3 of this standard. However, the requirements of §§ 571.208 and 571.210 shall be met at W seating positions in a bench seat using a body block as specified in Figure 2 of this standard, and a particular school bus passenger seat (i.e., a test specimen) in that weight class need not meet further requirements after having met S5.1.2 and S5.1.5, or after having been subjected to either S5.1.3, S5.1.4, or S5.3 of this standard or § 571.210.

Issued on October 27, 1989.

Jeffrey R. Miller,

Acting Administrator.

National Oceanic and Atmospheric Administration

50 CFR Part 675

[Docket No. 81131-9019]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of rescinding prohibition on receipt of groundfish.

SUMMARY: NOAA announces the rescission of the closure to directed fishing for rock sole by joint venture processing (JVP). This action, taken under provisions of the fishery management plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP), is necessary to assure optimum use of groundfish in that area. It is a conservation and management measure intended to promote fishery objectives of the North Pacific Fishery Management Council (Council).

DATES: This notice is effective October 27, 1989. Comments will be accepted through November 13, 1989.

ADDRESSES: Comments should be mailed to Steven Pennoyer, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802, or be delivered to Room 453, Federal Building, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Janet E. Smoker (Fishery Management Biologist, NMFS), 907-586-7230.

SUPPLEMENTARY INFORMATION: The FMP is implemented by rules appearing at 50 CFR 611.93 and part 675.

Earlier this year, NOAA announced the prohibition of receipt by foreign processors of rock sole taken in a directed fishery (54 FR 7933, February 24, 1989). A later action (54 FR 37112, September 7, 1989) apportioned sufficient amounts of rock sole (25,000 metric tons) to JVP to provide bycatch amounts for additional amounts of pollock, yellowfin sole, and "other flatfish" which were apportioned to JVP by the same action. The prohibition of receipt by foreign processors of rock sole taken in a directed fishery remained in effect.

During the fall joint venture fishery, the bycatch rate of rock sole in the yellowfin sole and "other flatfish" fisheries has averaged about 10 percent. However, recently joint venture vessels have moved into areas where they have encountered rates as high as 40 percent. Under the definition of directed fishing, vessels cannot retain on board an amount of rock sole equal to or greater than 20 percent of the total amount of fish or fish products on board (as calculated in round weight equivalents). As a result, large amounts of rock sole are being discarded and wasted by vessels which receive groundfish catches composed of more than 20 percent rock sole. This wastage is contrary to Council and NMFS policy.

To date, only 48,557 metric tons of the originally specified total allowable catch (TAC) for rock sole (90,762 metric tons) has been taken by domestic processing (DAP) and JVP fisheries combined. Allowing foreign processors to receive rock sole taken in directed fisheries will not result in overfishing of rock sole stocks because more than sufficient tonnage remains in TAC to provide for anticipated catches by DAP and JVP fisheries during the remainder of the year.

Therefore, foreign processors may receive rock sole taken in directed fisheries, effective noon, Alaska Daylight Time, October 27, 1989.

Classification

This action is taken under the authority of 50 CFR 675.20(b) and complies with Executive Order 12291.

The Assistant Administrator for Fisheries finds for good cause that it is impractical and contrary to the public interest to provide prior notice and comment. Immediate effectiveness of this notice is necessary to avoid wastage of amounts of rock sole discarded in order to avoid the threshold established for directed fishing. However, interested persons are invited to submit comments in writing to the address through November 13, 1989.

Proposed Rules

Federal Register
Vol. 54, No. 211
Thursday, November 2, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 989

[FV-89-111PR]

1989-90 Expenses and Assessment Rate Under Marketing Order No. 989 Raisins Produced From Grapes Grown in California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize expenditures and establish an assessment rate under Marketing Order No. 989 for the 1989-90 fiscal year established under the federal marketing order for raisins produced from grapes grown in California. Authorization of this budget would allow the Raisin Administrative Committee (Committee) to incur reasonable and necessary expenses to administer the marketing order program. Funds for the program would be derived from assessments on handlers of California raisins.

DATE: Comments must be received by November 13, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, F&V, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Patricia A. Petrella, Marketing Specialist, Marketing Order Administration Branch, Room 2525-S, F&V, AMS, USDA, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 475-3920.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Agreement and Order No. 989 (7 CFR Part 989), both as amended, regulating the handling of raisins produced from grapes grown in California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are an estimated 23 handlers of California raisins subject to regulation under this marketing order and approximately 5,000 producers of California raisins. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The minority of handlers and the majority of producers of raisins may be classified as small entities.

The federal marketing order for California raisins requires that the assessment rate for a particular marketing year shall apply to all assessable raisins handled from the beginning of such year. An annual budget of expenses is prepared by the Committee and submitted to the U.S. Department of Agriculture (Department) for approval. The members of the Committee are handlers and producers of regulated raisins. They are familiar with the Committee's needs and with the costs for goods, services, and personnel in their local area and are thus in a position to formulate an appropriate budget. The budget is formulated and discussed in public meetings, so that all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the Committee is derived by dividing anticipated expenses by expected shipments of assessable raisins. That rate is applied to actual shipments to produce sufficient income to pay the Committee's expected expenses. The budget of expenses and rate of assessment are usually recommended by the Committee shortly after the season starts. Expenses are incurred on a continuous basis; therefore, the budget of annual expenses and assessment rate approval must be expedited so that the Committee will have funds to meet its obligations.

The Committee met on October 5, 1989, as required by the marketing order, and unanimously recommended 1989-90 marketing order expenditures of $483,405 and an assessment rate of $1.50 per assessable ton of raisins. In comparison, 1988-89 marketing year budgeted expenditures were $435,000, and the assessment rate was 1.50 per ton. Assessment income for 1989-90 is estimated at $483,405 based on 322,270 tons of assessable raisins.

While this action would impose some additional costs on handlers of California raisins, including small entities, the costs are in the form of uniform assessments on all handlers. Any costs to handlers are expected to be more than offset by benefits derived from the operation of the marketing order. Therefore, the Administrator of the Agricultural Marketing Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Based on the foregoing, it is found and determined that a comment period of less than 30 days is appropriate because the budget and assessment rate approval for this program needs to be expedited. The Committee must have sufficient funds to pay its expenses, which are incurred on a continuous basis.

List of Subjects in 7 CFR Part 989

California, Marketing agreements and orders, Raisins.

For the reasons set forth in the preamble, it is proposed that § 989.340 be added as follows:

1. The authority citation for 7 CFR

RIN 2502–AE70

Section 8 Certificate Program, Moderate Rehabilitation Program and Housing Voucher Program; Correction

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects the public comment due date for the proposed rule concerning the denial or termination of assistance for drug-related or violent criminal activities, which was published on October 26, 1989, at 54 FR 43594, to provide a 30-day comment period instead of a 60-day comment period. The corrected public comment due date is November 27, 1989.

DATE: Comment due date: November 27, 1989.

ADDRESS: Interested persons are invited to submit comments regarding this rule to the Office of General Counsel, Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, Washington, DC 20410–0500. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying on weekdays between 7:30 a.m. and 5:30 p.m. at the above address.

As a convenience to commenters, the Rules Docket Clerk will accept public comments transmitted by facsimile ("FAX") machine. The telephone number of the FAX receiver is (202) 755–2575. (This is not a toll-free number.) Only public comments of six or fewer total pages will be accepted via the FAX transmittal. This limitation is necessary in order to assure reasonable access to the equipment. Comments sent by FAX in excess of six pages will not be accepted. Receipt of FAX transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Rules Docket Clerk, ((202) 755–7084). (This is not a toll-free number.)

FOR FURTHER INFORMATION CONTACT: Lawrence Coldberger, Director, Office of Elderly and Assisted Housing, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410–8000, telephone (202) 755–5720. Hearing- or speech-impaired individuals may call HUD's TDD number, (202) 426–0015. (These telephone numbers are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: On October 26, 1989, the Department published a proposed rule (54 FR 43594), which proposed to revise the Certificate Program, Moderate Rehabilitation Program, and Housing Voucher Program regulations to permit a Public Housing Agency (PHA) (including an Indian Housing Authority) to deny or terminate assistance to applicants and participants in these programs if family members are engaging in drug-related criminal activities or in violent criminal activities. Because the purpose of this proposed rule is to further the government's war against drugs and violent crime, and to ensure the provision of decent and safe housing for eligible families and for individuals residing near assisted families, it is in the public interest to promulgate a final effective rule as rapidly as possible. Accordingly, it was the Department's intention to provide an abbreviated 30-day public comment period. The proposed rule, as published, however, inadvertently provided the normal 60-day comment period.

Accordingly, FR Doc. 89–25236, published in the **Federal Register** issue of Thursday, October 26, 1989 (54 FR 43594), is corrected as follows:

1. The respective authority citations for part 882 and part 887 would continue to read as follows:

Authority: Secs. 3, 5, 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, 1437f); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. The public comment due date which was December 26, 1989, is corrected to read as follows:

Date: Comment due date: November 27, 1989.

Dated: October 27, 1989.

Peter Monroe,

Acting General Deputy Assistant Secretary for Housing—Deputy, Federal Housing Commissioner.

[FR Doc. 89–25796 Filed 11–1–89; 8:45 am]

BILLING CODE 4210–27–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AD71

Definition of Former Prisoner of War

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule; correction.

SUMMARY: The Department of Veterans Affairs (VA) is correcting previously published information concerning the definition of former prisoner of war.

FOR FURTHER INFORMATION CONTACT: Bill Leonard, Consultant, Regulations Staff (211B), Compensation and Pension Service, Veterans Benefits Administration, (202) 233–3005.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 3, 1989, (54 FR 40688), VA published a proposed amendment to its adjudication regulation defining former prisoner of war (POW) and establishing criteria for deciding such status. In that proposed regulation a word was inadvertently misspelled and is hereby corrected.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Donald R. Howell,

Acting Chief, Directives Management Division.

§ 3.1 [Corrected]

For the foregoing reason, the Department of Veterans Affairs hereby corrects FR Doc. 89–23249 in the issue of October 3, 1989, to read as follows:

1. On page 40687, first column, paragraph (y)(2)(i), 7th line, change the word "detailed" to "detained".

2. On page 40687, second column, paragraph (y)(2)(ii), 3rd and 6th lines, change the word "detailed" to "detained".

[FR Doc. 89–25706 Filed 11–1–89; 8:45 am]

BILLING CODE 8320–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL–3677–3]

Federal Assistance Limitations; State of Illinois

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Notice of Proposed Rulemaking.

SUMMARY: USEPA proposes to limit certain Federal highway funding assistance for Cook, Lake, Kane, and DuPage Counties, Illinois. These limitations apply to funds provided under Title 23 of the United States Code. The USEPA is taking action pursuant to Section 176(a) of the Clean Air Act (Act), because the State of Illinois has failed to adopt and submit to USEPA a vehicle inspection and maintenance (I/M) program commensurate with the severity of the ozone problem in the Chicago area. USEPA believes that enhancement of the existing I/M program is necessary to help bring the area into attainment of the ozone National Ambient Air Quality Standard (NAAQS) and that such an I/M program is a critical component of the "reasonable efforts" Illinois must make under Section 176(a). Thus, USEPA has concluded that the conditions under which the Agency must propose to impose Federal highway funding restrictions under Section 176(a) have been met in Cook, Lake, Kane, and DuPage Counties, Illinois.

DATES: USEPA will schedule a public hearing on its proposed actions regarding Federal highway funding restrictions in the future. A notice of this public hearing will be published in the **Federal Register**. The public comment period will remain open until 30 days after the public hearing.

ADDRESSES: Copies of all materials related to USEPA's proposed action may be inspected during normal business hours at the following addresses: (It is recommended that you telephone Randolph O. Cano at (312) 886–6036 before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch, 230 South Dearborn Street, Chicago, Illinois 60604.

Illinois Environmental Protection Agency, Division of Air Pollution Control, 2200 Churchill Road, Springfield, Illinois 62706.

Comments on this proposed rule should be addressed to: (Please submit an original and three copies, if possible.)

Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Randolph O. Cano, Air and Radiation Branch (5AR–26), Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6036.

SUPPLEMENTARY INFORMATION

A. Background

Congress amended the Clean Air Act in 1977 to address the major health problems posed by the States' failures to attain the National Ambient Air Quality Standards (NAAQS) for criteria pollutants. Congress required States to revise their State Implementation Plans (SIPs) to provide for attainment of the standards by December 31, 1982, and to submit the revised plans to USEPA by January 1, 1979. Provisions for an extension to December 31, 1987, were available if a State could demonstrate that, despite the implementation of all reasonably available control measures, the December 31, 1982, attainment deadline could not be met for ozone and/or carbon monoxide (CO). (See Section 172(a)). In return for this extension, Congress required the States to submit additional air pollution control measures in their 1979 SIP revisions (Section 172(b)(11)). One such additional measure was a commitment to implement an I/M program on an expeditious schedule.

To ensure that Federal funds do not further contribute to the already serious air pollution problems, and to encourage State cooperation, Congress also adopted Section 176(a). Section 176(a) of the Act prohibits the Administrator of USEPA and the Secretary of Transportation from awarding certain Federal assistance funds under certain circumstances. These circumstances include where: (1) an area has not attained a primary ambient air quality standard; (2) transportation control measures are necessary to attain that primary ambient air quality standard; and (3) the USEPA Administrator determines that the State has failed to submit, and is not making reasonable efforts to submit, a plan which considers each of the elements of Section 172 of the Act, including the requirement for I/M. On April 10, 1980 (45 FR 24692), after prior notice and public comment, USEPA and the Department of Transportation (DOT) published final policies and procedures for imposing funding restrictions under Section 176(a).

In the case of Illinois, in June 1979 the State of Illinois submitted its 1979 ozone and CO plan for the Chicago area.[1] As part of this plan, Illinois requested an extension of the ozone attainment deadline to 1987 for Cook, Lake, Kane, and DuPage Counties. USEPA approved this request on February 21, 1980 (45 FR 11472). The State subsequently implemented an I/M program on May 1, 1986.[2]

[1] The original Illinois ozone nonattainment counties for the Chicago area consisted of all of Air Quality Control Region 67, i.e., Cook, DuPage, Grundy, Kane, Kankakee, Kendall, Lake, McHenry, and Will Counties. See 43 FR 8962 (March 3, 1978), and 43 FR 45993 (October 5, 1978). On May 16, 1983 (48 FR 21947), USEPA redesignated Grundy, Kankakee, Kendall, McHenry and Will counties to attainment. On June 8, 1988 (53 FR 20722), USEPA proposed to redesignate Grundy, Kendall, McHenry, and Will Counties to nonattainment for ozone under the provisions of the Mitchell-Conte Amendment of December 22, 1987, (while renewing the ozone nonattainment designations of Cook, DuPage, Kane, and Lake Counties). This proposal was based on the concept that all portions of a Consolidated Metropolitan Statistical Area (CMSA) contribute to an ozone problem, and all of these Illinois counties are within the chicago CMSA.

[2] Illinois' I/M program is a contrator operated, centralized network of testing facilities for gasoline powered vehicles and trucks registered in all of Cook County, the eastern third of Lake County and the eastern half of DuPage County. Vehicles are tested for hydrocarbon and CO emissions. A probe is inserted into the vehicle tailpipe and the exhaust is analyzed for emissions. If the vehicle passes the test, and annual sticker is issued that indicates compliance with the law. If the vehicle fails to pass the test, the vehicle owner is required to make necessary repairs and submit the vehicle for a retest. If the vehicle is unable to pass the retest, a 1 year waiver is available under certain conditions.

Enforcement of the program is accomplished through a combination of computerized matching and sticker enforcement. The primary enforcement mechanism is the suspension of the drivers' licenses of vehicle owners and suspension of the vehicles' registrations. The suspensions are made automatically by a computer system which tracks vehicles required to be tested and actual test data.

imposition of the funding restrictions in Section 176(a) is automatic and mandatory whenever the USEPA determines that a State has not

VOL 54 ISS 211 NO 2 1989 UMI

The December 31, 1987, ozone attainment deadline has now passed, and the Chicago area still has not attained the ozone NAAQS. Because the State's ozone SIP did not provide for attainment of the NAAQS by that date or any near-term date thereafter, on October 17, 1988, USEPA announced in the **Federal Register** its disapproval of the Chicago portion of the Illinois Ozone SIP (53 FR 40415). On January 18, 1989, the United States District Court for the Eastern District of Wisconsin ordered USEPA to promulgate Federal Implementation Plans (FIPs) for this area and for northwestern Indiana within 14 months, or by March 18, 1990.[3] In a July 11, 1989 (54 FR 29063), Advance Notice of Proposed Rulemaking (ANPR), USEPA gave advance notice of several elements of the FIPs. Among those elements were the emissions inventory for the area and the required degree of emission reduction to attain and maintain the ozone NAAQS. Mobile sources account for approximately 50 percent of the Illinois volatile organic compound (VOC) emissions inventory. Further, USEPA stated that it believes a 72 percent reduction in VOC emissions from 1988 levels is necessary to bring the area into attainment of the ozone NAAQS *Id.*

USEPA has been evaluating available control measures necessary to bring the Chicago area into attainment of the ozone primary NAAQS. Obviously, transportation control measures will be a necessary component of any plan designed to obtain a 72 percent emission reduction and assure attainment and maintenance of the ozone standard in the Chicago area. Additionally, USEPA believes that enhancement of the current I/M program is an available and essential element of any attainment plan for the Chicago area,[4] and hence is a critical component of the "reasonable efforts" Illinois must make under Section 176(a) to avoid the imposition of Federal highway funding restrictions for the nonattainment counties of Cook, Lake, Kane, and DuPage. Enhancement of the I/M program is a control measure USEPA has identified at the current time as a critical component of "reasonable efforts".

USEPA has been required by the Court to develop a plan to bring the Chicago area into attainment of the health based ozone NAAQS. In addition, under the Act, the State of Illinois is under a continuing obligation to create its own plan. USEPA believes it is reasonable and necessary for the State of Illinois to implement enhancements to its I/M program at this time. The level of enhancements Illinois should implement has already been implemented in Wisconsin's I/M program, and the State of Indiana has enacted legislation requiring the implementation of the enhancements beginning in January 1990.

In the Chicago area, continuing violations of the ozone NAAQS are occurring, transportation control measures will be necessary in any plan designed to achieve attainment and maintenance of the ozone standard, and Illinois has failed to submit an I/M program commensurate with the severity of the ozone problem in the Chicago area, which is a critical component of the "reasonable efforts" Illinois must make under Section 176(a). Thus, the criteria listed under Section 176(a) have been met, and for this reason USEPA is proposing imposition of Federal highway funding restrictions in Cook, Lake, Kane, and DuPage Counties.

On August 4, 1989, USEPA notified the State and the Federal Highway Administration (FHWA) that the USEPA/DOT procedures for imposing the funding limitations under Section 176(a) were being initiated.[5] These letters inititated the 30-day consultation period outlined in the April 10, 1980 (45 FR 24692), **Federal Register** guideline for the Section 176(a) process. If the State enacts and implements adequate enhancements to it I/M program which achieve a level of performance equivalent to the enhanced I/M program design cited above, then USEPA would not impose sanctions for this reason.

The consultation period ended September 4, 1989. A description of all further correspondence and meetings which have occurred after August 4, 1989, follows.

In an August 31, 1989, letter to the Regional Administrator, Illinois requested a consultation meeting. On September 26, 1989, a consultation meeting was held. Representative from the Illinois Environmental Protection Agency (IEPA), the Illinois Department of Transportation, the Regional and District Offices of FHWA, USEPA's Office of Mobile Sources, and Region V of USEPA were present.

During the meeting, Region V discussed the rationale for pursuing Federal highway funding restrictions in Illinois. Representatives from the State of Illinois posed several questions related to enhancement of the State's I/M program and expressed their view on various enhancements. The State representatives pointed out that they wuld have to obtain direction and authorization from the legislature before any enhancements could be implemented. The representatives indicated their intent to provide more information regarding specific enhancements at a future time.

USEPA discussed the procedures which would be followed regarding imposition of Federal highway funding restrictions. USEPA informed the State that it would proceed with the process to propose the imposition of funding restrictions and would hold a public hearing regarding the proposed action. USEPA also notified the State that the State legislature would have an opportunity to enact measures to enhance the I/M program before a final decision is made on whether to impose the funding restrictions.

On October 6, 1989, IEPA submitted several enhanced I/M program alternatives for review by USEPA. These alternatives were intended to meet USEPA's performance standard for enhanced I/M. The submittal included possible enhanced I/M scenarios, the MOBILE 4 printouts from which the vehicle emission rates were derived, and a discussion of the input parameters used by IEPA in the model runs. IEPA committed to develop a formal enhanced I/M proposal by October 30, 1989, based on USEPA's response.

B. Proposed Findings and Actions

One available measure that USEPA has identified which Illinois could implement to help bring the area into attainment of the ozone NAAQS is to enhance the existing I/M program. Because USEPA believes that the State of Illinois has not used reasonable efforts to submit all measures necessary to attain and maintain the ozone NAAQS in the Chicago area,[6] USEPA proposes to impose Federal highway funding restrictions in Cook, Lake, Kane, and DuPage Counties under Section 176(a) of the Act.

During the public comment period, USEPA will consider any comments on this issue. If Illinois fails to remedy this situation before USEPA takes final action, the resulting funding limitations become effective on the date that the final rulemaking is published in the **Federal Register**. Upon final rulemaking, the Secretary of Transportation will not approve any projects or award any grants in Cook, Lake, Kane, and DuPage Counties under Title 23 of the United States Code, except for safety, mass transit, or transportation improvement projects related to air quality improvement or maintenance.

C. Opportunity for Public Hearing

USEPA will schedule a public hearing on its proposed actions regarding Federal highway funding restrictions in the future. A notice of this public hearing will be published in the **Federal Register.**

D. Request for Public Comment

Interested parties are invited to comment on all aspects of the proposed findings including USEPA's proposed action to impose Federal highway funding restrictions. USEPA will consider all testimony received at the public hearings. Additionally, USEPA is keeping the public comment period open for 30 days after the public hearing date, to provide an opportunity for submission of rebuttal information and supplementary information.

E. Regulatory Impact

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, USEPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. Under 5 U.S.C. 605(b), this requirement may be waived if the Agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and governmental entities with jurisdictions over populations of less than 50,000.

If USEPA takes final action and finds that the State has failed to submit, and is not making reasonable efforts to submit, a SIP that considers each of the elements required by Section 172, certain highway construction funds under Title 23 of the United States Code will be withheld. Thus, some small entities may be affected by final USEPA action.

USEPA cannot reliably predict the impact of Clean Air Act restrictions under Section 176(a) because of the exemptions authorized for certain highway projects. Careful review and evaluation of each project is necessary to determine whether or not a project is exempt. Consequently, USEPA is making no quantified assessment of the potential economic impact on small entities that may result from today's proposal.

Furthermore, although USEPA believes that a final action might have some impact on small entities this impact cannot affect the Agency's actions. Under the Clean Air Act, the imposition of the funding restrictions in Section 176(a) is automatic and mandatory whenever the USEPA determines that a State has not submitted, or is not making reasonable efforts to submit, a SIP which considers each of the elements of Section 172.

Under Executive Order 12291, today's action is not "Major." It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to USEPA, and any USEPA response, are available for public inspection at the USEPA Region V office listed above.

BILLING CODE 6560-50-M

Motorists are also subject to fines based on operating a vehicle with an expired or missing sticker.

USEPA's evaluation of the State's I/M program is contained in technical support documents dated June 6, 1988, February 16, 1987, October 20, 1987, and June 5, 1989. These documents are available from the Region V Office listed above. On April 24, 1989 (54 FR 16372), USEPA proposed to approve the Illinois I/M program as meeting current USEPA policy requirements for 1982 ozone SIP approval. USEPA will take final action on this program in a future **FEDERAL REGISTER** notice.

[3] In April 1987 the State of Wisconsin filed a suit under Section 304 of the Act in the United States District Court for the Eastern District of Wisconsin against Lee M. Thomas, then USEPA Administrator (Civil Action No. 87–C–395, now *Wisconsin v. Reilly*). Two counts of the complaint alleged that USEPA had failed to perform a non-discretionary duty to approve or disapprove the greater Chicago area ozone SIPs of Illinois and Indiana. Two other counts requested the Court to order USEPA to develop FIPs for the northeastern Illinois and northwestern Indiana portions of the Chicago-Gary-Lake County (IL), IL–IN–WI Consolidated Metropolitan Statistical Area (CMSA) within 6 months. The complaint also sought an injuction compelling USEPA to impose and enforce a moratorium on the construction and modification of major stationary sources in the Illinois and Indiana portions of the CMSA. While the litigation was in progress, USEPA published final disapprovals of the ozone SIP for Illinois on October 17, 1988, and for Indiana on November 18, 1988, thereby making the construction moratorium effective as to VOC sources in both areas. The Court, on January 18, 1989, ordered USEPA to develop FIPs for the Illinois and Indiana portions of the Chicago area within 14 months. USEPA is in the process of developing such FIPs.

[4] An appropriate level of performance which could be achieved through changes to the I/M program would be that which is equivalent in performance (but not necessarily identical) to an enhanced I/M program containing the following features:

—centralized biennial inspection;

—20 model years of passenger cars and light trucks;

—20 percent stringency for pre-1981 vehicles;

—idle tests;

—207(b) emission standards for 1981 and newer vehicles

—catalyst, inlet, and lead deposit inspections on 1981 and newer vehicles;

—five percent waiver on the emission short test.

The computer model Mobile 4 must be used to show equivalency in performance to the above design by using national or local inputs of tampering/misfueling rates, vehicle type mix, average speed, etc.

Possible enhancements Illinois could implement to achieve the level of performance of the above enhanced I/M program design would be to require the inspection of the gas cap, fuel inlet restrictor, and catalytic converter. If the fuel inlet restrictor test is failed the catalytic converter must be replaced. In addition to this enhancement, the geographic coverage of the I/M program could be expanded or other program changes such as reducing the waiver rate could be made to achieve the performance standard. All of these measures have been successfully implemented in other I/M program; therefore, USEPA considers them available for implementation. Any program design, that USEPA determines is equivalent in performance level to the enhanced I/M program outlined above would be acceptable.

[5] The USEPA Region V Regional Administrator, Valdas V. Adamkus, notified the FHWA Regional Administrator, Herbert R. Teets, and the Governor of Illinois, by letters, that the State of Illinois had failed to submit an ozone attainment plan which considers each element of Section 172 of the Act.

[6] On October 17, 1988, USEPA disapproved the Chicago portion of the Illinois Ozone SIP (53 FR 40415).

FEDERAL MARITIME COMMISSION

46 CFR Part 572

[Docket No. 89–23]

Agreements by Ocean Common Carriers and Other Persons Subject to the Shipping Act of 1984

AGENCY: Federal Maritime Commission.

ACTION: Proposed Rule.

SUMMARY: The Federal Maritime Commission proposes to remove the membership size limitation in its exemption of membership changes in certain passenger vessel operator agreements from the notice and waiting period requirements of section 6 of the Shipping Act of 1984 and the Information Form, notice and waiting period requirements of 46 CFR part 572. This will enable such membership changes to become effective upon filing with the Federal Maritime Commission, regardless of the membership size of the involved agreement.

EFFECTIVE DATE: Comments due by December 4, 1989.

ADDRESSES: Comments (original and 15 copies) to: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523–5725.

FOR FURTHER INFORMATION CONTACT: Austin L. Schmitt, Director, Bureau of Trade Monitoring, Federal Maritime

1989
UMI

Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523–5787.

SUPPLEMENTARY INFORMATION: The Federal Maritime Commission ("Commission"), in a seperate order issued concurrently with this notice, has revised 46 CFR 572.309(a)(2)(i) to exempt membership changes in certain passenger vessel operator agreements from certain procedural requirements of the Shipping Act of 1984, 46 U.S.C. app. 1701, *et seq.* ("1984 Act") and the Commission's rules thereunder, 46 CFR part 572. The exemption allows such membership changes to become effective upon filing with the Commission. Petition No. P2–89, *Cruise Lines International Association—Application for Section 16 Exemption* (Docket No. 89–22). This exemption is being granted in response to an Application filed by Cruise Lines International Association ("CLIA"), which requested that membership changes in passenger vessel operator discussion agreements open to all passenger vessels of a class defined in the agreements and consisting of 15 or more members, which do not contain ratemaking, pooling or joint service authority, be exempted from the notice and waiting period requirements of section 6 of the 1984 Act, and the Information Form, notice and waiting period requirements of 46 CFR part 572.

The Commission is granting the essential exemption requested by CLIA, with some modifications to narrow the exemption's scope to also exclude membership changes in passenger vessel operator agreements containing sailing or space chartering authority and to otherwise improve the exemption's clarity and definiteness.

The Commission has also determined to propose an expansion of the exemption's scope to remove the membership size limitation, thus, affording uniform treatment of membership changes in all passenger vessel discussion agreements, regardless of the size of the agreement's membership. The membership size limitation issue was outside the scope of Petition No. P2–89 and could not, therefore, be addressed in that proceeding. It appears that the expanded exemption will comply with the requirements of section 16 of the 1984 Act in that it would be unlikely to substantially impair effective regulation by the Commission, be unjustly discriminatory, result in a substantial reduction in competition, or be detrimental to commerce.

The Commission has determined that this rule is not a "major rule" as defined in Executive Order 12291 dated February 17, 1981, because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effect on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Acting Chairman of the Commission certifies pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, that this rule will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units or small governmental jurisdictions. The primary economic impact of this rule will be on passenger vessel operating ocean common carriers, which generally are not small entities.

The Commission has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, no environmental assessment or environmental impact statement was prepared.

The Paperwork Reduction Act, 44 U.S.C. 3501–3520, does not apply to this Proposed Rule because the amendment to part 572 of Title 46, Code of Federal Regulations, does not impose any addition reporting or recordkeeping requirements or change the collection of information from members of the public which require the approval of the Office of Management and Budget.

List of Subjects in 46 CFR Part 572

Antitrust, Contracts, Maritime carriers, Administrative practice and procedures, Rates and fares.

Therefore, pursuant to 5 U.S.C. 553, and sections 5, 16 and 17 of the Shipping Act of 1984, 46 U.S.C. 1704, 1715, 1716, in order to exempt membership changes in certain passenger vessel discussion agreements from certain requirements of the 1984 Act, and the Commission's implementing regulations thereof, the Commission proposes to amend part 572 of title 46 of the Code of Federal Regulations as follows:

PART 572—[AMENDED]

1. The authority citation to part 572 continues to read:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 1701–1707, 1709–1710, 1712 and 1714–1717.

2. Section 572.309 is amended by revising paragraph (a)(2)(i) to read as follows:

§ 572.309 Miscellaneous modifications to agreements—exemptions.

(a) * * *

(2) * * *

(i) *Article 3*—Parties to the agreement (limited to conference agreements, and discussion agreements among passenger vessel operating ocean common carriers which are open to all ocean common carriers operating passenger vessels of a class defined in the agreements, which do not contain ratemaking, pooling, joint service, sailing or space chartering authority).

* * * * *

By the Commission.

Joseph C. Polking,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89–460, RM–6982]

Radio Broadcasting Services; Minneapolis, KS

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a proposal filed by Ruby J. Hoeflicker, requesting the allotment of FM Channel 224A to Minneapolis, Kansas, as that community's first FM broadcasting service. The coordinates for Channel 224A are 39–07–30 and 97–42–18.

DATES: Comments must be filed on or before December 7, 1989, and reply comments on or before December 22, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Tom W. Davidson, Sidley & Austin, 1722 Eye Street NW., Wahington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 89–460, adopted October 2, 1989, and released October 16, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Wahington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 22037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts. For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

BILLING CODE 6712–01–M

47 CFR Part 73

[MM Docket No. 89–464, RM–6859]

Radio Broadcasting Services; Lynchburg, VA

AGENCY: Federal Communications Commission.

ACTION: Proposd rule.

SUMMARY: This document requests comments on a petition by CRS Communications, Inc., licensee of Station WXYU(FM), Channel 289A, Lynchbury, Virginia, proposing the substitution of Channel 289C3 for Channel 289A at Lynchburg, and the modification of its station's license to specify operation on the higher powered channel. A site restriction of 20.1 kilometers (12.5 miles) east of the city is proposed. The coordinates are 37–25–37 and 78–55–00. The proposal could provide the Lynchburg with its first wide coverage area FM service.

DATES: Comments must be filed on or before December 7, 1989, and reply comments on or before December 22, 1989.

ADDRESSES: Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows: Jerry V. Haines, Esquire, Edward A. Yorkgitis, Jr., Wiley, Rein & Fielding, 1776 K Street NW., Washington, DC 20006 (Counsel for petitioner).

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 89–464, adopted September 26, 1989, and released October 16, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 89–22; Notice 01]

RIN 2127–AD13

Federal Motor Vehicle Safety Standards; Roof Crush Resistance

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to amend Federal Motor Vehicle Safety Standard No. 216, Roof Crush Protection—Passenger Cars, to extend its requirements to light trucks. (For the purpose of this notice, the term "light trucks" includes vans and other multipurpose passenger vehicles (MPV's), as well as trucks and buses, with a gross vehicle weight rating of 10,000 pounds or less.) This proposal is part of the agency's effort to ensure that occupants of light trucks are adequately protected, particularly in rollover events. NHTSA notes that the sales of light trucks are increasing and that those vehicles are being used increasingly to transport people instead of or in addition to property.

DATES: *Comment closing date:* Comments on this notice must be received by NHTSA not later than January 2, 1990.

Proposed effective date: NHTSA proposes to apply these requirements to multipurpose passenger vehicles, trucks and buses that have a gross vehicle weight rating of 10,000 pounds or less, manufactured on or after September 1, 1991.

ADDRESS: Comments should refer to the docket and notice number of this notice and be submitted to: Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. (Docket hours are 9:30 a.m. to 4:00 p.m. Monday through Friday.)

FOR FURTHER INFORMATION CONTACT: Mr. Gary R. Woodford, Room 5320, NHTSA, 400 Seventh St., SW., Washington, DC 20590. Telephone: (202) 366–4804.

SUPPLEMENTARY INFORMATION:

Background

Standard No. 216 is intended to reduce deaths and injuries due to the crushing of the roof into the passenger compartment in rollover crashes. To that end, the standard currently establishes strength requirements for the forward portion of the roof (i.e., the area most likely to sustain severe damage in a rollover crash) of passenger cars, to increase the resistance of the roof to intrusion and crush. The roof of a stationary vehicle is subjected to a force of 1½ times the unloaded weight of the vehicle or 5,000 pounds, whichever is less. This force is gradually applied by a rigid test device in a static test. During the test, the device may not depress the roof structure more than five inches.

BEST COPY AVAILABLE

In addressing light truck safety, including the possible extension of roof crush resistance requirements to light trucks, buses and multipurpose passenger vehicles, the agency submitted two reports to Congress. The first of these is entitled, "Light Truck and Van Safety," (May 1987). The second, an April 1988 update to the 1987 report, is entitled, "Safety Programs for Light Trucks and Multipurpose Passenger Vehicles." As noted in the following discussion, these reports set forth much of the agency's view of light truck safety.

Standard No. 216 currently applies to passenger cars, but not to light trucks, for the reasons set forth in NHTSA's April 1988 light truck report to Congress:

> In the early years of NHTSA's existence, the regulatory and research approach was based on a clear distinction between the design and intended purpose of passenger cars and light trucks. Unlike passenger cars, light trucks were designed and used primarily as cargo carrying vehicles rather than as people-carrying vehicles. In addition, because light trucks were structurally different than passenger cars, the agency anticipated that occupants of light trucks would not be as vulnerable to injuries as passenger car occupants. Also, car occupants suffered far more deaths and injuries than did occupants of light trucks. Thus, the initial standards concentrated on requirements for passenger cars so that the agency could reduce deaths and injuries in those vehicles.
>
> (April 1988, page two.)

From 1967 to 1982, the number of light trucks being used to transport passengers, instead of or in addition to property, significantly increased. The Census Bureau's "Truck Inventory and Use Survey" shows that the percentage of pickup truck use for personal transportation purposes increased from 51 percent in 1967 to 66 percent in 1982 and that the percentage of use for agricultural purposes decreased from 26 percent to 12 percent in the same time period. NHTSA's May 1987 Light Truck and Van Safety report to Congress found that, in general, light trucks and vans have been capturing an increased share of the light duty market (including passenger cars), rising from 14.9 percent in 1971 to 28.7 percent in 1985. The report also found that (1) in 1977, only 10.2 percent of light truck sales were compact vehicles, while in 1985, the figure was 52.6 percent; (2) pickup trucks were a declining portion of light truck sales, dropping from 66.8 percent in 1977 to 59.3 percent in 1985; (3) van sales slightly increased from 21.3 percent of light truck sales to 22.7 percent; and (4) there was a large shift within the population of new vans from conventional cargo vans toward compact passenger vans. The agency noted that the greater use of light trucks as passenger carrying vehicles was leading to increases in the number of light trucks and vans on the road, the number of persons transported in such vehicles, and consequently, the number of persons exposed to crashes in those vehicles.

Safety Need

There has thus been a convergence between light trucks and passenger cars, both in their structure (with many trucks in the compact size range) and in their use (with many trucks used for personal transportation rather than cargo). These changes point strongly toward the need to reevaluate the standards applicable to light trucks. NHTSA has responded to these changes regarding light trucks by evaluating the degree to which occupant safety in light trucks can be improved through the extension of existing standards to those vehicles. In conducting this evaluation, this agency was mindful that it is required by the National Traffic and Motor Vehicle Safety Act to ensure that each standard is appropriate for the vehicle type to which it applies.

In the case of Standard No. 216, the agency has observed a significantly greater incidence of rollover crashes per registered vehicle involving light trucks, compared to passenger cars. NHTSA believes that rollover protection requirements are especially important for light trucks in view of traffic crash data which show that the light truck fatality rate (per registered vehicle) in rollovers is approximately twice that for passenger cars. As the agency stated in its April 1988 report to Congress:

> In rollover crashes, the multipurpose passenger vehicle fatality rate was 196 percent (1985) and 153 percent (1986) above the average fatality rate for all light trucks and passenger cars combined. The fatality rate for small pickups was 118 percent (1985) above average and is 107 percent (1986) above average. The standard pickup rate was 51 percent (1985) above average and is 47 percent (1986) above average. Higher fatality rates for the above vehicles are largely a consequence of their greater propensity for rollover as compared to passenger cars; state accident data indicate pickups roll over 1.5 times more often than passenger cars, and multipurpose passenger vehicles roll over two to three times more often.
>
> (April 1988, p. 10.)

An update of these data for 1987 and 1988 indicated that in rollover crashes, the multipurpose passenger vehicle fatality rate was 137 percent (1987) and 98 percent (1988) above the average for light trucks and passenger cars combined. The fatality rate for small pickups was 103 percent (1987) and 104 percent (1988) above average. The standard pickup fatality rate was 63 percent (1987) and 65 percent (1988) above average. While the fatality rates for multipurpose passenger vehicles and small pickups have shown declines since 1985, the rates are still generally above the average light duty vehicle rate.

Crash data indicate that during the period 1985–1988, the number of fatalities involved in light truck rollover events were 2,995 (1985); 3,387 (1986); 3,658 (1987); and 3,815 (1988). The agency believes that the number of light truck occupants killed in rollover crashes can be significantly reduced by reducing the number of occupants ejected in those crashes. This belief is based on the finding in NHTSA's May 1987 light truck and van safety report that a principal cause of the high fatality rate in light truck rollover crashes is occupant ejection; over two thirds of light truck rollover fatalities are ejectees. Accordingly, increased use of safety belts and improvements to other features (e.g., glazing) may reduce rollover fatalities by reducing ejection and holding occupants in place within the passenger compartment during rollovers.

However, the agency believes that the benefits from these ejection-prevention measures will be fully realized only if adequate protection is provided to guard against the collapse of the passenger compartment roof in a rollover crash. NHTSA tentatively concludes that amending Standard No. 216 to set roof-crush requirements for light trucks will complement regulatory actions that are directed toward reducing ejections and the accompanying risk of injury and fatality in rollovers. NHTSA also notes that this agency is currently conducting research on ways to reduce the likelihood of rollover involvement.

NHTSA is proposing to require light trucks to withstand a force 1½ times their weight, without the 5,000-pound limit applicable to passenger cars. The agency included the 5,000-pound ceiling for cars primarily to avoid requiring the redesign of large cars that could not meet the limits on roof crush when tested at 1½ times their weight. At that time, the agency believed that requiring the redesign of large cars would be unnecessary in view of their lower rollover tendency.

NHTSA has tentatively determined that there is no equivalent reason why there should be a 5,000-pound limit on the force that light truck roofs must withstand. In light of their high rollover involvement and fatality rates, NHTSA tentatively concludes that light trucks should meet a force crush limit of 1½

times their weight and that a force ceiling should not be provided. NHTSA believes this action will help ensure the crashworthiness of light trucks in rollover crashes. However, the agency requests comments from the industry and public regarding the advantages and disadvantages of a weight ceiling for light trucks.

NHTSA also specifically requests comments relating to the possible impacts of this proposed rule on final-stage manufacturers and alterers, and whether those impacts should be reduced by applying the standard only to MPV's and trucks having a GVWR of 8,500 pounds or less. This issue is further discussed in NHTSA's preliminary regulatory evaluation for this proposal, copies of which have been placed in the agency's rulemaking docket. (A copy of the evaluation can be obtained by writing to: Docket Section, NHTSA, Room 5109, 400 Seventh St., SW., Washington, DC 20590.)

This proposed extension of Standard No. 216 excludes school buses from the category of light truck to which this NPRM is addressed. The reason for this is that school buses must already comply with their own roof crush and other rollover crash protection requirements which generally are the same as the requirements proposed in this notice. Standard No. 220, School Bus Rollover Protection (49 CFR 571.220), limits roof crush to not more than 5⅛ inches upon the application of vertical downward force to the bus roof of 1½ times the vehicle's unloaded weight. Similar to the rule proposed in this notice, Standard No. 220 does not set a 5,000-pound or other weight limit on the applied force, other than limiting the force to 1½ times the unloaded weight. Given the similarity in requirements of Standards 220 and 216, NHTSA believes school bus safety would not be significantly improved by extending Standard No. 216 to those vehicles.

Voluntary Compliance

NHTSA obtained information from light truck manufacturers showing that there appears to be widespread voluntary compliance with the requirements set forth in Standard No. 216 for cars. (This information has been placed in Docket No. 67–11, Notice 1.) Information available to NHTSA also indicates that the majority of light trucks meet the roof crush displacement limits of the standard when tested at 1½ times the vehicle's unloaded vehicle weight, even though the resulting force may exceed the 5,000 pound limit for passenger cars.

In past regulatory matters involving widespread voluntary compliance, the agency has generally concluded that there is no compelling safety need for it to act when vehicle manufacturers are voluntarily taking the desired steps absent any Federal requirement to do so. In those circumstances, NHTSA has frequently determined that rulemaking would impose a burden on the agency by requiring it to develop appropriate requirements, conduct a rulemaking proceeding, and use some of its enforcement budget to monitor compliance. Such rules would also impose additional paperwork burdens on the manufacturers, even though they would take the desired action in any case. Those burdens would be imposed without a commensurate safety benefit for the public, and would therefore represent unnecessary burdens.

However, on occasion, the agency proceeds with rulemaking in such situations, particularly when a standard of major importance is involved. For example, NHTSA recently issued a final rule requiring installation of lap/shoulder belts in the rear seats of cars, although most models were already voluntarily slated to be so equipped within the next few years.

NHTSA tentatively concludes that it is similarly appropriate to extend Standard No. 216 to light trucks, notwithstanding the current level of apparent voluntary compliance. The roof-crush protection represented by the standard is clearly important for light truck occupant safety, given the rollover rate for many of them. Further, although most manufacturers believe that their vehicles would comply with the standard's requirements for passenger cars, and information available to the agency indicates that most light trucks can comply when tested to 1½ times the unloaded vehicle weight, some manufacturers apparently do not meet the proposed standard for their entire light truck fleet. As light trucks continue to grow in popularity and sales, NHTSA believes it is important to ensure that all such vehicles meet at least the minimum standards specified in Standard No. 216. Moreover, the agency believes it is important to ensure that any new entrants to the light truck market will follow the lead of their competitors in meeting the proposed requirements. NHTSA therefore tentatively concludes that amending Standard No. 216 as proposed in this notice will satisfy a safety need by ensuring uniform safety performance for all affected vehicles.

Leadtime

NHTSA proposes that the requirements for light trucks become effective September 1, 1991. The agency tentatively concludes that the widespread voluntary compliance with Standard No. 216 demonstrates the availability of the engineering and manufacturing resources needed to implement this proposal by that date. Comments are requested on the leadtime necessary to comply with the proposal, if a final rule is adopted.

Costs and Benefits

NHTSA has analyzed this proposal and determined that it is not "major" within the meaning of Executive Order 12291. Given the already substantial level of voluntary compliance with the proposed requirements, adoption of those requirements would have limited cost implications. NHTSA estimates this cost would be well below the $100 million costs that are needed to classify a rule as "major" under Executive Order 12291.

However, the costs of altering light trucks to meet the proposed requirements are not definitely known. A 1982 NHTSA evaluation of changes made to passenger cars in 1974 indicated that the cost for component changes in some models was $11 in 1988 dollars. However, it is uncertain whether this estimate would be applicable to light trucks. Potentially more costs may be incurred for vehicles that are built on chassis by final-stage manufacturers for commercial or recreational use, and for vehicles that are modified by alterers for these uses. Because of the proliferation of vehicle types, these manufacturers and alterers could face higher compliance costs. Based on previous tests conducted for NHTSA, an FMVSS 216 certification test should cost approximately $1,500 per test. Because of the need for more specific cost information, comments are requested from the industry and public regarding: (1) The number of vehicles that would not meet the standard; (2) the costs and weight increases associated with bringing these vehicles up to the standard; (3) the number of vehicles that would have to be tested; and (4) the total cost of testing and certification.

This proposal is "significant" within the meaning of the Department of Transportation's regulatory policies and procedures because of the public interest in this rule. As noted above, NHTSA has prepared a preliminary regulatory evaluation for this proposed rule, which can be obtained from NHTSA's Docket Section.

Regulatory Flexibility Act

NHTSA has considered the effects of this rulemaking action under the Regulatory Flexibility Act. NHTSA has examined the potential impacts of this

rule on small entities and has described those possible impacts in the preliminary regulatory evaluation, a portion of which contains the discussion

Information Service Center publishes the Unified Agenda in April and October of each year. The RIN

In consideration of the foregoing, NHTSA proposes to amend 49 CFR part 571 as set forth below.

particular vehicle need not meet further requirements after being tested at one location.

within 120 seconds. Guide the test device so that throughout the test it moves, without rotation, in a straight

reaching a force of 1½ times the unloaded vehicle weight of the tested vehicle. Complete the test within 120

rule on small entities and has described those possible impacts in the preliminary regulatory evaluation, a portion of which contains the discussion required of an initial regulatory flexibility analysis. To summarize that evaluation, there are a number of final-stage manufacturers, many of whom are small businesses, which install truck bodies and/or work-related equipment on chassis. These manufacturing processes may involve the roof structure on vehicles. Also, there are a number of alterers involved in modifying (e.g., raising) the roof structure. The potential impact of this proposed rule on these entities depends on the number of different models that are produced by them, the amount of testing done to determine compliance with the roof crush standard, and the ability of vehicles to conform with the standard. NHTSA tentatively believes that the task which these manufacturers and alterers would face in certifying compliance of their vehicles or alteration to the proposed requirements would not differ significantly from the tasks they face currently in certifying compliance with other standards. However, the agency believes it will be able to further analyze the impacts of the rule on small entities after receiving comments on the potential costs and other impacts of the proposed rule

Small organizations and governmental units would not be significantly affected. While there might be a relatively small price increase for those vehicles which have to be modified to achieve compliance, NHTSA does not anticipate any significant impacts for any small entity interested in purchasing such vehicles.

Environmental effects

NHTSA has analyzed this rulemaking action for the purposes of the National Environmental Policy Act. The agency has determined that implementation of this action would not have any significant impact on the quality of the human environment.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Regulatory Information Number

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency s confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, NHTSA proposes to amend 49 CFR part 571 as set forth below.

PART 571—[AMENDED]

1. The authority citation for part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.216 [Amended]

2. The title of the heading of Standard No. 216, Roof Crush Resistance—Passenger Cars, would be revised to read as follows: "Standard No. 216; Roof Crush Resistance".

3. Paragraph S3 would be revised to read as follows:

S3. *Application.* This standard applies to passenger cars, and to multipurpose passenger vehicles, trucks and buses with a GVWR of 10,000 pounds or less. However, it does not apply to school buses. It also does not apply to vehicles that conform to the rollover test requirements (S5.3) of Standard No. 208 (§ 571.208) by means that require no action by vehicle occupants. This standard also does not apply to convertibles, except for optional compliance with the standard as an alternative to the rollover test requirements in S5.3 of Standard No. 206.

4. Paragraph S4 would be revised to read as follows:

S4. *Requirements.*

S4.1 Passenger cars. A test device as described in S5 shall not move more than 5 inches, measured in accordance with S6.4, when it is used to apply a force of 1½ times the unloaded vehicle weight of the vehicle or 5,000 pounds, whichever is less, to either side of the forward edge of a vehicle's roof in accordance with the procedures of S6. Both the left and right front portions of the vehicle's roof structure shall be capable of meeting the requirements, but a particular vehicle need not meet further requirements after being tested at one location.

S4.2 Multipurpose passenger vehicles, trucks and buses with a GVWR of 10,000 pounds or less, manufactured on or after September 1, 1991. A test device as described in S5 shall not move more than 5 inches, measured in accordance with S6.4, when it is used to apply a force of 1½ times the unloaded vehicle weight of the vehicle to either side of the forward edge of a vehicle's roof in accordance with the procedures of S6. Both the left and right front portions of the vehicle's roof structure shall be capable of meeting the requirements, but a particular vehicle need not meet further requirements after being tested at one location.

5. Paragraph S6.3 would be revised to read as follows:

S6.3.1 Passenger cars. Apply force in a downward direction perpendicular to the lower surface of the test device at a rate of not more than one-half inch per second until reaching a force of 1½ times the unloaded vehicle weight of the tested vehicle or 5,000 pounds, whichever is less. Complete the test within 120 seconds. Guide the test device so that throughout the test it moves, without rotation, in a straight line with its lower surface oriented as specified in S6.2(a) through S6.2(d).

S6.3.2 Multipurpose passenger vehicles, trucks and buses with a GVWR of 10,000 pounds or less, manufactured on or after September 1, 1991. Apply force in a downward direction perpendicular to the lower surface of the test device at a rate of not more than one-half inch per second until reaching a force of 1½ times the unloaded vehicle weight of the tested vehicle. Complete the test within 120 seconds. Guide the test device so that throughout the test it moves, without rotation, in a straight line with its lower surface oriented as specified in S6.2(a) through S6.2(d).

Issued on October 27, 1989.

Barry Felrice,

Associate Administrator for Rulemaking.

DEPARTMENT OF AGRICULTURE

Forest Service

Revision to the George Washington National Forest Land and Resource Management Plan, Alleghany, Amherst, Augusta, Bath, Botetourt, Frederick, Highland, Nelson, Page, Rockbridge, Rockingham, Shenandoah, and Warren Counties, Virginia, and Hampshire, Hardy, Monroe, and Pendleton Counties, West Virginia

AGENCY: Forest Service, USDA.

ACTION: Notice; intent to prepare environmental impact statement.

SUMMARY: The Forest Service will prepare a draft and final environmental impact statement to revise the George Washington National Forest Land and Resource Management Plan pursuant to 16 U.S.C. 1604(f)(5) and 36 CFT 219.12.

The agency invites written comments and suggestions on the scope of the analysis. In addition, the agency gives notice that a full environmental analysis and decisionmaking process will occur on the proposal so that interested and affected people are aware of how they may participate in, and contribute to, the final decision.

DATE: Comments concerning the scope of the analysis should be received in writing by December 15, 1989, to ensure timely consideration.

ADDRESSES: Send written comments to George W. Kelley, Forest Supervisor, George Washington National Forest, PO Box 233, Harrison Plaza, Harrisonburg, VA 22801.

FOR FURTHER INFORMATION CONTACT: Steve Parsons, Planning Staff Officer (703) 433–2491.

SUPPLEMENTARY INFORMATION: The George Washington Land and Resource Management Plan (LRMP) was approved September 9, 1986. There were 18 administrative appeals of the decision to select Alternative 7 as the LRMP to be implemented. On August 6, 1987, the Regional Forester directed the Forest Supervisor to perform a supplemental analysis based on issues raised in the appeals by interested and affected publics.

On October 9, 1987, at the request of the Regional Forester, the Chief suspended the unresolved appeals until August 1, 1989, to allow the Forest to conduct supplemental analysis to resolve the issues. The Notice of Intent to prepare a significant amendment to the George Washington National Forest LRMP was published in the **Federal Register** on March 9, 1988, (53 FR 7545; hereby cancelled) inviting comments on the scope of the analysis and stating the draft supplement would be available for review in August 1989 and the final in April 1990. Due to delays in the process, on August 1, 1989, the Regional Forester requested an extension to complete the supplemental analysis. On September 6, 1989, Forest Service Chief F. Dale Robertson denied the request for extension and directed the Regional Forester to revise the Plan. The Chief believed the need to address certain issues warranted revision to the Plan.

The Forest Plan as approved on September 9, 1986, will remain in effect and continue to be implemented, as modified by the Chief's September 6, 1989, letter. The following interim direction will be effective until the revised Plan is issued: (1) The annual timber sales offered may not exceed 38 million board feet per fiscal year. This figure is based on a review of the GWNF's sold and planned data for fiscal years 1986 to 1990; (2) The use of either even-aged or uneven-aged management in the harvesting of timber will be determined and documented during project-level analysis. This determination will be based on the management area goals and objectives as stated in the Plan. Management prescriptions that prescribe the silvicultural system will be revisited with each timber sale (or group of sales). Clearcutting may be selected as the appropriate harvest method only when it is determined to be the optimum method. Additional management direction on clearcutting can be found in the Chief's letter of September 8, 1988. In that letter, the Chief directed the Regional Foresters to "seek opportunities to reduce clearcutting when other alternatives will meet our land management objectives;" and (3) Notify all appellants, and give them an opportunity to comment, on proposed surface-distrubing projects involving timber sales and road building. The Forest Supervisor must consider any comments and whether the project decision should be postponed until the LRMP revision is completed.

Since October 1987, public participation activities have included presentations to various public groups, individual meetings and phone calls, and requests for written comments on various planning documents. During environmental impact statement preparation for the LRMP revision, public involvement will continue. The Forest proposes to have periodic public meetings at various locations. The interested and affected people will be notified in advance through letters and news releases of the times and locations.

The following issues will be addressed in the environmental analysis, as well as those significant issues identified during the scoping process: (1) What primitive recreation opportunities should the Forest provide and possible locations; (2) how much all-terrain vehicle (ATV) use will be allowed and possible locations for that use; (3) what level of wildlife emphasis will be allowed, including what standards and guidelines are necessary for wildlife management; (4) what type of transportation system for the Forest is necessary; (5) how much timber should the Forest offer; (6) how can the timber sale program be managed more efficiently; (7) what should be the mix of uneven-aged and even-aged management systems to produce timber and where will each be permitted; (8) what lands should be identified as suited for timber production; and (9) what rivers will be recommended for inclusion in the Wild and Scenic Rivers System.

In preparing the environmental impact statement, the Forest Service will develop, as a minimum, a range of alternatives that: (1) increase and/or decrease timber harvest and road construction levels, analyze various mixes of timber harvest methods, and analyze various mixes of nontimber and timber activities for producing recreation and wildlife benefits; (2) provide timber harvesting at levels where direct timber revenues exceed direct costs, as well as alternatives where timber harvesting is economically efficient considering the contribution harvesting makes to providing other resource benefits; (3) emphasize different mixes of recreation, wildlife, and timber resources which may or may not meet demand for those resources; and (4) provide recommendations for different rivers to be included in the Wild and Scenic Rivers System.

The draft environmental impact statement is expected to be filed with the Environmental Protection Agency (EPA) and available for public review by March 1991. At that time EPA will publish a notice of availability of the draft environmental impact statement in the **Federal Register**.

The comment period on the draft environmental impact statement will be 90 days from the date the EPA notice of availability appears in the **Federal Register**. It is very important that those interested in the management of the George Washington National Forest participate at that time. To be most helpful, comments on the draft environmental impact statement should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC, 435 U.S. 519, 553, (1978).* Environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *City of Angoon* v. *Hodel,* 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.,* v. *Harris, 490 F. Supp. 1334, (E.D. Wis. 1980).* The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

After the comment period ends on the draft environmental impact statement, the comments will be analyzed and considered by the Forest Service in preparing the final environmental impact statement. The final environmental impact statement is scheduled to be completed by October 1991. In the final environmental impact statement the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the environmental impact statement, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in a Record of Decision. That decision will be subject to appeal under 36 CFR 217.

The responsible official is John E. Alcock, Regional Forester, Southern Region, 1720 Peachtree Road NW., Atlanta, Georgia 30367.

October 23, 1989.

Marvin C. Meier,

Deputy Regional Forester.

[FR Doc. 89-25814 Filed 11-1-89; 8:45 am]

BILLING CODE 3410-11-M

Modoc National Forest; Hayden Hill Gold Mine Operation

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service, as a cooperating agency with the Bureau of Land Management, Department of Interior, will prepare an environmental impact statement for the proposed open pit gold mine operation located in the Hayden Hill area of the Big Valley Ranger District of the Modoc National Forest. The lead Federal Agency will be the Susanville District of the Bureau of Land Management. In addition, Lassen County will be jointly preparing an environmental impact report, as directed by the California Environmental Quality Act, (CEQA). The agency invites written comments and suggestions on the scope of the analysis. In addition, the agency gives notice of the full environmental analysis and decision-making process that will occur on the proposal so interested and affected people are aware of how they may participate and contribute to the final decision.

DATE: Comments concerning the scope of the analysis must be received by January 15, 1990.

ADDRESSES: Submit written comments and suggestions concerning the scope of the analysis to Thomas Harbour, District Ranger, Big Valley Ranger District, P.O. Box 159, Adin, California 96006.

FOR FURTHER INFORMATION CONTACT: Direct questions about the proposed action and environmental impact statement to Joyce Coakley, District Resource Officer, Big Valley Ranger District Office, P.O. Box 159, Adin, California 96006 or phone 916–299–3210.

SUPPLEMENTARY INFORMATION: Hayden Hill Operating Company, a joint venture of AMAX Gold and U.S. Gold, has filed a plan of operation with the Bureau of Land Management, for an open pit gold mine in the Hayden Hill area. The project area is approximately 1280 acres and consists of an open pit, waste rock disposal site processing plants, heap leach systems, mill and tailing ponds, gold recovery processing plant and ancillary facilities and access roads. The present plan of operation proposes the waste rock site and tailings pond to be adjacent to National Forest System lands. The plan proposes to have access and some ancillary facilities on National Forest System Lands. The Forest Service will issue an approval of the plan of operation or permits, for those activities occurring on National Forest System Lands, based upon the Record of Decision.

In preparing the environmental impact statement, the Forest Service will identify and consider a range of alternatives for this site. One of these will be no development of the site. Other alternatives will consider relocation of the access route, waste rock and or tailing ponds.

Douglas G. Smith, Forest Supervisor, Modoc National Forest, Alturas California, is the responsible official.

Public participation will be especially important at several points during the analysis. The first point is during the scoping process (40 CFR 1501.7). The Forest Service will be seeking information, comments, and assistance from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preperation of the draft environmental impact statement (DEIS). The scoping processing includes:

1. Identifying potential issues.
2. Identifying issues to be analyzed in depth.
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed action and alternatives (i.e., direct, indirect, and cumulative effects and connected actions).

The Forest Service and the Bureau of Land Management will hold a public scoping meeting at the Adin Community Hall, Adin, California, from 3 p.m. till 9:30 p.m., Thursday, November 30, 1989.

1989
UMI

The DEIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by May 1990. At that time EPA will publish a notice of availability of the DEIS in the **Federal Register.**

The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register.** It is very important that those interested in the management of the Hayden Hill area participate at that time. To be the most helpful, comments on the DEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for implemeting the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978), and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

After the comment period ends on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final environmental impact statement. The final EIS is scheduled to be completed by July 1990. In the final EIS the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the EIS, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR part 217.

Dated: October 24, 1989.

Douglas G. Smith,

Forest Supervisor.

BILLING CODE 3410-11-M

ARMS CONTROL AND DISARMAMENT AGENCY

Performance Review Board; Membership

AGENCY: Arms Control and Disarmament Agency.

ACTION: Notice of membership of Performance Review Board.

SUMMARY: In accordance with 5 U.S.C. 4314(c)(4), the U.S. Arms Control and Disarmament Agency announces the appointment of Performance Review Board members.

EFFECTIVE DATE: November 1, 1989.

FOR FURTHER INFORMATION CONTACT: Nancy Aderholdt, Director of Personnel, U.S. Arms Control and Disarmament Agency, Washington, DC 20451, (202) 647-2034.

The following are the names and present titles of the individuals appointed to the register from which Performance Review Boards will be established by the U.S. Arms Control and Disarmament Agency during the period beginning on the effective date of this notice and ending when a new register is published in approximately one year. Specific Performance Review Boards will be established as needed from this register.

These appointment supercede those in the announcement published at 53 FR 49338 on December 7, 1988.

Name and Title

Stephen Read Hanmer, Jr.—Deputy Director
Mariner G. Cox—Executive Assistant
Manfred Eimer—Assistant Director, Verification and Intelligence Bureau
Robert Summers—Chief, Verification Division, Verification and Intelligence Bureau
Alfred Lieberman—Chief, Operations Analysis Division, Verification and Intelligence Bureau
Kathleen Bailey—Assistant Director, Nuclear and Weapons Control Bureau
Norman Wulf—Deputy Assistant Director, Nuclear and Weapons Control Bureau
Robert Rochlin—Chief Scientist, Nuclear and Weapons Control Bureau
Michael Rosenthal—Chief, International Nuclear Affairs Division, Nuclear and Weapons Control Bureau
Joerg Menzel—Chief, Nuclear Safeguards and Technology Division, Nuclear and Weapons Control Bureau
David Clinard—Deputy Assistant Director, Multilateral Affairs Bureau
O. James Sheaks—Chief, Science and technological Policy Division, Multilateral Affairs Bureau
R. Lucas Fischer—Deputy Assistant Director, Strategic Programs Bureau
Stanley Riveles—Chief, Strategic Affairs Division, Strategic Programs Bureau
Karin Lawson—Chief, Threater Affairs Division, Strategic Programs Bureau
Michael Guhin—Counselor
William Montgomery—Administrative Director
Thomas Graham, Jr.—General Counsel
Mary Elizabeth Hoinkes—Deputy General Counsel
Norman Clyne—Deputy for Long Range Planning
William Staples—Deputy for Policy Analysis
Albert M. Christopher—Special Counsel
William Shepard—Director of Congressional Affairs
Edward Lacey—Principal Deputy of the On-Site Inspection Agency.

William J. Montgomery,

Administrative Director.

BILLING CODE 6820-32-M

COMMISSION ON CIVIL RIGHTS

Vermont Advisory Committee to the United States Commission On Civil Rights Agenda and Notice Of Public Meeting

Notice is hereby given, pursuant to the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Vermont Advisory Committee to the Commission will be convened at 7:15 p.m., on November 30, 1989, in Room 413 of the Waterman Building, University of Vermont, Prospect and College Streets, Burlington, Vermont. The purposes of the meeting include the holding of a forum to examine the topic, "Civil Rights Issues Related to Recruiting and Hiring the Aged."

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson Eloise R. Hedbor (802/372-6917) or John I. Binkley, Director of the Eastern Regional Division at (202/523-5264, TDD 202/376-8117). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Eastern Regional Divison at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, DC, October 26, 1989.

Melvin L. Jenkins,

Acting Staff Director.

[FR Doc. 89-25810 Filed 11-1-89; 8:45 am]

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Shark Fishery for the Atlantic Ocean

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of a draft fishery management plan, notice of scheduled public hearings on the plan, and requests for comments.

SUMMARY: NOAA issues this notice that NMFS, acting on behalf of the Secretary of Commerce (Secretary), has developed a draft Fishery Management Plan for the Shark Fishery of the Atlantic Ocean (FMP) and request comments.

DATES: Written comments will be accepted until December 31, 1989. See **"SUPPLEMENTARY INFORMATION"** for dates, times, and locations of the hearings.

ADDRESS: Comments should be sent to Paul J. Leach, Southeast Region, NMFS, 9450 Koger Boulevard, St. Petersburg, FL 33702. Mark envelope "Shark Fishery". Copies of the draft FMP may be obtained from NMFS at the aforementioned address.

FOR FURTHER INFORMATION CONTACT: Paul J. Leach, 813-893-3322.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (Magnuson Act) provides for the preparation of a fishery management plan by the Secretary when a fishery requires conservation and management and the appropriate Regional Fishery Management Council(s) cannot prepare a plan in a reasonable period of time. The five Councils covering the east coast, Gulf of Mexico, and the Caribbean areas requested the Secretary to prepare the FMP because of the identified need for immediate management measures to protect shark resources and their acknowledgement of the significant amount of time required for preparing a Council FMP.

Public comments on the draft FMP are requested at the public hearings either in written or verbal form. NMFS will consider the public comments in preparing a final FMP. The final FMP and proposed implementing regulations will also be available for public comment before final Secretarial adoption and promulgation of final regulations. The notice of availability of the final FMP and proposed implementing rule will also be published in the **Federal Register.**

Shark resources are valuable to many user groups—including consumers of shark meat in the United States, consumers of sharkfin soup in the Orient, recreational fishermen who enjoy catching sharks on rod and reel, commercial fishermen whose income is dependent to varying degrees on a shark fishery, and medical researchers using shark-derived substances in studying cancer. Shark resources are in need of conservation and management primarily because of a combination of the unique aspects of shark biology and the intensive fishing pressures. Sharks, unlike most fish, are generally slow-growing, take many years to reach maturity, and produce few young (2-25 pups per year) after long gestation periods. Many species of sharks are highly migratory, ranging extensively across wide ocean areas and crossing state and national jurisdictional boundaries. Stocks of shark are fished by many nations. The maximum sustainable yield (MSY) in U.S. waters (the exclusive economic zone and State waters) covering the east coast, Gulf of Mexico, and Caribbean, is estimated to be 16,250 metric tons (mt) yearly. Over the past 10 years, total shark mortality in U.S. waters has exceeded the MSY by approximately 5,900 mt annually. The total fishing mortality is attributable to fish caught in a growing commercial fishery serving an expanding market for shark meat and fins, dead sharks discarded in commercial fisheries for swordfish, tuna, and shrimp, and fish caught and not released alive in the recreational fishery. If the intense fishing pressures are not controlled, the east coast and Gulf shark fisheries could collapse as has occurred in other overexploited shark fisheries. If a fishery collapse occurs, it could take decades before the shark resources will recover to healthy levels capable of sustaining recreational and commercial fisheries. Such a fishery collapse has not yet occurred despite high exploitation levels, probably because of the large unexploited biomass existing prior to the period of rapidly growing interest in sharks.

FMP management measures are proposed to achieve four major objectives: (1) Prevent overfishing; (2) encourage management of shark stocks throughout their ranges: (3) establish a data collection, research, and monitoring program; and (4) optimize the benefits to the United States from shark resources while minimizing resource waste. Specific measures proposed would: (1) Establish an annual quota for commercial landings of 5,800 mt; (2) establish a recreational bag limit of one shark per person per day; (3) establish a procedure for adjusting annual commercial quotas and bag limits for recreational fishermen; (4) prohibit "finning" by allowing fins to be landed only in proportion to carcasses, (i.e., no more than four fins per carcass); (5) prohibit sale of sharks caught under the bag limit; (6) require annual permits for commercial fishermen and dealers; and (7) require monthly data reports by permitted fishermen and dealers and by persons conducting shark fishing tournaments. In summary, the intended effects of the FMP are to reduce fishing mortality on sharks and to increase understanding of the condition of the shark resources and shark fishery.

NMFS will hold 22 public hearings on the draft FMP in order to obtain public comments. The dates, times, and locations are scheduled as follows:

November 16, 1989, 7:00 p.m.
Sonesta Inn, 157 High Street, Portland, Maine.
November 28, 1989, 7:00 p.m.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

Action: Notice.

The Department of Defense has sumitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Government Industry Reference Data Edit and Review (GIRDER); DLSC Form 1690; and OMB Control 0704-0135.

Type of Request: Reinstatement.

Average Burden Hours/Minutes Per Response: 22.7 hours.

Frequency of Response: Annually.

Number of Respondents: 100

Annual Burden Hours: 2,270.

Annual Responses: 100

Needs and Uses: The GIRDER report is the only method available to verify manufacturers' names and part numbers which are associated with National Stock Numbers (NSNs) in the Federal Catalog System (FSC). This FSC maintenance avoids erroneous invitations to bid and erroneous NSN assignment and is in consonance with the intent of title 10, U.S. Code, chapter 145.

Affected Public: Businesses or other for profit; Small businesses or organizations.

Frequency: Continuing.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Dr. J. Timothy Sprehe.

Written comments and recommendations on the proposed information collection should be sent to Dr. J. Timothy Sprehe at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Ms. Pearl Rascoe-Harrison.

Written request for copies of the information collection proposal should be sent to Ms. Rascoe-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302.

Dated: October 30, 1989.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Department of the Army

Army Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Names of the committee: Army Science Board (ASB), Army, DOD.

Date of Meeting: 27-29 November 1989.

Time of Meeting: 1300-1700 hours, 27 November; 0730-1700 hours, 28 November; 0730-1300 hours, 29 November.

Place: Fort Bliss, Texas, 27 November; Fort Huachuca, Arizona, 28-29 November.

Agenda: The Army Science Board Ad Hoc Subgroup on Software in the Army will meet for discussions focused on problems facing the Army in software development and to review past and ongoing efforts to improve the process. This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-0781/0782.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-8-M

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Proposed North Coyote Valley Industrial Area Project, Regulatory Permit Application No. 16507S92, Santa Clara, CA.

AGENCY: San Francisco District, U.S. Army Corps of Engineers, Department of Defense.

ACTION: Notice of intent to prepare a DEIS.

SUMMARY:

1. Proposed Action

The City of San Jose, California has applied for a Department of the Army permit under Section 404 of the Clean Water Act (33 U.S.C. 1344) to develop an industrial park in the northern end of Coyote Valley, San Jose, California. The project consists of 1,500 gross acres with 1215 net acres to be developed into a low intensity use industrial park characterized by large parcel sizes for individual users and a campus-like setting. The San Francisco District, Corps of Engineers and the City of San Jose will prepare a joint federal/state environmental impact document (Environmental Impact Report/Environmental Impact Statement (EIR/EIS)) for the proposed project pursuant to the National Environmental Policy Act and the California Environmental Quality Act.

2. Alternatives

The alternatives being considered by the City of San Jose at this time are:

a. Applicant's preferred plan as described in "1" above.
b. Reduced project plan on-site.
c. Alternative land use on-site.
d. Alternative site.
e. No action (permit denial).

Additional alternatives identified during the scoping process would also be considered in the EIR/EIS.

3. Scoping Process

a. A scoping meeting will be held on Wednesday, December 6, 1989 at the City Council Chambers, City Hall, 2nd Floor, 801 North 1st Street, San Jose, California, at 7 p.m. Public and private interest groups, and the public are invited to participate in the scoping process by attending the evening scoping meetings. The purpose of the scoping meetings is to identify significant issues and alternatives to be considered in the EIR/EIS.

Any person may also participate in the scoping process by submitting written comments to the Corps of Engineers. Comments should be addressed to the District Engineer, San Francisco District, Corps of Engineers, 211 Main Street, San Francisco, California, 94105-1905 and received within 30 days of the date of this notice.

b. The significant issues which have been identified to date and which would be analyzed in the EIR/EIS include impacts on:

(1) Water quality and hydrology
(2) Flood control
(3) Air quality
(4) Wildlife and habitat
(5) Noise conditions
(6) Aesthetics
(7) Traffic conditions
(8) Land Use
(9) Cultural Resources
(10) Growth Inducement

Additional significant issues identified during the scoping process would also be analyzed in the EIR/EIS.

c. Environmental review and consultation as required by Section 401 and 404 of the Clean Water Act, as amended (33 U.S.C. 1341 AND 1344); Section 307 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1456(c)); the Fish and Wildlife Coordination Act (16 U.S.C. 661 *et seq.*); the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470 *et seq.*); the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*); Executive Order 11988, "Floodplain Management", 24 May 1977; Executive Order 11990, "Protection of Wetlands", 24 May 1977; and other applicable statutes or regulations will be conducted concurrently with the EIR/EIS process.

Dated: 27 October 1989.

Jack E. Farlow,

Deputy District Engineer, Project Manager

[FR Doc. 89-25798 Filed 11-1-89; 8:45 am]

BILLING CODE 3710-FS-M

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Meeting

AGENCY: National Assessment Governing Board, Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming teleconference meeting of the Analysis and Dissemination Committee of the National Assessment Governing Board. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a) (2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: Wednesday, November 15, 1989.

TIME: 10:00 a.m. (e.s.t.) until adjournment.

PLACE: National Assessment Governing Board, Suite 7322, 1100 L Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Roy Truby, Executive Director, National Assessment Governing Board, Suite 7322, 1100 L Street, NW., Washington, DC, 20005-4013, Telephone: (202) 357-6938.

SUPPLEMENTARY INFORMATION: The National Assessment Governing Board is established under section 406(i) of the General Education Provisions Act (GEPA) as amended by section 3403 of the National Assessment of Educational Progress Improvement Act (NAEP Improvement Act), Title III-C of the Augustus F. Hawkins—Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100-297), (20 U.S.C. 1221e-1).

The Board is established to advise the Commissioner of the National Center for Education Statistics on policies and actions needed to improve the form and use of the National Assessment of Educational Progress, and develop specifications for the design, methodology, analysis and reporting of test results. The Board also is responsible for selecting subject areas to be assessed, identifying the objectives for each age and grade tested, and establishing standards and procedures for interstate and national comparisons.

The Analysis and Dissemination Committee of the National Assessment Governing Board will meet via teleconference on Wednesday, November 15, 1989 from 10:00 a.m. until the completion of business. Because this is a teleconference meeting, facilities will be provided so the public will have access to the Committee's deliberations. The proposed agenda includes discussion of the plans for the Press Conference to release the results of the reading and writing assessments, consideration of the recommendations from the State by State panel regarding the comparison of States' performance on the NAEP tests and other matters pertaining to the Committee's charge.

Records are kept of all Board proceedings and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, Suite 7322, 1100 L Street, NW., Washington, DC from 8:30 a.m. to 5:00 p.m.

Christopher T. Cross,

Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Office of Fossil Energy

[FE Docket No. 89-68-NG]

Vermont Gas Systems, Inc.; Application To Amend Authorization To Import Natural Gas From Canada and Issuance of an Emergency Order Granting Interim Authority To Increase the Volume Being Imported

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application to amend authorization to import Canadian natural gas and issuance of an emergency order granting interim authority to increase the volume being imported.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on October 4, 1989, of an application filed by Vermont Gas Systems, Inc. (Vermont Gas), to amend its existing authorization to import Canadian natural gas by increasing the maximum daily import volumes to 32,000 Mcf for the remainder of the import term and extending the expiration date of its authority for one year from October 31, 1991, to October 31, 1992. No new facilities will be needed for the importation and transportation of gas under the proposed amendments.

Vermont Gas requested waiver of the DOE's notice requirements (10 CFR 590.205(a)) to the extent necessary to assure that the requested authorization would be issued by October 30, 1989. Alternatively, Vermont Gas requested that if a final order could not be issued by October 30, 1989, it be given temporary emergency authority to import the additional volumes beginning on that date, and continuing until a final decision on the application is made so that there are sufficient gas supplies to meet the expected winter heating season requirements of its customers.

The application is filed pursuant to section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to

intervene, notices of intervention, and written comments are invited.

By this notice, the DOE is establishing a 30-day comment period to provide all

intervene, notices of intervention, and written comments are invited.

By this notice, the DOE is establishing a 30-day comment period to provide all interested persons the opportunity to submit comments in response to Vermont Gas' request to amend its import authorization. The DOE also gives notice at this time of its decision to issue an emergency interim order, under 10 CFR 590.403, authorizing Vermont Gas to import the additional volumes, on which comments may be filed within the same 30-day public comment period.

DATE: Protests, motions to intervene, notices of interventions, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., e.s.t., December 4, 1989.

ADDRESS: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F–056, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Lot Cooke, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F–056, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6116;

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: Vermont Gas is a local distribution company that receives its total supply of natural gas from TransCanada PipeLines Limited (TransCanada) under a gas purchase contract dated November 26, 1985, as amended (1985 contract). The delivery point is at the international boundary near Highgate Springs, Vermont. Vermont Gas sells and distributes this gas supply entirely within the State of Vermont. Vermont Gas cannot obtain any domestic natural gas supplies since it is not connected to any other pipelines than TransCanada.

In DOE Opinion and Order No. 143, issued September 5, 1986 (1 ERA Para. 70,666), Vermont Gas was authorized to increase incrementally from 25,600 Mcf per day to 32,000 Mcf per day the firm volumes of gas imported from TransCanada over a three-year period ending October 31, 1989. Beginning November 1, 1989, absent approval of this application, Vermont Gas' authorized import quantity would revert to 25,600 Mcf per day in accordance with DOE Opinion and Order No. 39 (Order 39), issued March 1, 1982 (1 ERA Para. 70,544). Order No. 39 expires October 31, 1991.

On May 1, 1989, Vermont Gas entered into a letter of agreement with Western Gas Marketing Limited (WGML), TransCanada's affiliate (acting on its own behalf and as agent for TransCanada), concerning a new contract for the purchase of gas on a firm, long-term basis after October 31, 1989. Subsequently, on July 31, 1989, Vermont Gas applied in FE Docket No. 89–50–NG to amend its import authorization to incorporate the terms contained in the May 1, letter of agreement. However, the new contract was not executed because it failed to receive approval by the producers of the gas and the earlier application was withdrawn contemporaneously with the filing of the present application.

Absent the new contract, Vermont Gas and WGML agreed on September 29, 1989, subject to producer approval, to amend the quantity and pricing provisions of the 1985 contract for the remaining term of that contract which expires October 31, 1992. Specifically, the maximum daily contract demand under the 1985 contract would be increased to 32,000 Mcf. In addition, the September 29, agreement provides that commencing November 1, 1989, the import price would consist of a demand and commodity charge. The monthly demand charge would be equal to the monthly demand toll per Mcf for transportation of the gas on TransCanada's system from the Province of Alberta to the point of delivery at Highgate Springs, Vermont. The demand charge would be subject to certain credits during the summer months (April through October) for any excess capacity that TransCanada or WGML may be able to use for sales to other parties. The commodity charge would be computed under a formula starting with a base price of $1.92 (U.S.) per MMBtu for gas that is delivered to Vermont Gas' firm customers and $1.55 (U.S.) per MMBtu for gas delivered to interruptible customers. The commodity charge would be recalculated annually on November 1 based on changes in the published average price of No. 2 fuel oil and No. 6 residual oil in Albany, New York. In an October 13 letter, Vermont Gas indicated that at 100 percent load factor the average delivered price at the international border for November 1989 would be $2.79 (U.S.) per Mcf.

The 1985 contract provides for price renegotiation at regular intervals during the contract period and for arbitration if the parties are unable to agree. The September 29 agreement redefines when renegotiation may be requested, adds a further basis for renegotiation in the event of certain market events, and establishes new criteria to be used in the event of any arbitration.

In support of its application, Vermont Gas states that the terms of the 1985 contract, as amended by the September 29 agreement, provide for a secure supply of natural gas at a price which is competitive with alternate fuels in Vermont. Vermont Gas asserts that the continued importation of up to 32,000 Mcf of gas per day, as was authorized to be imported over the past year, is needed to meet its firm market requirements.

To avoid the adverse consequences of having an insufficient supply to meet the demand for gas in its service area during the upcoming winter heating season, Vermont Gas requested that authorization be granted by October 30, 1989. In the event a final order could not be issued by that time, Vermont Gas requested an emergency interim import authorization. It is clear that the DOE could not extend a full 30-day comment period and still issue a permanent decisional order in this docket by the end of October. In view of the above considerations and the facts asserted by Vermont Gas, the DOE concluded that issuing an emergency interim order is not inconsistent with the public interest. This order, DOE/FE Opinion and Order No. 344, issued October 26, 1989, amends Order 39 to authorize Vermont Gas to import a maximum of 32,000 Mcf of gas per day, in accordance with the provisions of the September 29 agreement between Vermont Gas and WGML, until a final determination is made on the application.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is in the public interest because it is competitive, needed, and its gas source will be secure. Parties opposing the arrangement bear the burden of overcoming this assertion.

NEPA Compliance

The DOE has determined that compliance with the National Environmental Policy Act (NEPA), 42 U.S.C. 4321, *et seq.*, can be accomplished by means of a categorical exclusion. On March 27, 1989, the DOE published in the **Federal Register** (54 FR 12474) a notice of amendments to its guidelines for compliance with NEPA. In that notice the DOE added to its list of categorical exclusions the approval or disapproval of an import/export authorization for natural gas in cases not involving new construction. Application of the categorical exclusion in any particular case raises a rebuttable presumption that the DOE's action is not a major Federal action under NEPA. Unless the DOE receives comments indicating that the presumption does not or should not apply in this case, including the interim order, no further NEPA review will be conducted by the DOE.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motion to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590.

Protest, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties, written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for an oral presentation should identify the substantial question or fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice in accordance with 10 CFR 590.316.

A copy of Vermont Gas' application is available for inspection and copying from the Office of Fuels Programs Docket Room, Room 3F–056, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on October 26, 1989.

Constance L. Buckley,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of requests submitted for review by the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (Public Law 96–511, 44 U.S.C. 3501 et seq.).

The listing does not include information collection requirements contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, or extension; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed within 30 days of publication of this notice. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395–3084. (Also, please notify the EIA contact listed below.)

ADDRESS: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION CONTACT: Jay Casselberry, Office of Statistical Standards (EI–70), Energy Information Administration, M.S. 1H–023, 1000 Independence Avenue SW., Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 586–2171.

SUPPLEMENTARY INFORMATION: The energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission
2. FERC–519
3. 1902–0082
4. Disposition of Facilities, Mergers, and Acquisitions of Securities
5. Reinstatement
6. On occasion
7. Mandatory
8. Businesses or other for-profit
9. 30 respondents
10. 30 responses annually
11. The estimated average hours per response for each of the respondents is 85 burden hours
12. The estimated total reporting hours are 2,550
13. The FPA requires that public utilities file for approval of dispositions of

Inventory of Current DOE Reporting and Record-Keeping Requirements

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of inventory of current Department of Energy energy information collections, including reporting and record-keeping requirements.

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy (DOE) hereby gives notice to respondents, and other interested parties, of an inventory of current energy information collections (including reporting and record-keeping requirements) which are approved by the Office of Management and Budget (OMB). Management and procurement collections are the responsibility of DOE's Office of Management and Administration and are not included in these notices.

The listing that follows this notice includes energy information collections that have OMB approval, as of October 1, 1989. Part I lists, for each information collection utilizing a structured form, the current DOE control or form number, the title of the requirement, the OMB control number, and the OMB approval expiration date. Part II lists those information collections (including reporting or record-keeping requirements) not utilizing structured forms and the appropriate Code of Federal Regulations citations.

FOR FURTHER INFORMATION CONTACT: Etta Harris (EI-73), Energy Information Administration, Mail Stop 1H-023, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-2165. Information on the availability of single, blank information copies of those collections utilizing structured forms can be obtained by contacting the National Energy Information Center, EI-231, Forrestal Building, U.S. Department of Energy, Washington, DC 20585, (202) 586-8800.

SUPPLEMENTARY INFORMATION: In an effort to keep respondents, users, and other interested parties informed concerning the status of these information collections, which are subject to clearance by the OMB under the Paperwork Reduction Act, the EIA will publish a Notice of Change to the Inventory in the **Federal Register** on a quarterly basis throughout the current fiscal year.

Statutory Authority: Sec. 5(a), 5(b), 13(b), and 52, Public Law No. 93-275, Federal Energy Administration Act of 1974, as amended, 15 U.S.C. 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC, October 26, 1989.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER90-26-000, et al.]

American Electric Power Service Corp., et al.; Electric rate, Small power production, and Interlocking Directorate filings

Take notice that the following filings have been made with the Commission:

1. American Electric Power Service Corp.

[Docket No. ER90-26-000]

October 24, 1989.

Take notice that American Electric Power Service Corp. on October 18, 1989 tendered for filing a Transmission and Unit Power Supply Agreement, requesting the Commission designate it an Initial Rate Schedule on behalf of its affiliates, Appalachian Power Company, and Indiana Michigan Power Company (AEP) parties, affiliated operating subsidiaries of the American Electric Power Company.

The Transmission and Unit Power Supply Agreement among Appalachian Power Company (APCO), Indiana Michigan Power Company (I&M), and Carolina Power & Light Company (CP&L), dated December 14, 1988, provides for two new interconnections between APCO and CP&L and Unit Power service from I&M to CP&L. The new interconnections between APCO and CP&L are planned for completion in 1992 and 1997. The Unit Power service arrangement for a nominal 250 MW of capacity is based on I&M's cost for Rockport Unit No. 2, and is to begin on the later of January 1, 1990 or upon commercial operation of Rockport Unit No. 2.

AEP has requested an effective date of January 1, 1990.

Copies of the filing were served upon the Indiana Utility Regulatory Commission, the Michigan Public Service Commission, the State Corporation Commission of Virginia, the Public Service Commission of West Virginia, the North Carolina Utilities Commission, the South Carolina Public Service Commission, and the Tennessee Public Service Commission.

Comment date: November 9, 1989, in accordance with Standard Paragraph E at the end of this notice.

2. AEP Generating Company

[Docket No. ER89-470-000]

October 24, 1989.

Take notice that on October 19, 1989, AEP Generating Company (AEGCO) field with the Commission, in compliance with the Commission's order of September 22, 1989 in Docket No. ER89-470-000, an equity reopener provision applicable to a unit power agreement between AEGCO and Indiana Michigan Power Company, and two related unit power agreements.

The change is proposed to be effective upon the commercial operation date of Rockport 2, presently expected to occur in December, 1989. Copies of the filing were served upon the public service commissions on the states of Kentucky, Indiana and Michigan and the parties in Docket No. ER89-470-000.

Comment date: November 9, 1989, in accordance with Standard Paragraph E at the end of this notice.

3. Arkansas Power & Light Company

[Docket No. ER90-28-000]

October 24, 1989.

Take notice that Arkansas Power & Light Company (AP&L) filed on October 19, 1989 a Transmission Service Agreement with the City of Hope, Arkansas, requesting an effective date of October 1, 1989. The Agreement provides the basis upon which AP&L will wheel power from Southwestern Electric Power Company to Hope's North Substation.

The proposed Agreement supercedes AP&L's FERC Rate Schedule No. 100, whose cancellation was accepted by the Commision on August 15, 1989.

Copies of the Transmission Service Agreement and supporting workpapers were served on the City of Hope, Arkansas. Copies also were served on the Arkansas Public Service Commission.

Comment date: November 9, 1989, in accordance with Standard Paragraph E at the end of this notice.

4. Tucson Electric Power Company

[Docket No. ER90-25-000]

October 24, 1989.

Take notice that on October 10, 1989, Tucson Electric Power Company (Tucson) tendered for filing a notice of cancellation of Rate Schedule FERC No. 73 between Tucson and Arizona Public Service Company (Arizona).

Tucson requests an effective date of October 1, 1989.

Comment date: November 9, 1989, in accordance with Standard Paragraph E end of this notice.

5. Canal Electric Company

[Docket No. ER90-29-000]

October 24, 1989.

Take notice that on October 20, 1989 Canal Electric Company (Canal) tendered for filing a Power Contract (the Power Contract) between itself, Cambridge Electric Light Company and Commonwealth Electric Company and a Capacity Acquisition Commitment (the "Commitment"). The Power Contract implements the terms of the Capacity Acquisition Agreement (FERC Rate Schedule No. 21) and the Commitment. Such Power Contract recognizes the purchase of demand and energy by Canal from Connecticut Light and Power Company, a subsidiary of Northeast Utilities, and from United Illuminating Company over the time period October 1, 1989 to April 30, 1990 and the sale of such power to Cambridge Electric Light Company and Commonwealth Electric Company. Canal has requested that the Commission's notice requirements with respect to the Power Contract and the Commitment be waived pursuant to Section 35.11 of the Commission's regulations in order to allow the tendered Power Contract to become effective as of October 1, 1989.

Comment date: November 9, 1989, in accordance with Standard Paragraph E at the end of this notice.

6. Indianapolis Power & Light Company

[Docket No. ER90-30-000]

October 24, 1989.

Take notice that Indianapolis Power & Light Company on October 20, 1989, tendered for filing Modification No. 8 to the Interconnection Agreement dated December 2, 1968, (the 1968 Agreement) between Indianapolis Power & Light Company (IPL) and Southern Indiana Gas and Electric Company (SIGECO). The 1968 Agreement is designated as Rate Schedule FPC No. 6.

Modification No. 8 provides equitable compensation as between IPL and SIGECO for the delivery of emergency service, interchange energy, short term power and energy, limited term power, and specific transmission services.

Copies of the filing were mailed to Southern Indiana Gas and Electric Company, Inc. and to the Indiana Utility Regulatory Commission.

Comment date: November 9, 1989, in accordance with Standard Paragraph E at the end of this notice.

7. UNITIL Power Corp.

[Docket No. ER89-607-000]

October 24, 1989.

Take notice that on October 4, 1989, UNITIL Power Corp. (UNITIL) filed with the Commission a revision of its Electric Tariff No. 3, Sale of Electric Generating Capacity and Energy, for the sale of capacity and associated energy from UNITIL's excess capacity entitlements in various generating plants, filed with the Commission on August 15, 1989.

UNITIL states that it is revising its original filing by submitting Revised Sheet No. 2 and Second Revised Sheet No. e for the tariff and Second Revised page 1 of Attachment A (Service Agreement). The purpose of the revision is to specify the rate, and the derivation thereof, more clearly in the tariff and to eliminate any reference to a specific rate from the Service Agreement.

Comment date: November 9, 1989, in accordance with Standard Paragraph E at the end of this notice.

8. Georgia Power Company

[Docket No. ER89-618-000]

October 24, 1989.

Take notice that on October 20, 1989, Georgia Power Company (Georgia Power) tendered for filing additional information in support of a Coordination Services Agreement (the "Agreement") dated as of August 21, 1989, between Georgia Power and Oglethorpe Power Corporation (An Electric Membership Generation & Transmission Corporation) (OPC).

Georgia Power states that the Agreement has been executed to facilitate a power purchase by OPC from Big Rivers Corporation. Georgia Power seeks waiver of the Commission's notice requirements and seeks an effective date of August 21, 1989. The Agreement will terminate on May 31, 1992. The additional information allegedly justifies Georgia Power's scheduling fee of $15.00 per hour per transaction.

Comment date: November 9, 1989, in accordance with Standard Paragraph E at the end of this notice.

9. Wisconsin Public Service Corporation

[Docket No. ER90-27-000]

October 24, 1989.

Take notice that Wisconsin Service Corporation (the "company") on October 17, 1989, tendered for filing an executed service agreement to transfer, effective January 10, 1990, its all requirements customer, the Washington Island Electric Cooperative, Wisconsin, from all requirements service under a contract (FERC Rate Schedule Number 40) to the same service under the company's all requirements tariff, Original Volume no. 2. The filing does not affect the rate charged to the Washington Island Electric Cooperative, nor the revenues paid by the cooperative to the company. The company makes this change so that service will be under a tariff which is generally applicable to all customers.

Copies of the filing were served upon the Washington Island Electric Cooperative and the Public Service Commission of Wisconsin.

Comment date: November 9, 1989, in accordance with Standard Paragraph E at the end of this notice.

10. Kansas Gas and Electric Company

[Docket No. ES90-3-000]

October 25, 1989.

Take notice that on October 18, 1989, Kansas Gas and Electric Company filed an application with the Federal Energy Regulatory Commission seeking authority, pursuant to Section 204 of the Federal Power Act, to issue not more than 1,500,000 shares of its common stock, without par value, pursuant to its Long-Term Incentive Plan.

Comment date: November 15, 1989, in accordance with Standard Paragraph E at the end of this notice.

11. Chevron U.S.A. Inc.

[Docket No. QF90-9-000]

October 25, 1989.

On October 12,1989, Chevron U.S.A. Inc., (Applicant) of P.O. Box 3725, Houston, Texas 77253-3725, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Ewa Beach, Hawaii. The facility will consist of three (3) combustion gas turbine generators and three (3) heat recovery steam generators. Thermal Energy recovered from the facility will be consumed in refinery process equipment, such as heaters, reboilers, vaporizers,

distillation columns and pumps. The electric power production capacity will be 9,100 kilowatts. The primary energy source will be refinery process gas. Construction of the facility began in September 1989 and start-up is scheduled to begin in July 1990.

Comment date: Thirty days from publication in the **Federal Register** in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-25771 Filed 11-1-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP90-102-000 et al.]

Trunkline Gas Company, et al.; Natural Gas Certificate Filings

October 26, 1989.

Take notice that the following filings have been made with the Commission:

1. Trunkline Gas Company

[Docket No. CP90-102-000]

Take notice that on October 23, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP90-102-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Texpar Energy, Inc. (Texpar), a shipper and marketer of natural gas, under Trunkline's blanket certificate issued in Docket No. CP 86-586-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Trunkline States that pursuant to a Transportation Agreement (Agreement) dated July 17, 1989, between Trunkline and Texpar, it would transport up to 100,000 dekatherms (Dt.) per day equivalent of natural gas, on an interruptible basis, for Texpa. Trunkline indicates that the Agreement provides for Trunkline to receive the natural gas from various existing points of receipt in the states of Illinois, Louisiana, Tennessee and Texas, from the Panhandle Eastern Pipe Line Company (Panhandle) receipt point at Douglas County, Illinois and from the areas of offshore Louisiana and offshore Texas. Trunkline would then transport and redeliver the natural gas, less fuel and unaccounted-for line loss, to Panhandle in Douglas County, Illinois.

Trunkline States that the estimated daily and estimated annual quantities that would be transported would be 100,000 Dt. and 36,500,000 Dt., respectively.

Trunkline states that it commenced the transportation of natural gas for Texpar on September 1, 1989, as reported in Docket No. ST90-5-000 for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations (18 CFR 284.223(a)).

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Panhandle Eastern Pipe Line Company

[Docket No. CP90-104-000]

Take notice that on October 23, 1989, Panhandle Eastern Pipe Line Company, (Panhandle) P.O. Box 1642, Houston, Texas, 77251-1642 filed in Docket No. CP89-104-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Boyd Rosene and Associates, Inc. (Boyd Rosene), under its blanket authorization issued in Docket No. CP86-585-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle would perform the proposed interruptible transportation service for Boyd Rosene, a shipper and marketer of natural gas, pursuant to a transportation agreement for firm service under Rate Schedule PT dated September 1, 1989 (Contract No. P-PLT-2997). The term of the transportation agreement is for a primary term of one year from the initial date for service and shall continue in effect until terminated by Panhandle or Boyd Rosene upon at least six months prior notice to the other party. Panhandle proposes to transport on a peak day up to 19,815 dekatherm equivalent; on an average day up to 19,815 dekatherm equivalent; and on an annual basis 7,232,475 dekatherm equivalent of natural gas for Boyd Rosene. Panhandle proposes to receive gas from the firm point of receipt located in Haven Pool Point, Reno County, Kansas. Panhandle would then transport and redeliver the subject gas, less fuel used and unaccounted for line loss, Mich-Con Detroit in Wayne County, Michigan. Panhandle avers that no new facilities nor expansion of existing facilities are rquired to provide the proposed service.

It is explained that the proposed service is currently being performed puusuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Panhandle commenced such self-implementing service on September 1, 1989, as reported in Docket No. ST89-4788-000.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. Tennessee Gas Pipeline Company

[Docket No. CP90-88-000]

Take notice that on October 23, 1989,[1] Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP90-88-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the installation and operation of one or more portable compressors to be used from time to time at various locations on Tennessee's mainline, all as more fully detailed in the application which is on file with the Commission and open to public inspection.

Tennessee proposes to install and operate the portable compressor(s) for short periods of time as a substitute for existing compressors that are temporarily out of service because they require repairs or maintenance. It is stated that there would be no increase in actual operating horsepower. It is further stated that the proposal would not involve any increase in service to Tennessee's customers. It is asserted that the portable compressor(s) would be installed within the boundaries of existing rights-of-way or compressor station sites.

[1] The application was tendered for filing on October 20, 1989; however, the fee required by § 381.207 of the Commission's Rules (18 CFR 381.207) was not paid until October 23, 1989. Section 381.103 of the Commission's Rules provides that the filing date is the date on which the fee is paid.

Comment date: November 16, 1989, in accordance with Standard Paragraph F at the end of this notice.

explains that service commenced September 1, 1989, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-4779.

Comment date: November 16, 1989, in accordance with Standard Paragraph F at the end of this notice.

4. Trunkline Gas Company

[Docket No. CP89-101-000]

Take notice that on October 23, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP90-101-000 a request pursuant to § 157.205(b) and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on an interruptible basis for Enron Gas Marketing, Inc. (Enron), a shipper and marketer of natural gas, under its blanket certificate issued in Docket No. CP86-586-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Trunkline states that the maximum daily, average daily and annual quantities that it would transport for Enron would be 75,000 dt equivalent of natural gas, 75,000 dt equivalent of natural gas and 27,375,000 dt equivalent o natural gas, respectively.

Trunkline states that it would transport natural gas for Enron from various receipt points in Illinois, Louisiana, offshore Louisiana, Texas, offshore Texas and Tennessee to a delivery point in Vermillion Parish, Louisiana.

Trunkline indicates that in a filing made with the Commission in Docket ST90-8, it reported that transportation service for Enron commenced on September 1, 1989 under the 120-day automatic authorization provisions of § 284.223(a).

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

5. Panhandle Eastern Pipe Line Company

[Docket No. CP90-99-000]

Take notice that on October 23, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251, filed in Docket No. CP90-99-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP86-585-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Panhandle proposes to transport natural gas on a firm basis for Eli Lilly and Company (Eli Lilly). Panhandle explains that service commenced September 1, 1989, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-4779. Panhandle explains that the peak day quantity would be 150 Dt., the average daily quantity would be 150 Dt., and that the annual quantity would be 54,750 dekatherms. Panhandle explains that it would receive natural gas for Eli Lilly's account at firm points of receipt located in Kansas and Oklahoma. Panhandle states that it would also receive gas on an interruptible basis, pursuant to § 6.13 of Rate Schedule PT-Firm, at various points of receipt on its system. Panhandle states that it would redeliver the gas to Citizens Gas & Coke in Marion County, Indiana.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Texas Gas Transmission Corporation

[Docket No. CP90-122-000]

Take notice that on October 24, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP90-122-000 an application pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Bishop Pipeline Corporation (Bishop), under Texas Gas' blanket certificate issued in Docket No. CP88-686-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport, on an interruptible basis, up to 50,000 MMBtu per day for Bishop. Texas Gas states that construction of facilities would not be required to provide the proposed service.

Texas Gas further states that the maximum day, average day, and annual transportation volumes would be approximately 50,000 MMBtu, 15,000 MMBtu and 5,475,000 MMBtu respectively.

Texas Gas advises that service under § 284.223(a) commenced September 6, 1989, as reported in Docket No. ST89-4733.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Texas Gas Transmission Corporation

[Docket No. CP90-81-000]

Take notice that on October 24, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP90-81-000 an application pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Brooklyn Interstate Natural Gas Corporation (Brooklyn), under Texas Gas' blanket certificate issued in Docket No. CP88-686-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport, on an interruptible basis, up to 100,000 MMBtu per day for Brooklyn. Texas Gas states that construction of facilities would not be required to provide the proposed service.

Texas Gas further states that the maximum day, average day, and annual transportation volumes would be approximately 100,000 MMBtu, 30,000 MMBtu and 10,950,000 MMBtu respectively.

Texas Gas advises that service under § 284.223(a) commenced September 7, 1989, as reported in Docket No. ST89-4734.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

8. Texas Gas Transmission Corporation

[Docket No. CP90-80-000]

Take notice that on October 19, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP90-80-000 a request pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Fina Oil and Chemical Company (Fina), under the blanket certificate issued in Docket No. CP88-686-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Texas Gas states that pursuant to a transportation agreement dated July 20, 1989, it proposes to transport up to 10,000 MMBtu per day equivalent of natural gas for Fina. Texas Gas states that it would transport the gas from multiple receipt points as shown in Exhibit "B" of the transportation agreement and would deliver the gas at delivery points in High Island 573 "B" offshore Texas, as shown in Exhibit "C" of the agreement.

Texas Gas advises that service under § 284.223(a) commenced September 8, 1989, as reported in Docket No. ST90-12. Texas Gas further advises that it would transport 6,000 MMBtu on an average day and 2,555,000 MMBtu annually.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

9. Panhandle Eastern Pipe Line Company

[Docket No. CP90-98-000]

Take notice that on October 23, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas, 77251-1642, filed in Docket No. CP90-98-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas for Gulf Ohio Corporation (Gulf Ohio), a shipper and marketer of natural gas, pursuant to Panhandle's blanket certificate issued in Docket No. CP86-585-000 and section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

Specifically, Panhandle requests authority to transport up to 2,500 Dt. per day on an interruptible basis on behalf of Gulf Ohio pursuant to a Transportation Agreement dated July 20, 1989 between Panhandle and Gulf Ohio (Agreement). The Agreement provides for Panhandle to receive gas from various existing points of receipt located in Colorado, Illinois, Kansas, Michigan, Ohio, Oklahoma, Texas and Wyoming. Panhandle will then transport and redeliver subject gas, less fuel used and unaccounted for line loss, to CIPS-Mattoon in Douglas County, Missouri.

The shipper states that the estimated daily and estimated annual quantities would be 250 Dt. and 73,000 Dt., respectively. Service under § 284.223(a) commenced on September 1, 1989, as reported in Docket No. ST89-4805-000.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

10. Panhandle Eastern Pipe Line Company

[Docket No. CP90-107-000]

Take notice that on October 23, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77152-1642, filed an application with the Commission in Docket No. CP90-107-000 pursuant to 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to transport natural gas for Sunnybrook Transmission, Inc. (Sunnybrook), a natural gas marketer and shipper, under Panhandle's blanket certificate issued in Docket No. CP86-585-000 pursuant to section 7 of the NGA, all as more fully set forth in the application which is open to public inspection.

Panhandle proposes an interruptible natural gas transportation service for Sunnybrook of up to 20,000 dt equivalent on peak and average days, and 300,000 dt equivalent per year. Panhandle states that it would receive gas for Sunnybrook's account at various Colorado, Kansas, Oklahoma, and Texas receipt points and deliver equivalent volumes for Sunnybrook's account to Haven Pool in Reno County, Kansas. Panhandle also states that it would use existing facilities to provide the proposed service. Panhandle advises that it commenced transporting natural gas for Sunnybrook on September 1, 1989, under § 284.223(a) of the Regulations as reported in Docket No. ST90-22.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

11. Panhandle Eastern Pipe Line Company

[Docket No. CP90-105-000]

Take notice that on October 23, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77152-1642, filed an application with the Commission in Docket No. CP90-105-000 pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to transport natural gas for Entrade Corporation (Entrade), a natural gas marketer and shipper, under Panhandle's blanket certificate issued in Docket No. CP86-585-000 pursuant to section 7 of the NGA, all as more fully set forth in the application which is open to public inspection.

Panhandle proposes an interruptible natural gas transportation service for Entrade of up to 100,000 dt equivalent per peak day, 75,000 dt equivalent per average day, and 36,500,000 dt equivalent per year. Panhandle states that it would receive gas for Entrade's account at various Colorado, Illinois, Kansas, Michigan, Ohio, Oklahoma, Texas, and Wyoming receipt points and deliver equivalent volumes for Entrade's account to Michigan Gas Storage in Oakland County, Michigan. Panhandle also states that it would use existing facilities to provide the proposed service. Panhandle advises that it commenced transporting natural gas for Entrade on September 1, 1989, under § 284.223(a) of the Regulations as reported in Docket No. ST89-4807.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

12. Trunkline Gas Company

[Docket No. CP90-103-000]

Take notice that on October 23, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP90-103-000 a request pursuant to §§ 157.205(b) and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on an interruptible basis for Associated Natural Gas, Inc. (Associated), a shipper and marketer of natural gas, under its blanket certificate issued in Docket No. CP86-586-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Trunkline states that the maximum daily, average daily and annual quantities that it would transport for Associated would be 50,000 dt equivalent of natural gas, 50,000 dt equivalent of natural gas and 18,250,000 dt equivalent of natural gas, respectively.

Trunkline states that it would transport natural gas for Associated from various receipt points in Illinois, Louisiana, offshore Louisiana, Texas, offshore Texas and Tennessee to a delivery point in Douglas County, Illinois.

Trunkline indicates that in a filing made with the Commission in Docket ST90-9, it reported that transportation service for Associated commenced on September 1, 1989 under the 120-day automatic authorization provisions of § 284.223(a).

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

13. ANR Pipeline Company

[Docket No. CP90-118-000]

Take notice that on October 24, 1989, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP90-118-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport gas on an interruptible basis for Equitable Resources Marketing Company (Equitable), a marketer, under ANR's blanket certificate issued in Docket No. CP88-532-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANR states that pursuant to an agreement dated July 3, 1989, it proposes to transport up to 200,000 dt equivalent

BEST COPY AVAILABLE

of natural gas per day for Equitable. ANR states it would receive the gas at specified points located both offshore and onshore Louisiana and redeliver the

of natural gas per day for Equitable. ANR states it would receive the gas at specified points located both offshore and onshore Louisiana and redeliver the gas at specified points in Louisiana, Indiana, Illinois, Kentucky, Ohio, and Michigan. ANR estimates that the maximum and average day volumes would be 200,000 dt equivalent of natural gas, and that the annual volumes would be 73,000,000 dt equivalent of natural gas. It is stated that on September 1, 1989, ANR initiated a 120-day transportation service for Equitable under § 284.233(a), as reported in Docket No. ST90-59-000.

ANR further states that no facilities need be constructed to implement the service. ANR indicates that the primary term of the transportation agreement would expire on July 31, 1990, but that the service would continue on a month-to-month basis until terminated by either party on 30 days written notice. ANR proposes to charge rates and abide by the terms and conditions of its Rate Schedule ITS.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own view of the matter finds that a grant of the certificate is required by the public convience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Docket No. TM90-1-84-001

Caprock Pipeline Co.; Proposed Changes in FERC Gas Tariff

October 26, 1989.

Take notice that on October 23, 1989, Caprock Pipeline Company (Caprock) tendered for filing the following substitute tariff sheets to revise its Revised Original Volume No. 3 of its FERC Gas Tariff to be effective as noted. These tariff sheets are submitted to replace those originally filed on October 3, 1989, in this same docket.

Substitute Third Revised Sheet No. 4
Substitute Third Revised Sheet No. 5

Caprock states that these tariff sheets are being filed solely to modify Caprock's ACA surcharge provision to reflect changes consistent with Caprock's discussions with Commission Staff.

Any person desiring to be heard or to protest this filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before November 2, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. TM90-1-24-001]

Equitrans, Inc.; Proposed Changes in FERC Gas Tariff

October 26, 1989.

Take notice that Equitrans, Inc. (Equitrans) on October 20, 1989, tendered for filing with the Federal Energy Regulatory Commission (Commission) the following tariff sheets to its FERC Gas Tariff, Original Volume No. 1, effective October 1, 1989:

Eleventh Revised Sheet No. 10
Tenth Revised Sheet No. 14

In accordance with the Commission's Letter Order and Staff request the rates filed in Docket No. TM90-1-24-000 have been revised to comply with the conditions of the August 31, 1989 Letter Order. These rates were based on Equitrans' Annual Purchased Gas Adjustment (PGA) filing in Docket No. TA89-1-24-000 and Interim Purchased Gas Adjustment filing in Docket No. TF89-3-24-000 which were subject to refund and subject to Equitrans refiling its tariff sheets as mandated in the Commission's Letter Order issued August 31, 1989.

Equitrans states that a copy of its filing has been served upon its purchasers, interested state commissions, and upon each party on the service list of Docket No. CP86-676-000.

Any person desiring to be heard or to protest this filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before November 2, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any persons wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

October 23, 1989

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on this submission contact Judy Boley, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on this information collection should contact Eyvette Flynn, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395-3785.

OMB Number: 3060-0370

Title: Part 32—Uniform System of Accounts for Telecommunications Companies.

Action: Revision.

Respondents: Businesses or other for-profit.

Frequency of Response: Recordkeeping requirements and on occasion.

Estimated Annual Burden: 239 Responses; 68 Recordkeepers; 2,643,468 Hours.

Needs and Uses: The Uniform System of Accounts is a historical financial accounting system which reports the results of operational and financial events in a manner which enables both management and regulators to assess these results within a specified accounting period. Subject respondents are telecommunications companies. Entities having annual revenues from regulated telecommunications operations of less than $100 million are designated as Class B companies and are subject to a less detailed accounting system than those designated as Class A companies. The information contained in the various reports submitted to the Commission by the carriers provides necessary detail to enable this Commission to fulfill its regulatory responsibilities.

Federal Communications Commission.

BILLING CODE 6712-01-M

Public Information Collection Requirements Submitted to the Office of Management and Budget for Review

October 24, 1989.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on these submissions contact Judy Boley, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on these information collections should contact Eyvette Flynn, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–3785.

OMB Number: 3060–0164
Title: Section 25.390—Communications—Satellite Developmental Applications
Action: Extension
Respondents: Businesses (including small businesses)
Frequency of Response: On occasion
Estimated Annual Burden: 40 Responses; 960 Hours
Needs and Uses: Applicants seeking authority for developmental licenses must submit information pursuant to 47 CFR 25.390. The information is used by the FCC, other licensees of the spectrum and the public to assure that part 25 developmental licensees are operating in accordance with the authorizations and the rules.

OMB Number: 3060–0065
Title: Application for New or Modified Radio Station Authorization Under Part 5 of FCC Rules Experimental Radio Service (Other Than Broadcast)
Form No.: FCC 442
Action: Extension
Respondents: State or local governments, and businesses (including small businesses)
Frequency of Response: On occasion
Estimated Annual Burden: 700 Responses; 2,800 Hours.
Needs and Uses: FCC 442 is required to be filed by part 5 of the FCC rules and regulations by applicants requiring an FCC license to operate a new or modified experimental radio station. The data supplied by this form is used by applications examiners and engineers of the FCC to determine if the applicant is eligible for an experimental license, to determine the purpose and ensure compliance with the requirements of part 5 of the Rules, and if the proposed operations will cause interference to existing operations.

Federal Communications Commission.

Comments Invited on Mississippi Regional Public Safety Plan

October 26, 1989.

The Commission has received the public safety radio communications plan for the Mississippi area (Region 23).

In accordance with the Commission's Report and Order in General Docket 87–112 impelementing the Public Safety National Plan, parties are hereby given thirty days from the date of **Federal Register** publication of this public notice to file comments and fifteen days to reply to any comments filed. (See Report and Order, General Docket 87–112, 3 FCC Rcd 905 (1987), at paragraph 54.)

In accordance with the Commission's Memorandum Opinion and Order in General Docket 87–112, Region 23 consists of the State of Mississippi. General Docket 87–112, 3, FCC Rcd 2113 (1988).)

Comments should be clearly identified as submissions to General Docket 89–478, Mississippi—Region 23, and commenters should send an original and five copies to the Secretary, Federal Communications Commission, Washington, DC 20554.

Questions regarding this public notice may be directed to Maureen Cesaitis, Private Radio Bureau, (202) 632–6497, or Fred Thomas, Office of Engineering and Technology, (202) 653–8112.

BILLING CODE 6712–01–M

Low Power Television and Television Translator Filing Window From December 4, 1989 Through December 8, 1989

Released: October 27, 1989.

AGENCY: Federal Communications Commission.

ACTION: Notice of filing window.

SUMMARY: This action gives notice of an application filing window for the tendering of applications for new construction permits and for major changes in existing facilities for low power television and television translator stations. This notice sets forth the filing procedures, including when and where to file and the applicable application form to be used, and information concerning application filing fees.

DATES: December 4, 1989 through December 8, 1989.

FOR FURTHER INFORMATION CONTACT: Keith A. Larson or Molly Fitzgerald, Low Power Television Branch, Mass Media Bureau (202) 632–3894.

SUPPLEMENTARY INFORMATION: Commencing December 4, 1989, and continuing to and including December 8, 1989, the Commission will permit the filing of applications for new construction permits and for major changes in existing facilities for low power television and television translator stations. These applications must be filed at the below specified locations.

No more than five (5) applications for new low power television or television translator stations may be tendered for filing by any applicant, or by any individual or entity having an interest of one percent (1%) or greater in any applicant(s) filing in the December 4–December 8, 1989, window. This restriction does not apply to major change applications.

All applications must be "complete and sufficient" when tendered for filing, in accordance with Section 73.3564 of the Commission's rules. As noted below, a fee of $375.00 must accompany each application. Further, applicants filing during this window period must use the February 1988 edition of FCC Form 346. See 53 FR 15225 (April 28, 1988). All applications filed on obsolete editions will be returned as defective and unacceptable for filing. FCC Form 346 can be obtained from the FCC's Operations Support Division, Services and Supply Branch, Room B–10, 1919 M Street, NW., Washington, DC 20554, telephone number (202) 632–7272.

In this window application filing process, the Commission will utilize the facilities of a Treasury Department lockbox bank. Window application filings can be made, either by mail or by person, at the following locations *ONLY:*

If mailed—Federal Communications Commission, Low Power Television Window Filing, P.O. Box 371994, Pittsburgh, PA 15259–1994

If hand-delivered—Federal Communications Commission, Low Power Television Window Filing, Union Trust Building (Two Mellon Bank Center), 444 Oliver Avenue, Pittsburgh, PA 15259–0001.

Hand-carried or couriered applications can be delivered daily at the Union Trust Building location during normal business hours (8:30 a.m. to 5:00 p.m.). Detailed instructions to get to this location are included in this Public Notice as Attachment I. Submissions tendered after close of business (5:00 p.m.) on Friday, December 8, 1989, will not be accepted. Mailed applications must be actually received no later than December 8th. Window applications filings WILL NOT be accepted at the offices of the Federal Communications Commission in Washington, DC.

An original and two copies of the application and all required exhibits must be filed. To facilitate the initial processing of these applications, all applicants are requested to enclose in a single envelope the original and duplicate copies of the application, with each duplicate copy clearly denoted as such by the applicant. Where more than one new station or major change application is being filed, separate envelopes enclosing the individual application (*i.e.*, an original and two copies) can be mailed in a single package. Receipts will not be provided by the lockbox bank facility. However, for mailed window application filings, a "return copy" of the application can be furnished provided the applicant clearly identifies the "return copy" and attaches to it a stamped, self-addressed envelope. For hand-carried or couriered applications delivered to the Union Trust Building location, bank personnel, if requested in person, will date stamp as received a proffered copy of the application and return it to the requestor.

Generally, applicants seeking to construct a new low power television or television translator station or to make a major change in the facilities of an existing low power television or television translator station are required to pay and submit a fee with the filing of the application. A separate fee payment of $375.00, attached to each original application, must be submitted for each new station or major change application filed during this window; a single fee payment for multiple applications will *not* be accepted. Payment of the required fee can be made by check, bank draft or money order payable to the Federal Communications Commission.

Applications submitted with insufficient payments or without any payments will be dismissed and returned, along with the insufficient payment, to the applicant without processing. See § 1.1107 of the Commission's rules. Following the fee review process, applications that are found to be patently defective, not "complete and sufficient," or filed on an obsolete edition of FCC Form 346 will be rejected and returned to the applicant.

Governmental entities are exempt from the $375.00 fee. As defined by the Commission's rules, governmental entities include "any possession, state, city, county, town, village, municipal corporation or similar political organization or subpart thereof controlled by publicly elected and/or duly appointed public officials exercising sovereign direction and control over their respective communities or programs." Also exempted from this fee are noncommercial educational FM and full service television broadcast station licensees seeking to make major changes in the facilities of their existing low power television or television translator stations or to construct new low power television or television translator stations, provided those stations operate or will be operated on a noncommercial educational basis. See Section 1.1112 of the Commission's Rules. To avail itself of any fee exemption an applicant must indicate its eligibility by checking the appropriate box on page 1 of FCC Form 346 (February 1988 edition).

Applicants are advised that on April 21, 1988, the Commission adopted a Policy Statement providing for limited consideration of terrain shielding in the evaluation of television translator and low power television applications. 3 FCC Rcd 2664, recon. granted in part, 3 FCC Rcd 7105 (1988). In the Policy Statement the Commission described the limitations on its consideration of requests for waiver of its low power television service application acceptance requirements concerning interference protection standards and provided guidance for the submission of these waiver requests.

For further information concerning the filing window, contact Keith A. Larson or Molly Fitzgerald, Low Power Television Branch, Mass Media Bureau at telephone number (202) 632–3894.

Federal Communications Commission.
Donna R. Searcy,
Secretary.

Attachment I—Directions to Union Trust Building (Two Mellon Bank Center)

From Greater Pittsburgh International Airport and Interstate 79

Proceed east on Parkway (Interstate 279) towards downtown Pittsburgh. Go through the Fort Pitt tunnels and across the Fort Pitt bridge to Liberty Avenue. From Liberty Avenue, turn right onto the Boulevard of the Allies. Travel approximately 3–4 blocks to Smithfield Street. Turn left onto Smithfield and proceed approximately 5 blocks to Oliver Avenue. Turn right onto Oliver. Proceed one block. The Union Trust Building is on the right side of the street. Enter the building at 444 Oliver Avenue. This address is a specific office location where applications will be received.

From Pennsylvania Turnpike

Take Exit 6 (Monroeville) to Parkway (Interstate 376). Go west on Parkway to the Grant Street Exit (Exit 3).

Proceed on Grant Street to Fifth Avenue (approximately 4 blocks). Turn left onto Fifth Avenue and travel 2 blocks to Smithfield Street. Turn right onto Smithfield Street and travel 1 block to Oliver Avenue. Turn right onto Oliver Avenue. Proceed one block. The Union Trust Building is on the right side of the street. Enter the building at 444 Oliver Avenue. This address is a specific office location where applications will be received.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and section 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. § 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than November 16, 1989.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Barbara Lee Bacich,* Anna Maria, Florida; to acquire an additional 3.45 percent of the voting shares of Little Mountain Bancshares, Inc., Monticello, Minnesota, for a total of 14.03 percent, and thereby indirectly acquire First National Bank of Monticello, Monticello, Minnesota.

B. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Barbi Corp.—D.G. Council,* Kaufman, Texas; to acquire 2.44 percent of the voting shares of Kaufman Bancshares, Inc., Kaufman, Texas, and thereby indirectly acquire Farmers & Merchants National Bank, Kaufman, Texas.

Board of Governors of the Federal Reserve System, October 27, 1989.

Jennifer J. Johnson,
Associate Secretary of the Board.

BILLING CODE 6210-01-M

Brotherhood Bancshares, Inc., et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and section 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than November 22, 1989.

A. Federal Reserve Bank of Kansas (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Brotherhood Bancshares, Inc.,* Kansas City, Kansas; to become a bank holding company by acquiring 100 percent of the voting shares of Brotherhood Bank and Trust Company, Kansas City, Kansas.

2. *International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers,* Kansas City, Kansas; to acquire 47.5 percent of the voting shares of Brotherhood Bancshares, Inc., Kansas City, Kansas, and thereby indirectly acquire Brotherhood Bank and Trust Company, Kansas City, Kansas.

Board of Governors of the Federal Reserve System, October 27, 1989.

BILLING CODE 6210-01-M

Norwest Corp.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under section 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in section 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 17, 1989.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Northwest Corporation,* Minneapolis, Minnesota; to merge with First Interstate Corporation of Wisconsin, Kohler, Wisconsin, and thereby indirectly acquire First Interstate Bank of Wisconsin, Sheboygan, Wisconsin; First Interstate Bank of Wisconsin, N.A. (Green Bay), Green Bay, Wisconsin; First Interstate Bank of Wisconsin-Northeast, Green Valley, Wisconsin; First Interstate Bank of Wisconsin, N.A., (Eau Claire), Eau Claire, Wisconsin; First Interstate Bank of Wisconsin-Southeast, New Berlin, Wisconsin; First Interstate Bank of Wisconsin (Appleton), Appleton, Wisconsin; First Interstate Bank of Wisconsin (Waupun), Waupun, Wisconsin; First Interstate Bank Northern Indiana, N.A., South Bend,

Indiana; and acquire 100 percent of the voting shares of First Illini Bancorp, Inc., Galesburg, Illinois, and thereby

in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be

TRANSACTIONS GRANTED EARLY TERMINATION BETWEEN: 100389 AND 101389—Continued

TRANSACTIONS GRANTED EARLY TERMINATION BETWEEN: 100389 AND 101389—Continued

TRANSACTIONS GRANTED EARLY TERMINATION BETWEEN: 100389 AND 101389—Continued

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C.

Indiana; and acquire 100 percent of the voting shares of First Illini Bancorp, Inc., Galesburg, Illinois, and thereby indirectly acquire First Galesburg National Bank and Trust Company, Galesburg, Illinois; Abingdon Bank and Trust Company, Abingdon, Illinois; Madison Park Bank, Peoria, Illinois; and Community Bank and Trust Company of Canton, Canton, Illinois.

In connection with this application, Applicant also proposes to acquire First Interstate Trust Company of Wisconsin, Sheboygan, Wisconsin, and thereby engage in trust company activities pursuant to §225.25(b)(3); First Brokerage Services, Sheboygan, Wisconsin, and thereby engage in brokerage activities pursuant to § 225.25(b)(15); First Interstate Commercial Corporation of Wisconsin, Milwaukee, Wisconsin, and thereby engage in commercial finance activities, included, but not limited to, asset-based lending activities (the making, acquiring or servicing of loans or other extensions of credit for the company's account or for the account of others) pursuant to § 225.25(b)(1); and First Interstate Management Services of Wisconsin, Inc., Sheboygan, Wisconsin, and thereby engage in providing data processing services for financial institutions pursuant to § 225.25(b)(7) of the Board's Regulation Y.

First Interstate Bank of Wisconsin, Sheboygan, Wisconsin, conducts general insurance activities. Norwest anticipates that the bank will continue to conduct this activity after consummation of the proposal. Norwest has been previously authorized to conduct insurance activities pursuant to section 4(c)(8)(6) of the Bank Holding Company Act.

Board of Governors of the Federal Reserve System, October 27, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons comtemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

BILLING CODE 6750-01-M

[Docket No. 9229]

Outdoor World Corporation; Proposed Consent Agreement With Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In partial settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a membership campground promoter, based in Bushkill, PA, from misrepresenting in promotional mailings that named consumers have won specified prizes when the consumers had not won the specified prizes. Also, the proposed order would require respondent to retain accurate records, for three years, of advertising and promotional materials concerning prizes and gifts awarded.

DATE: Comments must be received on or before January 2, 1990.

ADDRESS: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Eileen Harrington, FTC/H-238, Washington, DC 20580. (202) 326-3127.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and section 3.25(f) of the Commission's Rules of Practice (16 CFR 3.25(f)), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with section 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii).

In the matter of Outdoor World Corp., a corporation: agreement in partial settlement containing consent order to cease and desist.

Outdoor World Corporation, by its duly authorized officer ("respondent") and counsel for the Federal Trade Commission enter into this agreement in partial settlement in accordance with the Commission's rules governing consent order procedures. The parties agree that:

1. Outdoor World Corporation is a Pennsylvania corporation with its principal office and place of business located at Route 209, Bushkill, Pennsylvania 18324.

2. Respondent has been served with a copy of the complaint issued by the Federal Trade Commission charging it with violations of section 5 of the Federal Trade Commission Act, 15 U.S.C. 45.

3. Respondent admits all the jurisdictional facts set forth in the Commission complaint in this proceeding.

4. Respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act, 5 U.S.C. 504.

5. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the respondent, in which event it

will take such action as it may consider appropriate, or issue and serve its decision, in disposition of the proceeding.

6. This agreement is for settlement purposes only and does not constitute an admission by respondent that the law has been violated as alleged in the complaint.

7. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of 3.25(f) of the Commission's Rules, the Commission may, without further notice to respondent, (a) issue its decision containing the following order to cease and desist in disposition of the proceeding and (b) make information public in respect thereto. When so entered, the order to case and desist shall have the same force and effect and my be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to order to respondent's address as stated in this agreement shall constitute service. Respondent waives any right it might have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

8. Respondent has read the complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I.

It is ordered that respondent, Outdoor World Corporation, a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, do forthwith cease and desist from representing, directly or by implication, that a consumer has won a specified prize, award, gift, bonus, premium, or any other good or service which is similarly described when in fact the consumer has not won the specified prize, gift, bonus, premium, or other good or service similary described.

II.

It is further ordered that respondent, its successors and assigns shall for three years the date the representation was last made maintain and upon request make available to the Federal Trade Commission for inspection and copying accurate records of (1) all advertising, promotional or sales materials containing representations regarding prize or gift offerings and (2) all prizes or gifts awarded pursuant to such offerings.

III.

It is further ordered that respondent shall notify the Commission at least thirty (30) days prior to any proposed change in respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the Order.

IV.

It is further ordered that respondent shall, within sixty (60) days after service of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with all requirements of this order.

Analysis of Proper Consent Order to Aid Public Comment

[File No. 892 3213 (JO1)]

The Federal Trade Commission has accepted an agreement for a proposed consent order from Outdoor World Corporation which would partially settle the case. Outdoor World Corporation is a seller and promoter of membership campgrounds. Its principal place of business is located at Route 209, Bushkill, Pennsylvania 18324.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments of interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint alleges that in numerous instances, Outdoor World Corporation has made false and misleading representations that a named consumer has won one or more specified prices. The proposed consent order would prohibit Outdoor World Corporation from representing that a consumer has won a specified prize when he or she has not won the specified prize.

The complaint also alleges that in numerous instances, Outdoor, World Corporation has made false and misleading representations that consumers will receive one or more prizes at no cost, where additional costs must be paid by consumers. This issue is not being settled and remains part of the case to be adjudicated.

The proposed order would require Outdoor World Corporation to retain accurate records for three (3) years of all advertising and promotional materials containing representations regarding prize or gift offerings, and records of all prizes and gifts awarded. The proposed order would require Outdoor World Corporation to notify the Commission of any proposed change in the corporation which may affect compliance with the order, and to file a compliance report within 60 days after service of the order.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Donald S. Clark,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Current Status of the Restructured Vessel Sanitation Program and Experience to Date with Pogram Operations; Meeting

The Center for Environmental Health and Injury Control (CEHIC) of the Centers for Disease Control (CDC) announces the following meeting.

Name: Current Status of the Restructured Vessel Sanitation Program and Experience to Date with Program Operations—Public meeting between CDC and the cruise ship industry, private sanitation consultants, and other interested parties.

Place: Miami Port Authority Passenger Terminal No. 10, 1007 North American Way, Miami, Florida.

Time and Date: 9 a.m.—5 p.m. Wednesday, December 13, 1989.

Status: Open.

Matters To Be Discussed: Current status of the restructured Vessel Sanitation Program and experience to date with program operations. During the past 3 years, as part of the revised Vessel Sanitation Program, CDC has conducted a series of public meetings with members of the cruise ship industry, private sanitation consultants, and other interested parties. This meeting is a continuation of that series of public meetings.

For a period of 15 days following the meeting, through December 28, 1989, the official record of the meeting will remain open so that additional material or comments may be submitted to be made part of the record of the meeting.

The meeting will be open to the public for participation, comment, and observation, limited only by space available. The meeting room accommodates approximately 100 people.

Contact Person for Further Information: Additional information concerning the meeting may be obtained from: Linda Anderson, Chief, Special Programs Group (F29), CEHIC, CDC, 1600 Clifton Road, N.E., Atlanta, GA 30333. Telephones: FTS: 236-4595, Commercial: (404) 488-4595.

Dated: October 26, 1989.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 89N-0360]

Biological Products; Ex-Vivo Activated Mononuclear Leukocytes for Administration to Humans; Points To Consider; Request for Comments, Data, and Recommendations; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft "points to consider" document entitled "Points to Consider in the Collection, Processing, and Testing of Ex-Vivo Activated Mononuclear Leukocytes for Administration to Humans." FDA is also announcing the continued availability of five other "points to consider" documents concerning in vitro monoclonal antibody products, in vivo monoclonal antibody products, recombinant deoxyribonucleic acid (DNA) products, characterization of cell lines, and interferon products. The availability of the latter five "points to consider" documents has been previously announced in the Federal Register.

FDA is also requesting comments, data, and recommendations from the public on these documents. The agency eventually may develop these documents into guidelines or regulations to help ensure the safety, purity, potency, and effectiveness of biological products, new drugs, or other products regulated under the Federal Food, Drug, and Cosmetic Act or under the Public Health Service Act.

DATES: Comments by January 2, 1989.

ADDRESSES: Submit written requests for single copies of the "points to consider" documents to the Congressional and Public Affairs Staff (HFB-140), Food and Drug Administration, Park Bldg., Rm. 158, 5600 Fishers Lane, Rockville, MD 20857. Send two self-addressed adhesive labels to assist that office in processing your requests. Submit written comments on the "points to consider" documents to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. Requests and comments should be identified with the docket number found in brackets in the heading of this notice. Requests and comments for the "points to consider" documents previously announced should be identified with the docket numbers specified below in brackets. Copies of the "points to consider" documents and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Linda Dujack, Center for Biologics Evaluation and Research (HFB-800), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20892, 301-496-8245.

SUPPLEMENTARY INFORMATION: Ex-vivo activated mononuclear leukocyte products currently present a potential for major advances in medical therapy. This new technology poses unique quality control and safety problems that must be thoroughly considered and overcome before any such products are marketed. FDA's Center for Biologics Evaluation and Research has developed a draft "points to consider" document concerning such products, entitled "Points to Consider in the Collection, Processing, and Testing of Ex-Vivo Activated Mononuclear Leukocytes for Administration to Humans." FDA is issuing this document to provide useful guidance to manufacturers engaged in the production of activated mononuclear leukocyte products. FDA is announcing the availability of this "points to consider" document and is inviting public comment.

In addition to the above document, FDA also is announcing the continued availability of five other "points to consider" documents that have been previously announced in the Federal Register of January 9, 1984 (49 FR 1138), June 6, 1984 (49 FR 23456), and April 4, 1988 (53 FR 10940). The five previously issued "points to consider" documents with the latest dates of revision are as follows:

1. "Points to Consider in the Manufacture of in Vitro Monoclonal Antibody Products Subject to Licensure" (draft of June 20, 1983) [Docket No. 83N-0363];

2. "Points to Consider in the Manufacture of Monoclonal Antibody Products for Human Use" (draft of June 1, 1987) [Docket No. 83N-0363];

3. "Points to Consider in the Production and Testing of New Drugs and Biologicals Produced by Recombinant DNA Technology" (draft of April 10, 1985) [Docket No. 83N-0363];

4. "Interferon Test Procedures: Points to be Considered in the Production and Testing of Interferon Intended for Investigational Use in Humans" (draft of July 28, 1983) [Docket No. 83N-0363];

5. "Points to Consider in the Characterization of Cell Lines Used to Produce Biologicals" (draft of November 16, 1987) [Docket No. 84N-0154].

FDA requests comments, data, and recommendations concerning any of the draft documents, particularly on the most recent "points to consider" on ex-vivo activated mononuclear leukocytes for adminsitration to humans. FDA may develop each of these documents into guidelines under 21 CFR 10.90(b)(1) or into regulations as needed to help ensure the safety, purity, potency, and effectiveness of biological products, new drugs, or other products regulated under the Federal Food, Drug, and Cosmetic Act or under the Public Health Service Act. Because these new technologies are changing and improving constantly, FDA may revise the draft documents several times and place the revisions on display at the Dockets Management Branch (address above).

Dated: October 26, 1989.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 89-25789 Filed 11-1-89; 8:45 am]

BILLING CODE 4160-01-M

National Institutes of Health

Meeting of the Division of Research Grants Advisory Committee

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Division of Research Grants Advisory Committee, December 1, 1989, Conference Room 6, Building 31C, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

The entire meeting will be open to the public from 9:00 a.m. to 4:30 p.m. The one-day meeting will include: an orientation to the history, current structure and functions of the Division of Research Grants; and a discussion of study section procedures and practices, especially as related to priority scores and percentile rankings. Attendance by the public will be limited to space available.

The Office of Committee Management, Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Maryland 20892, telephone (301) 496–7534, will furnish a summary of the meeting and a roster of the committee members.

Dr. Samuel Joseloff, Executive Secretary of the Committee, Westwood Building, Room 449, National Institutes of Health, Bethesda, Maryland 20892, phone (301) 496–7441, will provide substative program information upon request.

Dated: October 26, 1989.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

Public Health Service

National Toxicology Program, Board of Scientific Counselors' Meeting

Pursuant to Public Law 92–463, notice is hereby given of a meeting of the National Toxicology Program (NTP) Board of Scientific Counselors, U.S. Public Health Service, in the Conference Center, Building 101, South Campus, National Institute of Environmental Health Sciences (NIEHS), Research Triangle Park, North Carolina, on November 30 and December 1, 1989.

The meeting will be open to the public from 9:00 a.m. to 5:00 p.m. on November 30. The preliminary agenda topics with approximate times are as follows:

9:00 a.m.–10:00 a.m.—Program Orientation for New Board members

10:00 a.m.–12:30 p.m.—Program Progress and Concept Reviews—NIEHS Division of Toxicology Research and Testing (DTRT):

A. General Toxicology;

B. Reproductive and Development Toxicology;

C. Immunotoxicology;

1:30 p.m.–4:00 p.m.—Program Progress and Concept Reviews—DTRT cont.

D. Carcinogenesis;

E. Genetic Toxicology;

4:00 p.m.–5:00 p.m.—Review of Chemicals Nominated for NTP Studies.—The nominations of six chemicals will be reviewed. The chemicals were evaluated by the NTP Chemical Evaluation Committee on August 2, 1989, and are (with CAS Nos. in parentheses): (1) 4-Acetylaminofluorene (28322–02–3); (2) p-Aminobenzoic Acid (150–13–0); (3) Elmiron (37319–27–8); (4) Ethanol (64–17–1); (5) Monochloroacetone (78–95–5); and (6) Propylene Glycol Monomethyl Ether (107–98–2).

The meeting on December 1 will be open to the public from 9:00 a.m. until adjournment. The preliminary agenda topics with approximate times are as follows:

9:00 a.m.–9:15 a.m.—Report of the Director, NTP

9:15 a.m.–9:45 a.m.—Update on Activities of the Technical Reports Review Subcommittee (Peer Review Panel);

9:45 a.m.–10:45 a.m.—DTRT Poster Session

10:45 a.m.–11:15 a.m.—Update on Activities of the Reproductive and Developmental Toxicology Program Review Subcommittee

The Executive Secretary, Dr. Larry G. Hart, National Toxicology Program, P.O. Box 12233, Research Triangle Park, North Carolina 27709, telephone (919–541–3971; FTS 629–3971, will have available a roster of Board members and other program information prior to the meeting, and summary minutes subsequent to the meeting.

Dated: October 29, 1989.

David P. Rall,

Director, National Toxicology Program.

BILLING CODE 4140–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N–89–2079]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: October 27, 1989.

John T. Murphy,

Director, Information Policy and Management Division.

Proposal: Actions to Reduce Losses in FHA Programs, FR–2491.

Office: Housing.

Description of the need for the Information and its proposed use: This rule would require a mortgagee, when notified by the FHA Commissioner that the mortgagee had a higher than normal rate of early serious defaults and claims in the preceeding year, to submit a report to the Commissioner; and, if applicable, a plan and timetable for necessary corrective actions.

Form Number: None.

Respondents: Individuals or Households, Businesses or other For-Profit, Non-Profit Institutions, and Small Businesses or Organizations.

Frequency of Submission: On occasion.

Reporting Burden:

	Number of respondents	×	Frequency of Response	×	Hours per Response	=	Burden Hours
Information Collection	200		1		40		8,000

Total Estimated Burden Hours: 8,000.

Status: Reinstatement.

Contact: Andrew Zirneklis, HUD (202) 755–6824; John Allison, OMB (202) 395–6880.

Dated: October 27, 1989.

[FR Doc. 89–25793 Filed 11–1–89; 8:45 am]

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: October 26, 1989.

John T. Murphy,

Director, Information Policy and Management Division.

Proposal: Requisition For Development Or Modernization Funds.

Office: Public and Indian Housing.

Description of the Need for the Information and Its Proposed Use: The Housing Act of 1937, as amended, authorizes the Department to assist Public Housing Authorities (PHAs) and Indian Housing Authorities (IHAs) in the development and rehabilitation of lower income housing. The financial assistance is obtained by the PHA/IHA submitting to the Department an approved form HUD–5402A, Requisition for Development and Modernization Funds.

Form Number: HUD–5402A.

Respondents: State or Local Governments.

Frequency of Submission: Other.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
HUD–5402A	2,300		25		.5		28,750

Total Estimated Burden Hours: 28,750.

Status: Extension.

Contact: Stephanie Avery-Boyd, HUD, (202) 755–7920; John Allison, OMB, (202) 395–6880.

Dated: October 26, 1989.

Proposal:

1. Schedule of Subscribers and GNMA II Contractu al Agreement (to include Recordkeeping Requirements Contained in the GNMA MBS Guide (5500.2)) and
2. Schedule of Subscribers Addendum for Construction Loan Certification.

Office: Government National Mortgage Association (GNMA).

Description of the Need for the Information and Its Proposed Use: The forms will be used to provide GNMA with a listing of subscribers and other necessary information to prepare mortgage-backed securities and to provide the contractural agreement between the issuer and GNMA under the GNMA II program.

Form Number: HUD–11705, 1735.

Respondents: Businesses or Other For-Profit.

Frequency of Submission: On Occasion.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service,

Klamath Fishery Management Council Meeting

AGENCY: Fish and Wildlife Service Department of the Interior.

ACTION: Notice of meetings.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. I), this notice announces a meeting of the Klamath Fishery Management Council, established under the authority of the Klamath River Basin Fishery Resources Restoration Act (16 U.S.C. 460ss et seq.). The meeting is open to the public.

DATES: The Klamath Fishery Management Council will meet from 9:00 a.m to 5:00 p.m. Wednesday, November 1, 1989; from 9:00 a.m. to 4:00 p.m. on Thursday, November 2, 1989; and from 8:00 a.m. to 12:00 Noon on Friday, November 3, 1989.

Place: The meeting will be held at the Red Lion Inn, 1929 4th Street, Eureka, California.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald A. Iverson, Project Leader, U.S. Fish and Wildlife Service, P.O. Box 1006 (1030 South Main), Yreka, California 96097-1006, telephone (916) 842-5763.

SUPPLEMENTARY INFORMATION: For background information on the Task Force, please refer to the notice of their initial meeting that appeared in the **Federal Register** on July 8, 1987 (52 FR 25639).

On November 1, the Council will consider reports on proposed legislation, 1989 salmon fisheries, and technical advances in harvest management. The Council will also discuss the proposed Tenth Amendment to the Salmon Framework Plan of the Pacific Fishery Management Council. November 2nd and 3rd will be devoted to development of a long-term plan and policy for managing the in-river and ocean harvests of anadromous fish stocks of the Klamath River basin.

Dated: October 16, 1989.

W.E. Martin,

Acting Regional Director, U.S. Fish and Wildlife Service.

Receipt of Conveyance of Mineral Interest Applications; Arizona

ACTION: Notice of receipt of conveyance of mineral interest applications.

Notice is hereby given that:

Pursuant to section 209 of the Act of October 21, 1976, 90 Stat. 2757, Lake Pleasant Christian Convention Center has applied for conveyance of the mineral estate described as follows:

Gila and Salt River Meridian, Arizona

T. 6 N., R. 1 W.,
Sec. 23, S½NW¼, NW¼NW¼.
Containing 120 acres, more or less.

Pursuant to section 209 of the Act of October 21, 1976, 90 Stat. 2757, Pleasant Acres Development Corporation has applied for conveyance of the mineral estate described as follows:

Gila and Salt River Meridian, Arizona

T. 6 N., R. 1 W.,
Sec. 22, N½;
Sec. 23, NE¼, NE¼NW¼.
Containing 520 acres, more or less.

Additional information concerning this application may be obtained from the Area Manager, Phoenix Resource Area, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Upon publication of this notice in the **Federal Register**, the mineral interests described above will be segregated to the extent that they will not be open to appropriation under the public land laws, including the mining laws. The segregative effect of the application shall terminate either upon issuance of a patent or other document of conveyance of such mineral interests, upon final rejection of the application or two years from the date of filing of the application, September 13, 1989, whichever occurs first.

Dated: October 25, 1989.

Henri R. Bisson,

District Manager.

BILLING CODE 4310-33-M

[CA-940-00-5420-10-ZBGF; CACA 25712]

California; Proposed Issuance of a Recordable Disclaimer of Interest

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This document proposes to issue a disclaimer of interest from the United States to the City of Oceanside, California.

EFFECTIVE DATE: Comments should be received by (90 days from the publication date).

ADDRESS: Comments should be sent to the Chief, Lands Section, Branch of Adjudication and Records, California State Office, Bureau of Land Management, E-2845, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

FOR FURTHER INFORMATION CONTACT: Lavonia C. Silva, California State Office, (916) 978-4820.

Pursuant to section 315 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1745), the City of Oceanside has filed application CACA 25712 for issuance of a recordable disclaimer of interest by the United States, affecting the following land:

San Bernardino Meridian

T. 11 S., R. 5 W.,
Sec. 27, NE¼, portions of the right-of-way.
Acreage involved contains approximately 9.95 acres in San Diego County.

1. The above described land was conveyed by Certificate No. 1045, issued June 20, 1883 to Andrew J. Myers. The City of Oceanside is seeking clear title to portions of the railroad right-of-way which was granted in accordance with the General Railroad Right-of-Way Act of 1875 (43 U.S.C. 934). A title search revealed a reservation regarding the United States' right to enforce the terms of the General Railroad Right-of-Way Act of 1875. The applicant wishes to remove this cloud on the title.

2. For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments or objections in connection with the proposed disclaimer may present their views in writing to the undersigned.

Dated: October 24, 1989.

Nancy J. Alex,

Chief, Lands Section, Branch of Adjudication and Records.

[ID-030-09-4212-13]

Amendment of Little Lost/Birch Creek Management Framework Plan/Realty Action, I-23235; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Action—Amendment of the Little Lost/Birch Creek Management Framework Plan (MFP)/ Notice of Realty Action (NORA), Exchange of Public Land in Clark County, Idaho

Notice: Notice is hereby given that the BLM has amended the Little Lost/Birch Creek MFP to allow for the transfer of certain public lands in exchange for privately owned lands in Butte County, Idaho. The exchange will include surface and mineral estates.

SUMMARY: The following described lands have been examined and through the public supported land use planning process have been determined to be suitable for transfer by land exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716).

Public lands to be transferred are described as:

Boise Meridian, Idaho

T. 9 N., R. 30 E.,
Sec. 4, Lot 6, SE¼SW¼NW¼, W½SW¼ SE¼, W½E½SW¼SE¼.
Sec. 5, Lots 6 and 7.
Sec. 9, Lot 2.
Comprising 122.73 acres.

Non-federal lands to be acquired are described as:

Tract 1, Boise Meridian, Idaho

Beginning at the Northwest Corner of Section 9, T. 9 N., R. 30 E., and running North along section line into Section 4 a distance of 365 feet more or less to a fence on the West right-of-way line of Highway 28; thence South 23 degrees 22' East, along said right-of-way line 400 feet more or less to the North line of said Section 9; thence continuing along said right-of-way line 1,436 feet more or less to the South line of the NW¼NW¼ of said Section 9; thence West along said South line 725 feet more or less to the West line of Section 9; thence North along said section line 1,322 feet more or less to the point of beginning.

Tract 2. Boise Meridian, Idaho

Beginning at the Southwest Corner of the NE¼SW¼ of Section 9, T. 9 N., R. 30 E., and running thence North along West side of said ½th line 1,262 feet more or less to a fence on the West right-of-way line of Highway 28; thence South 23 degrees 22' East, along said right-of-way line 1,373 feet more or less to the South line of the NE¼SW¼; thence West along said South line 543 feet more or less to the point of beginning.

Comprising 21.9 acres.

The purpose of this exchange is to acquire the non-federal lands which have high public values for prime riparian habitat, important fisheries and access to Birch Creek.

The lands were appraised and the value of the lands to be exchanged are equal.

Lands to be transferred from the United States will be subject to the following reservations, terms and conditions: ditches and canals (Act of August 30, 1890—43 U.S.C. 945) and road right-of-way BL-053972 to the Idaho

UMI

State Transportation Department. Continued use of the land by valid right-of-way holders is proper, subject to the terms and conditions of the grant. Administrative responsibility previously held by the United States will be assumed by the patentee.

The publication of this notice in the **Federal Register** will segregate the public lands described above to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. As provided by the regulations of 43 CFR 2201.1(b), any subsequently tendered application, allowance of which is discretionary, shall not be accepted, shall not be considered as filed, and shall be returned to the applicant.

SUPPLEMENTARY INFORMATION: Detailed information concerning the conditions of the land exchange can be obtained by contacting Barbara Klingenberg, Realty Specialist, at (208) 529–1020.

Planning Protest

Any party that participated in the plan amendment and is adversely affected by the amendment may protest this action only as it affects issues submitted for the record during the planning process. The protest shall be in writing and filed with the Director (760), Bureau of Land Management, 1800 "C" Street, NW., Washington, DC 20240, within 30 days of this notice.

Land Exchange Comments

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments regarding the land exchange to the District Manager, Bureau of Land Management, 940 Lincoln Road, Idaho Falls, Idaho 83401. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any planning protests or objections regarding the land exchange, this realty action will become the final determination of the Department of the Interior and the planning amendment will be in effect.

Dated: October 27, 1989.

Lloyd H. Ferguson,

District Manager.

Public Lands in Bonneville, Clark and Jefferson Counties, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: The following described public lands have been identified as suitable for disposal by sale under section 203 of the Federal Land Policy and Management Act (FLPMA) of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value.

Parcel designation	Case No.	Legal description	Acreage	Appraised value
		Boise Meridian, Idaho		
A	I–26609	T. 7 N., R. 35 E. Sec. 27, NE¼NE¼	40	$4,000
B	I–26608	T. 7 N., R. 36 E. Sec. 33, SE¼SW¼	40	4,000
C	I–26610	T. 7 N., R. 36 E. Sec. 34, NW¼SW¼	40	4,000
D	I–26738	T. 9 N., R. 33 E. Sec. 25, W½SW¼	80	8,000
E	I–19736	T. 1 N., R. 44 E. Sec. 17; S½NW¼SE¼SE¼	5	6,000
F	I–27203	T. 1 N., R. 44 E. Sec. 17, W½SW¼SW¼SE¼	5	6,500
G	I–27204	T. 1 N., R. 44 E. Sec. 17, E½SW¼SW¼SE¼	5	6,500
H	I–27205	T. 1 N., R. 44 E. Sec. 17, W½NW¼SW¼SE¼	5	7,000

The mineral estates of the lands described above have no known mineral values, and will be sold under section 209(b) of FLPMA. A bid will also constitute an application for conveyance of those mineral interests offered for conveyance in the sale. A nonrefundable $50.00 filing fee will be required.

The following parcels will be offered for direct sale to the following parties based on historic use and ownership: Parcel A, Joseph Marty Family Trust, 1775 E. 1500 N., Hamer, Idaho 83425; Parcel C. Loren McGarry Ranches, HC 69, Box 1070, Hamer, Idaho 83425; and Parcel D, Sauer Enterprises, 5566 W. 49th N., Idaho Falls, Idaho 83402. Failure or refusal of the parites named above to submit a bid for the required amount by 9:00 a.m., January 10, 1990, will result in cancellation of the sale. The lands will then be offered for competitive sale through July 11, 1990.

Three landowners will be given a preference to bid on Parcel B on the basis of their ownership of adjacent land. These landowners are as follows: (1) Cook Farms, c/o Karl Cook, 1898 N. 2250 E., Hamer, Idaho 83425; (2) Loren McGarry Ranches, HC 69, Box 1070, Hamer, Idaho 83425; and (3) Ronald Torgerson, HC 69, Box 1040, Hamer, Idaho 83425. Failure or refusal of the parties named above to submit a bid of at least fair market value of 9:00 a.m., January 10, 1990, will result in perference bidding privileges being forfeited. The land will then be offered for sale to the public, using competitive procedures, through July 11, 1990.

Parcels E, F, G and H will be offered for competitive sale at public auction at no less than the appraised value. Sealed bids will be accepted until 9:00 a.m., January 10, 1990. At that time all bids will be opened and the highest bids will be announced. If two or more highest bids of the same amount are received, the determination of which is to be considered the highest bid shall be by drawing. Any unsold parcels will be offered for competitive sale through July 11, 1990.

Sealed bids for unsold parcels will be opened at 9:00 a.m. each Wednesday subsequent to the initial offering date until July 11, 1990.

Patents for the parcels, when issued, will contain the following reservations.

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States; Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

2. A right-of-way described under Serial Number BL–053505 for a highway issued under section 17 of the Act of November 9, 1921 (42 Stat. 212; 23 U.S.C. 18) on Parcels G and H.

3. A right-of-way described under Serial Number I–06116 for a highway issued under section 17 of the Act of November 9, 1921 (42 Stat. 212; 23 U.S.C. 18) on Parcel D.

4. A right-of-way described under Serial Number I–23546 issued under the Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761) on Parcel E.

5. A right-of-way described under Serial Number I–27212 for roadway purposes issued under the Act of October 21, 1976 (90 Stat. 2781; 43 U.S.C. 1767) on Parcels F and G.

6. A right-of-way described under Serial Number I–27213 for roadway purposes issued under the Act of October 21, 1976 (90 Stat. 2781; 43 U.S.C. 1767) on Parcel H.

The patent for Parcel E will also be issued subject to:

1. A right-of-way described under Serial Number I–21989 for a road issued under the Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761).

Upon the expiration of the right-of-way on July 7, 2015, the holder of the right-of-way must negotiate new terms with the landowner.

Publication of this Notice will segregate the subject lands from all appropriations under public lands laws, including the mining laws, but not the mineral leasing laws. This segregation will terminate upon the issuance of a patent or 270 days from the date of this Notice, or upon publication of a notice of termination.

DATE: The first opening of sealed bids for the lands described above will be held at 9:00 a.m., Wednesday, January 10, 1990.

ADDRESS: The sale will be held at the Bureau of Land Management, Idaho Falls District Office, 940 Lincoln Road, Idaho Falls, Idaho 83401.

FOR FURTHER INFORMATION: Additional information concerning these tracts, the terms and conditions of the sale and bidding instructions may be obtained from Jon Freeman or Juldy Fry at the above address, or by calling (208) 529–1020.

Detailed information concerning the sale, including the environmental assessments, is available for review at the Idaho Falls District, Bureau of Land Management, 940 Lincoln Road, Idaho Falls, Idaho 83401.

For a period of 45 days from the date of publication of this notice interested parties may submit comments to the District Manager, Idaho Falls District, at the above address. In the absence of timely objections, this proposal shall become the final determiantion of the Department of the Interior.

Dated: October 24, 1989.

Lloyd H. Ferguson,

District Manager.

Proposed Modification and Continuation of Withdrawal; Arizona

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, proposes to modify and continue for 20 years Public Land Order No. 3263, which withdrew lands in the Coconino National Forest for the Fort Valley and Long Valley Experimental Forest Research Areas. This notice pertains only to the lands in the Research Area Withdrawal. Other notices will be published at a later date for other lands covered by Public Land Order 3263. The land continues to be utilized for the purpose for which it was withdrawn, that of protecting the surface from activities detrimental to forest research actions. It is anticipated there will be no change in land use with the exception of 320 acres located in T. 22 N., R. 8 E., the west half of section 22, as the proposal is to terminate the withdrawal in that section. The Forest Service proposes that the land will remain closed to operations under the mining laws only.

DATE: Comments to this notice should be received by January 31, 1989.

ADDRESS: Comments should be addressed to the Arizona State Director, BLM, P.O. Box 16563, Phoenix, Arizona 85011.

FOR FURTHER INFORMATION CONTACT: John Mezes, BLM Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011, (602) 241-5509.

SUPPLEMENTARY INFORMATION: The Forest Service proposes that Public Land Order 3263, withdrawing lands from mining claim location for an indefinite period of time, be modified and continued for a period of 20 years pursuant to Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, insofar as it affects the following described lands in the State of Arizona:

Gila and Salt River Meridian

T. 22 N., R. 5 E.,
Sec. 24, S½, S½N½.
T. 22 N., R. 6E.,
Sec. 13, S½;
Sec. 22, All;
Sec. 23, ptn. NE¼;
Sec. 24, All;
Sec. 25, E/½, ptn. NW¼;
Sec. 27, ptn. NE¼, NW¼, N½SW¼.
T. 19 N., R. 7E.,
Sec. 23, ptn. NE¼;
Sec. 24, E½ and W½NW¼.
T.22 N., R. 7 E.,
Sec. 19, All;
Sec. 30, All.
T. 14 N., R. 9 E.,
Sec. 36, All.
T. 14 N., R. 10 E.,
Sec. 31, All.

Area proposed for termination.

T. 22 N., R. 8 E.,
Sec. 22, W½.

The areas described contained 6211.59 acres in Coconino County, of which 5891.59 acres will remain in withdrawal status. The purpose of the withdrawal is to protect the area from surface disturbing activities and allow forest and range experiments to continue without the threat of being disturbed. For periods of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with this proposed action may present their views in writing to this office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawal will be modified and continued and, if so, for how long. Notice of final determination will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Beaumont C. McClure,

Deputy State Director, Lands & Renewable Resources.

BILLING CODE 4310-32-M

Mineral Management Service

Outer Continental Shelf Advisory Board; Gulf of Mexico Regional Technical Working Group; Meeting

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of Gulf of Mexico Regional Technical Working Group (RTWG) meeting.

SUMMARY: Notice of this meeting is issued in accordance with the Federal Advisory Committee Act (Pub. L. No. 92-463). The Gulf of Mexico RTWG meeting will be held December 4, 1989, 1:00 p.m. to 4:45 p.m. at the Doubletree Hotel, Crescent Room, 300 Canal Street, New Orleans, Louisiana.

The RTWG business meeting will be held in conjunction with the Information Transfer Meeting. Agenda items for the business meeting include:

Gulf of Mexico Current Activities
Presentation on Amoco Cadiz Spill
Status of University Initiatives
Presentation of Minerals Management Service Inspection Program

FOR FURTHER INFORMATION: This meeting is open to the public. Individuals wishing to make oral presentations to the committee concerning agenda items should contact Ann Hanks of the Gulf of Mexico OCS Regional Office at (504) 736-2589 by November 27, 1989. Written statements should be submitted by the same date to the Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123. A taped cassette transcript and complete minutes of the Business Meeting will be available for public inspection in the Office of the Regional Director at the above address not later than 60 days after the meeting.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico RTWG is one of six such Committees that advises the Director of the Minerals Management Service on technical matters of regional concern regarding offshore prelease and postlease sale activities. The RTWG membership consists of representatives from Federal Agencies, the coastal States of Alabama, Florida, Louisiana, Mississippi, and Texas, the petroleum industry, the environmental community, and other private interests.

Dated: October 25, 1989.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

Bureau of Reclamation

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collection of information and explanatory material may be obtained by contacting the Bureau's clearance officer at the telephone number listed below. Comments and suggestions on the proposal should be made within 30 days directly to the bureau clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1006-0003), Washington, DC 20503, telephone 202-395-5897.

Title: Procedure to Process and Recover Value of Rights-of-Use and Administrative Costs.

OMB approval number: 1006-0003.

Abstract: Applicants for a right to use land under the jurisdiction of the Bureau of Reclamation must provide certain specified information. The required information will accompany the application and is the basic information necessary to enable the Bureau of Reclamation to determine whether or not the use can be granted. The information to be collected consists of the applicant's name and address, a description of the land on which the use is desired, the use to which the land will be put, the length of time the use will be in effect, and a map or drawing showing the area on which the desired use is to be located. If the use involves construction, the applicant may also be required to provide detailed construction plans, information needed by Reclamation to meet any environmental or cultural resource requirements, and additional information necessary to assure Reclamation that the proposed use will not conflict with the purpose for which Reclamation administers the land.

Bureau form number: No forms are involved.

Frequency: On occasion.

Description of respondents: Individuals, firms and agencies desiring to use Bureau of Reclamation-administered land for any purpose.

Estimated completion time: 2 hours.

Annual respondents: 400.

Annual burden hours: 800.

Bureau clearance officer: Nancy C. Smith, 303-236-6769.

Dated: September 11, 1989.

Terry P. Lynott,

Acting Deputy Commissioner, Bureau of Reclamation.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Board for International Food and Agricultural Development; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the Ninety-Seventh Meeting of the Board for International Food and Agricultural Development (BIFAD) on November 16 and 17, 1989.

The purposes of the Meeting are: (a) To hear an update on the Food and Agriculture 2000, (b) to hear a report on the Africa Natural Resources Program, (c) to hear a report on the Peanut CRSP, (d) to hear an update on Sustainable Agriculture, (e) to hear BIFAD Recommendations to Africa Bureau, and (f) to hear a report on S&T Rural Development Program.

The November 16-November 17, 1989 Meetings will be held in the Department of State, Room 5951, 2201 C Street, Washington, DC 20523. Any interested person may attend and may present oral statements in accordance with procedures established by the Board and to the extent the time available for the meeting permits.

Curtis Jackson, Bureau of Science and Technology, Office of University Relations, Agency for International Development is designated as A.I.D. Advisory Committee Representative at this Meeting. It is suggested that those desiring further information write to Dr. Jackson, in care of the Agency for International Development, Rm 309, SA 18, Washington, DC 20523, or telephone him on (703) 875-4005.

Dated: October 25, 1989.

Lynn Pesson,

Executive Director, BIFAD.

BILLING CODE 4325-01-M

POSTAL RATE COMMISSION

Order No. 852

Commission Order and Notice Initiating Proceedings and Setting Dates for Filing Initial Testimony; Advo-System, Inc.

Issued October 30, 1989.

In the Matter of a Complaint of Advo-System, Inc., Docket No. C89-3, Advo Local Saturation Subclass Proposal, Docket No. MC89-1, MOAA Catalog Subclass Proposal, Docket No. C89-4.

Before Commissioners: Henry R. Folsom, Vice Chairman; John W. Crutcher; W.H. "Trey" LeBlanc, III; Patti Birge Tyson

After considering the above-referenced filings of Advo-System, Inc. (Advo) and the Mail Order Association of America (MOAA) and related Postal Service answers, the Commission has determined that the complaints may be justified and has decided to initiate formal proceedings designed to explore issues relevant to (i) the Advo complaint; (ii) the Advo local saturation subclass alternatives; and (ii) the MOAA catalog complaint.[1] As our rules make clear, our decision to proceed in this fashion is preliminary in the sense that a final determination with respect to the merits of the complaints and the related classification proposals will await completion of a hearing on the record.

Other Procedural Matters. In light of earlier representations by Advo and MOAA as to the amount of time needed to prepare and file their evidence, the Commission directs Advo to file its direct evidence by December 6, 1989 and directs MOAA to file by January 24, 1990. MOAA is encouraged to file its evidence sooner if possible. Persons who have filed requests to be placed on the Commission's service list in the Advo Local Saturation Subclass Proposal, Docket No. MC89-1, are automatically granted intervenor status in the other proceedings. Other persons interested in participating in these cases

[1] *See* July 10, 1989 Petition of Advo-System, Inc. and related July 17, 1989 Commission Notice; *See* July 10, 1989 Advo Complaint and related July 17, 1989 Commission Notice and Order; *see also* August 18, 1989 Complaint of Mail Order Association of America and August 31, 1989 Commission Notice and Order. The Postal Service filed answers to the Advo Complaint on August 9, 1989 and to the MOAA Complaint on September 18, 1989.

should file notices of intervention in accordance with Commission rule 20 (39 CFR 3001.20) no later than December 1, 1989. Stephen A. Gold, Director of the Commission's Office of the Consumer Advocate, who was designated to represent the interests of the general public in the MOAA case by operation of Order No. 843, is directed to assume that duty in the other proceedings as well. Further scheduling decisions, including any decision on consolidation of the cases, will be made at a later date. *It Is Ordered:*

(1) The Commission hereby initiates formal proceedings in Docket Nos. MC89-1, C89-3 and C89-4.

(2) Advo's prepared testimony in Docket Nos. MC89-1 and C89-3 is to be filed no later than December 6, 1989; MOAA's prepared testimony in Docket No. C89-4 is to be filed no later than January 24, 1990.

(3) Intervenor status in these cases is extended to persons whose names are on the Commission's servcie list in Docket No. MC89-1, Advo Local Saturation Subclass; other persons interested in intervening in these cases are to file notices of intervention no later than December 1, 1989;

(4) Stephen A. Gold, Director of the Commission's Office of the Consumer Advocate, is designated to represent the interests of the general public in Docket Nos MC89-1 and Docket No. C89-3.

By the Commission.

Charles L. Clapp,

Secretary.

BILLING CODE 7710-FW-M

SECURITIES AND EXCHANGE COMMISSION

[File No. 22-19839]

Application and Opportunity for Hearing; Union Tank Car Company

October 25, 1989.

Notice is hereby given that Union Tank Car Company (the "Company") has filed an application pursuant to clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeship of Citibank, N.A. (the "Bank") under an indenture dated October 1, 1971 (the "1971 Indenture") between the Company and the Bank which was heretofore qualified under the Act and under a proposed indenture (the "1989 Indenture") between the Company and the Bank which will be qualified under the Act, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Bank from acting as trustee under either of these indentures.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest (as defined in the section), it shall, within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of that section provides, with certain exceptions stated therein, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture of the same obligor.

The Company alleges:

(1) Pursuant to the 1971 Indenture, the Company has outstanding $2,600,000 aggregate amount of its 7¾% Equipment Trust Certificates due October 1, 1991 (the "1971 Certificates"). The 1971 Certificates were registered under the Securities Act of 1933 (the "1933 Act") and the 1971 Indenture was qualified under the Act.

(2) Pursuant to the 1989 Indenture, the Company will issue $100,000,000 aggregate principal amount of Equipment Trust Certificates (the "1989 Certificates"). The 1989 Certificates will be registered under the 1933 Act and the 1989 Indenture will be qualified under the Act.

(3) The Company is not in default under the 1971 Indenture. The Company's obligations under the 1971 Indenture and the 1989 Indenture will rank *pari passu inter se.* The 1971 Indenture is and the 1989 Indenture will be secured by a separate group of specifically indentified rail cars.

(4) The provisions of the 1971 Indenture and the 1989 Indenture are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as Trustee under said Indentures.

The Company has waived notice of hearing, and any and all rights to specify procedures under the Rules of Practice of the Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application which is on file in the Offices of the Commission's Public Reference Section, File No. 22-19839, 450 Fifth Street NW., Washington, DC 20549.

Notice is further given that any interested persons may, no later than November 20, 1989, request in writing that a hearing be held on such matter stating the nature of his interest, the reasons for such request and the issues of law or fact raised by such application which he desires to controvert, or he may request that he be notified if the Commission orders a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions the Commission may deem necessary or appropriate in the public interest and for the protection of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Order 89-10-52, Dockets 46210 and 46411]

Agreements Among Members of the International Air Transport Association Regarding Cargo Services Matters

AGENCY: Department of Transportation.

ACTION: Notice.

SUMMARY: The Department approved and granted antitrust immunity to most of the agreements, which consisted of resolutions and recommended practices involving documentation, handling and technical procedures for processing cargo shipments. However, the Department disapproved various provisions revising the Conditions of Contract printed on the standard air waybill as being inconsistent with the Warsaw Convention and U.S. policy thereunder.

The Department disapproved paragraph II of Resolution 600b, Notice Concerning Carrier's Limitation of Liability, and paragraphs 2.3 4.1, 4.2, and 6 of the Conditions of Carriage in Resolution 600b, as well as the corresponding paragraphs in Recommended Practice 1600b, Publication of the Air Waybill and Conditions of Contract in French.

The Department also approved and granted antitrust immunity to various related agreements, rejecting IATA's contention that they were already immunized by prior Department orders approving IATA tariff coordination procedures.

FOR FURTHER INFORMATION CONTACT: Mr. Lawrence Myers, Office of the General Counsel, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-9183.

Dated: October 27, 1989.

Jeffrey N. Shane,

Assistant Secretary for Policy and International Affairs.

Fitness Determination of Conquest Airlines Corp.

AGENCY: Department of Transportation.

ACTION: Notice of commuter air carrier fitness determination—Order 89-10-56, Order to Show Cause.

SUMMARY: The Department of Transportation is proposing to find Conquest Airlines Corp. fit, willing, and able to provide commuter air service under section 419(e)(1) of the Federal Aviation Act.

RESPONSES: All interested persons wishing to respond to the Department of Transportation s tentative fitness determination should file their responses with the Air Carrier Fitness Division, P-56, Department of Transportation, 400 Seventh Street, SW., Room 6401, Washington, DC 20590, and serve them on all persons listed in Attachment A to the order. Responses shall be filed no later than November 6, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. James A. Lawyer, Air Carrier Fitness Division, P-56, Department of Transportation, 400 Seventh Street, SW., Room 6401, Washington, DC 20590, (202) 366-1064.

Dated: October 30, 1989.

Jeffrey N. Shane,

Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910-62-M

President's Commission on Aviation Security and Terrorism; Public Meeting

AGENCY: Office of the Secretary, Department of Transportation.

ACTION: Notice of public meeting of the President's Commission on Aviation Security and Terrorism.

SUMMARY: The President's Commission on Aviation Security and Terrorism will be holding its first public hearing. At this first public hearing the Commission is interested in hearing from members of the public who are concerned with the Commission's mandate from the President, as set forth below. Subsequent hearings will be scheduled, including a hearing of representatives of Federal agencies and a hearing focused on detection equipment and technology. Interested members of the public are invited to attend. Persons wishing to address or submit a written statement to the Commission should contact the person below at least three days before the hearing. Oral submissions to the Commission will be limited to 20 minutes each.

DATE: Friday, November 17, 1989, 10:00 a.m. ET.

ADDRESS: Reserve Officers Association, Fifth Floor, One Constitution Avenue, NE., Washington, DC 20002.

FOR FURTHER INFORMATION CONTACT: Robert I. Ross, Commission on Aviation Security and Terrorism, 1825 K Street, NW., Suite 519, Washington, DC 20036, (202) 254-3166.

SUPPLEMENTARY INFORMATION: By Executive Order 12686, August 4, 1989, the President established the Commission on Aviation Security and Terrorism to examine policy regarding the threat of terrorism to civil aviation, specifically options for preventing aviation terrorism and handling terrorist threats, including prior notification to the public, and policies, practices, and laws regarding treatment of families of the victims of terrorism. In these areas, the Commission is specifically to focus on the destruction of Pan American flight 103 over Lockerbie, Scotland, on December 21, 1988.

The members of the Commission are:

1. Ann Dore McLaughlin, former Secretary of Labor, Chair.
2. Senator Frank Lautenberg (D-NJ), Chair of the Senate Appropriations Subcommittee on Transportation.
3. Senator Alfonse M. D'Amato (R-NY), Ranking Minority Member of the Senate Appropriations Subcommittee on Transportation.
4. Representative James N. Oberstar (D-MN), Chair of the House Public Works and Transportation Subcommittee on Aviation.
5. Representative John Paul Hammerschmidt (R-AR), Ranking Minority Member of the House Committee on Public Works and Transportation.
6. Edward Hidalgo, Esq., former Secretary of the Navy.
7. General Thomas Richards, USAF (Ret.), former Deputy Commander in Chief, United States European Command.

Issued in Washington, DC, on October 30, 1989.

Harry R. Van Cleve,

Commission General Counsel.

[FR Doc. 89-25929 Filed 11-1-89; 8:45 am]

BILLING CODE 4910-62-M

Coast Guard

[CGD 89-091]

Meeting of the Chemical Transportation Advisory Committee

AGENCY: Coast Guard, DOT.

ACTION: Notice of meeting.

SUMMARY: The Chemical Transportation Advisory Committee (CTAC) will hold a meeting on Tuesday, November 28, 1989, in Room 2230, Department of Transportation, Nassif Building, 400 Seventh Street, SW., Washington, DC. The meeting is scheduled to begin at 9:00 a.m. and end at 4:30 p.m. The Committee will consider comments received during the comment period for the Notice of Proposed Rulemaking (NPRM) for Marine Vapor Control Systems published on October 6, 1989 (54 FR 41366).

The agenda is as follows:

1. Call to order.
2. Opening remarks.
3. Consideration of comments received on NPRM for Marine Vapor Control Systems.
4. Adjournment.

Attendance is open to the public. Members of the public may present oral statements at the meeting. Those wishing to present oral statements should notify the Executive Director of CTAC, Captain J.C. Maxham, (202) 267-2967, no later than the day before the meeting. A summary of comments received in response to the NPRM will be available from the contact given below.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander R.H. Fitch, U.S. Coast Guard Headquarters (G-MTH-1), 2100 Second Street SW., Washington, DC 20593-0001, (202) 267-1217.

Dated: October 27, 1989.

J.D. Sires,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

[FR Doc. 89-25778 Filed 11-1-89; 8:45 am]

BILLING CODE 4910-14-M

Federal Highway Administration

[FHWA Docket No. MC-89-17]

Driver Fatigue Research; Public Meeting

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of public meeting.

SUMMARY: The FHWA announces that there will be a public meeting at 9:00 a.m., Wednesday, November 29, 1989, in Room 2230 of the Department of Transportation Building, 400 Seventh Street, SW., Washington, DC.

The purpose of the meeting is to provide a briefing on a research contract that the FHWA recently awarded to the Essex Corporation, Goleta, California, to examine the problem of commercial motor vehicle fatigue and driver alertness, and to identify and examine potential countermeasures. In addition, a short review of all fatigue-related research currently underway within the FHWA will be provided.

The Essex Corporation will outline the proposed plan for its research, including methodology and technical equipment that will be applied. Participants are encouraged to provide comment on the proposal.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Davis (202-366-2997) or Mr. Stanley Hamilton (202-366-0665), Office of Motor Carriers, Federal Highway Administration, 400 Seventh Street NW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., EST, Monday through Friday.

Issued on October 27, 1989.

T.D. Larson,

Administrator.

[FR Doc. 89-25766 Filed 11-1-89; 8:45 am]

BILLING CODE 4910-22-M

Maritime Administration

Merchant Marine Decorations and Medals

AGENCY: Maritime Administration, DOT.

ACTION: Notice.

SUMMARY: This notice is issued pursuant to Maritime Administration regulations governing the award of authorized merchant marine decorations and medals (46 CFR part 350) to reflect the recently enacted authority given to the Maritime Administration to again accept applications for original issuance of World War II merchant marine decorations and medals to mariners who served during that period. That authority had previously been rescinded by Public Law 94-759, but has been renewed by Public Law 100-324.

FOR FURTHER INFORMATION CONTACT: Bruce J. Carlton, Director, Office of Maritime Labor and Training, Maritime Administration, MAR 250, Room 7302, Department of Transportation, 400 7th Street, SW., Washington, DC 20590. Tel. (202) 366-5755.

SUPPLEMENTARY INFORMATION: Under Public Law 759, 84th Congress, the authority of the Maritime Administration to issue merchant marine decorations and medals for World War II service was repealed. The Maritime Administration has had no authority to accept an original request made by a merchant mariner for World War II decorations and medals since 1956. Public Law 84-759 authorized the Maritime Administration only to replace those previously awarded merchant marine decorations and awards lost, destroyed, or rendered unfit for use.

With the enactment of Public Law 100-324, the Merchant Marine Decorations and Medals Act of May 30, 1988, the Maritime Administration has again been authorized to "award decorations and medals of appropriate design for individual acts or service in the United States merchant marine." This Act provides the authority for the Maritime Administration to accept requests for the original issuance of merchant marine decorations and medals for service during World War II, and the Maritime Administration will now accept and process such applications.

The following awards were established to recognize merchant seamen for their service in World War II. (Also listed are awards for the Korean and Vietnam Wars.) In determining an applicant's eligibility for these merchant marine decorations and medals, the service criteria associated with each of these awards must be fully met by the applicant. The award for which original applications are again being accepted are:

(a) The Atlantic War Zone Bar, awarded to crew members of ships operated by or for the War Shipping Administration who served in the Atlantic War Zone, including the North Atlantic, South Atlantic, Gulf of Mexico, Caribbean, Barents Sea, and the Greenland Sea, during the period December 7, 1941, to November 8, 1945;

(b) The Pacific War Zone Bar, awarded to crew members of ships operated by or for the War Shipping Administration who served in the Pacific War Zone which included the North Pacific, South Pacific, and the Indian Ocean east of 80

degrees east longitude, during the period December 7, 1941, to March 2, 1946;

(c) The Mediterranean-Middle East War Zone Bar, awarded to crew members of ships operated by or for the

[The Merchant Marine Distinguished Service Medal, Meritorious Service Medal, Gallant Ship Award and Mariner's Medal awarded for outstanding conduct or service in the

MAR 250, Department of Transportation, Washington, DC 20590.

If an applicant is found to be eligible for a merchant marine decoration and award, an authorization card(s) will be

exemption from three Federal Motor Vehicle Safety Standards. The basis of the grant is that an exemption would facilitate the development and field evaluation of a low emission motor

characteristics, affecting time to obtain operating temperature and the total power output rating. Petitioner raises the possibility that this change may actually improve performance of the heater when

2. Electric vehicles will help reduce dependency upon foreign oil.
3. Electric vehicles may help to reduce the incidence of vehicle fires.

degrees east longitude, during the period December 7, 1941, to March 2, 1946;

(c) The Mediterranean-Middle East War Zone Bar, awarded to crew members of ships operated by or for the War Shipping Administration who served in the zone including the Mediterranean Sea, Red Sea, Arabian Sea, and Indian Ocean west of 80 degrees east longitude, during the period December 7, 1941, to November 8, 1945; (d) The Defense Bar, awarded to crew members of U.S. merchant ships for service prior to Pearl Harbor, during the period September 8, 1939, to December 7, 1941; (e) The Combat Bar, awarded to crew members who served on a ship which at the same time of service was attacked or damaged by an instrumentality of war during the period December 7, 1941, to July 25, 1947. A star is attached if the crew member was forced to abandon ship. For each additional abandonment a star is added; (f) The Philippine Defense Ribbon, awarded to crew members of ships operated by or for the War Shipping Administration who served in Philippine water for not less than 30 days during the period December 8, 1941, to June 15, 1942; (g) The Philippine Liberation Ribbon, awarded to crew members of ships operated by or for the War Shipping Administration who served in Philippine waters for not less than 30 days during the period October 17, 1944, to September 3, 1945; (h) The Merchant Marine Emblem, an identifying insigne that was issued to active merchant seamen for service during the period December 7, 1941, to July 25, 1947; (i) The Victory Medal, awarded to crew members of ships owned by, or operated by, or for the account of the War Shipping Administration for 30 days during the period December 7, 1941, to September 3, 1945; (j) The Honorable Service Button, awarded to crew members of ships owned by or operated by the War Shipping Administration for 30 days during the period December 7, 1941, to September 3, 1945; and, (k) The Presidential Testimonial Letter, awarded to crew members of ships owned by or operated by the War Shipping Administration for 30 days during the period December 7, 1941, to September 3, 1945. In addition, applications continue to be accepted and processed for the Korean Service Bar, awarded for service in the U.S. merchant marine during the period June 30, 1950, to September 30, 1953, in waters adjacent to Korea; and the Vietnam Service Bar, awarded for service in the U.S. merchant marine during the period July 4, 1965, to August 15, 1973, in waters adjacent to Vietnam. (The Merchant Marine Distinguished Service Medal, Meritorious Service Medal, Gallant Ship Award and Mariner's Medal awarded for outstanding conduct or service in the U.S. merchant marine are processed in accordance with Maritime Administrative Order 550–3, Merchant Marine Awards Committee, and are not the subject of this notice.)

An individual who believes his service in the merchant marine during World War II meets the above-described eligibility criteria for one or more of these awards is invited to apply for the award(s). The following information must be provided by all applicants with any request for original issuance of World War II awards: (1) The applicant's full name and present mailing address; (2) a copy of the applicant's DD Form 214, "Certificate of Release or Discharge from Active Duty," with continuation sheet, if provided. (Do not send the original form.) The DD Form 214 will be used to verify the applicant's World War II merchant marine service and to identify the ship(s) on which the applicant served. Applicants who do not have a DD Form 214 should apply for one by completing a DD Form 2168, "Application for Discharge of Member or Survivor of Member of Group Certified to have Performed Active Duty with the Armed Force of the United States," and mailing it to the appropriate address on the form. In brief, to receive consideration for the DD Form 214, a merchant mariner would have had to serve satisfactorily as a crew member during the period of armed conflict, December 7, 1941, to August 15, 1945, aboard merchant vessels in oceangoing service or foreign waters. Merchant marine applicants who wish further information on how to obtain a DD Form 214 should contact their local Department of Veterans Affairs office. No application for an award under this Notice can be processed until the applicant has been issued a DD Form 214; (3) The applicant's identification number(s) (i.e., Z or book number), and his World War II home address, if available; (4) a brief summary of the applicant's World War II sailing history including ships sailed on, theatre(s) of operation (for example, Pacific War Zone, Atlantic War Zone), and the applicant's ports of discharge; and (5) any available supporting documentation to substantiate the application for an award.

All requests and inquiries on merchant marine decorations and medals should be forwarded to: Office of Maritime Labor and Training, Maritime Administration, Room 7302, MAR 250, Department of Transportation, Washington, DC 20590.

If an applicant is found to be eligible for a merchant marine decoration and award, an authorization card(s) will be supplied to the applicant with which the decoration may be purchased from either of the Maritime Administration's authorized vendors. (These vendors are the Ship's Service Store, United States Merchant Marine Academy, Kings Point, L.I., NY 11024, and The Quartermaster Uniform Company, 750 Long Beach Blvd., Long Beach, CA 90813.) The vendors will provide merchant marine service ribbon bars at cost, including postage and handling fees.

Those merchant seamen who have previously been awarded decorations for their service in World War II, Korea and/or Vietnam, but whose awards have been lost, destroyed, or rendered unfit for use, may obtain replacements of their merchant marine service ribbon bars by contacting the Maritime Administration at the above address. Those merchant marine service ribbon bars which may be replaced upon authorization by the Maritime Administration are: Atlantic War Zone Bar, Pacific War Zone Bar, Mediterranean-Middle East War Zone Bar, Combat Bar, Defense Bar, Philippine Liberation Ribbon, Philippine Defense Bar, Victory Medal Bar, Korean Service and Vietnam Service Bar. The following decorations are provided at cost, again upon authorization by the Office of Maritime Labor and Training, Maritime Administration: Victory Medal, Honorable Service Button, Merchant Marine Emblem, Mariner's Medal, Gallant Ship Unit Citation Bar, Meritorious Service Medal and Distinguished Service Medal.

By order of the Maritime Administrator.

Dated: October 27, 1989.

James E. Saari,

Secretary, Maritime Administration.

[FR Doc. 89-25779 Filed 11-1-89; 8:45 am]

BILLING CODE 4910-81-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. EX89-2; Notice 2]

Conceptor Industries, Inc.—Grant of Petition for Temporary Exemption From Three Federal Motor Vehicle Safety Standards

This notice grants the petition by Conceptor Industries, Inc., of Richmond Hill, Ontario, Canada, for a temporary

exemption from three Federal Motor Vehicle Safety Standards. The basis of the grant is that an exemption would facilitate the development and field evaluation of a low emission motor vehicle, and that an exemption would not unreasonably degrade the safety of such vehicle. The exemption is for a period of one year.

Notice of receipt of the petition was published on February 23, 1989, and an opportunity afforded for comment (54 FR 7910).

Conceptor has not heretofore manufactured motor vehicles. In conjunction with the Electric Vehicle Development Corporation and the Electric Power Research Institute, and several U.S. electric utility companies, Conceptor is modifying G-Vans produced by General Motors Corporation. These modifications include substitution of an electric propulsion system for the internal combustion propulsion system with which the vehicle is originally manufactured. Specific components that are removed by GM include the engine, exhaust system, coolant system, transmission, and drive shaft. Conceptor replaces them with an electric traction motor, 16 monoblock batteries in a tray, an electrical controller, and a smaller transmission and drive shaft. These modifications result in a vehicle that is 1,000 pounds heavier than the original G-Van produced by GM. The modified vehicle would have an all new frontal structure, the addition of the battery tray to the underlying structure, and the relocation of the power train to the rear. The net result of the modifications is not only to change the crash characteristics of the original G-VAn, but also potentially to affect compliance with some Federal safety standards which do not contain a barrier impact test procedure.

Petitioner stated that it did not know that its modifications will actually result in noncompliances, but it sought a 2-year exemption from several standards that may be affected. In the meantime, it will conduct such testing and make such modifications as may be required to ensure that the compliance of the vehicles it produces after the exemption period. It will not produce more than 2500 vehicles in any 12-month period in which the exemption is in effect, as its current plans are to sell no more than 200 exempted vehicles overall.

The standards from which Conceptor sought exemption, and its reasons for so doing, were:

1. Standard No. 103, Windshield Defrosting and Defogging Systems. The heater unit is a new diesel power one with different power output characteristics, affecting time to obtain operating temperature and the total power output rating. Petitioner raises the possibility that this change may actually improve performance of the heater when tested according to the Standard.

2. Standard No. 105, Hydraulic Brake Systems. The increased curb weight, the change in center-of-mass location, new weight distribution, new mode of power for the brake-hydraulic system and the introduction of regenerative braking will require the G-Van's braking system to be recalibrated for the new vehicle configuration. Petitioner requests exemption from the stopping distance requirements of the third effectiveness test (paragraph S5.1.1.3), the partial failure requirements (S5.1.2), and the inoperative brake power assist unit or brake power unit requirements (S5.1.3).

3. Standard No. 124, Accelerator Control Systems. The electric G-Van will incorporate an all-new accelerator mechanism. Testing is at present needed to determine its compliance with the standard.

4. Standard No. 208, Occupant Restraint Systems. In the absence of any information to the contrary, NHTSA assumes that the restraint systems installed by General Motors will remain in place. However, their continued compliance with the standard has not been demonstrated in the absence of barrier impact testing, for which the petitioner requests exemption.

5. Standard No. 212, Windshield Mounting.

6. Standard No. 219, Windshield Zone Intrusion.

Petitioner wishes to demonstrate compliance with these standards also through barrier impact testing, and exemption is therefore requested.

7. Standard No. 301, Fuel System Integrity. The Electric G-Van incorporates a new fuel tank used in the diesel powered heater unit. Compliance will be demonstrated through impact testing, which has not been conducted, and an exemption is therefore requested.

Petitioner stated that, during the time of the temporary exemption, the technical and economic feasibility of the Electric G-Van will be evaluated. It argued that an exemption would be in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act for the following reasons:

1. The evaluation period afforded by the exemption could lead to the greater commercialization of low-emission motor vehicles, and concomitant improvement in the air quality of urban areas.

2. Electric vehicles will help reduce dependency upon foreign oil.

3. Electric vehicles may help to reduce the incidence of vehicle fires.

The only commenter was General Motors Corporation, which supported the petition. GM explained that it supplies Conceptor with "shells", i.e., an aggregation of components and sub-systems derived from the "G" Van. In addition to the components listed by Conceptor as omitted from the shell, GM stated that it also does not provide a fuel system and significant portions of the electrical system. For these reasons, GM will specify in its contract with Conceptor that the petitioner alone bears the responsibility for certification of compliance with the Federal motor vehicle safety standards, except for those components requiring certification as motor vehicle equipment. GM commends Conceptor's efforts "to develop, certify, and market an electrically propelled vehicle."

Before considering whether the petitioner has sufficiently justified its request, the agency notes that an exemption is not needed with respect to Standards Nos. 103 and 208. The General Motors G-Van, from which the Conceptor is derived, is certified as a multipurpose passenger vehicle ("MPV"), and not as a passenger car. Thus, the Conceptor will be certified also as an MPV. The only requirement that Standard No. 103 imposes for an MPV is that it be equipped with a defroster and defogging system. Performance requirements for those systems are specified only for passenger cars. NHTSA understands that Conceptor will continue to provide the required systems, uncertain though it may be as to its performance capabilities. Similarly, with respect to Standard No. 208, a vehicle other than a passenger car is not currently subject to any requirement for which a barrier crash is specified in the standard as the means of determining compliance. Pursuant to S4.2.2., and S4.1.2.3, an MPV like the Conceptor may be equipped with a Type 2 lap and shoulder belt system that meets the requirements of Standard No. 209. Conceptor has informed NHTSA that it intends to leave the GM restraint systems in place. Finally, after the end of the comment period, Conceptor informed the agency that it had determined that it would comply with Standards Nos. 212 and 219, and that therefore no exemption was needed.

Sections 123(a)(1)(C) and (a)(2) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1410(a)(1)(C)) provide that a petitioner may be granted

VOL 54 ISS 211 NO 2 1989 UMI

a temporary exemption upon a finding that "such temporary exemption would facilitate the development or field evaluation of a low-emission motor vehicle and would not unreasonably degrade the safety of such vehicle", and "that such temporary exemption would be consistent with the public interest and the objectives of the Act." In view of increasing concerns about environmental problems and about the need to import petroleum to fuel this country's motor vehicles, NHTSA deems it important to encourage the search for propulsion systems that are viable alternatives to the internal combustion engine. Electrical propulsion is one such system. To date, such systems have not proven competitive with internal combustion systems to the extent that they are alternatives, except for a limited number of vehicle applications in urban environments, such as postal vans and delivery trucks. Even here, electric vehicle usage appears to be more of a sporadic, experimental nature than a program of incremental improvements in technology from one year to the next. The experience of Conceptor, with the encouragement and support of General Motors, could add to the sum of knowledge of electric vehicle technology. The agency believes that these factors would justify a finding that a temporary exemption will facilitate the development and field evaluation of a low-emission motor vehicle. Similarly, given that development of safety systems suitable for electrically propelled vehicles to meet the requirements of the Federal safety standards will continue while the exemption is in effect, NHTSA believes that a finding that an exemption is in the public interest, and consistent with the objectives of the Vehicle Safety Act would be justified.

In order to grant a low emission vehicle exemption, the Administrator is also required by the Act to find that such an exemption would not unreasonably degrade the safety of the exempted vehicle. To enable the agency to make this finding, a petitioner must either attempt to show that its noncompliances involve narrow, comparatively insignificant safety requirements or, attempt to show, through tests in accordance with the procedures in the affected standards, mathematical modeling, engineering analysis or other means, that the extent of its noncompliances are not unreasonable. The judgment as to reasonableness would be based on a variety of considerations including the potential safety risk and the vehicle design choices necessary to accommodate the production and marketing of a low emission vehicle.

In response to requests from NHTSA, Conceptor supplemented its original petition with additional information on August 24 and September 5, 1989, some of which is discussed below.

Standard No. 105: Conceptor's electric G-Van has the same GVWR as GM's certified G-Van. The electric G-Van has the identical braking system as the certified G-Van, including the hydraulic accumulator capable of several braking stops, except that an electric motor dedicated to the task replaces the internal combustion engine as the power-assist source. The electric G-Van also has a regenerative braking system which provides a third means of stopping should the power assist and/or the mechanical brakes fail. This effect occurs when the driver's foot is removed from the brake pedal, and, if the brakes are applied, the regenerative braking goes to maximum output.

The paragraphs of Standard No. 105 from which exemption is requested involve tests conducted at curb weight. The electric G-Van's curb weight is approximately 1,600 pounds greater than that of GM's G-Van. Because of the existence of regenerative braking, Conceptor believes that its product will stop more quickly in the partial failure test. Overall, it believes that the final testing of its product will demonstrate that its brake system is superior to that of the original G-Van.

Standard No. 124: Conceptor's G-Van has basically the same accelerator control system as the original G-Van, except that it contains a potentiometer which converts the mechanical position from the accelerator cable to electrical resistance. Two stainless steel extension return springs are located on the range selector end of the accelerator cable to return the motor speed controller (throttle) to motor shut-down (idle) as required by S5.1. The potentiometer, which replaces the throttle, also contains a return spring. Should the potentiometer lever fail, this spring will return the potentiometer to idle, thereby cutting off power to the electric drive motor. Conceptor also points out that in operation, when pressure is removed from the throttle, regenerative braking begins to slow the vehicle.

Standard No. 301: Although Conceptor's G-Van is not powered by an internal combustion engine, diesel fluid is carried to power the heater unit. The fuel tank has been replaced with a smaller one of approximately 8 gallons for this purpose, and one fuel line, now unnecessary, has been removed. The filler, vent, and sending systems remain the same as in GM's G-Van. Since the date of the original petition, Conceptor has conducted a front impact test on its van, and found that it complied. The remaining tests have not been completed, but petitioner believes that it should comply, and that the insertion of the battery pack should provide additional protection at least on side impact.

The agency has reviewed Conceptor's arguments, and has found them persuasive that an exemption for a period of one year would not unduly degrade the safety of the vehicle. However, on the basis of the information presented, the agency is unable to provide an exemption for a longer period. Regenerative braking should aid in complying with Standard No. 105, and in achieving the intent of Standard No. 124, but petitioner has not demonstrated how significant the braking effect is before application of the service brakes, or, once the brakes are applied, how much regenerative braking will add to the braking effect of the service brakes. During the year the exemption is in effect, petitioner will be able to determine whether it in fact complies, or whether an extension is needed. On the basis of its test, Conceptor argues that its vehicle meets the frontal impact requirements of Standard No. 301, and, because of its configuration, should meet the lateral moving barrier test. The reduced amount of fuel carried in the vehicle, and the elimination of one fuel line should enhance its ability to comply with the rear moving barrier test. The year that the exemption is in effect will allow time to conduct further tests to determine compliance with Standard No. 301.

Accordingly, Conceptor Industries, Inc. is hereby granted NHTSA Exemption No. 89–2 from paragraphs S5.1.1.3, S6.1.2, and S5.1.3 of 49 CFR 571.105 Motor Vehicle Safety Standard No. 105 *Hydraulic Brake Systems*, 49 CFR 571.124 Motor Vehicle Safety Standard No. 124 *Accelerator Control Systems*, and paragraphs S6.2/S6.4, and S6.3/S6.4 of 49 CFR 571.301 Motor Vehicle Safety Standard no. 301 *Fuel System Integrity*, expiring November 1, 1990.

(15 U.S.C. 1410; delegation of authority at 49 CFR 1.50)

Issued on: October 27, 1989.

Jeffrey R. Miller,
Acting Administrator.

BILLING CODE 4910-59-M

[Docket No. EX89–5; Notice 1]

Ferrari S.p.A.; Petition for Temporary Exemption From Federal Motor Vehicle Safety Standard No. 208

Ferrari S.p.A. of Modena, Italy, has petitioned for a temporary exemption from the passive restraint requirements of Motor Vehicle Safety Standard No. 208 *Occupant Restraint Systems* for its model F40, for a period of 1 year. The basis of the petition is that compliance would cause substantial economic hardship.

This notice of receipt of the petition is published in accordance with the regulations of the National Highway Traffic Safety Administration (49 CFR Part 555), and does not represent any agency decision or other exercised of judgment concerning the merits of the petition.

A manufacturer is eligible to apply for a hardship exemption if its total motor vehicle production in its most recent year of production does not exceed 10,000, as determined by the NHTSA Administrator (15 U.S.C. 1410(d)(1)). Ferrari's total production "is about 4000", of which approximately 25% are manufactured for sale in the United States. However, Fiat S.p.A., a major vehicle manufacturer now holds a 90% interest in Ferrari. The threshold of eligibility would be exceeded if the production total of Fiat were added to that of Ferrari.

As discussed below, NHTSA has tentatively determined that the threshold of eligibility is not exceeded. The agency believes that there are two general issues concerning whether Ferrari's eligibility is affected by its relationship with Fiat. The first issue is whether Ferrari can be considered the manufacturer of any vehicles other than the 4,000 units cited above, with the possible result that the 10,000 unit limit is exceeded. This question can be answered in the negative. It is only the manufacturer of vehicles bearing the Ferrari nameplate.

The second and more difficult issue is whether persons other than Ferrari can be considered to manufacture the 4,000 units. The National Traffic and Motor Vehicle Safety Act does not include any provision indicating that a person is a manufacturer of a vehicle by virtue of ownership or control of another person that is a manufacturer.

NHTSA has stated, however, that a person may be a manufacturer of a vehicle manufactured by another person if the first person has a sufficiently substantial role in the manufacturing process that it can be deemed the sponsor of the vehicle. The agency considers the statutory definition of "manufacturer" (15 U.S.C. 1391(5) to be sufficiently broad to include sponsors, depending on the circumstances. See 50 FR 14596, April 12, 1985, and a letter of September 18, 1987, to General Motors. In the present instance, the F40 bears no resemblance to any motor vehicle designed or manufactured by Fiat, and the agency understands that the F40 was designed and engineered without assistance from Fiat. Further, the agency understands that such assistance as Ferrari may receive from Fiat relating to use of test facilities and the like is an arms length transaction for which Ferrari pays Fiat. Accordingly, NHTSA concludes that Fiat is not a manufacturer of Ferrari vehicles by virtue of being a sponsor.

According to Ferrari, its F40 "is a vehicle designed primarily for competition and truly capable of being utilized for racing." Aware, however, that its purchasers would use it on the public roads, Ferrari has attempted to develop a US version of the vehicle "in full compliance of all safety and emission applicable standards notwithstanding the great difficulties posed by the sophisticated composite production, the performance of the vehicle and the extremely low production volume." To that end "the economic evaluation of the costs sustained by Ferrari for the adaptation * * * to the USA specifications is well over $6,000,000".

Ferrari had anticipated that the F40 would comprise 20% of its 1989 US sales, with production beginning in the summer of 1988 and completion a year later. It had intended producing 200 units in this period. But because of difficulties in obtaining electronic engine controls necessary to meet emission standards, and composite body panels, it could not meet this schedule. Realizing that any F40 manufactured for the US market on or after September 1, 1989, would have to comply with the passive restraint requirements of Standard No. 208, it contracted with its supplier preparing systems for its other vehicles, AutoLiv-Klippan, "to develop a passive belt system also for the F40 model." Although the design system has been completed, AutoLiv cannot deliver the system to Ferrari before the summer of 1990 due to its commitments to Ferrari on its other US models, and to other manufacturers as well.

The petitioner has advised that the F40 cannot be retrofitted with an airbag system. Neither can it be retrofitted with an automatic redundant belt system, which would require "substantial modifications not only to the outside fitting but also to the structure as: A pillar, roof structure, B pillar, etc.". As further evidence of its good faith attempts to conform, it submits that is has "promptly installed on its vehicles during the Phase-In period many more passive restraint systems than required by law, accumulating a large number of 'credits', to the number of 523. It regards this number as "especially high in consideration of a US production of just over 1000 vehicles per year."

Cognizant that many manufacturers who have petitioned the agency for hardship exemptions have had balance sheets showing continuing losses (Ferrari projects an income for 1989 of over $10,000,000 without US F40 sales), Ferrari basis its hardship argument on the need to begin to recover at the earliest possible time the $6,000,000 it has expended on developing the US version of the F40. A denial would force it to scrap "or rework a great number of vehicles already partially assembled and not being able to readily manufacture the vehicle with passive belts." In addition, $300,000 of parts and materials for active belts for the US cars would be wasted. It also believes that its dealers, who have invested in facilities dedicated to the F40, would also suffer economic losses.

Ferrari argues that an exemption would be in the public interest and consistent with the objectives of the Act. It believes that if an exemption is not granted, F40s that it has not manufactured to conform to US Federal safety and emission standards will be imported through the gray market. It argues that "curbing speculations and reducing the exposure of the public to questionable modified vehicles is in the public interest." It cites NHTSA's own statement (54 FR 35556) that one of the objectives of the Act was to afford a continuing wide choice of vehicles to the motoring public.

Interested persons are invited to submit comments on the petition of Ferrari described above. Comments should refer to the docket number and be submitted to Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street SW., Washington, DC 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment date indicated below will be considered. The petition and supporting materials, and all comments received, are available for examination in the docket both before and after the closing date. Comments received after the closing date will be considered to the extent practicable. Notice of final action on the petition will

be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: December 4, 1989.

BILLING CODE 4910-59-M

Research and Special Programs Administration

[Docket No. IRA-48]

Reichhold Limited Application for Inconsistency Ruling Concerning State of Maine Regulations for the Transportation of Hazardous Materials

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice of Extension of Comment and Rebuttal Comment Periods.

SUMMARY: Reichhold Limited has applied for an administrative ruling determining whether Maine's regulations requiring a license for the transportation of hazardous materials are inconsistent with the Hazardous Materials Transportation Act (HMTA) and the Hazardous Materials Regulations (HMR) issued thereunder and, therefore, preempted under section 112(a) of the HMTA. RSPA has expanded the proceeding to include Maine's licensing and enforcement statute concerning such transportation, and its fee statute for hazardous materials transported by railroad.

A public notice and invitation to comment on that application was published at 54 FR 37764, on September 12, 1989. It provided for a comment period ending October 20, 1989, and a rebuttal comment period ending December 8, 1989. Although RSPA has been in contact with other State of Maine officials concerning this matter, Maine's Attorney General's Office asserts that it did not receive the application until the day the comment period was to end. To ensure that all interested parties have an adequate opportunity to comment, this Notice extends the comment and rebuttal comment periods on that application.

DATES: The comment period is hereby extended to December 1, 1989, and the rebuttal comment period is extended to January 5, 1990. Rebuttal comments may discuss only those issues raised by comments received during the initial comment period and may not discuss new issues.

ADDRESSES: The application and any comments received may be reviewed in the Dockets Unit, Research and Special Programs Administration, Room 8421, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Comments and rebuttal comments on the application may be submitted to the Dockets Unit at the above address, and should include the Docket Number, IRA-48. Three copies are requested. A copy of each comment and rebuttal comment must also be sent to Mr. G.R. Beasant, Reichhold Limited, Mississauga Executive Centre, Four Robert Speck Parkway, Suite 700, Mississauga, Ontario, Canada L4Z 1S1, and to Mr. Garry R. Hinkley, Director, Commercial Vehicle, Secretary of State, Motor Vehicles Division, Station No. 29, Augusta, Maine 04333, and that fact certified to at the time each comment is submitted to the Dockets Unit. (The following format is suggested: "I hereby certify that copies of this comment have been sent to Mr. Beasant and Mr. Hinkley at the addresses specified in the **Federal Register**.").

FOR FURTHER INFORMATION CONTACT: Mr. Edward H. Bonekemper, III, Senior Attorney, Office of the Chief Counsel, Research and Special Programs Administration, 400 Seventh Street, SW., Washington, DC 20590-0001, telephone number 202-366-4400.

Public Comments: Comments should be limited to the issues of whether Maine's above-described statutes and regulations, requiring a license for transportation of hazardous materials and imposing a fee on hazardous materials transported by railroad, are inconsistent with the HMTA and the HMR. They should specifically address the "dual compliance" and "obstacle" tests described in the September 12, 1989 Notice.

Persons intending to comment on the application should examine the complete application in the RSPA Dockets Unit, the September 12, 1989 Notice (including Appendices A and B thereto), and the procedures governing the Department's consideration of applications for inconsistency rulings (49 CFR 107.201-107.211).

Issued in Washington, DC on October 27, 1989.

Alan I. Roberts,

Director, Office of Hazardous Materials Transportation.

Sunshine Act Meetings

Federal Register

Vol. 54, No. 211

Thursday, November 2, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

BLACKSTONE RIVER VALLEY

National Heritage Corridor

Notice is hereby given in accordance with Section 552b of Title 5, United States Code, that a meeting of the Blackstone River Valley National Heritage Corridor Commission will be held on Thursday, November 9, 1989.

The Commission was established pursuant to Public Law 99-647. The purpose of the Commission is to assist federal, state and local authorities in the development and implementation of an integrated resource management plan for those lands and waters within the Corridor.

The meeting will convene at 7:00 p.m. at the Central Falls Library, 205 Central Street, Central Falls, Rhode Island for the following reasons:

1. Report of the Chairman.
2. Report of the Executive Director.
3. Report of the Treasurer.
4. Committee Reports.
5. Report on the Cultural Heritage and Land Management Plan.
6. Report on Preservation Awards Program.
7. Discussion of 1990 Action Plan.
8. Reports on 2nd Annual National Conference on Historic Canals.
9. Report on Heritage Tourism conference.
10. Report of Scholar-In-Residence.
11. Report on Interpretive Tours—Bus, Rail, Canoe.
12. Public Comments.

It is anticipated that about twenty people will be able to attend the session in addition to the Commission members.

Interested persons may make oral or written presentations to the Commission or file written statements. Such requests should be made prior to the meeting to: James Pepper, Executive Director, Blackstone River Valley National Heritage Corridor Commission, P.O. Box 34, Uxbridge, MA 01569. Telephone (508) 278-9400 or (508) 278-5124.

Further information concerning this meeting may be obtained from James Pepper, Executive Director of the Commission at the address below.

Shirley Cleaves,

Acting Executive Director, Blackstone River Valley National Heritage Corridor Commission.

FEDERAL ELECTION COMMISSION

"FEDERAL REGISTER" NO. 89-25421

PREVIOUSLY ANNOUNCED DATE AND TIME: Thursday, November 2, 1989, 10:00 a.m.

THE FOLLOWING ITEM WAS DELETED FROM THE AGENDA:

Draft AO 1989-21:
Elaine Sandra Abramson on behalf of Create-A-Craft

THE FOLLOWING ITEM WAS ADDED TO THE AGENDA:

Drug-Free Workplace Program

DATE AND TIME: Tuesday, November 7, 1989, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC.

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. § 437g.
Audits conducted pursuant to 2 U.S.C. § 437g, § 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration.
Internal personnel rules and procedures or matters affecting a particular employee.

DATE AND TIME: Thursday, November 9, 1989, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC. (Ninth Floor).

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Setting of Dates for Future Meetings.
Correction and Approval of Minutes.
Draft Advisory Opinions:
Draft AO 1989-21:
Ms. Elaine Sandra Abramson on behalf of Create-A-Craft
Draft AO 1989-23:
Mr. David T. Wright on behalf of Coopers & Lybrand
Affiliation & Earmarking Regulations:
Announcement of Effective Date
Explanation & Justification of the Foreign National Regulations:
11 C.F.R. § 110.4
Administrative Matters

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, Telephone: (202) 376-3155.

Marjorie W. Emmons,

Secretary of the Commission.

[OST Docket No. 46574, Notice No. 89-22]

RIN 2105-AB52

Alcohol Abuse Prevention Program for the Transportation Industry

AGENCY: Office of the Secretary, DOT.

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: The Department of Transportation is exploring the need to adopt additional regulations for the transportation modes it regulates to prevent employees from performing sensitive safety- and security-related functions while under the influence of alcohol. This ANPRM solicits public comment on the scope of the problem, the need for additional action and the feasibility and scope of several possible options, if further action is deemed necessary.

DATE: Comments on the ANPRM must be received on or before January 31, 1990.

ADDRESS: Comments on the ANPRM should be mailed to Documentary Services Division, C–55, Department of Transportation, Room 4107, Docket 46574, 400 Seventh Street, SW., Washington, DC 20590. In order to provide a copy for each modal administration's docket and to facilitate the Department's review, we request that an original and seven additional copies of the comments be submitted. Because of the size and complexity of the document, we also ask commenters to designate the section letters and numbers to which their comments refer. Comments will be available for review by the public at this address from 9:00 a.m. through 5:00 p.m., Monday through Friday. Persons wishing the agency to acknowledge receipt of their comments should include a stamped, self-addressed postcard with their comments. The Documentary Services Division will time and date-stamp the card and return it to the commenter. The comments will be reviewed and, in the event that further action is taken, they will be furnished to those modal administrations that are responsible for taking the action.

FOR FURTHER INFORMATION CONTACT: Neil Eisner, Assistant General Counsel for Regulations and Enforcement, or Gwyneth Radloff, Attorney, Department of Transportation, (202) 366–9305, 400 7th Street SW., Washington, DC 20590.

I. Introduction

A. Background

The Department of Transportation (DOT or Department) is comprised of the Office of the Secretary (OST) and nine separate modal administrations: The Federal Aviation Administration (FAA), the Federal Highway Administration (FHWA), the Federal Railroad Administration (FRA), the Maritime Administration (MARAD), the National Highway Traffic Safety Administration (NHTSA), the Research and Special Programs Administration (RSPA), the St. Lawrence Seaway Development Corporation (SLSDC), the Urban Mass Transportation Administration (UMTA), and the United States Coast Guard (USCG).

Each of the modal administrations operates under different statutory authority; for example, some extensively regulate actions by persons within their mode of transportation, while others do not. As discussed below in greater detail, the Department, through its modal administrations, already has implemented several programs designed to address the use and abuse of alcohol by transportation workers. The states also are active in combating the use and abuse of alcohol; some of these efforts are funded through the Department.

Six of the Department's modes (USCG, FAA, FHWA, FRA, RSPA, and UMTA) recently issued drug testing rules for members of their regulated industries (53 FR 47002 et. seq., Nov. 21, 1988). The rules apply to persons performing sensitive safety- and security-related functions in commercial operations.

During the drug testing rulemakings, the Department noted on numerous occasions that alcohol is a drug. The Department recognized its wide use, its addictive nature, and the number of transportation-related deaths and injuries that result every year from its abuse. However, the Department also realized that, for numerous reasons, the solution to the alcohol abuse problem may be very different from that concerning other drugs, such as cocaine or marijuana. For that reason, with one exception, the modal administrations did not include alcohol among the list of substances to be tested for under the drug testing regulations. (Pursuant to a statutory mandate, the Coast Guard required post-accident alcohol testing, in an amendment to an existing rule permitting that testing. FRA had previously included alcohol in its post-accident testing mandate and had authorized alcohol testing for reasonable cause and pre-employment.) In announcing the drug testing rules, then Secretary of Transportation, Jim Burnley, stated that he had directed his General Counsel's Office to review the Department's existing alcohol regulations to determine if they were sufficient. The extensive press coverage of and public interest in the possible involvement of alcohol in the Exxon Valdez oil spill heightened the governmental interest in this area.

In his June 15, 1989, testimony before the Senate Committee on Commerce, Science and Technology, Secretary Skinner committed the Department to exploring further the need for additional regulations on alcohol use. This ANPRM is intended to elicit public comment on whether the Department's current regulatory requirements and programs are sufficient to respond to the hazards of alcohol use and abuse in DOT-regulated transportation industries and what additional action, if any, should be taken.

If further rulemaking action is necessary, the Department could consider a number of options that could improve safety by reducing alcohol abuse in DOT-regulated transportation industries. The list that follows is not all-inclusive and options may be combined. The options include:

1. Requiring employers to establish Employee Assistance Programs (EAP) that provide education on the dangers of alcohol abuse and training to detect alcohol use or impairment on the job;

2. Requiring employers to set up self- and peer-referral programs designed to identify alcohol abusers and get them into rehabilitation programs, with the understanding that the identified abusers, if rehabilitation is successfully completed, could retain their jobs;

3. Requiring alcohol testing of transportation employees similar in whole or in part to our drug testing rules, summarized in Appendix B (e.g., preemployment, periodic, reasonable cause, post-accident and random testing);

4. Requiring pre-performance testing prior to permitting an employee to operate a vehicle or perform safety- or security-related duties (e.g., a pilot could be tested before entering the cockpit to fly an airplane); and/or

5. (A nonrulemaking option) encouraging the states to implement safety programs directed at alcohol abuse and to increase their enforcement efforts.

If further regulatory action is deemed necessary after a review of the comments on this ANPRM, separate dockets will be set up and notices of proposed rulemakings will be developed by each of the affected modal administrations.

B. Major Issues

The Department particularly desires public comment on the following issues. This list is intended only to serve as a focal point and is not exhaustive. Following the list, there is an extensive discussion of these and other issues, and readers will note many questions throughout the document.

1. Are Additional Measures Necessary To Control Alcohol Abuse Among Transportation Workers?

How well are existing regulations and programs working? We have anecdotal reports that alcohol use is more widespread among transportation workers than other drug abuse, but are there supportive data? Are further regulations needed or would other actions such as increased enforcement of existing rules be more effective?

2. What Should Be Prohibited?

If we decide that new prohibitions or new testing for alcohol is appropriate, an important issue is what use of alcohol to prohibit. Unlike some other drugs, alcohol is a legal substance with legally and socially acceptable uses, at least for persons over 21 years of age. The Department already has made some decisions on what to prohibit. Most of the modes regulating commercial transportation (FAA, FHWA, FRA and Coast Guard) have selected a .04 percent blood alcohol concentration (BAC) level as the standard for determining whether a commercial operator is under the influence of alcohol, and prohibit any use of alcohol on the job. Some modes (USCG, FAA and FHWA) subject commercial operators to pre-duty abstinence periods. FHWA rules require that commercial vehicle operators with any measurable BAC level be placed out-of-service for a 24-hour period. Recreational boaters are prohibited only from being intoxicated, which correlates generally to a BAC of .10 percent. The BAC level is a ratio of the number of grams of alcohol per 100 milliliters of blood; for the purpose of determining BAC through an analysis of the breath, the amount of alcohol in one part of blood is presumed to equal the amount of alcohol in 2100 parts of expired breath sample (by volume).

Should the department undertake to make the transportation industries alcohol-free? Is this practicable, given the fact that alcohol is a legal substance? Or should the Department target impairment on the job, which poses the greatest danger? If so, where should the line be drawn? Should there be differences in this respect for different industries or occupations?

3. If Further Action Is Necessary, What General Forms Should It Take?

a. *Education.* Should the Department mandate employer-provided alcohol abuse training? Should educational efforts focus on convincing abusers to seek treatment or on training supervisors to identify problem drinkers? Are there data to validate the success of alcohol education programs? What elements are necessary for a successful program? Should educational

efforts be coupled with self- and peer-referral rehabilitation programs? Are educational programs more successful if coupled with increased enforcement efforts?

4. What Should Be the Consequences for an Employee Identified as Using Alcohol on the Job, Being Under the Influence While on the Job, or Improperly Using Alcohol Prior to Work?

Many of the words relating to alcohol are used interchangeably in our society, which may cause some confusion. In this document, we use the terms "intoxication", "driving while

alcohol appears to enter the blood stream at different rates in different people (Zero Alcohol, 1987). In another study, subjects were given controlled doses and had equal amounts of food in

we cannot take action. Rather, it means merely that a wide variety of factors must be weighed as we reevaluate our current requirements and consider new ones.

the investigators' objective measurements. (American Journal of Psychiatry, December 1986). BAC tests in the above situation would be

VOL 54 ISS 2 1 1 NO 2 1989 UMI

efforts be coupled with self- and peer-referral rehabilitation programs? Are educational programs more successful if coupled with increased enforcement efforts?

b. *Enforcement.* Are the federal and state penalties for alcohol use sufficient? Are effective actions being taken to ensure compliance with alcohol restrictions? What enforcement strategies are likely to be most effective? What should be the roles of employers and the Federal, state and local governments?

c. *Alcohol Testing.* Mandatory testing programs are costly and inevitably controversial. The Department's recent experience with imposing mandatory drug tests may provide some guidance, but we recognize that alcohol testing may involve different problems.

To what extent do our current drug rules serve as a viable model for alcohol testing? What changes would be necessary to account for the differences between alcohol and other drugs? Does widespread mandatory alcohol testing make sense if we choose to prohibit intoxication or impairment as a distinct from all use of alcohol? The signs of alcohol intoxication are much more widely recognized among the general population than the indicators of drug use. On the other hand, "functional" alcoholics can often mask signs of intoxication. Further, moderate levels of alcohol can impair certain faculties without constituting "intoxication." Would it be cost-effective to randomly test for alcohol intoxication? If not, should the Department require, at a minimum, post accident and reasonable cause testing for alcohol intoxication, where not already required?

d. *State Programs.* State and local governments have extensive experience in dealing with alcohol impairment. Testing for the presence of alcohol has traditionally been done by State enforcement personnel (usually as part of a stop of an individual on the highways). Some States have laws against boating while intoxicated and some states have laws against flying while intoxicated. Under FAA rules, crewmembers must submit to state tests upon request by a state law enforcement officer. The ability to test generally is predicated upon establishing reasonable suspicion to stop, probable cause to test, followed by an arrest if warranted, and finally, conducting a second and more sophisticated test (which would be used as evidence). In what areas can the Department make use of the states' resources and expertise?

4. What Should Be the Consequences for an Employee Identified as Using Alcohol on the Job, Being Under the Influence While on the Job, or Improperly Using Alcohol Prior to Work?

Should all who are found to be under the influence be removed from safety- and security-related jobs until they are rehabilitated? Should the function they were performing when under the influence be relevant? (e.g., filling out paperwork at a desk?) Should an opportunity for rehabilitation be required? Are there distinctions that warrant a federal role in mandating at least one opportunity for rehabilitation for alcohol abuse in light of DOT's position that such a role was inappropriate in the drug area? Rehabilitation may be more successful for alcohol users than for at least some kinds of drug use. Use of alcohol is also legal for persons aged 21 and older. Should either or both of these factors influence how we treat persons identified as alcohol abusers? What is the success rate of existing programs? Should the circumstances of use (on the job, for example) be a factor in determining whether an employee should have a right to rehabilitation? What about the circumstances of identification? Should self-identified problem users be treated differently? Should the level of consumption be a consideration? Should it matter whether the abuse was a cause of an accident? Should a job be held open in the event an employee takes advantage of an opportunity for rehabilitation?

C. General Information and Definitions

Throughout this notice, we have generally relied on or referred to the results of many studies concerning alcohol. Parenthetical references to these studies are included in the text; their full names are listed alphabetically in a bibliography in Appendix A. Copies of all of these studies have been placed in the rulemaking docket. It is important to note that the data we have are not complete; often the database includes only those tests that were performed. Tests are performed after some accidents, but not others depending upon current regulatory requirements, the availability of state enforcement personnel and location and timing of accidents. Also, data are not comparable among the transportation modes, because of differences in reporting requirements, databases and time periods. In addition, the referenced studies generally used different parameters and are not comparable to each other. We welcome the submission of additional data from commenters.

Many of the words relating to alcohol are used interchangeably in our society, which may cause some confusion. In this document, we use the terms "intoxication", "driving while intoxicated" (DWI) and "driving under the influence" (DUI) to refer to the same thing: violation of State and/or Federal BAC standards defining intoxication. "Zero tolerance" refers to a 0.00 BAC standard. "Impairment" and "under the influence" mean affected by alcohol ingestion, without regard to a specific BAC level. An "active alcoholic" is an current problem drinker. Some active alcoholics can successfully mask the effects of drinking and function in their jobs without detection for long periods of time; these people are often referred to as "functional alcoholics", but may still be safety risks in transportation.

II. The Problem of Alcohol Use and Abuse

A. Effect of Alcohol

The potential effects of alcohol abuse are substantial in terms of lives lost and environmental damage. It claims at least 100,000 lives annually, 25 times as many as all illegal drugs combined. In 1988, slightly over 47,000 deaths occurred on our nation's highways, of which 39 percent involved an intoxicated driver or non-occupant (with BAC over 0.10%), and another 11 percent where at least some alcohol was involved. (National Highway Traffic Safety Administration, "Drunk Driving Facts," July 1989).

Ethanol (the psychoactive component beverages) is a central nervous system depressant. It has been widely recognized for years that consumption of alcohol can degrade human performance of demanding or delicate tasks. However, there is somewhat less agreement about how much alcohol must be ingested before there is a significant deterioration in performance. Studies have indicated that the effects of alcohol vary among individuals, and, even for a given individual, alcohol will have varying effects depending on such factors as motivation, fatigue, and previous experience with alcohol (Zero Alcohol, 1987; Ryder, 1981; Landauer, 1983; Lister, 1983). One reason for the substantial variation among individuals is that ingestion of a specified quantity of alcohol will not necessarily produce the same BAC in two different people, even if they have the same body weight (Zero Alcohol, 1987).

In one study, for example, it was found that a particular body-weight-adjusted dose of ethanol could produce a range of BAC levels of .036 to .095 percent (O'Neill, 1983). In addition,

alcohol appears to enter the blood stream at different rates in different people (Zero Alcohol, 1987). In another study, subjects were given controlled doses and had equal amounts of food in their system. Nevertheless, the time required to reach the peak BAC level varied from 15 to 90 minutes after ingestion (Wilson, 1984).

ALCOHOL LEVELS BY WEIGHT

[Here are blood alcohol levels based on one's weight and the amount of alcohol consumed within an hour.]

	Weight			
	100	140	180	220
Beer:				
1 glass	.05	.04	.03	.02
2 glasses	.08	.06	.05	.05
3 glasses	.11	.09	.08	.07
Wine:				
1 glass	.03	.03	.02	.02
2 glasses	.06	.05	.04	.03
3 glasses	.08	.06	.04	.04
Distilled spirits:

2 ounces	.07	.05	.04	.03
3 ounces	.09	.07	.06	.05

Source National Safety Council.

There are also performance differences between individuals that are unrelated to the blood alcohol concentration. It appears, for example, that highly skilled professionals may be better able to compensate for the physiological effects of alcohol than persons who are less skilled, particularly at lower BAC levels. In two studies comparing the effect of alcohol on the performance of racing drivers and ordinary drivers on a closed track, the skill of the ordinary drivers showed some deterioration at a BAC of .05 percent, while the racing drivers showed no impairment until they had substantially higher BAC levels (Forney, 1961; Lovibond, 1970). Similarly, in a comparison of nonprofessional and professional pilots at BAC's of .04, .08, and .12 percent, the nonprofessionals made numerous errors in tracking, while the professionals' tracking ability did not decrease even at the highest BAC levels. (Billings, 1972) (However, the study noted that the professional pilots committed more procedural errors than normal after alcohol consumption. There may also be compounding factors, such as fatigue, that could affect results in a real-world situation.)

Under the circumstances, it must be recognized that a uniform standard will necessarily have nonuniform effects when measured against the behavior of specific individuals. However, this has not limited the states' ability to define and enforce driving-under-the-influence (DUI) standards and does not mean that we cannot take action. Rather, it means merely that a wide variety of factors must be weighed as we reevaluate our current requirements and consider new ones.

Most States have adopted a BAC of .10 percent as the definition of intoxication in connection with laws on driving under the influence. Some use it as a rebuttable presumption of a violation; others as a *per se* violation. (Several states are considering lowering their BAC standards to .08; and a number of states are in the process of considering adoption of the FHWA BAC standard for commercial drivers of .04.) States with BAC standards for operating vessels of aircraft typically use .10 percent.

However, as indicated above, a number of laboratory studies have shown that performance on some tasks can begin to deteriorate at BAC levels well under .10 percent (Moskowitz, 1973; Drew, 1959; Landauer, 1983). Some studies have suggested that performance deteriorates in a linear fashion, beginning with the lowest levels tested (Moskowitz, 1985; Drew, 1959). BAC's lower than .05 percent have been associated with increases in errors in tasks requiring divided attention, and it appears that cognitive performance is decreased for most individuals at BAC's of .04 percent or less (Zero Alcohol, 1987; Evans, 1974). Low BAC levels have also been shown to affect a driver's stopping distance and to increase errors in steering (Laurell, 1977). There is no definitive answer to how much the risk of accident occurrence increases as a result of the performance deficit, but some relationship can be assumed. Those administrations in the Department that have set allowable BAC levels for transportation workers (FAA, FHWA, FRA and Coast Guard) generally have used .04 percent as the maximum.

In addition, there is some evidence that serious impairment may continue after alcohol has been eliminated from a person's blood. National Institute on Alcohol Abuse and Alcoholism-supported researchers found that "handover effects" seriously impaired the performance of ten pilots on a flight simulator for as long as fourteen hours after they consumed enough alcohol to render them legally intoxicated in most states. They showed an inability to prevent the plane from veering away from a straight course and to hold the plane straight on landings. The researchers found no correlation between the pilots' degree of flight experience or their subjective interpretation of their performance and the investigators' objective measurements. (American Journal of Psychiatry, December 1988). BAC tests in the above situation would be negative.

A common problem is multiple substance abuse, impairment by a combination of alcohol and other drugs. The tendency of drug or alcohol abusers to abuse other substances poses a serious danger to the travelling public and complicates the treatment of the abuser. Combinations of substances can have unforeseeable synergistic effects, resulting in greater impairment. We also are concerned about the propensity of users to switch from abusing one substance to abusing another depending upon what is being tested for.

B. The Alcohol Problem—Generally

The National Institute on Alcohol Abuse and Alcoholism (NIAAA) reported in 1987 that, in the United States, two in every three adults drink, but 10 percent of those drinkers consume half of the nation's beer, wine, and liquor. An estimated 17 million U.S. adults are alcoholics, which is about six times higher than the number of cocaine users. (NIDA study, 1989).

C. Costs of Alcohol Abuse to Society

While it is difficult to estimate the precise cost to society from alcohol abuse, there is no doubt that the cost is enormous. The potential effects of alcohol abuse are substantial in terms of lives lost, personal injuries, property damage, business losses (lost productivity, absenteeism, etc.) and environmental damage.

According to a Research Triangle Institute study performed for the Department of Health and Human Services, the overall economic cost to American society from alcohol abuse was $89.5 billion in 1980. This amount represents direct costs, such as medical treatment, and indirect costs, such as lost wages and reduced productivity. In 1987, the NIAAA estimated the economic costs to society of alcohol abuse to be nearly $117 billion a year, including $18 billion from premature deaths, $66 billion in lost productivity, and $13 billion for rehabilitation. Assuming the base numbers are still the same, inflation presumably has increased the cost in current dollars.

D. Alcohol Abuse in the Transportation Industry

1. General

Generally, the Department's anti-alcohol abuse efforts have focused on alcohol as it affects an individual's medical qualifications; prohibitions on

UMI

on-duty use and operating while under the influence, and, in certain cases, use during defined pre-duty periods; and sanctions for violations of the Federal regulatory scheme, as well as sanctions for violations of State alcohol laws. Thus, alcohol testing, with limited exceptions, is left to State enforcement personnel. (Coast Guard and FRA rules provide for post-accident and reasonable cause testing. As noted above, the FAA requires crewmembers to submit to state tests upon request.) Each of the following sections briefly describes the existing federal rules by mode of transportation; Appendix B describes them in additional detail. The following sections also contain data that the Department has on the alcohol problem in each mode.

We specifically invite commenters to provide any additional relevant data or statistics about the alcohol problem in the different modes of transportation.

2. Aviation

The FAA regulations prohibit a person from acting or attempting to act as an aircraft crewmember if he or she is under the influence of alcohol, or has consumed any alcoholic beverage within 8 hours of reporting for duty. They also prohibit crewmembers from flying with a BAC of .04 or higher. If a history of drug dependence, alcoholism, or mental problems is discovered, the FAA may disqualify the pilot. In 1987, the Department's Inspector General's office checked the National Driver Register (NDR) and records in the Florida Department of Motor Vehicles; they found that nearly 8,000 FAA-certified pilots in Florida had been convicted of drunk-driving offenses. The FAA was unaware of these DUI convictions because the pilots had not reported them to the FAA as required. The FAA recently issued a DUI enforcement policy and an NPRM that includes, among other matters, a process for examining driving records.

There has never been an accident involving a transport-category U.S. air carrier in which the probable cause was attributed to alcohol use. However, starting in the early seventies, the Air Line Pilots Association and the major airlines, in cooperation with the FAA, developed a program to identify alcoholic pilots, so that they could be treated and, if appropriate, returned to duty. More than 1,200 pilots have been through this program, with a relapse rate of less than 15 percent. Since the program provides for stringent surveillance of treated pilots, there has been no compromise of safety. Nevertheless, the existence of this extensive a program demonstrates that the air carrier industry is not immune to the problem of alcohol abuse. We do not have any data, however, on the costs of alcohol abuse in terms of such things as lost productivity and increased medical expenses.

The number of general aviation accidents that can actually be attributed to the use of alcohol is uncertain. In the past, general aviation accidents have usually not been investigated by the National Transportation Safety Board (NTSB) to determine cause. FAA accident investigations are intended merely to be fact-finding and do not make a finding of probable cause. We do know, however, that in 3,949 general aviation accidents occurring between 1978 and 1987, 239 or 6 percent of the pilots involved had BAC levels above .04 percent. However, the general pattern over those ten years improved; the incidence of alcohol among private pilots involved in accidents actually declined by 36 percent over the course of the period, from 8.3 percent of all general aviation accidents in 1978 to 5.5 percent of such accidents in 1987.

3. Motor Carriers

It is a criminal offense to operate a commercial motor vehicle (CMV), or any vehicle subject to the Federal Motor Carrier Safety Regulations (FMCSRs) under the influence of alcohol or drugs. FHWA regulations prohibit the use of alcoholic beverages within 4 hours of reporting to work and also prohibit a driver from working while having any measured BAC or any detected presence of alcohol in his or her system. This effectively amounts to a zero alcohol threshold for CMV operators. A driver will not be considered physically qualified to drive a motor vehicle if, among other things, the driver is currently an active alcoholic. On October 4, 1986, FHWA issued requirements that states must adopt regulations, whereby a commercial motor vehicle (CMV) operator convicted of having a BAC level of .04 or above will be deemed to be DUI and subject to a disqualification of at least one year, or they will lose a percentage of federal-aid highway funds. These BAC regulations are integral to the commercial driver's license (CDL) program, a nationwide restructuring (under FHWA and state auspices) of testing, licensing, and disqualification procedures for CMV operators. Mandated by the Commercial Motor Vehicle Safety Act of 1986, the CDL program includes a national clearinghouse through which states will exchange commercial drivers' record information, including BAC violation histories.

Accident statistics indicate that nearly half of the fatally injured noncommercial motor vehicle drivers had a measurable amount of alcohol in their blood (usually .01 percent or more) compared to about 15 percent of fatally injured drivers of medium and heavy trucks. Moreover, as the chart below indicates, for those truck drivers who had been drinking prior to an accident, the highest accident rate was among those consuming the most alcohol. Drivers of heavy and medium trucks with positive BAC's are involved in about 750 fatal crashes annually, along with another 7,700 crashes resulting in personal injuries and 4,750 crashes involving only property damage (Zero Alcohol, 1987).

	Percentage of all fatal truck accidents	Percentage of the 15 percent of truck drivers who had alcohol in their blood
No truck driver use of alcohol	85.0	—
BAC = .10 or more	9.1	60
BAC = .04-.10	2.7	18
BAC = .03 or less	3.2	21
Total	100	

(Zero Alcohol, 1987)
(FARS data tapes, 1982–1985)

The NTSB is in the process of studying alcohol (and other drug) use by motor carrier operators in fatal accidents. We hope to have the results for consideration at the next stage of this rulemaking. We do know, however, that the cost of accidents to employers is substantial, over and above the lives lost, whether these accidents are caused by alcohol or something else. The National Safety Council estimates that an on-the-job accident is four times more costly than one that occurs in a personal vehicle, with an average cost to employers of $168,000 for a fatal accident and $6,900 for a nonfatal accident. To the extent alcohol use increases on-the-job accidents, its cost impact could be quite significant.

4. Rail

The FRA regulations prohibit on-the-job use of, possession of, or impairment by alcohol or any controlled substance. They also prohibit railroad employees subject to the Hours of Service Act from having a BAC level of .04 or more while on the job. This is a per se violation; however, it is used for civil, and not criminal purposes. Following innovations such as an industry program called "Operation Redblock" and the FRA's testing and rehabilitation program, alcohol use among railroad workers, which has always been a serious problem for the industry, may be in decine.

However, we recognize that problems continue in this area. From February 1986, when mandatory post-accident blood testing for alcohol began, through the end of 1988, 13 employees tested positive for alcohol (0.6 percent of employees tested). In five accidents/incidents, involving two deaths, two injuries, and $3.16 million in property damage, alcohol appears to have played a causal role. In one, the engineer tested positive at a BAC level of .16, and alcohol was found by the NTSB to be a contributing factor in the accident, which caused $1.58 million damage and the death of the engineer. In another accident, which is still under investigation, eight injuries and $194 thousand in damage were caused, and a dispatcher tested positive at .15 percent BAC. Three additional accidents so far in 1989 also involved four employees who tested positive for alcohol.

Reasonable cause breath testing under the FRA program (triggered by rule violations, less serious accidents and injuries, or reasonable suspicion) has produced the following results: 11 of 348 persons tested positive in 1986 (3.2 percent); 24 of 593 tested positive in 1987 (4.2 percent) and 46 of 1005 tested positive in 1988 (4.6 percent). FRA regulations define a "positive" breath test as one indicating a BAC level of .02 percent or above. The significance of these results with respect to prevalence in the population is difficult to determine, since a number of the tests were performed because of reasonable cause, and it should be expected that a high percentage of reasonable cause tests would be positive since prohibited use or impairment has already been identified or is suspected.

5. Maritime

Coast Guard regulations prohibit persons from operating a vessel while intoxicated, and merchant mariners from drinking on duty or assuming duties within 4 hours of consuming alcohol. In accordance with a statutory requirement, the regulations established Federal behavioral and BAC intoxication standards for both commercial and recreational vessel operators. Either the behavorial or BAC standard can be used independently to determine intoxication. The rule applies a .04 percent BAC standard to operators of all commercial vessels, including fishing vessels. For recreational boaters, the Federal BAC standard is .10 percent. For recreational boaters, this BAC standard and the Federal behavioral standard apply only in the absence of existing State BAC and behavioral standards or outside of State territorial waters. The Coast Guard regulations also require post-accident testing for alcohol and other drugs.

In its 1986 NPRM on operating a vessel while intoxicated, the Coast Guard stated that alcohol use has had an adverse effect on marine safety. It examined commercial vessel casualty records, which indicated that 44 deaths, 3 persons missing, and 33 injuries were attributable to alcohol during the period of January 1981 through May 1986. During the period 1982 through 1984, the Coast Guard took suspension and revocation action against 72 seamen for alcohol-related incidents.

Recreational boating casualties are much higher than commercial vessel casualties, second only to U.S. highway deaths as a cause of transportation deaths. They have been dropping in recent years, due to increased efforts in the cooperative safety programs of the Coast Guard, the states, and volunteer safety organizations. In 1988, 946 boating fatalities occurred, down from the previous record low of 1,037 in 1987. (Coast Guard report, "Boating Statistics 1988"). Studies conducted by the Coast Guard and the NTSB indicated that up to 50 percent of all recreational boating fatalities may have been alcohol-related.

6. Pipeline

RSPA has no specific regulations on alcohol. It does have a general regulation on health of pipeline workers at liquified natural gas plants. Pipeline operators must look for any physical condition that would impair performance, including any observable disorder or condition that is discoverable by a professional examination. We have no specific data on alcohol-related accidents or lost productivity data in this area; however, a number of the commenters in the anti-drug rulemaking seemed to believe that alcohol was a more pervasive problem than drugs. We are also aware that many companies in the industry are known to have alcohol prevention programs, but we do not have statistics or data on the prevalence of the problem in the industry. Although we recognize that most accidents are caused by excavation workers (people not regulated by RSPA) digging into pipelines, we would like to gather data on whether alcohol abuse does or can cause safety problems in the pipeline industry.

7. Mass Transportation

UMTA does not have any regulations concerning alcohol. However, many of UMTA's grantees are subject to other Federal requirements on alcohol use. All commuter rail lines funded by UMTA, for example, are subject to FRA regulations. All drivers of UMTA-funded motor vehicles that are capable of carrying more than 15 passengers, including the driver, are subject to the FHWA DUI standards which are enforced by the states.

Data available to UMTA indicate that approximately 50 commuter train accidents in the last 13 years have been attributed to drug-or alcohol-impaired workers, and, in the last three years, 15 percent of employees tested following commuter train accidents tested positive for drugs or alcohol. (The data do not provide separate figures for alcohol alone.) In informal implementation discussions following adoption of the UMTA anti-drug rulemaking, some industry members have indicated that they believe alcohol is a more serious problem than drugs. One of the few surveys taken indicated that, between 1982 and 1985, only five out of 1,210 bus drivers tested positive for alcohol following a fatal accident. However, information originating from industry sources indicates that transit bus drivers are heavier drinkers than the general population (U.S. Census Bureau, 1984b). One survey is reported to have found that 57 percent drink at least weekly, with an average consumption of nine drinks per week; the national median is six drinks per week (U.S. Census Bureau, 1984b). No information is available about drinking on the job (Zero Alcohol, 1987).

At this time, we do not have any useful data on the other costs of alcohol abuse, such as lost productivity and absenteeism, and we again invite commenters to supply information on these matters. We specifically request additional data relating to the problem of alcohol abuse and use in each mode of transportation. We particularly want commenters to address whether the current rules and programs are sufficient and, if not, why. We welcome suggestions on areas where further action is necessary.

III. Legal Authority/Issues

An analysis of the Department's authority to adopt any of the options discussed in this ANPRM would vary with the specific option.

The option that may be considered the most intrusive would be a requirement to conduct alcohol testing. For that

reason, we discuss that option here. If further rulemaking is deemed warranted, in subsequent documents, our analysis will address the option or options selected.

As a general matter, the legal authority, both statutory and constitutional, to mandate any alcohol testing would be the same as that relied upon to issue the drug testing rules, except the Coast Guard also has a statutory mandate to conduct post-accident alcohol testing. Although the existing case law addressing the constitutionality of employee alcohol testing programs is more sparse than that with regard to drug testing, the Department believes that the available precedent supports rulemaking efforts that may require alcohol testing in the regulated transportation industries.

As courts have held with regard to government drug testing of employees, alcohol testing mandated by the government is considered a search within the meaning of the Fourth Amendment of the U.S. Constitution. See, *Schmerber* v. *California*, 384 U.S. 757, 767–768 (1966) ("compelled intrusions into the body for blood to be analyzed for alcohol content" must be considered a Fourth Amendment search); *Skinner* v. *Railway Labor Executives' Association*, 489 U.S. , , 109 S.Ct. 1402, 1412 (1989) ("Subjecting a person to a breathalyzer test, which generally requires the production of alveolar or 'deep lung' breath for chemical analysis * * * implicates similar concerns about bodily integrity and, like the blood-alcohol test * * * considered in Schmerber, should also be deemed a search.")

In determining whether a particular search comports with Fourth Amendment requirements, courts must establish that under all the particular circumstances the search itself is "reasonable." As the leading case on bodily fluid testing, *Skinner* v. *Railway Labor Executives' Association*, makes clear, issuance of a warrant or the existence of probable cause or individualized suspicion is not a minimum essential requirement in establishing the reasonableness of a search under an administrative testing program.

In Skinner, the Supreme Court upheld regulations issued by the Federal Railroad Administration governing drug and alcohol post-accident and reasonable cause testing of railroad employees (49 CFR part 219). The Court concluded that the testing procedures and methods of procuring blood, breath, or urine samples for testing as set forth in Subparts C and D of the FRA regulations "pose only limited threats to the justifiable expectations of privacy of covered employees." 489 U.S. at , 109 S.Ct. at 1417, 1419. By contrast, the Court found that the government's interests in seeking to determine the cause of an accident or incident, deterring alcohol and illegal drug use by rail employees, and safeguarding the general public are compelling. Under these circumstances, the Court held that alcohol and drug testing pursuant to the FRA regulations are reasonable within the meaning of the Fourth Amendment.

Also, the lack of a demonstrated substance abuse problem among the workforce in a particular industry should not, of itself, pose insurmountable constitutional impediments to a testing program for that workforce. This point was made clear by the Supreme Court in *National Treasury Employees Union* v. *Von Raab*, 489 U.S. , , 109 S.Ct. 1384 (1989), which was decided the same day as Skinner. In Von Raab, the Court upheld urinalysis testing for illegal drugs of U.S. Customs Service employees slated for promotions into positions that involved either interdicting illegal drugs or carrying a firearm. Despite the Commissioner of Customs' stated belief that "Customs is largely drug-free," the Court concluded that there was little reason to suspect that the Customs Service was "immune" from society's pervasive drug abuse problem and held that the testing program was constitutionally defensible as a means to ensure that employees promoted to these sensitive positions are drug-free. *Id.*, 489 U.S. at , , 109 S.Ct. at 1387, 1395.

Pre-Skinner court decisions addressing the constitutionality of various employee alcohol testing programs have also concluded that such testing comports with the Fourth Amendment. Thus, a state regulation requiring jockeys to submit to mandatory warrantless breath alcohol tests on each racing day was found to be constitutionally permissible. *Shoemaker* v. *Handel*, 795 F.2d 1136 (3d Cir.), *cert. denied*, 479 U.S. 986 (1986). Similarly, alcohol and drug testing during a pre-employment physical examination, work-related examination, return to work after unscheduled absence, or on the basis of reasonable suspicion or involvement in an accident or incident was upheld in the case of mass transit employees directly involved in the operation, maintenance and decisionmaking of a public transit system. *Amalgamated Transit Union, Local 933* v. *City of Oklahoma City*, 710 F. Supp. 1321 (W.D. Okla. 1988). *Accord, Amalgamated Transit Union, Division 1279* v. *Cambria County Transit Authority*, 691 F. Supp. 898 (W.D. Pa. 1988) (mandatory drug and alcohol testing during annual physical examination does not violate Fourth Amendment).

Also, DOT is aware of at least one recent Federal appellate court case upholding employee alcohol testing in the wake of Skinner. In that case, the U.S. Court of Appeals for the Third Circuit upheld, *inter alia*, random breathalyzer testing of mass transit operating employees. *Transport Workers Union, Local 234* v. *Southeastern Pennsylvania Transportation Authority*, 863 F.2d 1110 (3d Cir. 1988), *vacated and remanded*, 109 S.Ct. 3209 (1989), *aff'd on remand sub nom. United Transportation Union* v. *Southeastern Pennsylvania Transportation Authority*, 884 F.2d 709 (3d Cir. 1989).

Consistent with the Supreme Court's analysis in Skinner and Von Raab and lower court decisions, if the Department determines that there is a need for properly-administered alcohol testing to ensure that employees in transportation industries are not impaired while performing sensitive safety- or security-related functions, that need would outweigh the privacy interests of these employees and, thus, would be constitutionally permissible.

IV. International Issues

We are aware that any decision to issue regulations requiring alcohol testing or some of the other options discussed in this ANPRM is certain to raise questions about compatibility with the laws of foreign countries. Our drug testing requirements have already resulted in government-to-government consultations, which we believe will ultimately result in mutually satisfactory arrangements. Nevertheless, it would be useful, even at this early stage of our analysis, to understand more about how other countries whose transportation industries operate in the U.S. or perform sensitive safety or security-related work for U.S. operators outside the U.S. view the problem of alcohol use and abuse among transportation employees, how they respond to the problem, whether they conduct any alcohol testing and how those programs operate. We specifically invite comments on those situations where our regulations might have an international effect. Among other things, it should be noted that Annex 2 to the Convention on International Civil Aviation (the Chicago Convention), section 2.5, states that no person shall pilot or act as a flight crewmember while under the influence of an intoxicating liquor or any

narcotic drug "by reason of which his capacity to so act is impaired." It is the U.S. government's intention to work with foreign governments to resolve potential conflicts in a manner that accommodates their concerns while ensuring the necessary level of safety by those we regulate.

V. Questions of Approach

A. Introduction

If we determine that further action against alcohol abuse is necessary, there are several alternative approaches that we are considering. They could be adopted singly or in combination. As a preliminary matter, we first discuss who should be covered by any program we set up, which is relevant to all but the enforcement options. A discussion of each alternative and questions that each poses then follows. We welcome public comments on these alternatives. We also welcome public comment on any other approaches that the Department could take to address the alcohol problem in the transportation industry.

B. Covered Employees

Our modal drug rules generally cover persons who perform sensitive safety- or security-related functions in commercial transportation. They affect approximately 4 million persons and include, for example, commercial truck drivers, pilots, pipeline operators, licensed and documented mariners and others serving on board a vessel with a licensed operator, mass transit operators, and railroad workers subject to the Hours of Service Act. (See the end of Appendix B for a short summary of the drug regulations.) The Department's existing alcohol regulations cover a somewhat different population. Chart 1 provides a general description of the types of people covered by the drug regulations.

The basis for imposing any requirements concerning alcohol abuse would be sensitive safety- or security-related functions. It would appear that the same employees who could cause safety problems if they are on drugs could cause problems through misuse of alcohol.

What, if any, rationale is there for covering a different population for alcohol testing than drug testing? In addition, we would like public comment on whether the line we drew between commercial operations and private operations for the drug rules should be changed with respect to alcohol? If so, why? Would the answers to these questions be different if the Department required action other than testing? Why?

C. The Options

The specific options include:

1. Education

a. *General.*

CHART 1—PERSONS COVERED BY DRUG RULES

FRA	UMTA	USCG	RSPA	FAA	FHWA
Engineers, Brakemen, Dispatchers, Block Operators, Signal Maintainers, Conductors.	Vehicle Controllers, Vehicle Operators, Mechanics.	Licensed/documented persons and persons serving under such lic/doc persons in a sensitive safety position, including for example: licensed officers, mates, (chief, first-third), and chief/assistant engineers; documented oilers, wipers, quarter masters, able and ordinary seamen. Includes persons on inspected vessels (deep draft, passenger & small passenger, off shore supply, & mobile offshore drilling units) and uninspected vessels (inland, Great Lakes, Ocean & Harbor tow boats, passenger & fishing boats).	Operations, Maintenance, Emergency Response.	Pilots, Flight Navigators, Aircraft Dispatchers, Mechanics, Repairmen, Flight and Ground Instructors, Flight Attendants, Air Traffic Controllers, Aviation Security, Screening Personnel, Ground Security, Coordinators, Flight Engineers.	Drivers (interstate) of vehicles of: 26,001 or more pounds, 15 + passengers, hazardous material (placarded).

One approach would be to emphasize education to increase employee perception of the risks of performing duties or operating a vehicle under the influence of alcohol. There is some disagreement about the respective effectiveness of education vis-a-vis enforcement. Some researchers claim that education is more effective in preventing alcohol abuse than apprehension of the abuser. The American Automobile Association Foundation for Traffic Safety compared eight states that adopted tougher drunk driving laws with six that did not. The new laws had no effect at all on traffic fatalities. The Foundation attributes the overall decline in U.S. traffic-related deaths between 1980 and 1985 to public awareness campaigns by such groups as Mothers Against Drunk Driving (MADD). A Boston University researcher similarly concluded that social pressure and publicity "may be as important as government regulations in reducing drunk driving and fatal crashes." (Both quoted in USA Today, Wednesday, August 3, 1988.) However, would social pressure have less effect on commercial operators who face economic pressures to complete their jobs?

These studies have been criticized as poorly designed and misleading, since education programs were never isolated as an independent variable for comparison. NHTSA believes that the most effective programs are those that combine education and enforcement. Public information and education programs, in the absence of enforcement or sanctions activities, have never been shown to impact alcohol-related fatal crashes. Conversely, scores of studies have found that programs involving enhanced enforcement, roadside sobriety checkpoints and the use of sanctions such as license suspensions frequently have resulted in significant reductions of alcohol-related fatalities. Although there is disagreement on the effectiveness of education alone, it appears that using education as an adjunct to deterrent measures would make them more effective.

Education may be less effective for illegal drugs, because the users have already decided to do something illegal. Having crossed over that line, they may be less susceptible to educational efforts. For that reason, alcohol abuse may warrant a different response from the approach the Department took to illegal drug use.

b. *Employee Assistance Programs.* One method of preventing, as well as

encouraging the voluntary cessation of, alcohol abuse is to establish an Employee Assistance Program (EAP). An EAP can have education, training

UMI

encouraging the voluntary cessation of, alcohol abuse is to establish an Employee Assistance Program (EAP). An EAP can have education, training and rehabilitation components that benefit both management and employees and can be positive factors in determining the employee acceptance of and success of an anti-alcohol abuse program. The Department's own EAP offers education and training for its employees and supervisors. The drug testing rules all require companies regulated by the Department to provide information to employees on the dangers of drug use and the consequences of that use. In addition, supervisors are required to be trained in the detection of drug use among employees. Similar requirements could be imposed with respect to alcohol use and abuse.

We would expect to find that the additional cost of adding information about alcohol to the existing drug prevention programs would be relatively small. We ask for public comment on whether this would be a useful approach. Also, how often should training be required and for whom? It would be helpful if any data on the success or failure of educational efforts could be provided. Finally, we would like any data on costs, especially for programs that are added to existing drug programs.

c. *Drug Free Workplace Programs.* The Federal government recently enacted rules (54 FR 4946, January 31, 1989) that apply to its contractors and grantees as a result of the Drug-Free Workplace Act of 1988 (Pub. L. 100-690, title V, subtitle D). These rules require that grantees and contractors (1) certify that they will provide a drug-free work environment; (2) establish a written drug-free workplace policy; (3) inform employees about the consequences of drug use and about any resources to assist those employees with drug abuse problems; (4) notify the government if an employee is convicted of a criminal drug offense occuring in the workplace; (5) take action (disciplinary action or rehabilitation) with respect to a convicted employee.

Given the fact that the Department already requires a drug free workplace for its grantees and contractors, could a similar program for alcohol be initiated for companies regulated by the Department? (Many of our regulated companies would also be covered by the drug free workplace requirements if they also are contractors or grantees of federal agencies.) What should the elements of such a program be? Could alcohol easily be added to existing industry drug-free workplace programs? Should alcohol be treated as an entirely separate issue requiring separate programs? What, if any, are the problems associated with implementation? For grantees that also are regulated by the Department (e.g., UMTA grantees), could this serve as a cost effective program? Would it be cost effective for persons and companies not now subject to the drug free workplace rules? Who should be subject to such a requirement? Would the rule be enforceable? Effective? In some regulated industries, such a certification would be viable; in others it may not. Commenters should address how it could work or would not work in particular industries. Is a conviction reporting requirement practical?

2. Rehabilitation

a. *General.* We believe that both employers and employees benefit from the availability of rehabilitation programs. The opportunity for rehabilitation can encourage employees to seek help and increase their overall acceptance of an anti-alcohol program. Employers benefit from greater productivity, fewer accidents, and lower turnover costs if employees are rehabilitated.

b. *Employer-mandated Programs.* One approach would be to encourage or require employers to offer rehabilitation opportunities to their employees. The Department decided that it would be inappropriate for the federal government to mandate employer-provided drug rehabilitation in its modal drug testing rules and that this issue should be worked out between employers and employees. However, as an employer, the Department provides such services. It offers a one-time opportunity for rehabilitation (usually paid for by the employee's health insurance) for employees who test positive under its internal drug testing program. The employees eventually can be reinstated if they successfully complete rehabilitation and undergo subsequent monitoring. Counseling and rehabilitation opportunities are also provided to any DOT employees who seek help for alcohol problems.

Is there any justification for requiring employers to provide rehabilitation for alcohol abusers, but not for drug users? If so, please explain why. Should rehabilitation be offered to those who volunteer or those who get caught or both? Would required rehabilitation, by removing the incentive for self-referral, only ensure that the alcohol abuse continues until the violator is caught or causes an accident? Would education work effectively without rehabilitation? Would education work if the Department encouraged, but did not mandate, rehabilitation?

c. *Expansion of Rehabilitation Programs Like "Operation Redblock" to Other Modes.* To be effective, it appears that "providing an opportunity for rehabilitation" means holding the same or similar job open for the employee. The railroad industry's voluntary program called "Operation Redblock" is designed to identify substance abusers and get them into rehabilitation programs, with the understanding that persons who complete the program successfully will retain their jobs. The program relies on voluntary self-referral (where the employee agrees to seek help before an on-duty alcohol violation, based on his or her own initiative or an EAP contact by a family member or other concerned person), and peer-referral (where the co-worker notes on-the-job alcohol use and identifies the user as unsafe to work with). Employees have a natural reluctance to report on a friend when it means that the friend could lose his or her job. Because Operation Redblock allows employees to bypass disciplinary rules, one important aspect of the program is that it helps overcome this reluctance. Operation Redblock also includes an opportunity for treatment even where the employee's alcohol or drug use is detected through management action; but this is a special "incentive provision" offered in exchange for employees' active participation, through prevention committees, in rule enforcement. As such, it may be more appropriate for negotiation between employer and employee than as a regulatory requirement.

A somewhat similar alcohol prevention program for airline pilots is run by the Air Line Pilots Association and many of the major airlines. Also, Coast Guard regulations allow licensed personnel to voluntarily deposit their license, certificate or document and seek drug or alcohol rehabilitation prior to being subjected to a suspension or revocation proceeding for intoxicant-related incompetence. (This option is unavailable if the person caused an accident.) The document will not be returned until the individual successfully completes a rehabilitation program and participates in a post-rehabilitation monitoring program.

Through some combination of regulation and promotion of voluntary efforts, these types of programs could be used in all transportation industries in order to encourage more people to step forward and receive help. It is more likely to result in the employee seeking early treatment. A critical issue is when the opportunity for treatment will be offered. If an individual knows that he or she automatically will be provided rehabilitation after testing positive, he or she may have no incentive to volunteer before being detected or causing an accident. Of course, peer referral may not be possible in some transportation operations (e.g., segments of the trucking industry). We ask for public comment on how successful this approach is in the industries where it is used. Is it appropriate for all modes of transportation? For small companies as well as large? What could be done for owner-operators? Would this approach be successful with respect to persons who abuse both alcohol and other drugs? Would it be appropriate for the Department to require such a program in light of the fact that it did not think it appropriate to do so in the drug testing rules? We are especially interested in data on current rehabilitation efforts by transportation employers: the cost of the program, the success rate, specific implementation problems, and so forth.

d. *Implementation Issues.* If we pursued the rehabilitation option, should we mandate the particulars of a rehabilitation program? Who should pay for inpatient rehabilitation and the subsequent monitoring program? Should an employee continue to be paid while undergoing rehabilitation? What would be the economic costs of holding the job open? Would this be an impossible option for small companies? Should they be exempt or would that have adverse effects? How much time should an employee be allowed to complete a rehabilitation program, taking into account how long it may take an employee to be admitted into one? We are interested in comments on how to implement opportunities for rehabilitation among small companies and owner-operators.

e. *Medical Review Officers.* The kind of rehabilitation program needed (inpatient, outpatient or counseling/abatement) will necessarily vary from case to case. Who should make that determination? Under the drug rules, employers are required to appoint or designate a Medical Review Officer (MRO) to review the results of the employer's drug testing program, interpret each confirmed positive test result, and evaluate an individual who has undergone rehabilitation before he or she can return to the job. Should a similar requirement be included in any alcohol rule requiring or permitting rehabilitation? How would an MRO "verify" a positive in an alcohol case? Should an MRO have to be a licensed medical doctor or other substance abuse professional? Are there distinctions between the necessary qualifications for an MRO in the drug area and one in the alcohol area? The MRO could be a currently employed company physician or could be a private physician who performs MRO service for the employer on a contractual basis.

D. Enforcement

1. General.

The Department relies mainly on the states to enforce its highway and maritime regulations against persons operating while intoxicated. In recent years, it has encouraged greater enforcement efforts by the states against alcohol and other drug abuse. NHTSA has several programs to provide financial and technical assistance to states for improving laws and programs to combat alcohol- and drug-impaired driving. As discussed in Appendix B, FHWA and NHTSA have regulations that require states to adopt minimum BAC standards for commercial motor vehicle operators and to implement the minimum age 21 drinking age law, respectively, or face the loss of some federal funding.

2. Effectiveness of Deterrent Actions

Enforcement is the most important deterrent activity, when accompanied by sufficient public visibility. For example, if motor vehicle DWI offenders are not arrested, no sanctions can be imposed and no deterrence can occur. However, even if there is an increase in enforcement, this does not ensure that deterrence will result, since the public may not be sufficiently aware of such efforts.

The effectiveness of enforcement efforts has been recently summarized by Voas and Lacey (1988) and the effectiveness of roadside checkpoint operations has been summarized by Dickman (1987). Highly visible enforcement, particularly the frequent use of roadside sobriety checkpoints, has frequently, but not always, resulted in reductions in alcohol-related fatal crashes or in surrogate measures. Many of the examples of such reductions have been in foreign countries (Ross 1973; Ross 1984; Homel 1986; Ross 1988). In the United States, positive results have been documented for programs in Largo/Clearwater, Florida (Lacey et al. 1986); Charlottesville, Virginia (Voas, Rhodenizer and Lynn 1985); Arizona (Epperlein 1988); Stockton, California (Voas and Hause 1987) and Bergen County, New Jersey (Levy, Shea and Asch 1987). Additional evidence for the deterrent effects of roadside checkpoints has been provided by Williams and Lund (1984), who found that drivers perceived higher enforcement levels in areas where checkpoints were used than in areas where they were not used, even though actual arrest rates were sometimes higher in the latter. As a rule, 15–30 percent reductions in alcohol-related fatal crashes have been documented in the above studies. Most of the observed reductions were temporary in nature, primarily because the enforcement efforts, themselves, were short-term. However, it would be improper to criticize enforcement programs for providing only temporary reductions when these programs have more frequently resulted in "bottom-line" reductions in crashes than any other approach. Further, the ongoing roadside checkpoint program in New South Wales, Australia (Homel, Carseldine and Kearns 1988) has demonstrated that long-term reductions in alcohol-related fatal crashes can be effected with long-term enforcement emphasis.

The deterrent effects of sanctions have been reviewed by Voas (1986), Peck, Sadler and Perrine (1985) and by Nichols and Ross (1988). Nichols and Ross reviewed studies of the specific and general deterrent effects of confinement, license suspensions, fines and, to some extent, treatment programs. They concluded that all sanctions provided some evidence of impact but that license actions provided consistent evidence of both specific and general deterrence effects. With regard to the effectiveness of license suspensions on offenders who receive them, several controlled studies found that license suspensions have a significant impact on a variety of traffic safety measures, including subsequent total convictions, total crashes, alcohol-related crashes, non-alcohol-related crashes and serious injury and fatal crashes (e.g. Hagen 1977; Popkin et al. 1983; Blomberg, Preusser and Ulmer 1987; and Preusser, Blomberg and Ulmer 1988). In addition, several controlled studies provided evidence of a general deterrent impact, as reflected by population-wide reductions in alcohol-related fatal crashes (e.g. Blomberg, Preusser and Ulmer 1987; Ross 1987; Zador et al. 1988; Klein 1989). The results of these studies provide reasonably sound evidence that the deterrent effects of license suspensions extend beyond those offenders who are caught and sanctioned. Nichols and Ross speculated that this was at least partially because license actions are feared more by DWI offenders than any other sanctions. Nearly all of the studies that found reductions in crashes following an increase in the use of

BEST COPY AVAILABLE

VOL 54 ISS 211 NO 2 1989 UMI

license sanctions were studies of administrative license suspension laws. This suggests that the certainty of imposing license actions is also likely to be an important factor.

In summary, it is likely that the effect of the arrest itself results in reduced drunk driving among those offenders who are caught. Further, enhanced enforcement efforts can extend such deterrent effects beyond offenders who are caught. In addition, it appears that the imposition of license sanctions (and to a lesser extent jail sentences) on offenders who are caught results in reductions in their recidivism rates beyond those caused by arrest. Much of the reduction in recidivism among offenders receiving license actions appears to be due to reduced exposure, rather than deterrence itself. However, since frequently-imposed license sanctions, like high visibility enforcement, have been shown to reduce alcohol-related fatal crashes on a population-wide basis, a significant element of deterrence must also be operative.

3. The National Driver Register

The National Driver Register (NDR) is a central, computerized index of state reports on drivers whose driving privileges have been denied, suspended or revoked. Applications for driver licenses in many states are routinely checked against the NDR to screen for potential problem drivers. In 1986, Congress enacted legislation to require a uniform national commercial driver's license to end a driver's ability to obtain a license in one state after losing one in another. The Commercial Driver's License Information System, which is tied in with the NDR, enables the states to check commercial driver's licenses by computer.

Recent legislation has expanded the role of the NDR to allow FAA and the rail industry to use it to locate and review individual driving records to screen qualifications of airline pilots and locomotive engineers. The information would be used as an indication of a possible alcohol abuse problem, as well as evidence of any misrepresentation on their FAA medical applications. The FAA and FRA are currently considering regulations that will implement this legislation. The Department also has proposed legislation that would authorize the Coast Guard to use the NDR to obtain information on driving-records violations of merchant mariners.

Should the Department seek access to the NDR for the other modes of transportation? Would information on convictions be useful for identifying possible alcohol abusers in sensitive safety jobs not requiring a Federal license? Are there additional steps that the Department could and should take to increase enforcement of the existing regulations? Should additional legislation be sought as incentives for additional state or local action in lieu of or as a supplement to the other alternatives discussed in this ANPRM? What would be the advantages of such an approach and what would its impact be on federalism? How can the Department best make use of the states' expertise and position in the field to increase enforcement?

E. Alcohol Testing Program

Under this option, employers would be required to institute alcohol testing programs, perhaps similar to our drug testing programs. However, the drug programs focus on illicit use and controlled substances, and thus present different issues than would an alcohol testing program. In some ways, the issues raised by an alcohol program could prove to be more difficult than those of drug testing. They are more complicated simply because alcohol is a legal substance.

Below, we discuss a series of issues and raise questions for commenters to address. These are relevant to pursuing this option.

1. What to Prohibit?

An important issue is what use of alcohol to prohibit. In addition to current restrictions, the Department could prohibit: (1) Any use affecting work, reflected by the presence of any alcohol in a covered employee's blood during working hours; or (2) impairment and/or intoxication on the job, as expressed by given BAC levels or behavior; or (3) a combination of both for different employees or different situations.

Drug testing rules target drug usage by employees, regardless of whether the use occurred on- or off-duty. This makes sense because the drugs we test for are illegal and no one yet has developed the capability to determine, based exclusively on a chemical test, at what level a particular drug impairs the user's performance of a particular function and can have devastating safety consequences. Our current alcohol rules target both use and impairment by prohibiting the employee from drinking on the job or just prior to reporting to work, or from performing a safety-related function under the influence of alcohol identified by a certain BAC level. Data relating body fluid concentrations of alcohol to performance decrements is more extensive than that available for drugs.

Should we expand testing for alcohol beyond the current FRA, Coast Guard, and FAA (consent to testing) rules? If we decide to test, would the approach we took with our modal drug rules be appropriate? That is, should the Department undertake to make transportation workers alcohol-free? Is this practicable, given the fact that alcohol is a legal substance? Is it necessary, or does the accident record indicate that an absolute prohibition would be a case of over-regulation? If "zero" is an unrealistic or unnecessary goal, where should the line be drawn? We would like to hear from companies that prohibit alcohol consumption by their employees on how they enforce this prohibition and whether their programs are successful.

The issue of being under the influence of, or impaired by, alcohol is more complicated than simply having drugs in one's system. To be legally relevant, the use or impairment must occur in the context of job performance. Drinking during most off-duty periods may or may not impinge upon a person's ability to function well in the job, but generally by itself is not illegal. Focusing our efforts on detection of alcoholics would not be sufficient to address the problem. Drinking that causes on-the-job impairment poses a serious danger whether or not the drinker is an alcoholic.

What function the person is performing is important. Finding a BAC level of .04 in an aircraft pilot who is on duty but simply filling out administrative paperwork in an office may be irrelevant to safety; i.e., the effects on his ability to perform paperwork are not related to safety. Therefore, we might only want to test pilots when they are about to enter or leave the cockpit as opposed to when they are performing administrative duties. Such a requirement could complicate the logistics of testing, especially for those people that move in and out of safety-sensitive functions during the workday.

Should testing be limited to those times when the employee is about to perform or is performing a safety function? What are the likely implementation problems? Would it be too difficult to set up a program to randomly test pilots, for example, when they were about to perform or were performing sensitive safety functions?

Do different functions demand different standards? For example, should we continue to have different rules for commercial versus private operators? What about different job categories—should a pilot be held to a higher standard (i.e., a lower BAC) than a flight attendant or a dispatcher?

2. What is a Positive?

If the Department were to require industry testing programs for alcohol, one of the most difficult issues to decide would be what blood level of alcohol would constitute a "positive" test. The consensus of DOT rules and practice would appear to support, as a measure of intoxication, a *per se* prohibited level of .04 percent. (It should be noted that FRA leaves a conservative margin of error of about .01 percent for field testing. Thus, the effective *per se* level is .05 percent.) However, some current rules imply a tighter standard. For example, FAA prohibits crewmembers from drinking less than eight hours before flight. To enforce this rule, the FAA might want to set a lower BAC on a "positive" level, on the theory that someone at a given BAC level had imbibed within the eight-hour period.

Others might argue that .04 is too strict a standard, that it would have the effect of outlawing alcohol since it is difficult to establish with certainty how long alcohol will stay in a particular individual's system. Still others would argue that the permissible level needs to vary depending on, for example, whether an individual is about to fly an aircraft or fill out paperwork.

In its comments on the FHWA rulemaking that established the .04 BAC standard for driver disqualification, the NTSB recommended that a zero BAC level be used as the standard, because lower BAC levels have some impairment effects. FHWA accommodated this position by requiring that commercial motor vehicle operators with any measured BAC standard be placed out-of-service for the next 24 hours. We do not intend to reopen the issue of whether specific modal standards established for use within the existing regulatory framework should be revisited. However, in the context of considering additional regulatory action, including the possibility of additional testing requirements, we do believe that it is necessary to consider the appropriate BAC level to be used under the different alternatives.

What constitutes impairment? What impairment effects do hangovers have? How can we detect this type of impairment? Should we try? Moreover, how can we avoid establishing a program that encourages "binge" drinking a sufficient number of hours before work to avoid positive BAC tests, but then results in the adverse effects of hangovers? Commenters should address how a program should be structured and what BAC cutoff should be applied. Commenters should also discuss whether sanctions should differ for different BAC levels.

3. Treatment of Positives

Finding alcohol abuse by an individual performing a safety-sensitive function raises questions about how to treat that individual. Because alcohol is a legal substance, the questions may warrant different answers from the ones that would be given concerning a similar individual who had used drugs. The answers also would depend upon what use of alcohol we prohibit. The major issues that would have to be confronted include: Should any action taken against an individual who tests positive depend on—or vary with—whether the individual is performing sensitive safety functions when tested? Should the consequences of testing positive be different for persons known to be chronic abusers versus persons caught under the influence one time? How could dependency on alcohol be accurately determined? Should the employee merely be kept out of the sensitive safety job until sober? Or should rehabilitation be required for every person testing "positive" before that person could be returned to the job? Should action vary depending on how high the BAC level is? How should we treat persons who suffer from multiple addiction to both alcohol and drugs?

4. Occasions/Grounds for Testing

a. *General.* In the Department's drug testing rules, we required preemployment, periodic, reasonable cause, post-accident and random tests (special testing also is required for rehabilitated employees). Depending upon what use we prohibit, alcohol testing, unlike drug testing, may not be the most effective means of detecting abuse in all circumstances. The presence of alcohol is relatively easier to detect from physical symptoms (e.g., breath) or behavior (e.g., inability to walk a straight line) than drug use (although alcohol symptoms often can be successfully masked), and people are more familiar with the symptoms of alcohol intoxication. Also, the time-frame for testing is limited, because the body processes alcohol within hours of ingestion. If we decide to prohibit impairment, rather than use, the time frame for testing would be further limited to the time the job performance. For that reason, certain types of testing may not be as useful for alcohol as they are in testing for drugs. Along with comments on the utility and need for alcohol testing in general, we specifically invite comment on the suitability for alcohol testing of the different types of drug tests (preemployment, periodic, reasonable cause, post-accident and random). Commenters also should address the utility of each type of test. In this regard, we invite comments as to whether different types of tests are called for in different circumstances, such as blood testing only following an accident.

b. *Preemployment Testing.* Preemployment tests (for job applicants or current employees transferring into covered positions) may or may not be relevant, because testing normally would occur when the applicant is not performing any sensitive safety function. However, they may provide helpful information for use by a medical officer in determining whether an individual has a problem.

Drinking prior to interviewing with a potential employer is not illegal even though it might be imprudent. Therefore, there are legitimate questions about the significance of a positive test. On the other hand, it is possible that it could be used, along with other indicators, as a warning signal about alcohol dependency. It might also be useful as one tool among many for an employer to determine whether an applicant can be expected to perform reliably in a safety-related function. For example, the presence of alcohol may indicate the need to ask follow-up questions of the applicants to determine whether there would be a potential safety problem. Would such a test provide sufficient benefits to warrant requiring it? Would it be necessary to limit the use of any positive results; i.e., should we prohibit rejecting an applicant solely on the basis of a positive test?

c. *Periodic Testing.* As with preemployment testing, a primary purpose of periodic testing (at required, scheduled physicals) would be to identify persons who may have an alcohol problem. Periodic testing often occurs during off-duty hours when the fact that the employee may be under the influence is not necessarily relevant to his or her job performance. Unless we determine to prohibit employees from having any alcohol content during a physical examination, the primary purpose of such a test would be as a means of alerting employers to someone who may be a candidate for referral to an EAP or otherwise evaluated for substance dependency. Adding an alcohol test to the regimen for a required physical might be beneficial because the examination might not otherwise identify the employee's problem. If a blood sample is already taken and could

VOL 54 ISS 211 NOV 2 1989 UMI

be used, it could lessen any legal or cost obstacles. Would this type of test provide sufficient benefits to warrant requiring it? As with preemployment testing, should we limit the use of any positive results?

d. *Reasonable Cause Testing.* Reasonable cause testing would be useful to determine impairment during job performance. It would be based, as in drug testing, on a rule violation (e.g., FRA rule now provides for this) and/or on a reasonable suspicion by one or more supervisors that an employee appeared to be under the influence. (The standard for triggering a test would differ depending on whether the substantive prohibition of alcohol abuse went only to intoxication on the job or to any measurable BAC while the employee was working.)

Because alcohol use often (at least at higher levels) results in more observable symptoms (and because more research has been done on how to train people to make these observations), this test may be more valuable for alcohol than for drugs. Although a supervisor may not know if the behavior is alcohol-related, whatever its cause it could support a decision to refuse to let the person operate in a sensitive safety position. Supervisor observation would not be a complete solution, however; "practiced" drinkers can appear normal (e.g., they can walk a straight line) and avoid detection. Also, supervisors may have reasons to overlook employee alcohol use (e.g., sympathy for employee and dealing with problem is too much trouble). The Army has found that supervisors have a tendency to underreport alcohol involvement in accidents (The Alcohol and Accidents Guide, February 1987). Commenters also should address how to reduce the possibility of harassment. Would procedures similar to those for our drug testing rules (generally requiring two supervisors, etc.) be appropriate? Also, would this test be especially valuable in conjunction with reasonable cause testing for drugs? If an individual's behavior raises suspicion and the person tests negative on an alcohol breathalyzer, some enforcement personnel might suggest performing a drug test.

e. *Post-Accident Testing.* Post-accident testing is already required by federal regulation in some modes, and serves as a valuable accident investigation and enforcement tool. States also conduct post-accident tests, depending upon the circumstances. Post-accident testing at remote locations might be more difficult to accomplish than drug testing, because alcohol passes from the blood and breath more quickly than most drugs. Delays for transportation of trained personnel to a test site could result in negative or inconclusive tests. Requiring a blood test, for example, to be conducted within a very limited time could raise the costs tremendously by requiring expensive forms of transportation in some instances. Therefore, it may be necessary to use preliminary breath testing. This also may require the use of trained people and special equipment. Commenters are invited to address this question, including the additional cost that may be involved and any special problems that field breath testing would present in terms of the integrity of the test process.

The drug rules require employers to test employees involved in an accident as soon as possible, but not later than specified maximum time limits (generally 32 hours). For the FRA, the average period of time is about 5 hours to get blood, but railroads run on track and accidents occur within limited areas, unlike aviation or maritime accidents. Within what period of time after the accident should an employee be tested for alcohol? Should we arrange with state enforcement and/or investigative personnel to carry out such testing if the accident occurs in a remote area? They may be the first government officials able to get to the scene and are sometimes equipped to conduct field alcohol breath tests.

f. *Random Testing.* Under the Department's drug rules, companies must conduct random drug tests at a 50 percent annualized rate; that is, the number of annual random tests conducted should equal half the number of the testable population. Because alcohol is rapidly eliminated from the body, random testing might be less effective for employees who, for example, do not work close to a place where a test can be conducted. The deterrent effect of random testing might be reduced for the same reason. Commenters are requested to focus on how the objectives of random alcohol testing (e.g., deterrence) could be accomplished. Should we use a higher than 50 percent annualized random testing rate? Because alcohol is generally eliminated from the body within hours, can these tests be effectively administered? Is it too expensive and inefficient a means of identifying abusers? Does it make sense if we only prohibit impairment on the job, rather than any alcohol use? As discussed earlier, must any random testing be limited to the specific times an employee is performing a sensitive safety- or security-related function? If so, how would this complicate implementation of a testing program? If alcohol misuse is more easily uncovered through observation and reasonable cause testing, will random testing add enough more deterrent effect to an overall program to meet constitutional muster?

g. *Pre-Performance Tests*—(1) General. Pre-performance testing could potentially be used in lieu of other forms of alcohol testing. Depending upon the industry, supervised testing could be conducted before a covered person assumed his or her duties on board a plane or ship, or unsupervised self-testing-type systems could be used to prevent a vehicle from operating if a person failed a test.

The advantage of pre-performance testing is that it detects an employee's impairment at the time he or she begins to perform sensitive safety- or security-related functions in a job where it is illegal to be under the influence of alcohol. Of all the kinds of testing, pre-performance tests may offer the most direct nexus to improving safety. They also could provide a strong deterrent. However, pre-performance testing may not be feasible for certain industries. Furthermore, technological and cost issues have not been resolved for some types of tests.

(2) *Pre-Performance Testing: Under Supervision.* An individual could be given a BAC test prior to performing a sensitive safety- or security-related function. This type of test is now being done in Alaska by Alyeska Pipeline Service Company. All crewmembers are tested prior to being allowed to work. Crewmembers that fail the test are not permitted to work until a test is passed.

This same system, or a variation, could be employed in other industries where an individual reports to a specific station before operating a commercial vehicle. For example, in some segments of the trucking industry, drivers report to a central dispatch facility every day and return at the end of the day. Most commercial pilots also report to a central location prior to flying. In such instances, supervised BAC testing may be feasible. In other segments of the two industries noted above, supervised BAC testing could be impractical and unmanageable. However, the system eventually decided upon by the Department to check for alcohol would not need to be uniform in every respect and in every segment of each of the regulated industries, if circumstances warrant different approaches. This may make the rules more complex, but could provide necessary flexibility to companies. In addition, it might be appropriate to give companies the option of conducting either a pre-performance test or a random test.

Commenters should address how such a system could be developed for each industry, and the costs of such a system. We are also interested in the experience gained by the use of such tests in the U.S., as well as in other countries. What are the benefits of a pre-performance test? How would such benefits compare with a random test? How should a pre-performance positive test be treated? Any rule implemented would prohibit an individual from operating a commercial vehicle (aircraft, vessel, etc.) if a test were failed. However, commenters should address the need for regulations that mandate what additional action should be taken upon a positive test? Are sanctions needed, or should such steps be addressed by individual companies? Would alternative alcohol testing requirements (e.g., pre-performance vs. random) provide flexibility to companies? Is flexibility needed? To be effective, must pre-performance tests be conducted before all operations, or could they be done on a random basis? How often? Should tests be performed at a central meeting place prior to an employee's assumption of duties or should the test be attached to the vehicle's ignition system (discussed below)? Could an employee simply start drinking after passing the pre-performance test?

(3) *Pre-Performance Testing: Unsupervised.* The Department, through NHTSA, began to investigate the use of in-vehicle alcohol test devices (ignition interlock devices, referred to as "IID's") in 1968. The types of devices developed over the years have focused on breath and performance type tests; generally, if a driver does not pass the test, the vehicle will not operate or, under some systems, if operated, the emergency flashers or horn will automatically go off.

A recent report submitted to Congress describes the effectiveness and potential for application of ignition interlock devices to prohibit operation of motor vehicles by intoxicated drivers. ("Potential for Application of Ignition Interlock Device to Prohibit Operation of Motor Vehicles by Intoxicated Individuals: A Report to Congress".) NHTSA also performed laboratory testing for commercially available in-vehicle test devices. ("Further Laboratory Testing of In-Vehicle Alcohol Test Devices.")

Initially, attempts to develop IID's based on breath alcohol tests were hampered by technological limitations and concerns that they were too susceptible to circumvention or cheating. At this point, however, the NHTSA report notes that these problems have been partially or completely solved. The new devices are more reliable and accurate, and are designed to prevent or detect many forms of tampering and circumvention. NHTSA tests have indicated that the devices are more difficult to circumvent, but relatively uncomplicated strategies can still be used to "fool" these devices (e.g., use of bogus air samples or filters). In spite of these evasive practices, improvements are possible that would further address potential circumvention. NHTSA also noted that IID's are now being used by a specific population group (those subject to court supervision because they are convicted of driving under the influence) in passenger vehicles. Their placement in general use would likely meet public resistance due to costs. It should also be noted that the experience gained thus far has been in passenger motor vehicles only. What would the costs be to install comparable devices in commercial vehicles? What about vehicles used in other modes of transportation?

(a) *Performance Tests.* Early research on IID's had focused on performance tests as well as breath tests. However, research and development work have indicated that while performance tests may be operationally feasible, a useful device does not yet exist.

The Canadian transportation ministry funded research that compared one performance test, the Critical Tracking Tester (CTT), with another, the Tracometer. The CTT requires a driver to keep a pointer centered on a dial by appropriate movements of the steering wheel. The device generates random movements of the pointer at an increasing rate, requiring the driver to make corrective movements at an increasing speed. The Tracometer requires a driver to align a pointer with one of five targets that are randomly illuminated, requiring the driver to turn the wheel in the opposite direction of the desired pointer direction. The research concluded that the Tracometer provided better discrimination than did the CTT in detecting BAC limits (0.08 in Canada). However, the researchers concluded that while the Tracometer appeared to be promising, further work was necessary before a practical device would be available.

The NHTSA report concludes that a useful device does not yet exist and thus more work is needed. For example, the CTT's are least accurate at moderate BAC levels (0.05–0.10). The report also notes that there is apparently little development work currently being done on performance-based systems.

(b) *Breath Tests Using Ignition Interlock Devices.* With respect to breath alcohol testing, there are currently three IID's available on the market. Basically the devices are a simple form of a portable breath tester, but are not as sophisticated as evidential quality breath tests used by the police. The three IID's are fairly similar. Each has three components: an alcohol breath test unit, an electronic control device, and a connector to the vehicle's ignition and electrical system. The alcohol sensor is a breath test unit that is a hand-held unit and requires the driver to blow into the device. Only if the driver passes the test can the car be started. The devices use different sensors (pressure and/or temperature) to reduce the likelihood of circumvention.

The IID's currently are marketed primarily to traffic courts for use with drivers convicted of DWI/DUI. Such drivers may be required by the court to install a device on their car. (Manufacturers envision further use of the devices, such as by fleet owners or commercial vehicles.) Nine states have passed legislation authorizing the use of IID's with convicted DUI offenders. In California, for example, a two-year program was initiated and terminates at the end of 1989, when an evaluation will be made. (California's interlocks prevent persons with a BAC of 0.03 or above from starting the vehicle.) Other states are also considering legislation.

Based on the information available to date, the NHTSA report reached a series of general conclusions about the new breath test ignition interlock devices. These conclusions are listed in Appendix C.

Commenters should address the feasibility of implementing such a program of IID's for a particular company or industries, and specify the potential problems if such an approach were adopted. Would these devices have any application to types of vehicles other than motor vehicles? Will employees accept such devices? What are the practical problems of such devices? Will such a system be effective in cutting down the use of alcohol in the transportation industry? If used in the context of preperformance testing, what staffing problems would this cause? How will it affect accident rates? What are the costs? What are the ways of getting around the system? Even if the systems are not 100 percent tamper-proof, will the fact that such machines are in place make employees more aware of the need to stay sober? Are the devices cost-effective if this is the case? Finally, IID's are accurate in detecting low BAC levels. Would the usefulness of the tests be affected if we prohibited

any positive BAC level?

What should happen to a person who tests positive after completing rehabilitation? During the post-rehabilitation period, should we prescribe the minimum and/or

devices as *per se* determinants of intoxication.

devices cost-effective if this is the case? Finally, IID's are accurate in detecting low BAC levels. Would the usefulness of the tests be affected if we prohibited any positive BAC level?

NHTSA estimated that the one-year lease costs for one IID could be as high as $400–$500. Would IID's be cost effective? How would IID costs compare to random testing costs, for example?

We welcome public comment on any additional new technological devices that are accurate and reliable.

h. *Post-Rehabilitation Testing.* Another approach would be to improve the follow-up of alcohol abusers who receive treatment and re-enter the work force. Alcohol testing could be useful as part of post-rehabilitation monitoring. Once an employee has undergone rehabilitation, there is a need to ensure continued disassociation from alcohol. However, many substance abusers do not restrict themselves to one type of drug; they often combine drugs, including alcohol. Alcohol testing could become a useful part of the follow-up testing of rehabilitated substance abusers.

Is there any data that shows alcohol use rises when drug use declines, or vice-versa? Should we require post-rehabilitation monitoring and a recommendation for reinstatement from the MRO or EAP counselor before an employee can be returned to the job? If not, who should make the decision on what kind of rehabilitation the employee needs? Who should make the determination that the employee has established control over the substance abuse problem and has a good prognosis for recovery? Should there be procedures by which the employee can contest a determination that he or she is not ready to return to work?

Should there be a uniform testing period after rehabilitation, or should this be determined on a case-by-case basis? If we adopt a uniform post-rehabilitation period, how long should it be? Should the length of the follow-up period depend on the BAC level that was detected? Should it depend on the severity of the individual's alcohol problem, as indicated by the kind of treatment that was found to be necessary? (For example, should someone undergoing inpatient rehabilitation be subject to post-rehabilitation testing for a longer time than someone who needs only abatement counseling?) Who should decide? Recognizing that alcoholism may be a lifetime disease, is there a period of time after the initial phase of rehabilitation when a relapse is most likely and during which testing would be valuable? If so, how long is that period? What should happen to a person who tests positive after completing rehabilitation? During the post-rehabilitation period, should we prescribe the minimum and/or maximum number of tests to be administered? We would want to ensure that any necessary tests would be given frequently enough to ensure that the employee is not abusing alcohol. At the same time, however, we do not want alcohol testing to become an instrument of harassment.

One alternative, on which we also invite comments, is a specified post-rehabilitation testing period that would apply only if the employee, the MRO, the EAP counselor, and perhaps the employer failed to agree on an individualized program. Such a fall-back system could provide, for example, for up to four additional tests during the 12 months following rehabilitation.

VI. Means of Alcohol Testing

A. Introduction

This section contains a discussion of the principal methods for conducting tests for the consumption of alcohol, including a list of some of the advantages and disadvantages of each methodology. Comments are requested concerning the cost and practicality of the various methodologies. Commenters should give references to specific studies in support of their comments.

B. Breath Testing

There are two types of breath testing devices: (1) The preliminary breath testing (PBT) device, discussed above in the preperformance section, a hand-held device that is useful as a screening tool; and (2) the evidentiary breath testing device (EBT), generally a larger machine found in police stations, that can provide results allowed as evidence in legal proceedings. The FRA allows the use of PBTs exclusively as a screening technique and requires evidentiary testing to follow.

In the breath alcohol test, often used by police agencies to test suspected drunk drivers, the subject blows into a machine that makes a chemical analysis of the expelled breath. The machine provides a reading expressed in terms of blood alcohol concentration. Breath tests, although they may be considered somewhat invasive, may nevertheless be less invasive and thus more acceptable to some people than other forms of tests. They provide a reasonably accurate measure of BAC, at least if they meet NHTSA specifications for accuracy and are properly calibrated. Many states accept the results of evidentiary breath testing devices as *per se* determinants of intoxication.

Perhaps most significant in the context of workplace testing, breath testing, unlike blood and urine tests, provides an immediate response, so that follow-up action can be instituted promptly. In addition, it does not require elaborate chain of custody procedures for collection or laboratory analysis, since no specimens have to be sent to a laboratory for analysis.

On the other hand, breath testing requires specific training and a quality control program to ensure proper administration of the test and calibration of the device. Calibration requires proper use of a breath alcohol simulator, which in turn may require that the unit be set up by a chemist following a specified procedure. The initial costs of EBT's (between about $400 and $5,000), as well as the costs of calibration, are substantial.

Comments are requested on procedural standards for conducting a breath test. We note that no nationally accepted standards exist, although the FRA, for example, has developed guidance materials for its programs. Each state, however, has its own standards for police administration of breath tests, and these standards vary considerably.

One potential problem with breath testing is that no sample remains after the test for retesting in the event of a challenge. This is of particular concern if the test is administered by the employer, because some employees may question the neutrality of the test; in such cases blood tests might be necessary in order to confirm a "positive" breath test result. What qualifications should people have to administer a breath alcohol test? Is there any need to confirm a breath alcohol test? We request comment on whether any have used this approach and had problems.

C. Blood Testing

In this approach, a blood sample is taken from the individual, by normal medical procedures for taking blood samples. The sample is sent to a laboratory where it is analyzed for blood alcohol concentration. Measurement is thus made of the actual blood alcohol concentration and the test does not rely on breath/blood partition or on interpolation from the urine concentration. Blood testing is accepted in all jurisdictions as evidence concerning whether the tested individual is or is not intoxicated. While the test must be conducted in a laboratory, the medical technology required is not especially great; there are many laboratories that can perform these tests competently, although there is no certification program comparable to that offered by the Department of Health and Human Services for drug testing. (DOT's Transportation Systems Center does conduct a voluntary program of laboratory proficiency testing. Laboratories that sign up for the program are given blood samples with known quantities of alcohol; if the lab provides an inaccurate test result, it is notified so that it can correct its procedures or equipment.)

Nevertheless, blood testing is the most physically invasive of all forms of alcohol testing, and some people may be afraid of having blood drawn. In addition, taking a blood sample, while relatively simple, is still a medical procedure, and should be performed only by a qualified professional or technician and only at a suitable physical location. It may not be feasible to conduct field sampling of employees' blood. We seek comment on how those who have used this procedure have handled employee fear and other implementation problems.

Blood tests have the same problems as any other test that must be sent to a laboratory (including the drug tests required by the Department). That is, the results of the test are not immediately available, so there would inevitably be a delay before employers would be able to identify the need for further action. And it would be necessary to establish collection, chain of custody and laboratory procedures analogous to those for urine testing. We ask for comment on whether any acceptable procedures exists.

D. Urine Testing

In this approach, employees would give a urine sample, just as in the case of drug testing. The simplest method of administering a urine test would involve collecting a single sample. This would provide evidence with respect to prior alcohol use, but would not give a reliable indication of the current BAC level. A more elaborate two-step process can indicate current alcohol levels. In the first step, the test subject voids. The collector then waits until the subject can give a second sample, typically at least one-half hour. The second sample, since it includes only newly excreted fluids, can be interpolated to calculate the approximate blood alcohol concentration. The success of this method requires that the initial void be complete. The double void will take more employee time than the single void needed for urine drug testing, thus increasing costs.

Compared to blood testing, urinalysis is less invasive physically, although it may be considered more of a privacy invasion. Of all the types of tests, it has the advantage of requiring the least skill to perform the on-site steps. In addition, since urine samples are already being taken for drugs, a requirement to institute alcohol tests might require no additional personnel or on-site equipment. This could be a significant cost advantage.

The disadvantages of urinalysis parallel those of drug testing. The delay necessary between the time of collection and the time results are available means a corresponding delay before corrective action or rehabilitation can be begun, where necessary.

In addition, there is no uniform cut-off parallel to BAC and, except for the Transportation Systems Center's limited and voluntary laboratory proficiency program, there is no nationally-recognized system of regulation for laboratories performing alcohol tests. There is no question that a urine test, particularly a two-step test, can determine whether an individual has recently consumed measurable amounts of alcohol. Thus, if the Department were to establish a permissible alcohol level of "zero," there is little doubt that urinalysis could be a useful tool. Some might argue, however, that the correlation between alcohol concentration in urine and its concentration in blood is insufficiently precise to be used as a measurement for higher cutoffs, such as .04 or .10. However, we note that FRA authorizes the use of urinalysis for alcohol (with a conservative assumption that the urine concentration is 1.5 times the blood alcohol level), and some recent literature has also endorsed it. The use of conservative conversion factors may result in underestimation of the BAC.

E. Other Techniques

There are less-expensive means of determining approximate blood alcohol concentration. We specifically request public comment on the feasibility of using the following devices or other similar ones separately or in conjunction with other methods of testing.

There are strips that turn various colors when wet with saliva mixed with an enzyme. The colors indicate saliva-alcohol concentration, which statistically is a close approximation of blood alcohol concentration. According to a NHTSA study, this method appears to give highly variable results with a high incidence of false positives. However, it could be used by individuals to determine if they can safely drive.

A different device consists of a tube filled with chemical crystals. After breaking an internal ampul containing the crystals, the person being tested expels breath into the tube. The crystals change color to indicate the amount of alcohol in the subject's breath. The device does not accurately measure blood alcohol concentration, but it is useful to indicate the presence of alcohol in the individual's system, and has been marketed for use by private individuals who want to determine whether it is safe for them to drive.

One device now in use by some police agencies is the Passive Alcohol Sensor (PAS), an electronic device which tests ambient air in front of a driver's mouth for the presence of alcohol. It must be placed within six inches of the subject's mouth. The device gives false positives about 10 percent of the time, and temperature and wind conditions affect its accuracy. The more sophisticated PBT's are more accurate, but are also subject to environmental variations from cold, wind, subject's cooperativeness, etc.

These and similar devices could not be used as tests upon which legally effective determinations of intoxication could be made. However, it could be possible, if a blood or urine test were the method of choice, to use such devices as a means of screening employees. That is, if an employee showed no evidence of alcohol on one of these screening tests, a more costly and invasive blood or urine test might not be necessary. To use these devices for this screening purpose, it would be necessary to determine, as well, whether they tend to give false negative readings. We would appreciate public comment on this. We note that the concerns that the Department had with respect to the use of screen test results to make permanent employment decisions also apply to alcohol testing.

One other promising method for identifying people who may be under the influence of alcohol may be behavioral sobriety tests. NHTSA has developed a Standardized Field Sobriety Test (SFST), which comprises three psychophysical tests. The three tests are: Walk and Turn (walking a straight line and back again); One-Leg Stand (one stage of which requires the subject to stand on one leg and count from "one thousand and one" to "one thousand and thirty"); and Horizontal Gaze Nystagmus. The first two tests measure a person's balance, muscular coordination and ability to concentrate on two activities. The horizontal nystagmus technique, which is used by some police departments as part of a

VOL 54 SS 2 11 NO 2 1989 UMI

roadside screening, relies on identifying the tendency of the eyes to jerk involuntarily as they move back and forth. This tendency becomes more pronounced with increased consumption of alcohol; depending upon the individual, usually the first clues of impairment occur at BAC levels of .05–.08. It is difficult to fake normal nystagmus and the horizontal gaze nystagmus test is reported to be the most accurate method of detecting alcohol use without breath analysis or other specialized equipment. However, significant training and practice is required to master and retain this "testing" skill. We specifically invite commenters to address the utility of increased training in this and/or other methods of identifying persons who have consumed alcohol.

VII. Other Practical Problems

If alcohol testing is proposed, there are a myriad of implementation questions that will need to be addressed. In many cases, they are the same as, or analogous to, questions that were addressed and resolved in the drug testing rules or the "Procedures for Transportation Workplace Drug Testing Programs" (49 CFR part 40). However, there may also be differences, and we invite commenters to address any practical problems they foresee, including recommended solutions.

One problem has been alluded to already: while we have limited the performance of drug tests to laboratories certified by the Department of Health and Human Services, there is no fully-comparable program to certify laboratories performing alcohol tests. Of course, some tests (i.e., breath) do not require laboratory analysis, so this may not be a problem. In addition, it may be that alcohol testing is sufficiently simple that no special certification is necessary. On the other hand, if we were to require testing, we would want to take whatever measures are necessary to ensure the accuracy of test results. A related question involving laboratories is capacity. A mandatory alcohol testing program would undoubtedly increase demand for laboratory services greatly. Is there sufficient capacity in the industry to accommodate such a demand?

The role of a Medical Review Officer (MRO) would be another area of controversy. Should an MRO have to certify results before they are reported, as is done for drug testing? One important function of the MRO in connection with drug testing is to ascertain whether there is a legitimate explanation for the presence of drugs in the employee's system (e.g., ingestion of cough syrup). Does this consideration have relevance for alcohol? A legal explanation for the presence of drugs results in a negative finding. However, if an individual exceeds an established BAC level should it matter that it resulted from legal medication; i.e., if the person is under the influence of alcohol while performing a safety function, is it necessary to know more? Does the question turn on the level of alcohol prohibited? Even if an MRO would not be necessary to consider the circumstances of alcohol ingestion, would it not still be necessary to have an independent review of the chain of custody?

What are the costs associated with different types of testing? What kinds of calibration or other standards do we need for different types of tests?

VIII. Regulatory Process Matters

It is not clear at this preliminary point what the annual effect of any rule or program will be on the economy. To the extent the Department is aware of costs or benefits, it has provided that data in this document. However, there are too many variables and possible permutations of alternatives for the Department to provide an overall cost benefit analysis. Upon review of the comments, the Department will assess the costs and benefits if further regulatory action is deemed appropriate. We do not anticipate at this point that the annual effect on the economy will be $100 million or more for any particular mode. If it becomes apparent at a later stage in this rulemaking that the impact on the economy will be major, then we will prepare a regulatory impact analysis. Otherwise we will prepare an economic evaluation in accordance with the Department's Regulatory Policies and Procedures. Commenters should submit any relevant cost data.

This ANPRM is significant under the Department's Regulatory Policies and Procedures, because it involves matters of significant public and Congressional interest.

For the reasons noted above, at this time, we do not know whether there would be a significant economic impact on a substantial number of small entities. A Regulatory Flexibility Analysis will be prepared if we determine that this rulemaking would have such an impact. At this stage, we cannot determine whether this rule will impose any reporting or paperwork requirements under the Paperwork Reduction Act.

Federalism

Depending upon what action we determine to take, this rulemaking may have substantial effects on the states or on the relationship between the national government and the states. One option under consideration is to rely on increased state enforcement to combat the alcohol problem. Because of the many possibilities and permutations, at this time, we do not have enough information to determine whether a Federalism Assessment will be necessary in accordance with Executive Order 12612. We specifically request that commenters consider the impact on federalism of any of their comments or proposals.

X. Appendix B—Existing DOT Regulations

A. Alcohol

1. Introduction

As a general matter, the Department's alcohol efforts have focused on alcohol as it affects an individual's medical qualifications; prohibitions on on-duty use and, in certain cases, use just prior to reporting to work; and sanctions for violations of the Federal regulatory scheme. With limited exceptions, alcohol testing is left to State enforcement personnel. (Coast Guard and FRA rules provide for post-accident and reasonable cause testing. FAA requires crewmembers to submit to tests upon request.) The Department has nine operating administrations. A brief description of their general functions and their specific responses to the problem of alcohol use or abuse follow.

2. Current Modal Administration Regulations

a. *U.S. Coast Guard.* The Coast Guard carries out a number of functions including commercial vessel and recreational boating safety, search and rescue missions, enforcement of maritime law, bridge administration, port and environmental safety, regulation of deepwater ports, marine environmental responses, icebreaking operations, and aids to navigation. In addition, in conjunction with other agencies, the Coast Guard carries out drug interdiction actions aimed at stopping the importation of drugs into the U.S. through its coastal waters.

The Coast Guard has broad authority for commercial vessel safety. The Coast Guard issues licenses and merchant mariner documents to merchant seamen. It also investigates marine casualties and can and does proceed against licenses or documents for violation of dangerous drug laws or for negligent acts while under the influence of alcohol. The Coast Guard also has been taking action against licenses and merchant mariner's documents of seamen who have been found to be either in the possession of intoxicating liquor or intoxicated by alcohol.

The Coast Guard Authorization Act of 1984 established civil and criminal penalties for operating a vessel while intoxicated, as determined under standards developed by the Coast Guard. In addition to establishing penalties for operating a vessel while intoxicated, the Act requires future reports of marine casualties to include information concerning whether the use of alcohol contributed to the casualty. The Coast Guard issued a final rule, effective January 13, 1986, implementing the directive in the 1984 Authorization Act. It established Federal behavioral and blood alcohol concentration (BAC) intoxication standards for both commercial and recreational vessel operators. Either the behavioral or BAC standard can independently be used to determine intoxication. The behavioral standard is useful, because blood tests may be refused or not taken in a timely manner.

The rule applies a .04 percent BAC standard to operators of all commercial vessels, including fishing vessels. For recreational boaters, the Federal BAC standard is .10 percent. This and the Federal behavioral standard apply only in the absence of existing State BAC and behavioral standards or outside of State territorial waters. For example, if a State has only a behavioral standard, the Federal .10 percent BAC level would also apply to recreational boaters. The rule does not preempt enforcement by a State of its applicable laws and regulations concerning operating a recreational vessel while intoxicated or limit more stringent employer-sponsored programs.

The rule requires employers to ensure that intoxicated individuals are not permitted on

UMI

duty. Crewmembers are prohibited from operating a vessel while intoxicated, drinking on duty or assuming duties within four hours of consuming alcohol. The rule covers U.S. vessels operating anywhere, foreign vessels operated in U.S. waters and individuals with an essential role in operating a vessel, but not when they are on shore. It provides for licensed personnel to seek voluntary rehabilitation prior to being subject to a suspension or revocation proceeding for intoxicant-related incompetence; allows Coast Guard officers to terminate the use of certain vessels when the operator appears to be under the influence of an intoxicant so that further operation creates an unsafe condition; and requires employers' reports on marine casualties to include specific information on the role of intoxicants in the accident.

The rule allows post-accident and reasonable cause testing for intoxicants by employers and State law enforcement officials. Where practicable, the marine employer's determination of reasonable cause should be based on observation of the individual's behavior and demeanor by two persons. Refusal by commercial mariners to submit to a test is presumptive of intoxication (if State law permits such a presumption; this is true for recreational boaters as well). Individuals determined to be intoxicated will have the opportunity during judicial or administrative hearings to dispute the charge.

In addition, the Coast Guard has instructed its casualty investigators to be closely attuned to the possibility of drug or alcohol involvement in marine casualties and is training investigators to look for and recognize alcohol or drug ties to accidents. The Coast Guard, in cooperation with the National Association of State Boating Law Administrators, and the National Transportation Safety Board (NTSB), has developed and distributed to the states a set of guidelines for states to use in developing state legislation addressing the drug and alcohol problem. Among other concerns, the guidelines address restrictions and prohibitions that should be considered, testing, evidentiary requirements, penalties, and education.

Independent of present regulations, the master of a vessel traditionally has had plenary disciplinary authority aboard his vessel. Even today, a master may, and often does, deal with alcohol-related problems by logging individuals who are intoxicated and docking their pay.

Upon completion of the voyage, a Coast Guard marine investigator reviews the ship's log. In addition to the shipboard punishment imposed by the master, the investigator normally will charge a mariner with misconduct for failure to perform due to intoxication, subjecting the mariner to a suspension and revocation proceeding before an Administrative Law Judge. Depending on the circumstances of the incident, the mariner may be given a letter of admonishment, a suspension under probation, or outright suspension or revocation of his license and/or document. The Administrative Law Judge also may direct the mariner to enter a rehabilitation program.

The Coast Guard also has internal procedures that address alcohol problems and drug use by its military employees.

b. *Federal Aviation Administration.* The Federal Aviation Administration (FAA) is charged with regulating air commerce. This includes programs governing safety, airspace and air traffic management, air navigation facilities, research, engineering, development, testing and evaluation of systems needed for a safe and efficient system, airport development and aircraft registration.

FAA alcohol regulations cover pilots, flight engineers, and other crewmembers. For example, they prohibit any pilot from acting or attempting to act as a crewmember if he or she is under the influence of alcohol, or has consumed any alcoholic beverage within 8 hours of reporting for duty. FAA regulations also prohibit a pilot from flying with a blood alcohol concentration (BAC) of .04 or higher. The FAA can suspend or revoke a certificate or assess penalties for failure to comply with its regulations.

The FAA requires pilots to have medical examinations (private and recreational pilots—once every 2 years; commercial pilots—once every year; airline transport pilots—once every 6 months). If a history of drug dependence, alcoholism, or mental problems is discovered, the FAA may disqualify the pilot. The FAA also uses a "driving while intoxicated" (DWI) or a "driving under the influence" (DUI) conviction as an indication of a possible alcohol or drug problem. The FAA recently issued a notice of proposed rulemaking designed to identify those pilots that are convicted of driving while intoxicated or driving under the influence and review their medical qualifications in light of such convictions.

Finally, the FAA requires crewmembers to submit to an alcohol test on request of a law enforcement officer who has a reasonable basis to believe that the crewmember may have violated state alcohol rules. The law enforcement officer must be authorized under State or local law to obtain such tests. State law and practices vary; only six states give explicit authority to obtain such tests.

It is also important to note the role of international conventions in this area. Annex 2 to the Convention on International Civil Aviation (the Chicago Convention), section 2.5, of which the United States is a contracting state, provides that no person shall pilot or act as a flight crewmember while impaired by an intoxicating liquor or narcotic drug.

c. *Federal Highway Administration.* The Federal Highway Administration (FHWA) is involved in a variety of areas such as financial assistance, highway construction and motor carrier safety. It has the authority to establish medical/physical qualification requirements for truck and bus drivers and has had regulations on this subject for over 30 years. Within the context of a comprehensive, nationwide revamping of testing, licensing and disqualification procedures for commercial motor vehicle (CMV) operators, the FHWA recently established stringent regulations defining driving under the influence of alcohol (DUI) for commercial drivers. However, enforcement of the DUI standard continues to be primarily the responsibility of the States in the motor carrier field.

FHWA regulations require that commercial drivers submit to a medical examination once every two years. A driver will not be considered physically qualified to drive a motor vehicle if, among other things, the driver is currently a practicing alcoholic.

FHWA regulations prohibit the use of alcoholic beverages within four hours of reporting to work, and prohibit a driver from working while having any measured BAC or any detected presence of alcohol in his or her system. These and related infractions carry a 24-hour out-of-service penalty.

The CDL regulations and the FMCSRs also require that a driver be disqualified for one year if the driver is convicted of a DUI offense at the .04 percent BAC level or greater, or for a drug offense. The offenses must have occurred while the driver was driving a CMV or a vehicle subject to the FMCSRs. Second offenses, or offenses involving the movement of hazardous materials, carry longer disqualification penalties, ranging from three years to life.

The Commercial Driver's License Information System (CDLIS), implemented under the Commercial Motor Vehicle Safety Act of 1986, will constitute a useful tool for identifying and removing from the road problem drinkers who drive CMVs. After March 31, 1992, every driver of a CMV nationwide will be required to hold a CDL from his or her state of domicile, issued according to FHWA standards. Since the CDLIS will be the nationwide clearinghouse for driving record information for all CDL holders, and since states must check with the CDLIS to yield important highway safety benefits in the alcohol area.

On October 4, 1988, FHWA issued regulations whereby a commercial motor vehicle (CMV) driver found to have a blood alcohol concentration level of .04 or above will be deemed to be DUI. States are required to adopt this standard for CMV operators, or face the loss of highway funding. They also require commercial motor vehicle operators with any measured BAC to be placed out-of-service for a 24 hour period.

The new DUI standard has not as yet been applied by the States. Under the statutory mandate that authorized the Department to set the DUI standard, Congress recognized that it would take some time for the States to implement the program. Therefore, States have until September 30, 1993 to adopt these standards. The States are rapidly enacting legislation to implement the entire CDL program, including its BAC provisions; over half the States had enacted the .04 percent BAC level for CMV drivers by late summer 1989. The FHWA program thus establishes a DUI standard for a CMV driver, and sets penalties, which are to be enforced by the States. Currently, alcohol testing is done by the States, but the new provisions mandate a lower and uniform BAC, as well as penalties.

d. *Federal Railroad Administration.* The Federal Railroad Administration (FRA) is involved in areas such as railroad safety, financial assistance, and national rail transportation policy. Since 1970, FRA has had statutory authority to regulate all fields of railroad safety, including employee qualifications as they relate to safety. Historically, FRA encouraged rail management and labor to work together on alcohol and drug prevention programs, especially employee assistance programs. However, such programs were not required.

In 1985, FRA issued a final rule governing the conduct of railroads and employees subject to the Hours of Service Act (engine, train and yard crews, dispatchers and train order operators, and signal employees). The final rule prohibits on-the-job use, possession of or impairment by alcohol or any controlled substance as well as having a BAC level of .04 or more.

The rule mandates full toxicological testing (blood and urine) after certain accidents that involve significant public interest or a high likelihood of human failure (approximately 200 events per year). Railroads also are authorized to conduct breath and urine tests: (1) On reasonable suspicion of impairment; (2) after a human factor accident/incident; and (3) after other specified operating/safety rule violations. Effective March 1, 1986, railroads were required to institute pre-employment drug screening for potential employees, which may include alcohol analysis. The rule further requires railroads to have "voluntary referral" policies, thereby allowing workers to enroll in assistance programs.

e. *Maritime Administration.* The Maritime Administration (MARAD) administers programs to aid the development, promotion, and operation of the U.S. merchant marine. MARAD also administers of U.S. Merchant Marine Academy, which has an enrollment of approximately 1,100 people. The Academy regulations strictly forbid the use and possession of controlled substances and the use and possession of alcohol on Academy grounds. (Consumption of alcohol for special events can be authorized.) Entering freshman at the Academy must submit to urinalysis as part of the admissions process. For good cause, a midshipman can be sent to the infirmary for urine or blood tests for drug or alcohol use. Confirmation of a drug or alcohol rule violation leads to automatic explusion. A full administrative hearing procedure is available. There is also an active counseling program on campus.

f. *National Highway Traffic Safety Administration.* The National Highway Traffic Safety Administration (NHTSA) carries out programs relating to the safety performance of motor vehicles and related equipment, motor vehicle drivers and pedestrains, a national maximum speed limit, and a national minimum drinking age, among other things.

NHTSA is actively involved in developing programs to reduce alcohol and other drug use by all motorists, including operators of commercial vehicles. NHTSA's programs include providing technical and financial assistance to the states.

Under the section 402 program, NHTSA provides for a variety of State highway safety programs. In a joint final rule, published in April 1988, NHTSA and FHWA identified national priority program areas; included among them are alcohol and other drug counter-measures such as enforcement, education and public information and improvement of records and court systems. NHTSA provides technical assistance to states for DUI enforcement, such as the development and promotion of the use of its Standardized Field Sobriety Test (SFST), SFST training and SFST instructor training. The SFST consists of three psycophysical tests that are used to detect drug and alcohol impairment. The three tests are: Walk and Turn (walking a straight line and back again); One-Leg Stand (one stage of which requires the subject to stand on one leg and count from "one thosand and one" to "one thousand and thirty"); and Horizontal Gaze Nystagmus. The first two tests measure a person's balance, muscular coordination and ability to concentrate on two activities. The horizontal nystagmus technique, which is used by some police departments as part of a roadside screening, relies on identifying the tendency of the eyes to jerk involuntarily as they move back and forth.

The section 408 alcohol incentive grant program provides funds to States that have improved laws and programs to reduce traffic safety problems involving drivers under the influence of alcohol or a controlled substance. The program is available to all qualifying States—21 have currently qualified. Through the 408 program, NHTSA also awards grants to States that have programs that satisfy certain supplemental criteria established by regulation, or that enact tough sentencing laws for individuals convicted of driving under the influence of alcohol.

Finally, a joint NHTSA/FHWA regulation implements the Federal statute that requires that certain Federal highway funds be withheld from States that permit the purchase or public possession of alcohol by those under the age of 21. The law provides for a five percent total withholding in FY87 and a ten percent withholding in all succeeding fiscal years.

g. *Research and Special Programs Administration.* The Research and Special Programs Administration (RSPA) regulates the safety of transportation of hazardous materials and the transportation of natural gas and hazardous liquids by pipeline, collects air carrier economic data, and conducts multimodal transportation research and development.

RSPA has no specific regulations on alcohol. It does have a general regulation on health of pipeline workers at liquified natural gas plants. Pipeline operators must look for any physical condition that would impair performance, including any observable disorder or condition that is discoverable by a professional examination.

h. *St. Lawrence Seaway Development Corporation.* The St. Lawrence Seaway Development Corporation (SLSDC) is responsible for the development, operation and maintenance of that portion of the St. Lawrence Seaway that falls within the territorial limits of the U.S.

No specific legislation or SLSDC regulation covers alcohol and other drug use, but a general regulation allows the Corporation to prohibit the transit of a vessel if the crew is incompetent or inadequate and to board the vessel to determine this. The U.S. Coast Guard regulations apply to U.S. pilots, crewmen and vessels.

i. *Urban Mass Transportation Administration.* The Urban Mass Transportation Administration (UMTA) assists in developing improved mass transportation facilities, planning and financing of such systems, and encouraging private sector involvement in local mass transit systems.

The UMTA grant statutes prohibit the agency from making grants unless recipients have the legal, technical, and financial capability to carry out UMTA-assisted projects, including the ability to provide safe transit services. Grantees must exercise satisfactory continuing control over UMTA-assisted facilities and equipment. UMTA has no current regulations concerning alcohol. Even so, many of UMTA's grantees are subject to other Federal requirements on alcohol use. All commuter rail lines funded by UMTA, for example, are subject to FRA regulations. All drivers of UMTA-funded vehicles that are capable of carrying more than 15 passengers, including the driver, are subject to the FHWA DUI standards. However, other grantees, small transit systems, for example, and all UMTA-funded rail systems other than commuter rail, are not subject to Federal requirements on alcohol use.

B. Drugs

On November 21, 1988, six modal administrations of the Department of Transportation published final rules that require the commercial transportation operators they regulate to test employees in sensitive safety- and security-related occupations for drugs and to develop employee assistance programs (EAP) to provide information and training. The rules cover approximately 4 million persons in the aviation, highway, railroad, pipeline, mass transit and maritime industries. The employers are required to conduct preemployment, periodic (physicals), post-accident, reasonable cause, random, and return to duty drug tests and to test for five classes of drugs: marijuana, cocaine, amphetamines, phencyclidine (PCP) and opiates. The testing must be conducted in accordance with DOT-wise regulations based on the Department of Health and Human Services Guidelines (HHS), which are designed to protect the privacy and dignity of the individuals tested. A positive initial screening test is followed by a more specific gas chromatography/mass spectrometry confirmation test. Persons who confirm positive must be removed from their sensitive safety- or security-related position. They can be reinstated only upon successful completion of a rehabilitation program and a return to duty test. The rules encourage, but do not require employers to establish rehabilitation programs. Most testing will begin in December 1989. Small companies have an extra year to imlement drug testing.

XI. Appendix C—NHTSA Conclusion on IID's

• Ignition interlock technology based on breath alcohol test devices for detecting and

preventing alcohol-impaired driving does appear feasible at this time. Devices that measure a driver's BAC level are currently being marketed and used.

- Laboratory tests have shown the current breath test ignition interlock devices, when set to interlock at 0.03 percent BAC, to be relatively accurate in detecting low (i.e., 0.04 percent BAC) as well as high driver BAC levels. The accuracy and reliability of these devices under real-world conditions is unknown. There is no apparent reason why any operational problems cannot easily be overcome.
- The devices contain anti-tampering and circumvention measures that appear to reduce the likelihood of many forms of tampering and circumvention. Such activity by users is not impossible, but operational experience and testing will indicate the extent to which tampering and circumvention will be a problem.
- Current interest has focused on applying this technology to convicted DWI offenders as a condition of probation or to obtain a restricted driving privilege. Critical information necessary to estimate the potential effectiveness of these devices in this application is lacking. This includes whether the devices function properly under real-world conditions and evidence that persons required to use the devices do not tamper or circumvent their use and do not elect to operate other vehicles when drinking.
- There is not yet enough evidence available to judge how effective these devices will be in deterring alcohol-impaired driving and related crashes.
- It is not appropriate for these devices to be used in lieu of other sanctions that have evidence of beneficial effects (e.g., license suspension). Use of this technology as an additional condition of probation or for reinstatement of a restricted driving privilege does appear appropriate.
- The use of these devices with other populations may be feasible (e.g., fleet owners could install them, commercial and public transportation vehicles could be equipped, and individuals interested in this protection could pay for their installation). Widespread use of this type would have to overcome resistance due to the costs, liability issues, and public acceptability issues. Also, considerable research is needed to ascertain the practicality of these uses of the devices.
- Ignition interlock technology for detecting and preventing drug-impaired driving does not appear feasible at this time. There is no easy or feasible in-vehicle test method currently known to detect the use of drugs. In addition, the cost and complexity of testing for different drugs thought to impair driving skill (including legal as well as illegal drugs), makes such an approach even more impractical.

The most immediate issues outstanding regarding the use of breath test ignition interlock technology with convicted DWI offenders are:

- Their operational performance in the real world (i.e., their accuracy, reliability, maintenance and calibration requirements);
- The extent to which the devices are tampered with, circumvented, or non-equipped vehicles are used by persons ordered to only drive cars with ignition interlock devices installed;
- The effectiveness of these devices in reducing alcohol-impaired driving; and
- The certification standards adopted by the states authorizing use of the devices.

NHTSA research will help address these needs:

- NHTSA is currently initiating a project to develop model performance guidelines and test procedures that states can use in developing their own certification standards.
- NHTSA is providing grant funds to California to support their ongoing evaluation of their ignition interlock program.
- NHTSA will provide technical assistance to states or local communities interested in evaluating the effectiveness of their ignition interlock program.

Part III

The President

Proclamation 6058—To Amend the Generalized System of Preferences

Proclamation 6058 of October 31, 1989

TO AMEND THE GENERALIZED SYSTEM OF PREFERENCES

2

5. Section 201(a) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (the Implementation Act)

VOL 54 SS 211 NO 2 1989 UMI

Proclamation 6058 of October 31, 1989

TO AMEND THE GENERALIZED SYSTEM OF PREFERENCES

- - - - - - -

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

1. Section 1903 of the Omnibus Trade and Competitiveness Act of 1988 (the 1988 Act) (Public Law No. 100-418, 102 Stat. 1313) amends section 503(c)(1)(B) of the Trade Act of 1974 (the 1974 Act) (19 U.S.C. 2463(c)(1)(B)) to provide for the continued exclusion of watches as eligible articles under the Generalized System of Preferences (GSP) except those watches entered after June 30, 1989, that the President specifically determines, after public notice and comment, will not cause material injury to watch or watch band, strap, or bracelet manufacturing and assembly operations in the United States or the United States insular possessions.

2. Pursuant to Title V of the 1974 Act, as amended (19 U.S.C. 2461 et seq.), the President may designate specified articles provided for in the Harmonized Tariff Schedule of the United States (HTS) as eligible for preferential tariff treatment under the GSP when imported from designated beneficiary developing countries.

3. Pursuant to section 503(c)(1)(B) of the 1974 Act, as amended, I have determined that the addition of certain specified watches (HTS subheadings in Annex I to this Proclamation) as articles eligible for preferential treatment under the GSP will not cause material injury to watch or watch band, strap, or bracelet manufacturing and assembly operations in the United States or the United States insular possessions.

4. Pursuant to sections 501 and 503(a) of the 1974 Act (19 U.S.C. 2461 and 2463(a)), I have determined, after taking into account information and advice received under section 503(a) of the 1974 Act, that it is appropriate to designate certain specified watches provided for in the HTS as eligible for preferential treatment under the GSP.

5. Section 201(a) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (the Implementation Act) (Public Law No. 100-449, 102 Stat. 1851) authorizes the President to proclaim such modifications or continuance of any existing duties, such continuance of existing duty-free or excise treatment, or such additional duties, as the President determines are necessary or appropriate to carry out Article 401 of the United States-Canada Free-Trade Agreement and the schedule of duty reductions with respect to goods originating in the territory of Canada set forth in Annexes 401.2 and 401.7 to the Agreement.

6. Pursuant to section 201(a) of the Implementation Act, I have determined that it is necessary to provide for the continued staged reduction in duties on certain goods originating in the territory of Canada.

7. Section 604 of the 1974 Act (19 U.S.C. 2483) authorizes the President to embody in the HTS the substance of the provisions of that Act, and of other Acts affecting import treatment, and actions thereunder.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States, including but not limited to Title V and section 604 of the 1974 Act, and section 201 of the Implementation Act, do proclaim that:

(1) In order to provide benefits under the GSP to specified designated eligible articles when imported from any designated beneficiary developing country, the HTS is modified as provided in Annex I to this Proclamation.

(2) In order to provide for the continued staged reductions on Canadian goods in particular HTS subheadings modified in Annex I to this Proclamation, effective with

respect to certain goods originating in the territory of

ANNEX I

(a) Chapter 91 of the Harmonized Tariff Schedule of the United States is modified as follows:

Notes:

respect to certain goods originating in the territory of Canada which are entered, or withdrawn from warehouse for consumption, on or after the dates specified in Annex II to this Proclamation, the rate of duty in the HTS set forth in the Rates of Duty 1-Special subcolumn followed by the symbol "CA" in parentheses for each of the HTS subheadings enumerated in such Annex II shall be deleted and the rate of duty provided in such Annex shall be inserted in lieu thereof.

(3) Any provisions of previous proclamations and Executive orders inconsistent with the provisions of this Proclamation are hereby superseded to the extent of such inconsistency.

(4) (a) The amendments made by Annex I of this Proclamation shall be effective with respect to articles both: (i) imported on or after January 1, 1976, and (ii) entered, or withdrawn from warehouse for consumption, on or after the date that is 14 days after the publication of this Proclamation in the Federal Register.

(b) The amendments made by Annex II of this Proclamation shall be effective with respect to goods originating in the territory of Canada which are entered, or withdrawn from warehouse for consumption, on or after the dates specified in such Annex.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

Billing code 3195-01-C

ANNEX I

(a) Chapter 91 of the Harmonized Tariff Schedule of the United States is modified as follows:

Notes:

1. Bracketed matter is included to assist in the understanding of proclaimed modifications.

2. The following supersedes matter now in the Harmonized Tariff Schedule of the United States (HTS). The subheadings and superior descriptions are set forth in columnar format, and material in such columns is inserted in the columns of the HTS designated "Heading/Subheading", "Article Description", "Rates of Duty 1-General", "Rates of Duty 1-Special", and "Rates of Duty 2", respectively.

Effective as to articles entered, or withdrawn from warehouse for consumption, on or after the date that is 14 days after the publication of this Proclamation in the Federal Register.

1. Subheading 9101.12.00 is superseded by:

	[Wrist watches,...:]			
	[Wrist watches,...:]			
"9101.12	With opto-electronic display only: Straps, bands or bracelets entered with watches of subheading 9101.12.80 and classifiable therewith pursuant to additional U.S. note 2 to this chapter; all the foregoing whether or not attached to such watches at the time of entry:			
9101.12.20	Of textile material or of base metal, whether or not gold- or silver-plated.....	3.9%	Free (E,IL) 3.5% (CA)	35%
9101.12.40	Other.....	3.9%	Free (A,E,IL) 3.5% (CA)	35%
9101.12.80	Other.....	3.9% on the movement and case + 5.3% on the battery	Free (A,E,IL) 3.5% on the movement and case + 4.7% on the battery (CA)	35%"

2. Subheading 9101.21.40 is superseded by:

	[Wrist watches,...:]			
	[Other wrist...:]			
	[With automatic...:]			
	"Having over 17 jewels in the movement: Straps, bands or bracelets entered with watches of subheading 9101.21.50 and classifiable therewith pursuant to additional U.S. note 2 to this chapter; all the foregoing whether or not attached to such watches at the time of entry:			
9101.21.10	Of textile material or of base metal, whether or not gold- or silver-plated.....	6.25%	Free (E,IL) 5.6% (CA)	80%
9101.21.30	Other.....	6.25%	Free (A,E,IL) 5.6% (CA)	80%
9101.21.50	Other.....	$2.30 each + 6.25% on the case	Free (A,E,IL) $2.07 each + 5.6% on the case (CA)	$11.50 each + 45% on the case"

ANNEX I (con.)
2 of 3

3. Subheading 9101.29.40 is superseded by:

ANNEX I (con.)
3 of 3

4. Subheading 9101.91.00 is superseded by:

	[Wrist watches,...:]			
	[Other wrist...:]			
	[With automatic...:]			
	"Having over 17 jewels in the movement: Straps, bands or bracelets entered with watches of subheading 9101.91.50 and classifiable therewith pursuant to additional U.S. note 2 to this chapter; all the foregoing whether or not attached to such watches at the time of entry:			
9101.91.10	Of textile material or of base metal, whether or not gold- or silver-plated.....	6.25%	Free (E,IL) 5.6% (CA)	80%
9101.91.30	Other.....	6.25%	Free (A,E,IL) 5.6% (CA)	80%
9101.91.50	Other.....	$2.30 each + 6.25% on the case	Free (A,E,IL) $2.07 each + 5.6% on the case (CA)	$11.50 each + 45% on the case"

5. Subheading 9101.99.00 is superseded by:

	[Wrist watches,...:]

LIST OF PUBLIC LAWS

Last List November 1, 1989

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

H.R. 801/Pub. L. 101–132

To designate the United States Court of Appeals Building at 56 Forsyth Street in Atlanta, Georgia, as the "Elbert P. Tuttle United States Court of Appeals Building". (Oct. 30, 1989; 103 Stat. 778; 1 page) Price: $1.00

H.J. Res. 380/Pub. L. 101–133

Designating October 18, 1989 as "Patient Account Management Day". (Oct. 30, 1989; 103 Stat. 779; 1 page) Price: $1.00

S. 1792/Pub. L. 101–134

To amend the Disaster Assistance Act of 1989 to avoid penalizing producers who planted a replacement crop on disaster-affected acreage, and for other purposes. (Oct. 30, 1989; 103 Stat. 780; 2 pages) Price $1.00

S.J. Res. 177/Pub. L. 101–135

To designate October 29, 1989, as "Fire Safety At Home—Change Your Clock, Change Your Battery Day". (Oct. 30, 1989; 103 Stat. 782; 1 page) Price: $1.00

Note: The "Table of Effective Dates and Time Periods—October 1989" inadvertently appeared in the November 1, 1989, **Federal Register**. The table for November appears below.

TABLE OF EFFECTIVE DATES AND TIME PERIODS—NOVEMBER 1989

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

Revised January 1, 1989

The GUIDE to record retention requirements is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal record-keeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Order from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-9325.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SAN FRANCISCO, CA

WHEN: November 29; at 9:00 a.m.
WHERE: Room 15136,
450 Golden Gate Avenue,
San Francisco, CA.
RESERVATIONS: Call Mary Walters at the San Francisco Federal Information Center,
415-556-6600.

SEATTLE, WA

WHEN: November 30; at 1:00 p.m.
WHERE: South Auditorium, 4th Floor,
915 2nd Avenue,
Seattle, WA.
RESERVATIONS: Call Carmen Meier or Peggy Groff at the Portland Federal Information Center on the following numbers:
Seattle: 206-442-0570,
Tacoma: 206-383-7970,
Portland: 503-328-2222.

WASHINGTON, DC

WHEN: December 7, at 9:00 a.m.
WHERE: Office of the Federal Register,
First Floor Conference Room,
1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.

Title 3—

The President

Proclamation 6059 of November 1, 1989

Gaucher's Disease Awareness Week, 1989

By the President of the United States of America

A Proclamation

Gaucher's disease is the most common of a group of inherited disorders known as lipid storage diseases, in which the body fails to produce a sufficient quantity of an enzyme crucial to the breakdown and removal of fatty substances. These substances, called lipids, are key structural components of living cells. However, their buildup in the body tissues of Gaucher's victims can lead to an enlarged spleen and liver, as well as bone pain and fractures. In rare cases, severe neurological complications may occur.

Gaucher's disease is usually diagnosed during childhood. It most commonly afflicts individuals of Eastern European Jewish descent—one in every 2,500 persons in this group has the disorder. Currently, no cure exists for the more than 20,000 Americans suffering from Gaucher's.

Scientists do know that Gaucher's disease results from a defective recessive gene. Children who inherit a defective gene from each parent develop Gaucher's; those who inherit only one defective gene do not develop the disease, but become carriers and threaten their offspring in turn.

Although a cure remains elusive, remarkable progress has been made in understanding the cause of Gaucher's disease. Investigators at the Federal Government's National Institute of Neurological Disorders and Stroke (NINDS) have discovered the enzyme that is absent in victims of Gaucher's disease. This finding has led the way to the development of diagnostic and carrier tests for the disease. Scientists working in the field of genetics have also gained valuable insight into the nature of Gaucher's disease.

While these advances offer great hope to the victims of Gaucher's disease, much work remains to be done. Cooperating with the NINDS are voluntary health agencies such as the National Gaucher Foundation. These agencies not only conduct valuable research but also provide helpful information and services to Gaucher's patients and their families. This week, as we call attention to this mysterious disease, we also recognize and salute the many dedicated men and women who are working to find a cure for it.

To enhance public awareness of Gaucher's disease, the Congress, by Senate Joint Resolution 73, has designated the week of October 29, 1989, as "Gaucher's Disease Awareness Week" and has authorized and requested the President to issue a proclamation in observance of that week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week beginning October 29, 1989, as Gaucher's Disease Awareness Week and call upon the people of the United States to observe that week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of November, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

Proclamation 6060 of November 1, 1989

To Amend the Generalized System of Preferences

By the President of the United States of America

A Proclamation

1. Pursuant to section 502 (a), (b), and (c) of the Trade Act of 1974, as amended (the 1974 Act) (19 U.S.C. 2462 (a), (b), and (c)), and having due regard for the eligibility criteria set forth therein, I have determined that it is appropriate to designate Hungary as a beneficiary developing country for purposes of the Generalized System of Preferences (GSP).

2. Section 604 of the 1974 Act (19 U.S.C. 2483) authorizes the President to embody in the Harmonized Tariff Schedule of the United States (the HTS) the substance of the provisions of that Act, and of other Acts affecting import treatment, and actions thereunder.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States, including but not limited to sections 502 and 604 of the 1974 Act, do proclaim that:

(1) General note 3(c)(ii)(A) to the HTS, listing those countries whose products are eligible for benefits of the GSP, is modified by inserting in alphabetical order in the list of independent countries "Hungary".

(2) Any provisions of previous proclamations and Executive orders inconsistent with the provisions of this Proclamation are hereby superseded to the extent of such inconsistency.

(3) The amendments made by this Proclamation shall be effective with respect to articles both: (i) imported on or after January 1, 1976, and (ii) entered, or withdrawn from warehouse for consumption, on or after the date of publication of this Proclamation in the **Federal Register**.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of November, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

Rules and Regulations

Federal Register
Vol. 54, No. 212
Friday, November 3, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Regulation 692]

Navel Oranges Grown in Arizona and Designated Parts of California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona navel oranges that may be shipped to domestic markets during the period from November 3 through November 9, 1989. Consistent with program objectives, such action is needed to balance the supplies of fresh navel oranges with the demand for such oranges during the period specified. This action was recommended by the Navel Orange Administrative Committee (Committee), which is responsible for local administration of the navel orange marketing order.

DATES: Regulation 692 (7 CFR part 907) is effective for the period from November 3 through November 9, 1989.

FOR FURTHER INFORMATION CONTACT: Jacquelyn R. Schlatter, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–8139.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order 907 (7 CFR part 907) as amended, regulating the handling of navel oranges grown in Arizona and designated parts of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 123 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order and approximately 4,065 navel orange producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

The California-Arizona navel orange industry is characterized by a large number of growers located over a wide area. The production area is divided into four districts which span Arizona and part of California. The largest proportion of navel orange production is located in District 1, Central California, which represented 85 percent of the total production in 1988–89. District 2 is located in the southern coastal area of California and represented 13 percent of 1988–89 production; District 3 is the desert area of California and Arizona, and it represented approximately 1 percent; and District 4, which represented approximately 1 percent, is northern California. The Committee's estimate of 1989–90 production is 73,350 cars (one car equals 1,000 cartons at 37.5 pounds net weight each), as compared with 70,633 cars during the 1988–89 season.

The three basic outlets for California-Arizona navel oranges are the domestic fresh, export, and processing markets. The domestic (regulated) fresh market is a preferred market for California-Arizona navel oranges. The Committee estimates that about 68 percent of the 1989–90 crop of 73,350 cars will be utilized in fresh domestic channels (49,500 cars), with the remainder being exported fresh (10 percent) or processed (22 percent). This compares with the 1988–89 total of 45,581 cars shipped to fresh domestic markets, about 64 percent of the crop.

Volume regulations issued under the authority of the Act and Marketing Order No. 907 are intended to provide benefits to growers. Growers benefit from increased returns and improved market conditions. Reduced fluctuations in supplies and prices result from regulating shipping levels and contribute to a more stable market. The intent of regulation is to achieve a more even distribution of oranges in the market throughout the marketing season.

Although information available on the current season is limited, the costs of implementing the regulations are expected to be more than offset by the potential benefits of regulation.

Reporting and recordkeeping requirements under the navel orange marketing order are incurred by handlers of navel oranges. However, handlers in turn may require individual growers to utilize certain reporting and recordkeeping practices to enable handlers to carry out their functions. Costs incurred by handlers in connection with recordkeeping and reporting requirements may be passed on to growers.

Major reasons for the use of volume regulations under this marketing order are to foster market stability and enhance grower revenue. Prices for navel oranges tend to be relatively inelastic at the grower level. Thus, even a small variation in shipments can have a great impact on prices and grower revenue. Under these circumstances, strong arguments can be advanced as to the benefits to growers, particularly smaller growers. Therefore, if a "significant economic impact on a substantial number of small entities" would be present, this impact would be positive rather than adverse.

At the beginning of each marketing year, the Committee submits a

VOL 54 ISS 212 3 1989 NO UMI VOL

marketing policy to the U.S. Department of Agriculture (Department) which discusses, among other things, the potential use of volume and size regulations for the ensuing season. The Committee, in its 1989–90 season marketing policy, considered the use of volume regulation for the season. This marketing policy is available from the Committee or Ms. Schlatter. The Department reviewed that policy with respect to administrative requirements and regulatory alternatives in order to determine if the use of volume regulations would be appropriate. A "Notice of Marketing Policy" (notice), which summarized the Committee's marketing policy was prepared by the Department and published in the October 19, 1989, issue of the **Federal Register** (54 FR 42966). The purpose of the notice was to allow public comment on the Committee's marketing policy and the impact of any regulations on small business activities.

The notice provides a 30-day period for the receipt of comments from interested persons. That comment period will end on November 20, 1989. The Department will analyze all comments received, and the analysis will be made available to interested persons. That analysis will assist the Department in evaluating the marketing policy and considering the issuance of weekly volume regulations.

This action is consistent with the 1989–90 marketing policy adopted by the Committee. The Committee met publicly on October 31, 1989, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended, by a vote of seven to two with two abstentions, that 1,100,000 cartons is the quantity of navel oranges deemed advisable to be shipped to fresh domestic markets during the specified week. This amount is 100,000 cartons less than estimated in the tentative shipping schedule adopted by the Committee on October 3, 1989. Of the 1,100,000 cartons, 1,056,000 are alloted for District 1, and 44,000 are allotted for District 3. Districts 2 and 4 are not regulated as they do not have a sufficient quantity of fruit available for current shipment.

During the week ending on October 28, 1989, shipments of navel oranges to fresh domestic markets, including Canada, totaled 323,000 cartons compared with 110,000 cartons shipped during the week ending on October 27, 1988. Export shipments totaled 26,000 cartons compared with 1,000 cartons shipped during the week ending on October 27, 1988, and processing and other uses accounted for 78,000 cartons compared with 35,000 cartons shipped during the week ending on October 27, 1988.

Fresh domestic shipments to date this season total 456,000 cartons compared with 146,000 cartons shipped by this time last season. Export shipments total 30,000 cartons compared with 1,000 cartons shipped by this time last season. Processing and other use shipments total 122,000 cartons compared with 47,000 cartons shipped by this time last season.

The average f.o.b. shipping point price for the week ending on October 28 was $9.88 per carton based on a reported sales volume of 205,000 cartons compared with last week's average of $11.77 per carton on 72,000 cartons. The season average f.o.b. shipping point price to date is $10.53 per carton. Average f.o.b. shipping point prices for comparable periods last season are not available.

The Committee reports that the market is good for larger sizes (72's and larger) and weak for smaller sizes (113's and smaller). Committee members also stated that there is a large amount of fruit available for shipment and that some price discounting is occurring.

According to the National Agricultural Statistics Service, the 1988–89 season average fresh equivalent on-tree price for California-Arizona navel oranges was $3.86 per carton, 65 percent of the season average parity equivalent price of $5.98 per carton.

Based upon fresh utilization levels indicated by the Committee and an econometric model developed by the Department, the point estimate of the 1989–90 season average fresh on-tree price would be $4.30 per carton. This is equivalent to 66 percent of the projected season average fresh on-tree parity equivalent price of $6.54 per carton. It is currently estimated that there is less than a one percent probability that the 1989–90 season average fresh on-tree price will exceed the projected season average fresh on-tree parity equivalent price.

Limiting the quantity of navel oranges that may be shipped during the period from November 3 through November 9, 1989, would be consistent with the provisions of the marketing order by tending to establish and maintain, in the interest of producers and consumers, an orderly flow of navel oranges to market. By using provisions contained in the navel orange marketing order, handler shipments could exceed 1,320,000 cartons during the week.

Based on considerations of supply and market conditions, and the evaluation of alternatives to the implementation of this volume regulation, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities and that this action will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is further found and determined that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register**. This is because there is insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act.

In addition, market information needed for the formulation of the basis for this action was not available until October 31, 1989, and this action needs to be effective for the regulatory week which begins on November 3, 1989. Further, interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and handlers have been apprised of the provisions of this rule and the effective time. It is necessary, therefore, in order to effectuate the declared purposes of the Act, to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

List of Subjects in 7 CFR Part 907

Arizona, California, Marketing agreements and orders, Oranges (navel).

For the reasons set forth in the preamble, 7 CFR part 907 is amended as follows:

PART 907—[AMENDED]

1. The authority citation for 7 CFR part 907 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 907.992 is added to read as follows:

Note: This section will not appear in the annual Code of Federal Regulations.

§ 907.992 Navel Orange Regulation 692.

The quantity of navel oranges grown in California and Arizona which may be handled during the period from November 3 through November 9, 1989, is established as follows:

(a) District 1: 1,056,000 cartons;
(b) District 2: unlimited cartons;

(c) District 3: 44,000 cartons;
(d) District 4: unlimited cartons.

Dated: November 1, 1989.

BILLING CODE 3410–02–M

7 CFR Part 910

[Lemon Regulation 690]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 690 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 293,088 cartons during the period from November 5 through November 11, 1989. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 690 (7 CFR part 910) is effective for the period from November 5 through November 11, 1989.

FOR FURTHER INFORMATION CONTACT: Beatriz Rodriguez, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 475–3861.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 85 handlers of lemons grown in California and Arizona subject to regulation under the lemon marketing order and approximately 2500 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona lemons may be classified as small entities.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR part 910), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601–674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee (Committee) and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the California-Arizona lemon marketing policy for 1989–90. The Committee met publicly on October 31, 1989, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and unanimously recommended a quantity of lemons deemed advisable to be handled during the specified week. The Committee reports that overall demand for lemons is moderate.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

[DA–89–036]

Milk in the Eastern Ohio-Western Pennsylvania Marketing Area; Temporary Revision of Supply Plant Shipping Percentages and Cooperative Association Delivery Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Temporary revision of rules.

SUMMARY: This action increases temporarily the percentage of producer milk receipts that must be shipped by pool supply plants operated by both proprietary and cooperative association handlers under the Eastern Ohio-Western Pennsylvania milk order (Order 36). The action increases the percentage of milk that must be shipped by pool supply plants to fluid milk processing plants from 40 percent to 45 percent during the remaining portion of October and for November 1989, and from 30 percent to 35 percent in the months of December 1989-February 1990. The action also increases the percentage of producer milk marketed by a cooperative association that must be delivered to distributing plants to qualify plants operated by the cooperative association for pool status from 35 percent to 40 percent for the remaining portion of October through February 1990. Increases of 10 percentage points in the minimum performance standards for pool supply plants were requested by two proprietary handlers who need more

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Temporary Revision of Shipping Percentages and Cooperative Association Delivery Requirements: Issued September 18, 1989; published September 22, 1989 (54 FR 38999).

The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action provides greater assurance that an adequate supply of fresh fluid milk will be available to consumers.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under the criteria contained therein.

This revision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and the provisions of § 1036.7(f) of the order.

Notice of proposed rulemaking was published in the **Federal Register** (54 FR 38999) concerning a proposal to increase the shipping and delivery percentages for pool supply plants and pool plants operated by cooperative associations. An increase of 10 percentage points in shipping requirements was proposed to be effective for an indefinite period beginning with the month of October 1989. The public was afforded the opportunity to comment on the proposal by submitting written data, views and arguments by September 29, 1989. Comments were received from several interested parties and they are dealt with in the following statement of consideration.

Statement of Consideration

This action increases by 5 percentage points the shipping and delivery percentages for pool supply plants and pool plants operated by cooperative associations. The higher standards would apply for the remaining portion of the month of October 1989 and for the months of November 1989-February 1990. Specifically, the pool supply plant shipping percentages would be increased from 40 percent to 45 percent for the remaining portion of the month of October and for November 1989, and from 30 percent to 35 percent for the months of December 1989-February 1990. Similarly, for the remaining portion of October through February 1990, the percentage of a cooperative association's member producer milk that must be shipped to distributing pool plants or to nonpool plants for Class I purposes if the plants operated by such cooperative are to be considered pool plants would be increased from 35 percent to 40 percent. A cooperative would be permitted to meet the higher delivery requirement on the basis of its deliveries in the current month or during the immediately preceding 12-month period.

Section 1036.7(f) of the Eastern Ohio-Western Pennsylvania milk order allows the Director of the Dairy Division to increase the order's shipping and delivery requirements by up to 10 percentage points for any month for which he finds that such an adjustment is necessary to obtain needed shipments of milk.

United Dairy, Inc. and Hillside Dairy Company, Inc., two proprietary handlers who operate pool distributing plants under the Eastern Ohio-Western Pennsylvania order, requested that the shipping and delivery percentages for pool supply plants and pool plants operated by cooperative associations be increased by 10 percentage points as soon as possible to enable handlers to provide consumers with an adequate supply of fluid milk products. Proponents asked that the pooling standards be adjusted upward by the maximum allowable amount (10 percentage points). They also proposed that the upward revisions be effective as soon as possible. The request specified no ending date for such higher standards.

Proponents receive the majority of their milk supplies from Milk Marketing, Inc. (MMI), a cooperative association that markets about 40 percent of the milk pooled under Order 36. In mid-August, the cooperative informed proponents that MMI would be unable to supply all of the handlers' Class I fluid milk requirements beginning with the end of that month. Proponents estimated that their supply shortfalls would amount to approximately 10-20 percent of their total Grade A milk requirements. Since the handlers were unable to replace this milk on an economic basis with receipts from other sources, they requested this action.

Several interested parties responded to the notice which invited comments on the handlers' proposal to increase the minimum pooling standards for supply plants and plants operated by cooperative associations. There were wide differences of opinion as to whether the higher standards are warranted and, if so, for how long they should apply.

Three distributing plant operators, Dean Dairy Products Company, Reiter Dairy, Inc., (a subsidiary of Dean Foods) and Superior Dairy, Inc., supported the proposed revision. These handlers stated that they are short of milk now, either because of MMI's supply cutbacks or because the market's current supply/demand situation is unusually tight, and favor the higher performance standards. The handlers believe the temporary revision would make more milk available for their fluid processing operations. They argued that it is difficult, if not impossible, to replace or obtain additional milk at this time because area processors manufacturing Class II and III products are not willing to make local supplies available to fluid milk plants. The handlers stated that recently they have had to purchase supplemental milk from distant sources in Indiana, Michigan and Kentucky to meet their packaging needs. According to the handlers, such supplemental milk purchases have added considerably to their overall raw product costs.

Three supply plant operators (Brewster Dairy, Inc., Miceli Dairy Products Company and Middlefield Cheese), a distributing plant operator and a cooperative association opposed the upward revision of shipping standards. The supply plant operators generally opposed the higher standards because shipping more of their milk supplies to fluid processors would leave less milk available for their manufacturing operations. These handlers argued that since only slightly more than one-half of the market's milk is being used for Class I purposes, there is plenty of milk available for fluid processing.

The supply plant operators stated that the real issue in this particular situation is pricing, not pooling standards. In their comments, the supply plant operators took the position that fluid processors could obtain adequate milk for their packaging operations if they were willing to pay competitive prices. Certain of these market suppliers indicated that they had offered to sell milk to proponents who refused to buy it, apparently because the price was too high.

Oberlin Farms, the distributing plant, stated that it had been able to satisfy all of its milk requirements and saw no reason to revise the order's shipping standards. North Shore Milk Producers, a cooperative association that qualifies its members' milk for pooling through Brewster Dairy, stated that the proposed temporary revision would reduce the volume of milk Brewster Dairy would be able to qualify for pooling, and result in financial harm to the cooperative's members.

The market's primary supplier of raw milk (MMI) supported the handlers' proposal to increase the percentage of milk that pool supply plants must deliver to distributing plants. In its comments, MMI stated that the cooperative has recently received numerous requests for additional milk from Order 36 distributing plants. MMI took the position that the proposed upward revisions in the performance standards are supported by the market's current supply/demand conditions. MMI delivered 62 percent of its Order 36 producer milk to pool distributing plants during August 1989. Such percentage exceeds the percentage of the market's producer milk used in Class I, and is considerably above the 35-percent minimum delivery requirement, which applies in each month for pool plants operated by cooperative associations. Also, it is considerably above the 30-percent minimum shipping standard for August, which applies to pool supply plants that have not qualified for automatic pool plant status on the basis of shipments in previous months. MMI expressed a belief that other supply plants are meeting only minimal shipping requirements.

The National Farmers Organization (NFO) took the position that current marketing conditions may warrant a temporary increase in the pooling standards for supply plants and plants operated by cooperative associations. The producer organization argued that the amount and duration of any increase in the shipping and delivery percentages must be carefully evaluated to avoid causing an adverse and depressing effect on prices paid for producer milk.

As MMI and NFO pointed out in their comments, supply-demand conditions for the Order 36 market have tightened considerably. For instance, receipts of milk from producers during the last four months for which data is available (May-August 1989) were 5.0 percent below the same four months of 1988 while Class I use by regulated handlers in such 4-month period was 5.1 percent above last year. In August 1989, 57.6 percent of the market's producer milk was used for Class I purposes compared with 53.5 percent in August 1988 and 51.7 percent in August 1987. It is also noteworthy that the foregoing comparisons of production and fluid sales reflect information for months when, generally, marketwide Class I sales are lowest and production is highest. If the current production and sales trends continue, it is reasonable to anticipate even tighter supply/demand relationships in the upcoming months when less milk is available and the need for milk for use in fluid products is greater. In view of the foregoing, an upward revision of the shipping percentages is justified. However, based on comments received and other available information, an increase of 5 rather than 10 percentage points in the shipping standards for pool supply plants and delivery standards for pool plants operated by cooperative associations is deemed adequate. These revisions should divide the delivery obligations to fluid processors among the market's suppliers more fairly and equitably than those obligations are divided at present, without requiring greater deliveries than needed.

NFO commented that the upward revisions in the pooling standards should not continue beyond February 1990, while MMI asked that they apply through March 1990. Superior Dairy, Inc., recommended that the higher standards apply until the Director is able to determine that the Class I needs of handlers can be serviced with the order's present pooling standards for supply plants and plants operated by cooperative associations. It is reasonable to limit the applicability of the higher shipping and delivery percentages through February 1990, as NFO suggested. During the months of March through August, supply plants are given automatic pool status if they have met the shipping requirements during the immediately preceding months of September through February. Accordingly, the pooling standards for supply plants and plants operated by cooperative associations are revised upward by 5 percentage points for the remaining portion of October 1989 through February 1990.

It is hereby found and determined that 30 days' notice of the effective date hereof is impractical, unnecessary, and contrary to the public interest in that:

(a) This temporary revision is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area;

(b) This temporary revision does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of the proposed temporary revision was given interested parties and they were afforded opportunity to file written data, views, or arguments concerning this temporary revision.

Therefore, good cause exists for making this temporary revision effective upon publication of this document in the **Federal Register.**

List of Subjects in 7 CFR Part 1036

Dairy products, Milk, Milk marketing orders.

It is therefore ordered, that the following provisions of § 1036.7 (b) and (d) of the Eastern Ohio-Western Pennsylvania order are hereby revised for the remainder of the month of October 1989 through February 1990.

PART 1036—MILK IN THE EASTERN OHIO-WESTERN PENNSYLVANIA MARKETING AREA

1. The authority for 7 CFR part 1036 continues to read as follows:

Authority: (Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674).

§ 1036.7 [Amended]

2. In § 1036.7(b), the provision "40 percent" is revised to "45 percent" and the provision "30 percent" is revised to "35 percent".

3. In § 1036.7(d), the provision "35 percent" is revised to "40 percent".

Signed at Washington, DC, on: October 30, 1989.

W. H. Blanchard,

Director, Dairy Division.

BILLING CODE 3410-02-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 309

RIN 3064-AA65

Disclosure of Information

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: The Federal Deposit Insurance Corporation ("FDIC") is amending part 309 of its regulations

VOL
54
NO
3
1989
ISS
2
12
UMI

regarding the disclosure of information to conform to changes required by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA"). In the grant of new regulatory authority to the FDIC over savings associations formerly under the supervisory jurisdiction of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation, FIRREA has amended the Federal Deposit Insurance Act to define banks and savings associations collectively as "depository institutions." *See* section 204(c)(1), Pub. L. No. 101–73, 103 Stat. 183 (1989). The changes in nomenclature that are being made are required to comply with the provisions of FIRREA.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: M. Jane Williamson, Assistant Executive Secretary (Operations), Office of the Executive Secretary, (202) 898–3713, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

No collections of information pursuant to section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.) are contained in this notice. Consequently, no information has been submitted to the Office of Management and Budget for review.

Reason for Adoption Without Prior Notice and Comment

Immediate adoption of this final rule is necessary to conform the existing rule to the provisions of FIRREA, which provides the FDIC with certain authority over savings associations. Because the changes in part 309 of the FDIC's regulations occasioned by the enactment of FIRREA merely involve changes of nomenclature, the notice and public participation provisions of the Administrative Procedure Act (5 U.S.C. 553) are not applicable. The FDIC finds, for the same reason, that it is in the public interest to dispense with the 30-day deferred effective date requirement.

Background

In the grant of new regulatory authority to the FDIC over savings associations formerly under the supervisory jurisdiction of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation, FIRREA has amended the Federal Deposit Insurance Act to define banks and savings associations collectively as "depository institutions." *See* section 204(c)(1), Pub. L. No. 101–73, 103 Stat. 183 (1989). Thus, "depository institution" has been substituted in part 309 wherever the term "bank" appears, with a few technical exceptions.

Regulatory Flexibility Analysis

Because no notice of proposed rulemaking is required under section 553 of the Administrative Procedure Act or any other law, the Regulatory Flexibility Act (5 U.S.C. 601–602) does not apply.

List of Subjects in 12 CFR Part 309

Authority delegations (Government agencies), Disclosure requirements; Freedom of information, Privacy.

For the reasons set out above, 12 CFR part 309 is amended as set forth below.

PART 309—DISCLOSURE OF INFORMATION

1. The authority citation for Part 309 is revised to read as follows:

Authority: 12 U.S.C. 1819 "Seventh" and "Tenth"; 5 U.S.C. 552

2. In 12 CFR 309.2, paragraph (d) is revised to read as follows:

§ 309.2 Definitions.

* * * * *

(d) The term "examination" includes, but is not limited to, formal and informal investigations of irregularities involving suspected violations of Federal or State civil or criminal laws, or unsafe and unsound practices as well as such other investigations as may be conducted pursuant to law;

* * * * *

§§ 309.4 and 309.7 [Amended]

3. In 12 CFR 309.4(a) introductory text and § 309.7(a), remove "Office of Information" and add "Office of Corporate Communications". In § 309.4(a) introductory text remove "(202) 389–4221" and add "202–898–6996". In § 309.7(a) remove "202–389–4221" and add "202–898–6996".

4. In 12 CFR 309.4(f), remove the phrase "commercial and mutual savings banks" and add, in its place, the phrase "commercial banks and state savings banks".

5. In 12 CFR 309.6(c)(3), remove the phrase "the Federal Home Loan Bank Board, any Federal Home Loan Bank" and add, in its place, "the Office of Thrift Supervision, the Federal Housing Finance Board, any Federal Home Loan Bank".

6. In 12 CFR 309.6, the introductory text of paragraph (c)(7)(iii) is revised to read as follows:

§ 309.6 Disclosure of exempt records by FDIC personnel.

* * * * *

(c) * * *

(7) * * *

(iii) Any subsidiary depository institution of a bank holding company or a savings and loan holding company may reproduce and furnish a copy of any report of examination of the subsidiary depository institution to the parent holding company without prior approval of the Director of the Division of Supervision and any depository institution may reproduce and furnish a copy of any report of examination of the disclosing depository institution to a majority shareholder if the following conditions are met:

* * * * *

§§ 309.4 and 309.6 [Amended]

7. In 12 CFR part 309, remove the words "Division of the Bank Supervision" each place they appear and add, in their place, the words "Division of Supervision" in the following places:

(a) Section 309.4(c) introductory text; and

(b) Section 309.6(c) introductory text, (c)(1), (c)(2)(i), (c)(2)(ii), (c)(3), (c)(4)(ii), (c)(4)(iii), (c)(4)(iv), (c)(4)(iv)(B)(*1*), (c)(5) introductory text, (c)(6) introductory text, (c)(7)(i), (c)(7)(ii), (c)(7)(iii) introductory text, (c)(7)(iii)(B)(*3*), (c)(7)(iv), and (c)(11).

§§ 309.2, 309.4, 309.5, 309.6 [Amended]

8. Other than as amended above, in 12 CFR part 309, remove the term "bank" or "banks" each place such term appears (except where any such term is capitalized or preceded by "foreign" or "nonmember") and add, in its place, "depository institution" or "depository institutions" respectively in the following places:

(a) Section 309.2 (a), (f), and (h);

(b) Section 309.4 (a)(1), (d) introductory text (d)(2)(i), (e)(1), and (e)(2);

(c) Section 309.5(h); and

(d) Section 309.6(c)(1) title, (c)(1), (c)(2)(i), (c)(2)(ii), (c)(3), (c)(4)(i), (c)(4)(ii), (c)(4)(iii), (c)(4)(iv)(C), (c)(5) title, (c)(5) introductory text, (c)(6) introductory text, (c)(6)(ii), (c)(7) title (c)(7)(i), (c)(7)(iii) introductory text, (c)(7)(iii)(A), (c)(7)(iii)(B), (c)(7)(iii)(D), and (c)(7)(iv).

By order of the Board of Directors.

Dated at Washington, DC, this 24th day of October, 1989.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

[FR Doc. 89–25639 Filed 11–3–89; 8:45 am]

BILLING CODE 6714–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-CE-14-AD; Amendment 39-6381]

Airworthiness Directives; Beech Models 19A, B19, M19A, 23, A23, A23A, A23–19, A23–24, B23, C23, A24, A24R, and B24R Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Beech Models 19A, B19, M19A, 23, A23, A23A, A23–19, A23–24, B23, C23, A24, A24R, and B24R airplanes, which requires installation of provisions for lubrication and inspection of the aileron push rods. There have been several reports of failure of the aileron push rod forward bearings on Beech Models A23–19, B24R, and C23 airplanes. This action is necessary to prevent failures of these rod ends and possible loss of aileron control.

DATES: *Effective Date:* December 4, 1989.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Beech Service Bulletin No. 2198, dated April 1989, applicable to this AD may be obtained from the Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas 67201–0085. This information may also be examined at the Rules Docket at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Larry Engler, Federal Aviation Administration, Wichita Aircraft Certification Office, 1801 Airport Road, room 100, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946–4409.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD requiring the cutting of an inspection hole in the wing skins and inspecting the aileron push rods for corrosion and freedom of movement on certain Beech Models 19A, B19, M19A, 23, A23, A23A, A23–19, A23–24, B23, C23, A24, A24R, and B24R airplanes was published in the Federal Register on July 31, 1989 (54 FR 31536). The proposal resulted from several reports of the forward aileron push rod bearings failing. An injury accident was caused by a rod end that failed either before or during take off when the aileron became locked down and lateral control could not be maintained with the remaining aileron. The probable cause of the rod end failure was the lack of adequate lubrication of the push rod bearings. Beech Service Bulletin 2198, dated April 1989, provides a kit to facilitate examination and lubrication of aileron push pull rod ends. The Service Bulletin also calls for a one-time inspection of the rod ends for corrosion with replacement as necessary, and lubrication of the rod end bearings.

Interested persons have been afforded an opportunity to comment on the proposal. No comments or objections were received on the proposal or the FAA determination of the related cost to the public. Accordingly, the proposal is adopted without change except for minor editorial clarifications.

The FAA has determined that this regulation involves 3500 airplanes at an approximate cost of $370 for each airplane. The total cost is estimated to be $1,295,000. The cost of this modification will not have a significant economic impact on affected owners and operators.

The regulations adopted herein do not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. Therefore, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

List of Subjects in 14 CFR 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption Of The Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

Beech: Applies to the airplanes listed below, certificated in any category:

Models	Serial Numbers
A23–19, 19A, M19A, B19	MB–1 through MB–818, except MB–814
23, A23, A23A, B23, C23	M–1 through M–1675, except M–1675
A23–24, A24	MA–1 through MA–368
A24R	MC–2 through MC–150
B24R	MC–152 through MC–451, except MC–311 and MC–449

Compliance: Required as indicated after the effective date of this AD, unless already accomplished.

To prevent the possibility of separation of aileron push rods and possible loss of aileron control, accomplish the following:

(a) Within the next 100 hours time-in-service (TIS), accomplish the following in accordance with Beech Service Bulletin No. 2198, dated April 1989:

(1) Install inspection openings in the wing lower skins.

(2) Inspect the aileron rod ends for corrosion and freedom of movement. If serviceable, lubricate the rod end bearings. If corrosion is evident, prior to further flight replace the rod end with a new P/N 169–380082–3 rod end as specified in the above service bulletin. Corrosion is evident by restriction of movement of the rod ends.

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where the AD may be accomplished.

(c) An alternate method of compliance or adjustment of the compliance time which provides an equivalent level of safety, may be approved by the Manager, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone (316) 946–4400.

Note: The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas 67201–0085; or may examine these documents at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

VOL 54 ISS 212 NO 3 1989 UMI

Issued in Kansas City, Missouri, on October 24, 1989.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89-25923 Filed 11-2-89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-NM-226-AD; Amdt 39-6388]

Airworthiness Directives; Boeing Model 727-200 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 727-200 series airplanes, which requires a one-time visual inspection to detect cracks and/or corrosion of the fuselage skin adjacent to stringer (S) 28L and S-28R from body station (BS) 700 to BS 720, and repair, if necessary. This amendment is prompted by a report of a 48-inch crack in the fuselage skin adjacent to S-28 and the failure of an adjacent frame. This condition, if not corrected, could result in rapid decompression of the airplane.

EFFECTIVE DATE: November 20, 1989.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Stanton R. Wood, Airframe Branch, ANM-120S; telephone (206) 431-1924. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Recently, an operator reported a 48-inch corrosion crack on a Boeing 727-200 airplane, line number 964, during a "C" check. The crack was detected adjacent to stringer (S) 28R from body station (BS) 660 to BS 700 and running under the wing to body fairing. Removal of the fairing disclosed that the crack ran an additional 40 inches to BS 720A. Further inspection revealed that the frame at BS 720 was broken.

The crack originated between BS 700 and BS 720, and S-28 and an intercostal. The crack resulted from extensive corrosion and fast fracture of the skin. The airplane had accumulated 46,843 hours and 32,654 cycles. This is the first report of a crack in this area. This condition, if not corrected, could result in rapid decompression of the airplane.

The design of this portion of the fuselage is unique to the Model 727-200 series airplanes.

Airworthiness Directive 76-13-01, Amendment 39-2666, currently requires inspection of this general area on airplanes, line numbers 001 through 765, for corrosion and cracking. The airplanes that have installed the terminating modification specified in that AD are not currently required to be inspected in this area, but are susceptible to this new corrosion and cracking problem.

The FAA has reviewed and approved Boeing Alert Service Bulletin 727-53A0203, dated October 20, 1989, which describes the procedures for a visual inspection to detect cracks and corrosion of the fuselage skin, and repair, if necessary.

Since this condition is likely to exist or develop on other airplanes of the same type design, this AD requires a one-time visual inspection of the fuselage skin adjacent to S-28L and S-28R from BS 700 to BS 720, and repair, if necessary, in accordance with the service bulletin previously described. This is considered to be interim action until final action has been identified, at which time the FAA may consider further rulemaking.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to all Model 727-200 series airplanes, except line numbers 001 through 765 which are currently being subject to the inspection requirements of AD 76-13-01 inspection adjacent to stringer (S) 28L and S-28R from body station (BS) 700 to BS 720), certificated in any category. Compliance is required within the next 15 days after the effective date of this AD, unless previously accomplished within the last 6 months.

To prevent rapid decompression of the airplane, accomplish the following:

A. Conduct an external detailed visual inspection for cracks and corrosion of the fuselage skin adjacent to S-28L and S-28R from BS 700 to BS 720, in accordance with Boeing Alert Service Bulletin 727-53A0203, dated October 20, 1989. Any cracks or corrosion detected must be repaired prior to further flight, in accordance with the service bulletin.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Seattle Aircraft Certification Office.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective November 20, 1989.

Issued in Seattle, Washington, on October 26, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89-25920 Filed 11-2-89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-NM-104-AD; Amdt. 39-6389]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises an existing airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, which currently requires inspection for cracks of the fuselage between body station (BS) 940 and BS 1000 body crown crease beam and the intercostal structure, and repair, if necessary. Investigation has shown that the earlier-produced airplanes are designed differently in this area and are not subject to the addressed cracking. This amendment deletes airplanes, line number 001 through 065, from the applicability of the existing rule.

EFFECTIVE DATE: November 3, 1989.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Dan R. Bui, Airframe Branch, ANM-120S; telephone (206)431-1919. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by revising AD 89-06-03, Amendment 39-6183 (54 FR 13875; April 6, 1989), applicable to Boeing Model 747 series airplanes, to delete airplanes, line number 001 through 065, from the applicability of the existing rule, was published in the **Federal Register** on August 21, 1989 (54 FR 34527).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the one comment received.

The Air Transport Association (ATA) of America, commenting on behalf of its members, supported the proposed amendment.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

Since this amendment relieves a restriction, it is made effective upon publication in the **Federal Register.**

There are approximately 65 Model 747 series airplanes of the affected design in the worldwide fleet. It is estimated that 48 airplanes of U.S. registry will be affected by this AD, that the actions required by the existing AD will take approximately 16 manhours per airplane to accomplish, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators will be reduced by $30,720.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by amending AD 89-06-03, Amendment 39-6183 (54 FR 13875; April 6, 1989), by revising the applicability statement to read as follows:

Boeing: Applies to Model 747 series airplanes, listed in Boeing Service Bulletin 747-53-2297, dated June 30, 1988, certificated in any category, except line number 001 through 065. Compliance required as indicated, unless previously accomplished.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment amends Amendment 39-6183, AD 89-06-03.

This amendment becomes effective November 3, 1989.

Issued in Seattle, Washington, on October 26, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate Aircraft Certification Service.

[FR Doc. 89-25922 Filed 11-2-89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-NM-212-AD; Amdt. 39-6382]

Airworthiness Directives: Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

BEST COPY AVAILABLE

VOL 54 ISS 212 NO 3 1989 UMI

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, which requires a one-time inspection and replacement, if necessary, of the horizontal stabilizer hinge fitting backup structure fasteners. This action is prompted by reports that airplanes may have been delivered with undersized fasteners in the horizontal stabilizer hinge fitting back up structure. This condition, if not corrected, could result in detachment of longitudinal braces from the backup fitting with resultant hinge fitting movement adversely affecting airplane controllability.

EFFECTIVE DATE: November 20, 1989.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Dan R. Bui, Airframe Branch, ANM-120S; telephone (206) 431-1919. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Certain Boeing Model 747 series airplanes may have been delivered with undersized fasteners in the horizontal stabilizer hinge fitting backup structure aft of the body station (BS) 2598 bulkhead. The affected fasteners attach the stabilizer backup fittings to support structure aft of the BS 2598 bulkhead. Undersized or missing fasteners could result in detachment of longitudinal braces from the backup fitting, with resultant hinge fitting movement adversely affecting airplane controllability.

The FAA has reviewed and approved Boeing Alert Service Bulletin 747-53A2314, dated July 31, 1989, which describes procedures for inspection of the fastener locations for undersized or missing fasteners, and replacement, if necessary.

Since this condition is likely to exist or develop on other airplanes of this same type design, this AD requires a one-time inspection to determine the presence and proper installation of the horizontal stabilizer hinge fitting backup structure fasteners and replacement, if necessary, in accordance with the service bulletin previously described. Undersized fasteners must be replaced with fasteners of the required diameter prior to further flight.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency resolution under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to Model 747 series airplanes, listed in Boeing Alert Service Bulletin 747-53A2314, dated July 31, 1989, certificated in any category. Compliance required within 60 days after the effective date of this AD, unless previously accomplished.

To ensure structural integrity of the horizontal stabilizer hinge fitting backup structure and to prevent possible detachment of longitudinal braces from the backup fitting with resultant hinge fitting movement adversely affecting airplane controllability, accomplish the following:

A. Conduct a one-time inspection for undersized and missing fasteners, in accordance with Boeing Alert Service Bulletin 747-53A2314, dated July 31, 1989. If any fastener is undersized or missing, prior to further flight, install a new fastener in accordance with that service bulletin.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective November 20, 1989.

Issued in Seattle, Washington, on October 25, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate Aircraft Certification Service.

[FR Doc. 89-25024 Filed 11-2-89; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 89-NM-80-AD; Amdt. 39-6384]

Airworthiness Directives; Boeing of Canada, Ltd., de Havilland Division, Model DHC-8-100 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain de Havilland Model DHC-8-100 series airplanes, which requires modification of the propeller alternate feather system. This amendment is prompted by a report of inadvertent operation of both alternate feather switches in lieu of the standby hydraulic pressure switches. This condition, if not corrected, could lead to unexpected loss of thrust and altitude in a critical flight regime.

EFFECTIVE DATE: December 11, 1989.

ADDRESSES: The applicable service information may be obtained from Boeing of Canada, Ltd., de Havilland Division, Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Pat Perrotta, Manager, Propulsion Branch, ANE-174, New York Aircraft Certification Office, Engine Propeller Directorate, Federal Aviation Administration, New England Region, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581; telephone (516) 791-7421.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to certain de Havilland Model DHC-8-100 series airplanes, which requires modification of the propeller alternate feather system, was published in the **Federal Register** on June 14, 1989 (54 FR 25284).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supported the intent of the rule, but suggested supplemental descriptive information be included in the Airplane Flight Manual (AFM) regarding the flight crew's operation of the airplane and the microswitches' purpose. The FAA does not concur. Upon further investigation, the FAA has determined that the modification will have no impact on the flight crew's operation of the airplane. The condition lever is to be pulled into feather before selecting alternate feather. The microswitches are solely to prevent inadvertent operation of the alternate feather system, and, therefore, this type of information is inappropriate to be included in the AFM. The system description is in the maintenance manual and pilots' operating handbook.

The commenter also suggested that information should be provided regarding procedures to determine if the microswitches are in operating condition. The FAA does not concur. Functional checks are part of routine maintenance "A" checks.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 91 Model DHC-8-100 series airplanes of the affected design in the worldwide fleet. It is estimated that 44 airplanes of U.S. registry will be affected by this AD, that it will take approximately 4 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. The modification kit will be provided by the manufacturer at no cost to operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $7,040.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing of Canada, Ltd., de Havilland Division: Applies to Model DHC-8-100 series airplanes, Serial Numbers 1 through 91, certificated in any category. Compliance is required within the next 400 hours time-in-service after the effective date of this AD, unless previously accomplished.

To prevent unwanted propeller feathering due to inadvertent activation of the alternate feather switches, accomplish the following:

A. Modify the alternate feather system, in accordance with the Accomplishment Instructions of Boeing of Canada, Ltd., de Havilland Division, Service Bulletin No. 8-61-10, Revision A, dated August 5, 1988.

B. An alternate means of compliance or adjustment of the compliance time which provides an acceptable level of safety, may be used when approved by the Manager, New York Aircraft Certification Office, FAA, New England Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, New York Aircraft Certification Office.

C. Special Flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing of Canada, Ltd., de Havilland Division, Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or New York Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, FAA, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581.

This amendment becomes effective December 11, 1989.

Issued in Seattle, Washington, on October 25, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89-NM-10-AD; Amdt. 39-6395]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to all Boeing Model 727 series airplanes, which requires inspection of the Number 1 and 3 engine aft mount support fittings, and repair or replacement, if necessary. This amendment is prompted by reports of cracks in the aft engine mount support fittings. This condition, if not corrected, could result in an engine separating from the airplane.

EFFECTIVE DATE: December 11, 1989.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Kathi N. Ishimaru, Airframe Branch, ANM-120S; telephone (206) 431-1525. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to Boeing Model 727 series airplanes, which requires inspection of the Number 1 and 3 engine aft mount support fittings, and repair or replacement, if necessary, was published in the **Federal Register** on July 24, 1989 (54 FR 30721).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Two commenters requested the use of an eddy current inspection combined with a visual inspection as an alternative to the proposed detailed visual inspection, in order to eliminate the need to remove the heat exchanger. Since specific inspection guidelines were not presented with the comment, the FAA does not concur with the request. However, as provided by paragraph E., operators may present alternate inspection guidelines to the FAA for consideration as an alternate means of compliance with the AD.

Five commenters requested the initial compliance threshold be extended beyond the proposed 1,000 flight cycles to as much as 3,000 flight cycles. These requests were based on the opinion that service history does not support the 1,000-flight cycle threshold and the proposed threshold does not fit into the normal inspection cycle. The FAA does not concur with the commenters' requests. The 1,000-flight cycle threshold is based on the service history of 18 cracked fittings, including one fitting which was almost completely severed. The commenters provided no technical justification to increase the threshold.

One commenter stated that, in the past, repair data and spare parts were inadequate. The FAA does not consider this to be a problem currently. The manufacturer has advised the FAA that it has increased its spare parts inventory to support this AD. Additionally, paragraph D. of the AD has been revised to identify specific FAA-approved repair drawings.

One commenter requested the proposal be revised to indicate that the repairs be made in accordance with the service bulletin. The FAA does not concur. The Boeing service bulletin specified in this AD does not contain repair procedures. However, as previously mentioned, a list of approved Boeing Repair Drawings has been added to paragraph D. of the AD to provide specific sources for repair information and procedures.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change noted above. This change will neither increase the scope of the rule nor increase the economic burden on any operator.

There are approximately 1,710 Model 727 series airplanes of the affected design in the worldwide fleet. It is estimated that 1,143 airplanes of U.S. registry will be affected by this AD, that it will take approximately 12 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $548,640.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to all Model 727 series airplanes certificated in any category. Compliance is required as indicated, unless previously accomplished.

To detect cracking in the Number 1 or 3 engine aft mount support fitting, accomplish the following:

A. Conduct a detailed visual inspection for cracks of the Number 1 and Number 3 engine aft mount support fittings, in accordance with Section III.D and Figure 1 of Boeing Service Bulletin 727-54-0017, dated December 22, 1988, in accordance with the following schedule:

1. For airplanes with engine aft mount support fittings made of 7079-T6 material: within the next 1,000 flight cycles or 1 year, after the effective date of this AD, whichever occurs first, unless previously accomplished within the last 2,000 flight cycles.

Note: 7079-T6 material is used in the aft support fitting on the Number 1 engine strut on airplanes line numbers 001 through 883, and the Number 3 engine strut on airplanes line numbers 001 through 880.

2. For airplanes with engine aft support fittings made of 7075-T73 material: prior to the accumulation of 40,000 flight cycles, or within the next 1,000 flight cycles after the effective date of this AD, whichever occurs later, unless previously accomplished within the last 2,000 flight cycles.

Note: 7075-T73 material is used in the aft support fitting on the Number 1 engine strut on airplanes line number 884 and all later airplanes, and the Number 3 engine strut on airplanes line number 881 and all later airplanes.

B. For the initial inspection required in paragraph A., above, as an option to the detailed visual inspection, perform an eddy current inspection of the support fittings outboard of the body skins, and a detailed visual inspection of the support fittings inboard of the body skins, in accordance with Section III.A and Figure 1 of Boeing Service Bulletin 727-54-0017, dated December 22, 1988.

C. Repeat the detailed visual inspection required in paragraph A., above, at intervals not to exceed 3,000 flight cycles.

D. If cracked fittings are found as a result of the inspections required by this AD, prior to further flight, accomplish one of the following:

1. Repair in accordance with Boeing Repair Drawings 65C34829, 65C34830, 65C34993, 65C34581, 65C35114, or 65C34998; or

2. Repair in accordance with a procedure approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region; or

3. Replace the cracked fittings.

E. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Seattle Aircraft Certification Office.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective December 11, 1989.

Issued in Seattle, Washington, on October 25, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-NM-79-AD; Amdt. 39-6393]

Airworthiness Directives; McDonnell Douglas Model DC-10-30 and KC-10A (Military) Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction of final rule.

SUMMARY: This action corrects Airworthiness Directive (AD) 89-20-09, applicable to certain McDonnell Douglas Model DC-10-30 and KC-10A (Military) series airplanes, which requires an inspection of the auxiliary hydraulic pump electrical connector sockets to determine if the correct connector sockets are installed, and if not, they must be replaced with sockets of the correct part number. This action corrects the applicability statement published in the **Federal Register** to limit the AD to aircraft listed in McDonnell Douglas Service Bulletin A29-127.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Robert T. Razzeto, Aerospace Engineer, Systems and Equipment Branch, ANM-130L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (213) 988-5355.

SUPPLEMENTARY INFORMATION: On September 12, 1989, the FAA issued AD 89-20-09, Amendment 39-6328 (54 FR 39346; September 26, 1989), applicable to McDonnell Douglas Model DC-10-30 and KC-10A (Military) series airplanes, which requires an inspection and change, if necessary, of the auxiliary hydraulic pump electrical connector sockets. The applicability statement should have stated that the affected airplanes are listed in McDonnell Douglas Service Bulletin A29-127, dated March 3, 1989. However, the applicability statement, as published in the **Federal Register**, omitted this important qualifying statement. Therefore, this correction inserts a qualifying statement in the applicability portion of the final rule.

Since this action only corrects an error in the final rule, it has no adverse economic impact and imposes no additional economic burden on any person. Therefore, notice and public procedures hereon are unnecessary and the amendment may be made effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

PART 39—[AMENDED]

Pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration corrects § 39.19 of part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By correcting the applicability statement of Amendment 39-6328 (54 FR 39346; September 26, 1989), AD 89-20-09 as follows:

McDonnell Douglas: Applies to Model DC-10-30 and KC-10A (Military) series airplanes, as listed in McDonnell Douglas Service Bulletin A29-127, dated March 3, 1989, certificated in any category. Compliance required as indicated, unless previously accomplished.

This amendment becomes effective November 3, 1989.

Issued in Seattle, Washington, on October 25, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate Aircraft Certification Service.

[FR Doc. 89-25921 Filed 11-2-89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 89-ASO-36]

Revision of Transition Area, Lakeland, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises the Lakeland, FL, Transition Area in the vicinity of the Plant City Airport. The notice of proposed rulemaking mistakenly referred to the Plant City Municipal Airport. The correct name is Plant City Airport. A new Standard Instrument Approach Procedure (SIAP) has been developed to serve Runway 9 based on the Plant City Nondirectional Radio Beacon (NDB). The radius of the existing transition area around the Plant City Airport is increased from 5 to 6.5 miles and an arrival area extension is added west of the airport. The additional controlled airspace is required for protection of Instrument Flight Rules (IFR) aircraft executing the NDB Runway 9 SIAP to the Plant City Airport. Also, minor corrections have been made to the geographic position

VOL
54
NO
3
1989
SS
2
1
2
UMI

coordinates of the Bartow Municipal, Lakeland Municipal and Winter Haven's Gilbert Airports.

EFFECTIVE DATE: 0901 U.T.C., March 6, 1990.

FOR FURTHER INFORMATION CONTACT: James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

SUPPLEMENTARY INFORMATION:

History

On August 22, 1989, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Lakeland, FL, Transition Area (54 FR 34788). The proposed action would enlarge the transition area in the vicinity of the Plant City Airport by increasing its radius from 5 to 6.5 miles and adding an arrival area extension west of the airport. This action was necessary to provide controlled airspace for IFR aircraft executing a recently developed NDB Runway 9 SIAP to the Plant City Airport. Also, minor corrections would be made to the geographic position coordinates of the Bartow Municipal, Lakeland Municipal and Winter Haven's Gilbert Airports. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Section 71.181 of part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6E dated January 3, 1989.

The Rule

This amendment to part 71 of the Federal Aviation Regulations revises the Lakeland, FL, Transition Area by enlarging the area around the Plant City Airport and adding an arrival area extension west of the airport. This action will provide required airspace protection for IFR aircraft executing a new NDB Runway 9 SIAP to the Plant City Airport. Also, minor changes are made in the geographic position coordinates of the Bartow Municipal, Lakeland Municipal and Winter Haven's Gilbert Airports.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. Section 71.181 is amended as follows:

Lakeland, FL [Revised]

That airspace extending upward from 700 feet above the surface within an 6.5-mile radius of Lakeland Municipal Airport (Latitude 27°59'18" N./Longitude 82°00'56"); within a 7-mile radius of Bartow Municipal Airport (Latitude 27°56'36" N./Longitude 81°47'02" W.); within a 6.5-mile radius of Plant City Airport (Latitude 28°00'00" N./Longitude 82°09'40" W.); within three miles each side of the 286° bearing from the Plant City NDB (Latitude 28°00'08" N./Longitude 82°09'23" W.), extending from the 6.5-mile radius area to 8.5 miles west of the NDB; within a 6.5-mile radius of Winter Haven's Gilbert Airport (Latitude 28°03'25" N./Longitude 81°45'25" W.); within 2.5 miles each side of the Lakeland VORTAC 071° radial, extending from the 6.5-mile radius area to the Winter Haven's Gilbert Airport 6.5-mile radius area.

Issued in East Point, Georgia, on October 18, 1989.

Dan Cass,

Acting Manager, Air Traffic Division, Southern Region.

[FR Doc. 89–25927 Filed 11–2–89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 89–AEA–05]

Proposed Revocation of Transition Area; Rehoboth Beach, Delaware

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This notice cancels the 700 foot Transition Area at the Rehoboth Beach Airport, Rehoboth Beach, DE. As a result of the closure of the Rehoboth Beach Airport, Rehoboth Beach, DE, the Federal Aviation Administration no longer finds it necessary to retain that amount of controlled airspace which was required to accommodate Instrument Approach Procedures to the airport.

EFFECTIVE DATE: 0901 u.t.c. January 11, 1990.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Airspace Specialist, System Management Branch, AEA–530, Federal Aviation Administration, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 917–0857.

SUPPLEMENTARY INFORMATION:

History

On July 7, 1989, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revoke the Transition Area at Rehoboth Beach, DE (54 FR 31704). The proposed action would return that controlled airspace which was necessary to contain procedures to that airport. In addition, this airport is closed and is no longer used as a charted reference.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received. Section 71.181 of part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6E, January 3, 1989.

The Rule

This amendment to part 71 of the Federal Aviation Regulations revokes the 700 foot Transition Area for Rehoboth Beach, DE. As a result of the closure of the Rehoboth Beach Airport and the removal of this airport from all charted references, the Federal Aviation Administration finds that the associated Transition Area airspace is no longer required.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation

as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Rehoboth Beach, Delaware [Removed]

By removing the description of the Rehoboth Beach, Delaware Transition Area in its entirety as follows:

"That airspace extending upward from 700 feet above the surface within a 5-mile radius of the center (lat. 38°43'10" N., long. 75°07'35" W.) of Rehoboth Aircrafters Airport, Rehoboth Beach, DE, and within 2 miles each side of the Waterloo, DE, VORTAC 144° radial extending from the 5-mile radius area to the VORTAC. This transition area is effective from sunrise to sunset, daily."

Issued in Jamaica, New York, on September 28, 1989.

John D. Canoles,

Manager, Air Traffic Division.

Organization, Functions and Authority Delegations

AGENCY: Securities and Exchange Commission.

ACTION: Technical amendment and correction.

SUMMARY: A technical amendment to § 200.312, specific exemptions, was inadvertently published in the Federal Register at p. 40862 on October 4, 1989. The correct version was published in the Federal Register at p. 24329 on June 7, 1989, and is hereby reinstated by this correction.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Carol K. Scott, Assistant General Counsel (202–272–2472), or Fran L. Paver (202–272–2453), Office of the General Counsel, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

Text of Amendments

1. The authority citation for part 200, subpart H, continues to read as follows:

Authority: Pub. L. 93–579, sec. (f), 5 U.S.C. 552a(f), unless otherwise noted.

Section 200.312 is also issued under Pub. L. 93–579, sec. k, 5 U.S.C. 552a(k).

2. Section 200.312 is amended by revising paragraph (a)(8) to read as follows:

§ 200.312 Specific exemptions.

* * * * *

(a) * * *

(8) Rule 2(e) of the Commission's Rules of Practice—Appearing or Practicing Before the Commission.

* * * * *

3. Amendatory paragraph 5 published on October 4, 1989, at p. 40863 in the first column is removed.

* * * * *

Dated: October 30, 1989.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 38

RIN 1076–AB92

Education Personnel

July 21, 1989.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule.

SUMMARY: The Bureau of Indian Affairs (BIA) is publishing a final rule which amends existing regulations that establish requirements of employment, discharge, voluntary services and payment of teachers and other personnel in Bureau of Indian Affairs' operated schools and agency education positions. This action is taken by BIA to establish a basic compensation rate for teachers and counselors in BIA-operated schools in accordance with the Augustus F. Hawkins-Robert T. Stafford Elementary and School Improvement Amendments of 1988 (Pub. L. 100–297).

EFFECTIVE DATE: These regulations shall become effective December 4, 1989.

FOR FURTHER INFORMATION CONTACT: Larry D. Holman, Office of Indian Education Programs, Eastern Navajo Agency, Bureau of Indian Affairs, Department of the Interior, P.O. Box 328, Crownpoint, New Mexico 87313; Telephone (505) 786–6152.

SUPPLEMENTARY INFORMATION: The authority for issuing this rule is Public Law 95–561, the "Education Amendments of 1978" (25 U.S.C. 2011), as amended by Public Law 98–511, Public Law 99–89 and Public Law 100–297. This final rule is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8. The BIA has inserted the amendments required by Public Law 100–297. Specifically, these amendments (1) redesignate 38.6 paragraphs (c) through (e) as paragraphs (d) through (f); (2) add a new paragraph (c); and (3) amend the first sentence in the newly-designated section (d)(1) to comply with section 5114(a) of Public Law 100–297.

Public Law 100–297 requires the Department of the Interior to adopt for teachers and counselors pay rates established under the Defense Department Overseas Teachers Pay and Personnel Practice Act. Therefore, the amendments to this rule, acknowledging the adoption of these pay rates, are mandated by law and to publish for public comment would be impractical and unnecessary. Therefore, the Department concludes under 5 U.S.C. 553(b) that prior publication and public comment are not required.

The Department of the Interior has determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The amendments in this rule contain no information collection or recordkeeping requirement under the Paperwork Reduction Act of 1980 (44

U.S.C. 3501 et seq.). The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

The primary author of this document is Larry D. Holman, Agency Superintendent for Education, Eastern Navajo Agency.

List of Subjects in 25 CFR Part 38

Indians-education, Teachers.

For the reasons set forth in the preamble, part 38 of title 25, chapter I of the Code of Federal Regulations is amended as set forth below:

1. The authority citation for 25 CFR part 38 continues to read as follows:

Authority: Sec. 1131 and 1135 of the Act of November 1, 1987 (92 Stat. 2322 and 2327, 25 U.S.C. 2011 and 2015); Secs. 511 and 512 of Pub. L. 98–511; and Secs. 8 and 9 of Pub. L. 99–89 (Indian Education Technical Amendments Act of 1985) and Title V of Pub. L. 100–297 (Indian Education Amendments of 1988).

2. In § 38.6, paragraphs (c) through (e) are redesignated as paragraphs (d) through (f), a new paragraph (c) is added and newly redesignated paragraph (d)(1) introductory text is revised to read as follows:

§ 38.6 Basic compensation for educators and education positions.

* * * * *

(c) *Schedule of compensation rates for teachers and counselors.* The basic compensation for teachers and counselors, including dormitory counselors and homeliving counselors, shall be determined in accordance with rates set by the Defense Department Overseas Teachers Pay and Personnel Practices Act. The schedule used shall be the current published schedule for the school year beginning on or after July 1 of each year.

* * * * *

(d) *Adjusting employee basic compensation rates.* (1) Except for employees occupying positions of teachers and counselors, including dormitory counselors and homeliving counselors, adjustments in an employee's basic compensation made in connection with each contract renewal will be based on the following:

* * * * *

Eddie F. Brown,

Assistant Secretary—Indian Affairs.

RIN 1545-AB47

Installment Method Reporting by Dealers in Personal Property; Change From Accrual to Installment Method Reporting

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document supplements final regulations relating to installment method reporting by dealers in personal property published elsewhere in this issue. Changes to the applicable tax law were made by the Installment Sales Revision Act of 1980. These regulations affect dealers in personal property and provide them with the guidance necessary to comply with the law.

DATES: The regulations are effective for taxable years ending after October 19, 1980.

FOR FURTHER INFORMATION CONTACT: Benjamin P. Foster, Internal Revenue Service, Attn: CC:CORP:T:R (IA–146–81), Room 4429, Washington, DC 20224. Telephone 202–343–0328 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in this final rule have been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control number 1545–0963. The estimated annual burden associated with the collections of information in this final rule is 1 hour per recordkeeper.

This estimate is an approximation of the average time expected to be necessary for a collection of information. It is based on such information as is available to the Internal Revenue Service. Individual recordkeepers may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be sent to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, TR:FP, Washington, DC 20224, and to the Office of Management and Budget, Paperwork Reduction Project (1545–0963), Washington, DC 20503.

Background

On July 28, 1986, proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 453A of the Internal Revenue Code and to the Table of OMB Control Numbers (26 CFR Part 602) were published in the **Federal Register** (51 FR 26909). The amendments, which related to the rules applicable to changes from the accrual method to the installment method of accounting by dealers in personal property, were proposed to reflect the modification of those rules by section 2 of the Installment Sales Revision Act of 1980 (Pub. L. No. 96–471, 94 Stat. 2251). No written comments or requests for a public hearing were received with respect to the proposed amendments. Accordingly, this Treasury Decision adopts the proposed amendments with minor revisions.

Availability of the Installment Method

Section 10202 of the Revenue Act of 1987 (Pub. L. No. 100–203, 101 Stat. 1330) amended the rules relating to installment sales by dealers. The amendment, which applies to obligations arising from dispositions made after December 31, 1987, provides that sections 453A and 453C shall not apply (with certain exceptions) to dealer dispositions of personal and real property. Accordingly, the final regulations provide that sales by a dealer may be treated as sales on the installment plan only for sales made on or before December 31, 1987.

Special Analyses

It has been determined that this final rule is not a major rule as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required.

Drafting Information

The principal author of these regulations is Paulette C. Galanko of the Office of the Assistant Chief Counsel (Income Tax and Accounting), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

For the reasons set out in the preamble, parts 1 and 602 of the Code of Federal Regulations are amended as set forth below.

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 1.453A–3 also issued under 26 U.S.C. 453A.

§§ 1.453–7 and 1.453–8 [Removed]

Par. 2. Sections 1.453–7 and 1.453–8 are removed.

Par. 3. New § 1.453A–3 is added at the appropriate place to read as follows:

§ 1.453A–3 Requirements for adoption of or change to installment method by dealers in personal property.

(a) *In general.* A dealer (within the meaning of § 1.453A–1(c)(1)) may adopt or change to the installment method for a type or types of sales on the installment plan (within the meaning of § 1.453A–1(c)(3) and (d)) in the manner prescribed in this section. This section applies only to dealers and only with respect to their sales on the installment plan.

(b) *Time and manner of electing installment method reporting*—(1) *Time for election.* An election to adopt or change to the installment method for a type or types of sales must be made on an income tax return for the taxable year of the election, filed on or before the time specified (including extensions thereof) for filing such return.

(2) *Adoption of installment method.* A taxpayer who adopts the installment method for the first taxable year in which sales are made on an installment plan of any kind must indicate in the income tax return for that taxable year that the installment method of accounting is being adopted and specify the type or types of sales included within the election. If a taxpayer in the year of the initial election made only one type of sale on the installment plan, but during a subsequent taxable year makes another type of sale on the installment plan and adopts the installment method for that other type of sale, the taxpayer must indicate in the income tax return for the subsequent year that an election is being made to adopt the installment method of accounting for the additional type of sale.

(3) *Change to installment method.* A taxpayer who changes to the installment method for a particular type or types of sales on the installment plan in accordance with this section must, for each type of sale on the installment plan for which the installment method is to be used, attach a separate statement to the income tax return for the taxable year with respect to which the change is made. Each statement must show the method of accounting used in computing taxable income before the change and the type of sale on the installment plan for which the installment method is being elected.

(4) *Deemed elections.* A dealer (including a person who is a dealer as a result of the recharacterization of transactions as sales) is deemed to have elected the installment method if the dealer treats a sale on the installment plan as a transaction other than a sale and fails to report the full amount of gain in the year of the sale. For example, if a transaction treated by a dealer as a lease is recharacterized by the Internal Revenue Service as a sale on the installment plan, the dealer will be deemed to have elected the installment method assuming the dealer failed to report the full amount of gain in the year of the transaction.

(c) *Consent.* A dealer may adopt or change to the installment method for sales on the installment plan without the consent of the Commissioner. However, a dealer may not change from the installment method to the accrual method of accounting or to any other method of accounting without the consent of the Commissioner.

(d) *Cut-off method for amounts previously accrued.* An election to change to the installment method for a type of sale applies only with respect to sales made on or after the first day of the taxable year of change. Thus, payments received in the taxable year of the change, or in subsequent years, in respect of an installment obligation which arose in a taxable year prior to the taxable year of change are not taken into account on the installment method, but rather must be accounted for under the taxpayer's method of accounting in use in the prior year.

(e) *Effective date.* This section applies to sales by dealers in taxable years ending after October 19, 1980, but generally does not apply to sales made after December 31, 1987. For sales made after December 31, 1987, sales by a dealer in personal or real property shall not be treated as sales on the installment plan. (However, see section 453(l)(2) for certain exceptions to this rule.) For rules relating to sales by dealers in taxable years ending before October 20, 1980, see 26 CFR 1.453–7 and 1.453–8 (rev. as of April 1, 1987).

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 4. The authority for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.10 [Amended]

Par. 5. Section 602.101(c) is amended by inserting in the appropriate place in the table "§ 1.453A–3 * * * 1545–0963".

Approved: August 31, 1989.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Kenneth W. Gideon,

Assistant Secretary of the Treasury.

Installment Method Reporting by Dealers in Personal Property

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to installment method reporting by dealers in personal property. Changes to the applicable tax law were made by the Installment Sales Revision Act of 1980 and the Tax Reform Act of 1986. These regulations affect dealers in personal property and provide them with the guidance necessary to comply with the law.

DATES: The regulations are effective for taxable years beginning after December 31, 1953, and ending after August 16, 1954.

FOR FURTHER INFORMATION CONTACT: Paulette C. Galanko, Internal Revenue Service, Attn: CC:CORP:T:R (IA–141–83), room 4429, Washington, DC 20224. Telephone 202–566–3802 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in this final rule have been

VOL 54 NO 3 1989 ISS 2 1 2 UMI

reviewed and approved by the Office of Management and Budget in accordance with the requirements of the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control number 1545-1134. The estimated average burden associated with the collections of information in this final rule is 10 hours per recordkeeper.

This estimate is an approximation of the average time expected to be necessary for a collection of information. It is based on such information as is available to the Internal Revenue Service. Individual recordkeepers may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer TR:FP, Paperwork Reduction Project, Washington, DC 20224, and to the Office of Management and Budget, Paperwork Reduction Project (1545-1134), Washington, DC 20503.

Background

On July 28, 1986, proposed amendments to the Income Tax Regulations (26 CFR part 1) providing rules under section 453A of the Internal Revenue Code were published in the Federal Register (51 FR 26903). These amendments related to installment method reporting by dealers in personal property and were proposed to reflect the addition of section 453A to the Code by the Installment Sales Revision Act of 1980 (Pub. L. No. 96-471, 94 Stat. 2247). A public hearing was not held as no written requests for a public hearing were received with respect to the proposed amendments. Accordingly, this Treasury Decision adopts the proposed amendments with the two changes discussed below and certain other minor revisions.

Availability of the Installment Method

Section 10202 of the Revenue Act of 1987 (Pub. L. No. 100-203, 101 Stat. 1330) amended the rules relating to installment sales by dealers. The amendment, which applies to obligations arising from dispositions made after December 31, 1987, provides that sections 453A and 453C shall not apply (with certain exceptions) to dealer dispositions of personal and real property. Accordingly, the final regulations provide that sales by a dealer may be treated as sales on the installment plan only for sales made on or before December 31, 1987.

Revolving Credit Sales

Section 812 of the Tax Reform Act of 1986 (Pub. L. No. 99-514, 100 Stat. 2085) amended the rules relating to sales under a revolving credit plan. The amendment, which applies for taxable years beginning after December 31, 1986, provides that section 453A shall not apply to any disposition of personal property under a revolving credit plan and that all payments to be received with respect to such dispositions are to be treated as received in the year of disposition. Accordingly, the final regulations provide that sales under a revolving credit plan may be treated as sales on the installment plan only for taxable years beginning on or before December 31, 1986.

Income to be Reported

The proposed regulations inadvertently omitted portions of former § 1.453-3 that should have been included in the regulations under section 453A. The omitted paragraphs, relating to determinations of the amount of income to be reported, other permissible accounting methods, and recordkeeping requirements, have been included in § 1.453A-1 of the final regulations.

Special Analyses

It has been determined that this final rule is not a major rule as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553 (b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required.

Drafting Information

The principal author of these regulations is Paulette C. Galanko of the Office of the Assistant Chief Counsel (Income Tax and Accounting), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

List of Subjects

26 CFR 1.44-1 through 1.483-2

Income taxes, Accounting, Deferred compensation plans.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

For the reasons set forth in the preamble, parts 1 and 602 of title 26 of the Code of Federal Regulations are amended as set forth below.

PART 1—[AMENDED]

Paragraph 1. The authority for part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Sections 1.453A-1 and 1.453A-2 also issued under 26 U.S.C. 453A.

Par. 2. Sections 1.453-1 and 1.453-2 are removed and the following new §§ 1.453A-0 through 1.453A-2 are added in the appropriate place:

§ 1.453A-0 Table of contents.

This section lists the paragraphs and subparagraphs contained in §§ 1.453A-1 through 1.453A-3.

§ 1.453A-1 Installment method of reporting income by dealers in personal property.

(a) In general.
(b) Effect of security.
(c) Definition of dealer, sale, and sale on the installment plan.
(d) Installment plans.
(1) Traditional installment plans.
(2) Revolving credit plans.
(e) Installment income of dealers in personal property.
(1) In general.
(2) Gross profit and total contract price.
(3) Carrying charges not included in total contract price.
(f) Other accounting methods.
(g) Records.
(h) Effective date.

§ 1.453A-2 Treatment of revolving credit plans; taxable years beginning on or before December 31, 1986.

(a) In general.
(b) Coordination with traditional installment plan.
(c) Revolving credit plans.
(d) Effective date.

§ 1.453A-3 Requirements for adoption of or change to installment method by dealers in personal property.

(a) In general.
(b) Time and manner of electing installment method reporting.
(1) Time for election.
(2) Adoption of installation method.
(3) Change to installment method.
(4) Deemed elections.
(c) Consent.
(d) Cut-off method for amounts previously accrued.
(e) Effective date.

§ 1.453A-1 Installment method of reporting income by dealers on personal property.

(a) *In general.* A dealer (as defined in paragraph (c)(1) of this section) may elect to return the income from the sale of personal property on the installment method if such sale is a sale on the installment plan (as defined in paragraphs (c)(3) and (d) of this section). Under the installment method of accounting, a taxpayer may return as income from installment sales in any taxable year that proportion of the installment payments actually received in that year which the gross profit realized or to be realized when the property is paid for bears to the total contract price. For this purpose, gross profit means sales less cost of goods sold. See paragraph (d) of this section for additional rules relating to the computation of income under the installment method of accounting. In addition, see § 1.453A-2 for rules treating revolving credit plans as installment plans for taxable years beginning on or before December 31, 1986.

(b) *Effect of security.* A dealer may adopt (but is not required to do so) one of the following four ways of protecting against loss in case of default by the purchaser:

(1) An agreement that title is to remain in the vendor until performance of the purchaser's part of the transaction is completed;

(2) A form of contract in which title is conveyed to the purchaser immediately, but subject to a lien for the unpaid portion of the selling price;

(3) A present transfer of title to the purchaser, who at the same time executes a reconveyance in the form of a chattel mortgage to the vendor; or

(4) A conveyance to a trustee pending performance of the contract and subject to its provisions.

(c) *Definitions of dealer, sale, and sale on the installment plan.* For purposes of the regulations under section 453A—

(1) The term "dealer" means a person who regularly sells or otherwise disposes of personal property on the installment plan;

(2) The term "sale" includes sales and other dispositions; and

(3) Except as provided in paragraph (d)(2) of this section, the term "sale on the installment plan" means—

(i) A sale of personal property by the taxpayer under any plan for the sale of personal property, which plan, by its terms and conditions, contemplates that each sale under the plan will be paid for in two or more payments; or

(ii) A sale of personal property by the taxpayer under any plan for the sale of personal property—

(A) Which plan, by its terms and conditions, contemplates that such sale will be paid for in two or more payments; and

(B) Which sale is in fact paid for in two or more payments.

(d) *Installment plans*—(1) *Traditional installment plans.* A traditional installment plan usually has the following characteristics:

(i) The execution of a separate installment contract for each sale or disposition of personal property; and

(ii) The retention by the dealer of some type of security interest in such property.

Normally, a sale under a traditional installment plan meets the requirements of paragraph (c)(3)(i) of this section.

(2) *Revolving credit plans.* Sales under a revolving credit plan (within the meaning of § 1.453A-2(c)(1))—

(i) Are treated, for taxable years beginning on or before December 31, 1986, as sales on the installment plan to the extent provided in § 1.453A-2, which provides for the application of the requirements of paragraph (c)(3)(ii) of this section to sales under revolving credit plans; and

(ii) Are not treated as sales on the installment plan for taxable years beginning after December 31, 1986.

(e) *Installment income of dealers in personal property*—(1) *In general.* The income from sales on the installment plan of a dealer may be ascertained by treating as income that proportion of the total payments received in the taxable year from sales on the installment plan (such payments being allocated to the year against the sales of which they apply) which the gross profit realized or to be realized on the total sales on the installment plan made during each year bears to the total contract price of all such sales made during that respective year. However, if the dealer demonstrates to the satisfaction of the district director that income from sales on the installment plan is clearly reflected, the income from such sales may be ascertained by treating as income that proportion of the total payments received in the taxable year from sales on the installment plan (such payments being allocated to the year against the sales of which they apply) which either:

(i) The gross profit realized or to be realized on the total credit sales made during each year bears to the total contract price of all credit sales during that respective year, or

(ii) The gross profit realized or to be realized on all sales made during each year bears to the total contract price of all sales made during that respective year.

A dealer who desires to compute income by the installment method shall maintain accounting records in such a manner as to enable an accurate computation to be made by such method in accordance with the provisions of this section, section 446, and § 1.446-1.

(2) *Gross profit and total contract price.* For purposes of paragraph (e)(1) of this section, in computing the gross profit realized or to be realized on the total sales on the installment plan, there shall be included in the total selling price and, thus, in the total contract price of all such sales.

(i) The amount of carrying charges or interest which is determined at the time of each sale and is added to the established cash selling price of such property and is treated as part of the selling price for customer billing purposes, and

(ii) In the case of sales made in taxable years beginning on or after January 1, 1960, the amount of carrying charges or interest determined with respect to such sales which are added contemporaneously with the sale on the books of account of the seller but are treated as periodic service charges for customer billing purposes.

Any change in the amount of the carrying charges or interest in a year subsequent to the sale will not affect the computation of the gross profit for the year of sale but will be taken into account at the time the carrying charges or interest are adjusted. The application of this paragraph (e)(2) to carrying charges or interest described in paragraph (e)(2)(ii) of this section may be illustrated by the following example:

Example. X Corporation makes sales on the traditional installment plan. The customer's order specifies that the total price consists of a cash price plus a "time price differential" of 1½ percent per month on the outstanding balance in the customer's account, and the customer is billed in this manner. On its books and for purposes of reporting to stockholders, X Corporation consistently makes the following entries each month when it records its sales. A debit entry is make to accounts receivable (for the total price) and balancing credit entries are made to sales (for the established selling price) and to a reserve account for collection expense (for the amount of the time price differential). In computing the gross profit realized or to be realized on the total sales on the installment plan, the total selling price and, thus, the total contract price for purposes of this paragraph (e) would, with respect to sales made in taxable years beginning on or after January 1, 1960, include the time price differential.

(3) *Carrying charges not included in total contract price.* In the case of sales by dealers in personal property made during taxable years beginning after December 31, 1963, the income from which is returned on the installment method, if the carrying charges or interest with respect to such sales is not included in the total contract price, payments received with respect to such sales shall be treated as applying first against such carrying charges or interest.

(f) Other accounting methods. If the vendor chooses as a matter of consistent practice to return the income from installment sales on an accrual method (,) such a course is permissible.

(g) Records. In adopting the installment method of accounting the seller must maintain such records as are necessary to clearly reflect income in accordance with this section, section 446 and § 1.446–1.

(h) *Effective date.* This section applies for taxable years beginning after December 31, 1953, and ending after August 16, 1954, but generally does not apply to sales made after December 31, 1987, in taxable years ending after such date. For sales made after December 31, 1987, sales made by a dealer in personal or real property shall not be treated as sales on the installment plan. (However, see section 453(l)(2) for exceptions to this rule.)

§ 1.453A–2 Treatment of revolving credit plans; taxable years beginning on or before December 31, 1986.

(a) *In general.* If a dealer sells or otherwise disposes of personal property under a revolving credit plan—

(1) Such sales will be treated as sales on the installment plan to the extent provided in paragraph (c) of this section;

(2) Income from sales treated as sales on the installment plan under paragraph (c) of this section may be returned on the installment method; and

(3) Income returned on the installment method is computed in accordance with § 1.453A–1, except that—

(i) The gross profit on such sales is computed without regard to § 1.453A–1(e)(2);

(ii) Under the circumstances described in paragraph (c)(6)(vi) of this section, the taxpayer may, in computing income for a taxable year, treat all such sales as sales made in such taxable year for purposes of applying the gross profit percentage; and

(iii) The rule contained in § 1.453A–1(e)(3) is applied in accordance with paragraph (c)(6)(v) of this section.

(b) *Coordination with traditional installment plan.* A dealer who makes sales of personal property under both a revolving credit plan and a traditional installment plan (1) may elect to report only sales under the traditional installment plan on the installment method, (2) may elect to report only sales under the revolving credit plan on the installment method, or (3) may elect to report both sales under the revolving credit plan and the traditional installment plan on the installment method.

(c) *Revolving credit plans.* (1) To the extent provided in this paragraph (c) sales under a revolving credit plan will be treated as sales on the installment plan. The term "revolving credit plan" includes cycle budget accounts, flexible budget accounts, continuous budget accounts, and other similar plans or arrangements for the sale of personal property under which the customer agrees to pay each billing-month (as defined in paragraph (c)(6)(iii) of this section) a part of the outstanding balance of the customer's account. Sales under a revolving credit plan do not constitute sales on the installment plan merely by reason of the fact that the total debt at the end of a billing-month is paid in installments. The terms and conditions of a revolving credit plan do not contemplate that each sale under the plan will be paid for in two or more payments and thus do not meet the requirements of § 1.453A–1(c)(3)(i). In addition, since under a revolving credit plan payments are not generally applied to liquidate any particular sale, and since the terms and conditions of such plan contemplate that account balances may be paid in full or in installments, it is generally impossible to determine that a particular sale under a revolving credit plan is to be or is in fact paid for in installments so as to meet the requirements of § 1.453A–1 (c)(3)(ii). However, paragraphs (c) (2) and (3) of this section provides rules under which a certain percentage of charges under a revolving credit plan will be treated as sales on the installment plan. For purposes of arriving at this percentage, these rules, in general, treat as sales on the plan those sales under a revolving installment credit plan: (i) Which are of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments and (ii) Which are charged to accounts on which subsequent payments indicate that such sales are being paid for in two or more installments.

(2)(i) The percentage of charges under a revolving credit plan which will be treated as sales on the installment plan shall be computed by making an actual segregation of charges in a probability sample of the revolving credit accounts and by applying the rules contained in paragraph (c)(3) of this section to determine what percentage of charges in the sample is to be treated as sales on the installment plan. (See paragraph (c)(5) of this section for rules to be used if some of the sales under a revolving credit plan are nonpersonal property sales (as defined in paragraph (c)(6)(iv) of this section).) Such segregation shall be made of charges which make up the balances in the sample accounts as of the end of each customer's last billing-month ending within the taxable year. (See paragraph (c)(6)(v) of this section for rules to be used in determining which charges make up the balance of an account.) However, in making such segregation, any account to which a sale is charged during the taxable year on which no payment is credited after the billing-month within which the sale is made (hereinafter called the "billing-month of sale") and on or before the end of the first billing-month ending in the taxpayer's next taxable year shall be disregarded and not taken into account in the determination of what percentage of charges in the sample is to be treated as sales on the installment plan. In order to obtain a probability sample, the accounts shall be selected in accordance with generally accepted probability sampling techniques. The appropriateness of the sampling technique and the accuracy and reliability of the results obtained must, if requested, be demonstrated to the satisfaction of the district director. If the district director is not satisfied that the taxpayer's sample is appropriate or that the results obtained are accurate and reliable, the taxpayer shall recompute the sample percentage or make appropriate adjustments to the original computations in a manner satisfactory to the district director. The taxpayer shall maintain records in sufficient detail to show the method of computing and applying the sample.

(ii) For taxable years ending before January 31, 1964, a taxpayer who has reported for income tax purposes all or a portion of sales under a revolving credit plan as sales on the installment method may apply the percentage obtained for the first taxable year ending on or after such date in determining the percentage of charges under a revolving credit plan for such prior taxable year (or years) which will be treated as sales on the installment plan. However, in computing the percentage to be applied in determining the percentage of charges under a revolving credit plan which will be treated as sales on the installment plan for such prior taxable year (or years), the rule stated in § 1.453A–1(e)(3) shall not apply. See paragraph (c)(6)(v) of this section for rules relating to the application of payments to finance charges for such prior taxable years.

(3) For the purpose of determining the percentage described in paragraph (c)(2) of this section, a charge under a revolving credit plan will be treated as a sale on the installment plan only if such charge is a sale (as defined in paragraph (c)(6) of this section) and meets the following requirements:

(i) The sale must be of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments. If the aggregate of sales charged during a billing-month to an account under a revolving credit plan exceeds the required monthly payment, then all sales during such billing-month shall be considered to be of the type which the terms and conditions of such plan contemplate will be paid for in two or more installments. The required monthly payment shall be the amount of the payment which the terms and conditions of the revolving credit contract require the customer to make with respect to a billing-month. If the amount of such payment is not fixed at the date the contract is entered into, but is dependent upon the balance of the account, then such amount shall be the amount that the customer is required to pay (but not including any past-due payments) as shown on the statement either:

(A) For the last billing-month ending within the taxpayer's taxable year or

(B) For the billing-month of sale, whichever method the taxpayer adopts for all accounts. A taxpayer shall not change such method of determining the required monthly payment based upon the balance of the account without obtaining the consent of the district director. In any case where the required monthly payment is not set in accordance with a consistent method used during the entire taxable year, the district director may determine the required monthly payment in accordance with the method used during the major portion of such taxable year if the use of such method is necessary in order to reflect properly the income from sales under a revolving credit plan. The requirements stated in this paragraph (c)(3)(i) may be illustrated by the following examples:

Example (1). Under the terms of a revolving credit plan the required monthly payment to be made by customer A is $20. During the billing-month ending in December, sales aggregating $80 are charged to customer A's account, and during the next billing-month, ending in January, sales aggregating $19.95 and finance charges of $.00 are charged to A's account. Since the aggregate of sales charged to customer A's account during the billing-month ending in December ($80) exceeds the required monthly payment ($20), the terms and conditions of the plan contemplate that the sales charged during such billing-month are of the type which will be paid for in two or more installments. Since the aggregate of sales charged to customer A's account during the billing-month ending in January ($19.95) does not exceed the required monthly payment, the sales making up the aggregate of sales in such billing-month are not of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments.

Example (2). The terms of a revolving credit plan require a payment of 20 percent of the balance of the customer's account as of the end of the billing-month for which the statement is rendered. A customer makes purchases aggregating $25 in the customer's next to the last billing-month ending within the taxpayer's taxable year, and the balance at the end of that month is $150. At the end of the customer's last billing-month ending within the taxpayer's taxable year, the balance of the account has decreased to $110. If the taxpayer determines the required monthly payment by reference to the payment required on the statement for the last billing-month ending within the taxable year and applies such method consistently to all accounts, then the sales making up the $25 aggregate of sales are of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments. Although such aggregate was less than the $30 payment (20%×$150) required on the statement rendered for the billing-month of sales. It was more than the $22 (20%×$110) that the customer was required to pay on the statement rendered for his last billing-month ending within the taxable year, and thus meets the requirements of this paragraph (c)(3)(i). If, however, the taxpayer determines the required monthly payment by reference to the payment required on the statement for the billing-month of sale, then the sales making up the aggregate of sales during such billing-month do not meet the requirements of this paragraph (c)(3)(i) because such aggregate was less than the $30 payment required on the statement rendered for such month.

(ii) The sale must be charged to an account on which the first payment after the billing-month of sale indicates that the sale is being paid in installments. The first payment after the billing-month of sale indicates that the sale is being paid in installments if, and only if, such payment is an amount which is less than the balance of the account as of the close of the billing-month of sale. For purposes of this paragraph (c)(3)(ii), such balance shall be reduced by any return or allowance credited to the account after the close of the billing-month of sale and before the close of the billing-month within which the first payment after the billing-month of sale is credited to the account, unless the taxpayer demonstrates that the return or allowance was attributable to a charge made in a month subsequent to the billing-month of sale. The requirements stated in this paragraph (c)(3)(ii) may be illustrated by the following examples, in which it is assumed that the taxpayer's annual accounting period ends on January 31.

Example (1). Customer A's revolving credit account shows the following sales and payments:

Month ending	Aggregate sales in month	Payments	Balance
December 20	$150	0	$150
January 20	75	$30	195
February 20	0	195	0

All sales made in the billing-month ending December 20 meet the requirements of this paragraph (c)(3)(ii) because the first payment on the account after such billing-month ($30) was less than the balance of the account as of the close of such billing-month ($150); and none of the sales made in the billing-month ending January 20 meets the requirements of this paragraph (c)(3)(ii) because the balance of the account as of the end of such billing-month was liquidated in one payment. By application of the rules of paragraph (c)(6)(v) of this section, the balance in the account as of the last billing-month ending in the taxable year ($195) consists of $120 of the $150 of sales made in the billing-month ending December 20 and all of the $75 of sales made in the billing-month ending January 20. Therefore, $120 of the account balance meets the requirements of this paragraph (c)(3)(ii) and $75 does not.

Example (2). Customer B's revolving credit account shows the following sales and payments:

Month ending	Aggregate sales in month	Payments	Balance
December 20	$ 50	0	$ 50
January 20	100	0	150

Month ending	Aggregate sales in month	Payments	Balance
February 20	0	$50	100

None of the sales made in the billing-month ending December 20 meets the requirements of this paragraph (c)(3)(ii) because the first payment credited to the account after such billing-month ($50) is not less than the balance of the account as of the close of such month ($50). All of the sales made in the billing-month ending January 20 meet the requirements of this paragraph (c)(3)(ii) because the first payment after such billing-month ($50) is less than the balance of the account as of the close of such month ($150).

Example (3). Customer C's revolving credit account shows the following purchases and credits:

Month ending	Item	Charges	Credits	Balance
January 20	Coat	$55		
	Dress	40		
	Shirt	5		$100
February 20	Return		$5	
	Payments		95	0

None of the sales made in the billing-month ending January 20 meets the requirements of this paragraph (c)(3)(ii) because the first payment credited to the account after such billing-month ($95) was equal to the balance of the account as of the end of such billing-month, $95. For this purpose, the balance of $100 is reduced by the $5 return which was credited to the account after the close of the billing-month of sale and before the close of the billing-month within which the first payment after the billing-month of sale is credited.

(4) The provisions of paragraphs (c)(2) and (3) of this section may be illustrated by the following examples in which it is assumed that the taxpayer is a dealer whose annual accounting period ends on January 31.

Example (1). Customer A's revolving credit ledger account shows the following:

Month ending	Aggregate sales in month [1]	Returns and allowances	Payments	Finance charges	Balance
January 20	$15.00	0	0	0	$15.00
February 20	0	0	0	$0.15	15.15

[1] Including sales of personal property and nonpersonal property sales.

For purposes of the segregation provided for in paragraph (c)(2)(i) of this section, customer A's account will be disregarded and not taken into account in the determination of what percentage of charges in the sample is to be treated as sales on the installment plan because no payment was credited to that account after the billing-month of sale and on or before February 20.

Example (2). This example is applicable with respect to sales made during taxable years beginning before January 1, 1964. Under the terms of corporation X's revolving credit plan, payments are required in accordance with the following schedule:

Unpaid balance:	Required monthly payment
0 to $99.99	$20
$100 to $199.99	40
$200 to $299.99	60

Customer B's revolving credit ledger account for the period beginning on September 21, 1963, and ending February 20, 1964, shows the following:

Month ending	Aggregate sales in month [1]	Returns and allowances	Payments	Finance charges	Balances
October 20	$55.00	0	0	0	$55.00
November 20	45.00	0	$20.00	$0.35	80.35
December 20	20.00	0	20.00	.60	80.95
January 20	26.00	$5.00	20.00	.51	82.56
February 20	0	10.00	72.56	0	0

[1] Including sales of personal property and nonpersonal property sales.

The three $20 payments and the $5 return or allowance made in the billing-months ending in the taxable year are applied under the rules in paragraph (c)(6)(v) of this section to liquidate the earliest outstanding charges, first to the $55 aggregate of sales in the billing-month ending October 20 and next to $10 of the aggregate of sales made in the billing-month ending November 20. Thus, the balance of the account as of the close of the billing-month ending January 20, $82.56, is made up as follows:

Remainder of sales in billing-month ending Nov. 20 ($45–$10)	$35.00
Finance charges for billing-month ending Nov. 20	0.35
Sales for billing-month ending Dec. 20	20.00
Finance charge for billing-month ending Dec. 20	0.60
Sales for billing-month ending Jan. 20	26.00
Finance charge for billing-month ending Jan. 20	0.61
Total	82.56

The sales of $35 remaining from the aggregate of sales for the billing-month ending November 20 meet the requirements of paragraph (c)(3)(i) of this section because the aggregate of sales charged during such billing-month ($45) exceeds the required monthly payment ($20), and such sales meet the requirements of paragraph (c)(3)(ii) of this section because the first payment after the billing-month of sale ($20) is an amount less than the balance of the account as of the close of such month ($80.35). Therefore, $35 of sales will be treated as sales on the installment plan. The $20 aggregate of sales charged during the billing-month ending December 20 does not meet the requirements of paragraph (c)(3)(i) of this section because it is in an amount which does not exceed the required monthly payment ($20). (The finance charge of $0.60 added in the billing-month does not enter into the determination of the aggregate of sales for the month because the term "sales" (as defined in paragraph (c)(6)(i) of this section does not include finance charges). The $26 aggregate of sales for the billing-month ending January 20 does not meet the requirements of paragraph (c)(3)(ii) of this section because the first payment after such billing-month ($72.56) was equal to the balance of the account as of the close of such billing-month ($72.56). For this purpose, the balance of $82.56 is reduced by the $10 return or allowance which was credited after the billing-month of sale and before February 20. Thus, of the $82.56 balance of B's account as of the close of the last billing-month ending within corporation X's taxable year, $35 will be treated as sales on the installment plan for purposes of determining the percentage provided for paragraph (c)(2) of this section.

Example (3). This example is applicable with respect to sales made during taxable years beginning after December 31, 1963. Assume the facts in example (2), except that Customer B's revolving credit ledger account is for the period beginning on September 21, 1964 and ending February 20, 1965. Since payments received are first used to liquidate any outstanding finance charges under the rule in paragraph (c)(6)(v) of this section, the $20 payment in December liquidated the $0.35 finance charge accrued at the end of the November billing-month and the $20 payment in January liquidated the $0.60 finance charge accrued at the end of the December billing-month. The balance of the three $20 payments ($59.05) and the $5 return or allowance are applied (under the rules in paragraph (c)(6)(v) of this section) to liquidate the earliest outstanding sales, first to the $55 aggregate of sales in the billing-month ending October 20 and next to $9.05 of the aggregate of sales made in the billing-month ending November 20. Thus, the balance of the account as of the close of the billing-month ending January 20, $82.56, is made up as follows:

Remainder of sales in billing-month ending Nov. 20 ($45–$9.05)	$35.95
Sales for billing-month ending Dec. 20	20.00
Sales for billing-month ending Jan. 20	26.00
Finance charge for billing-month ending Jan. 20	0.61
Total	82.56

The sales of $35.95 remaining from the aggregate of sales for the billing-month ending November 20 meet the requirements of paragraph (c)(3)(i) of this section because the aggregate of sales charged during such billing-month ($45) exceeds the required monthly payment ($20), and such sales meet the requirements of paragraph (c)(3)(ii) of this section because the first payment after the billing-month of sale ($20) is an amount less than the balance of the account as of the close of such month ($80.35). Therefore, $35.95 of sales will be treated as sales on the installment plan. The $20 aggregate of sales charged during the billing-month ending December 20 does not meet the requirements of paragraph (c)(3)(i) of this section because it is in an amount which does not exceed the required monthly payment ($20). The $26 aggregate of sales for the billing-month ending January 20 does not meet the requirements of paragraph (c)(3)(ii) of this section because the first payment after such billing-month ($72.56) was equal to the balance of the account as of the close of such billing-month ($72.56). For this purpose, the balance of $82.56 is reduced by the $10 return or allowance which was credited after the billing-month of sale and before February 20. Thus, of the $82.56 balance of B's account as of the close of the last billing-month ending within corporation X's taxable year $35.95 will be treated as sales on the installment plan for purposes of determining the percentage provided for in paragraph (c)(2) of this section.

(5) Sales under a revolving credit plan which are nonpersonal property sales (as defined in paragraph (c)(6)(iv) of this section) do not constitute sales on the installment plan. Therefore, the charges under a revolving credit plan must be reduced by the nonpersonal property sales, if any, under such plan, before application of the sample percentage as provided for in paragraph (c)(2)(i) of this section. The taxpayer may treat as the nonpersonal property sales under the plan for the taxable year an amount which bears the same ratio to the total sales under the revolving credit plan made in the taxable year as the total nonpersonal property sales made in such year bears to the total sales made in such year.

(6) For purposes of this paragraph (c)—

(i) The term "sales" includes sales of services, such as a charge for watch repair, as well as sales of property, but does not include finance or service charges.

(ii) The term "charges" includes sales of services and property as well as finance or service charges.

(iii) A billing-month is that period of time for which a periodic statement of charges and credits is rendered to a customer.

(iv) The term "nonpersonal property sales" means all sales which are not sales of personal property made by the taxpayer. Thus, sales of a department leased by the taxpayer to another are nonpersonal property sales. Likewise, charges for services rendered by the taxpayer are nonpersonal property sales unless such services are incidental to and rendered contemporaneously with the sale of personal property, in which case such charges shall be considered as constituting part of the selling price of such property.

(v) Except as otherwise provided in this paragraph (c)(6)(v), each payment received from a customer under a revolving credit plan before the close of the last billing-month ending in the taxable year shall be applied to liquidate the earliest outstanding charges under such plan, notwithstanding any rule of law or contract provision to the contrary. For purposes of determining which charges remain in the balance of an account at the end of the last billing-month ending in the taxable year, the taxpayer may apply returns and allowances which are credited before the close of the last billing-month ending in the taxable year either (A) to liquidate or reduce the charge for the specific item so returned or for which an allowance is permitted, or (B) to liquidate or reduce the earliest outstanding charges. The method so selected for applying returns and allowances shall be followed on a consistent basis from year to year unless the district director consents to a change. Additionally, finance or service charges which are computed on the basis of the balance of the account at the end of the previous billing-month (usually reduced by payments during the current billing-month) are accrued at the end of the current billing-month and are therefore considered, for purposes of determining the earliest outstanding charges, as charged to the account after any sales made during the current billing month. However, for purposes of determining which charges remain in the balance of an account at the end of the last billing-month ending in a taxable year which began after December 31, 1963, payments received during such year shall be applied first against any finance or service charges which were outstanding at the time such payment was received. The preceding sentence

VOL 54 ISS 212 NO 3 1989 UMI

shall not apply with respect to a computation made for purposes of applying the rule described in paragraph (c)(2)(ii) of this section.

(vi) The taxpayer shall allocate those sales under a revolving credit plan which are treated as sales on the installment plan to the proper year of sale in order to apply the appropriate gross profit percentage as provided for in § 1.453A–1(e). This allocation shall be made on the basis of the percentages of charges treated as sales on the installment plan which are attributable to each taxable year as determined in the sample of accounts described in paragraph (c)(2) of this section. However, if the taxpayer demonstrates to the satisfaction of the district director that income from sales on the installment plan is clearly reflected, all sales may be considered as being made in the taxable year for purposes of applying the gross profit percentage.

(7) The provisions of this paragraph (c) may be illustrated by the following example:

Example. Corporation X is a dealer and has elected to report on the installment method those sales under its revolving credit plan which may be treated as sales on the installment plan. Corporation X's taxable year ends on January 31, and the total balance of all its revolving credit accounts as of January 31, 1984, is $2,000,000. The total sales made in the taxable year are $10,000,000 of which $500,000 are nonpersonal property sales. The gross profit percentage realized or to be realized on all sales made in the taxable year is 40 percent. The amount of the gross profit contained in the year-end balance of $2,000,000 which may be deferred to succeeding years is computed as follows:

(i) In order to reduce the charges appearing in the year-end balance of revolving credit accounts receivable by the nonpersonal property sales contained therein, corporation X determines the amount of such nonpersonal property sales under the method permitted in paragraph (c)(5) of this section. Corporation X first determines the ratio which total nonpersonal property sales made during the year ($500,000) bears to total sales made during the year ($10,000,000), and then applies the percentage (5 percent) thus obtained to the year-end balance of revolving credit accounts receivable ($2,000,000). The nonpersonal property sales thus determined ($100,000) is subtracted from such year-end balance to obtain the charges under the revolving credit plan appearing in the year-end balance ($1,900,000) to which the sample percentage is to be applied.

(ii) In accordance with generally accepted sampling techniques, the taxpayer selects a probability sample of all revolving credit accounts having balances for billing-months ending in January 1984. The technique employed results in a random selection of accounts with total balances of $100,000.

(iii) Analysis of these sample accounts discloses that of the $100,000 of balances, $10,000 of balances are in accounts on which no payment was credited after a billing-month of sale and on or before the end of the first billing-month ending in the taxable year beginning February 1, 1984. These balances are, therefore, disregarded and not taken into account in the determination of what percentage of sales in the sample is to be treated as sales on the installment plan. Of the remaining $90,000 of balances, the taxpayer determines, by analyzing the ledger cards in the sample, that $63,000 of balances are composed of sales which meet the requirements of paragraphs (c)(3) (i) and (ii) of this section and are thus treated as sales on the installment plan. The remaining $27,000 of balances either did not meet the requirements of paragraphs (c)(3) (i) and (ii) of this section or were not sales (as defined in paragraph (c)(6)(i) of this section). The percentage of charges in the sample treated as sales on the installment plan is, therefore, 70 percent ($63,000 ÷ $90,000).

(iv) The charges in the year-end balance which are to be treated as sales on the installment plan, $1,330,000, are computed by multiplying the charges to which the sample percentage is applied ($1,900,000) by the sample percentage (70 percent).

(v) The deferred gross profit attributable to sales under the revolving credit plan for the taxable year, $532,000, is determined by multiplying the amount treated as sales on the installment plan ($1,330,000), by the gross profit percentage (40 percent). (Corporation X will be able to demonstrate to the satisfaction of the district director that (A) since the gross profit percentage for all sales does not vary materially from the gross profit percentage for all sales made under the revolving credit plan, (B) since only an insubstantial amount of sales included in year-end account balances was made prior to the taxable year, and (C) since the prior year's gross profit percentage does not vary materially from the gross profit percentage for the taxable year, income from sales on the installment plan will be clearly reflected by applying the current year's gross profit percentage for all sales under the revolving credit plan treated as sales on the installment plan.)

(d) *Effective date.* This section applies for taxable years beginning after December 31, 1953, and ending after August 16, 1954, but does not apply for any taxable year beginning after December 31, 1986. For taxable years beginning after December 31, 1986, sales under a revolving credit plan shall not be treated as sales on the installment plan.

OMB Control Numbers Under the Paperwork Reduction Act (26 CFR Part 602)

PART 602—[AMENDED]

Par 3. The authority for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par 4. Section 602.101(c) is amended by inserting in the appropriate places in the table "§ 1.453A–1 * * * 1545–0152" and "§ 1.453A–2 * * * 1545–0152".

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Approved: August 31, 1989.

Kenneth W. Gideon,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

26 CFR Part 301

[T.D. 8271]

RIN 1545–AN01

Disclosure of Information

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations amending the Income Tax Regulations relating to the disclosure, under section 6103(n) of the Internal Revenue Code, of returns and return information, in connection with the procurement of property and services for purposes of tax administration. These amendments give to the Tax Division, Department of Justice, the authority to make these disclosures under section 6103(n) for Federal tax administration purposes. These amendments affect all disclosures by the Tax Division, Department of Justice, made to any person(s) described in section 6103(n). These amendments apply to all disclosures made after the effective date of this amended regulation.

EFFECTIVE DATE: These amendments to the regulations are effective November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Margo L. Stevens of the Disclosure Litigation Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington DC 20224 (Attention: CC:D:Executive Assistant, Room 3560) (202) 566–3074 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains final regulations amending the Income Tax Regulations relating to the disclosure of returns and return information under section 6103(n) of the Internal Revenue Code (26 CFR 301.6103(n)–1). The Internal Revenue Service published proposed amendments to the Income Tax Regulations relating to the disclosure of returns and return information on January 3, 1989 (54 FR

39). The Internal Revenue Service received one written comment and two telephone inquiries pertaining to the proposed amendments. All three commentators inquired into the type of litigation support that the Tax Division would utilize and about the safeguards to protect against redisclosure of the returns and return information. The Service explained that the Tax Division contemplated the use of outside contractors to process pleadings, correspondence, and the voluminous amounts of documentary evidence involved in large tax cases. These documents would be input into computers and would become part of a data base of case-related documents. This support would enhance the retrievability of the documents for use in the preparation and actual trial of these large tax cases. The Service acknowledged that the proposed amendments were drafted in a way that would allow the Tax Division to utilize outside contractors for other tax administration purposes authorized by 26 U.S.C. 6103(n), although no such other uses are currently contemplated. It was also explained that the proposed amendments included a conforming amendment to § 301.6103(n)–1(d) which already provided for the safeguarding of returns and return information disclosed under section 6103(n). Because no request for a public hearing was received, no hearing was scheduled.

Explanation of Provisions

Section 6103(n) of the Code authorizes the disclosure, pursuant to Treasury regulations, of returns and return information to the extent necessary and in connection with the processing, storage, transmission, and reproduction of returns and return information, and the programming, maintenance, repair, testing, and procurement of equipment, for purposes of tax administration. Section 6103(b)(4) of the Code defines "tax administration" to include litigation arising under the internal revenue laws.

Existing § 301.6103(n)–1 of the regulations authorizes disclosures to third parties under section 6103(n) only by officers or employees of the Treasury Department, a State tax agency, or the Social Security Administration, for tax administration purposes. Under the current regulations, the Tax Division, Department of Justice, cannot make disclosures to third parties. These amendments give disclosure authority to the Tax Division, Department of Justice, in order to allow the Tax Division to disclose tax returns and return information for purposes of obtaining litigation support services during the course of litigation arising under the Code. This authority is necessary to enable the Tax Division to procure services from outside contractors in connection with the Tax Division's tax litigation responsibilities.

Special Analyses

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. Although this Treasury decision was preceded by a notice of proposed rulemaking that solicited public comments, the notice was not required by 5 U.S.C. 553 since the regulations proposed in that notice and adopted by this Treasury decision are interpretative. Therefore, a final Regulatory Flexibility Act Analysis is not required by the Regulatory Flexibility Act (5 U.S.C. chapter 6) and the delayed effective date requirement of 5 U.S.C. 553(d) does not apply.

Drafting Information

The principal author of these amendments to the regulations is James N. Beyer of the Disclosure Litigation Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service, the Office of Chief Counsel, and the Treasury Department participated in developing these amendments to the regulations, both on matters of substance and style.

List of Subjects in 26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Disclosure of information, Employment taxes, Estate tax, Excise taxes, Filing requirements, Gift tax, Income taxes, Investigations, Law enforcement, penalties, Pensions, Statistics, Taxes.

Accordingly, title 26, part 301 of the Code of Federal Regulations, is amended as follows:

PART 301, PROCEDURE AND ADMINISTRATION

Paragraph 1. The authority for part 301 is amended by adding the following citation:

Authority: 26 U.S.C. 7805; * * * section 301.6103(n)–1 also issued under 26 U.S.C. 6103(n).

§ 301.6103 [Amended]

Par. 2. Section 301.6103(n)–1 is amended as follows:

1. The first sentence of paragraph (a) is amended by removing the language "or" immediately following the phrase "State tax agency", and by adding, immediately following the phrase "the Social Security Administration", the language ", or the Tax Division, Department of Justice,".

2. The first full sentence of the flush language following paragraph (a)(2) is amended by removing the language "or" immediately following the phrase "State tax agency", and by adding, immediately following the phrase "the Social Security Administration", the language ", or the Tax Division, Department of Justice,".

Par. 3. Section 301.6103(n)–1 is amended as follows:

The second sentence for paragraph (d) is amended by removing the language "or" immediately following the phrase "State tax agency", and by adding, immediately following the phrase "the Social Security Administration", the language ", or the Tax Division, Department of Justice,".

Par. 4. Section 301.6103(n)–1 is further amended as follows:

Paragraph (d)(2) is amended by adding, immediately following the phrase "State tax agency,", the language "or to the Tax Division, Department of Justice,".

Dated: October 13, 1989.

Fred T. Goldberg, Jr.,

Commissioner of Internal Revenue.

Approved:

Kenneth W. Gideon,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 938

Pennsylvania Regulatory Program; Reclamation in Lieu of Cash Payment for Civil Penalties

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: OSM is announcing the approval of an amendment to the Pennsylvania permanent regulatory program (hereinafter referred to as the Pennsylvania program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment provides the Pennsylvania Department of Environmental Resources (DER) with the discretionary authority to accept reclamation in lieu of cash payment to satisfy civil penalty debts. The amendment is intended to give greater

discretion to the State regulatory authority while maintaining consistency with the corresponding Federal regulations.

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.17, are the Director's findings

reclamation work not meet established standards or not be completed.

Paragraph C of the proposed amendment requires that reclamation sites be chosen from a list of

payable upon expiration of the time allowed to request a hearing. The revised amendment provides the operator a 30-day timeframe for cash payment following a determination by

penalty payment. As previously stated, paragraph D of the revised amendment requires that reclamation value be based either on engineering cost estimates prepared by the Monitoring

documents required to implement reclamation as payment need not be part of the program submission.

discretion to the State regulatory authority while maintaining consistency with the corresponding Federal regulations.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Robert J. Biggi, Director, Harrisburg Field Office, Office of Surface Mining Reclamation and Enforcement, Third Floor, Suite 3C, Harrisburg Transportation Center, 4th and Market Streets, Harrisburg, Pennsylvania 17101; Telephone: (717) 782–4036.

SUPPLEMENTARY INFORMATION:

I. Background on the Pennsylvania Program
II. Submission of Amendment
III. Director's Findings
IV. Disposition of Comments
V. Director's Decision
VI. Procedural Determinations

I. Background on the Pennsylvania Program

The Secretary of the Interior conditionally approved the Pennsylvania program on July 31, 1982. Information on the background of the Pennsylvania program submission, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval can be found in the July 30, 1982, **Federal Register** (47 FR 33050). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 938.11, 938.12, 938.15 and 938.16.

II. Submission of Amendment

By letter dated August 21, 1986 (Administrative Record No. PA 609), the Pennsylvania DER submitted to OSM a proposed amendment to revise the Pennsylvania program. The proposal would change the civil penalty program by providing DER with the option of accepting reclamation of lands affected by mining as legal tender from persons owing civil penalties in lieu of sum certain cash payments. OSM published a notice announcing receipt of this amendment and the opening of a public comment period in the October 3, 1986, **Federal Register** (51 FR 35370). OSM's review of this proposed amendment identified several problems that were communicated to the State in a February 6, 1987, letter (Administrative Record No. PA 633). The DER addressed these problems and submitted a revised proposed amendment on July 26, 1988 (Administrative Record No. PA 698). On October 7, 1988, OSM announced receipt of changes to the amendment and invited public comment on their adequacy (53 FR 39489).

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.17, are the Director's findings concerning the program amendment submitted on August 21, 1986, and revised on July 26, 1988.

The revised amendment consists of Pennsylvania DER Program Guidance Manual Section I:3:9, Reclamation in Lieu of Cash Payments for Civil Penalties. The amendment provides DER with authority and procedures for accepting reclamation of abandoned mine lands in place of cash payment of civil penalty debts. Specifically, the amendment sets forth qualifications for operator participation, criteria for abandoned mine site selection, methods for determining the value of proposed reclamation, contents of the operator's reclamation proposal, proposal review criteria, Consent Order and Agreement provisions and requirements for inspection and documentation of the work accomplished.

The revised amendment restricts participation to operators who do not own or control mining operations with a demonstrated pattern of willful violations as to indicate an intent not to comply with SMCRA or the approved State program. Although an operator who owes civil penalties is permitted to do reclamation work to pay those penalties, such reclamation does not relieve the original operator who abandoned the site of his liability. DER will continue to pursue enforcement actions against the operator who mined but failed to reclaim the site. These actions include the collection of civil penalties, repayment for reclamation work completed, and listing on DER's Violation Docket and in OSM's Applicant Violator System (Administrative Record No. PA–785).

In a January 29, 1987, letter to the Pennsylvania DER and other state regulatory authorities, OSM established minimum criteria for approval of state program amendments concerning reclamation in lieu of cash payments for civil penalties (Administrative Record No. PA 641). To be approved, a state program amendment must:

1. Identify categories of sites that qualify for reclamation under the program amendment,
2. Specify the criteria and procedures for determining the dollar value of reclamation work to be performed,
3. Contain a plan for evaluating the performance of the reclamation work,
4. Contain timeframes for completion of the reclamation work, and
5. Specify the recourse available to the state regulatory authority should the reclamation work not meet established standards or not be completed.

Paragraph C of the proposed amendment requires that reclamation sites be chosen from a list of reclaimable sites maintained by DER's Bureau of Mining and Reclamation (BMR).

DER will add sites to the list only when further enforcement action is not expected to achieve compliance. Operators may propose sites for approval by BMR's Division of Monitoring and Compliance which are not on the list. In no case will sites that are owned or controlled by the operator or in which the operator has a financial interest be considered for reclamation. Furthermore, enforcement action involving the site must have progressed through bond forfeiture and collection.

Paragraph D of the proposed amendment specifies how the value of the reclamation work will be determined. The calculated value of the reclamation work to be performed must be equal to or more than the amount of the assessed cash penalty. Value calculations must be based either on engineering cost estimates or the cost for bid as determined by DER's Bureau of Abandoned Mine Reclamation.

Paragraph I of the proposed amendment sets forth a plan for evaluating the performance of the reclamation work. Photographs of the reclamation area must be taken by DER personnel before and after the reclamation work is accomplished. Once work is started the site must be inspected on the same schedule as active mining sites. An inspection report must be used to document each inspection. The final inspection report must state that the project is completed and provide details on the work accomplished.

Paragraph G of the proposed amendment requires DER and the operator to execute a Consent Assessment that establishes a date when all parties agree that the reclamation work must be completed. Failure to accomplish specified reclamation by the date certain results in a formal order requiring cash payment of the civil penalty. In the event the operator fails to pay the civil penalty as ordered, DER will implement approved program provisions pertaining to collection of outstanding civil penalties.

The civil penalty provisions at section 518 of SMCRA and the Federal rules at 30 CFR 845.20 do not specify the method of payment for assessed penalties. The Act and Federal rules state that the penalty assessed shall become due and payable upon expiration of the time allowed to request a hearing. The revised amendment provides the operator a 30-day timeframe for cash payment following a determination by DER that the specified reclamation has not been achieved. The Pennsylvania program provides a 30-day period to request a formal hearing on all DER actions. The 30-day timeframe to make payment is consistent with the Federal rule and Act which require payment upon expiration of time allowed to request a hearing.

The Director finds that the July 26, 1988, revised amendment satisfies the minimum criteria for approval set forth in his January 29, 1987, letter and incorporates civil penalties and sanctions consistent with section 518 of SMCRA and the requirements at 30 CFR 845.20.

IV. Disposition of Comments

OSM solicited public comment on the proposed amendment as originally submitted on August 21, 1986, and as revised on July 26, 1988. All substantive comments pertained to the amendment as originally submitted. One commenter who commented on the original submission also provided similar comment on the revised amendment. OSM's response to comments is based on the July 26, 1988, revised amendment.

Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(11)(i), comments were solicited from Federal agencies with an actual or potential interest in the Pennsylvania program. The U.S. Department of Interior's Fish and Wildlife Service (FWS) and the Soil Conservation Service of the U.S. Department of Agriculture (SCS) responded.

The FWS recommended that criteria be included in the Pennsylvania program to ensure that procedures used to implement reclamation in lieu of cash payment are applied in a uniform manner and in such a way that they accomplish the objectives of the civil penalty program. No further explanation was provided by the commenter. OSM agrees that any process to collect payment of assessed penalties must provide the same deterrent value as cash payment. Paragraph D of the amendment requires that the calculated value of the reclamation must be equal to or exceed the assessed cash penalty. Thus, the broad objective of deterring future violations will be achieved. Furthermore, the amendment contains specific procedures which if followed should result in uniform implementation.

The SCS wanted to know how and who would determine the value of reclamation necessary to satisfy civil penalty payment. As previously stated, paragraph D of the revised amendment requires that reclamation value be based either on engineering cost estimates prepared by the Monitoring and Compliance Section in DER District Offices or the cost for bid as determined by the Bureau of Abandoned Mine Reclamation. OSM believes these methods of value determination will ensure compensation equal to or of higher value than the assessed penalty. The SCS also expressed concern that reclamation be conducted in accordance with an erosion and sedimentation control plan. OSM agrees that reclamation must be conducted in a manner that will not adversely impact the surrounding area. Paragraph E(4) of the revised amendment requires that each operator's reclamation proposal include a description of erosion and sedimentation controls. Under paragraph H, reclamation work must conform to the standards and contract specifications applicable to reclamation projects approved under Pennsylvania's Abandoned Mine Reclamation Program.

The SCS recommended that operators participating in the reclamation in lieu of cash payment for civil penalties program be required to sign a statement that they have no present or expected future financial interest in the site to be reclaimed. Paragraph (c) of the revised amendment prohibits the selection of any sites where the operator has a financial interest. Furthermore, the proposed amendment specifically disallows arrangements whereby an operator gains financially by reducing royalty payments to the landowner on different property being mined. OSM believes that these restrictions address the commenters concerns and that the use of a signed statement to enforce the provision is discretionary. This is a matter of State law because SMCRA does not prohibit such an arrangement between operators and landowners.

Several comments were received from organizations representing the coal industry and environmental groups. The Mining and Reclamation Council of America and the Pennsylvania Coal Mining Association (PCMA) supported Pennsylvania's proposal to allow reclamation as payment for assessed civil penalties. The PCMA urged OSM not to include the model Consent Order and Agreement (Exhibit II) as part of the amendment because such documents are subject to frequent change. Following consultation with OSM, DER revised the amendment to include the content and format requirements for Consent Order and Agreement documents. The Director agrees that the language of negotiated settlement documents required to implement reclamation as payment need not be part of the program submission.

The Environmental Policy Institute, National Wildlife Federation and Sierra Club (EPI, et al.) commented on the proposed amendment as a group. EPI, et al. believed the amendment should clearly prohibit the extraction of coal during the reclamation of abandoned mine sites. OSM agrees that there is no statutory authority to allow coal extraction during reclamation and that if it were allowed, such a practice would undermine title V of SMCRA. Paragraph H of the revised amendment specifically requires that the Consent Order and Agreement contain provisions to prohibit the extraction of coal or other marketable material from the reclamation site.

EPI, et al., commented that only those operators who have abated all outstanding violations should be eligible to substitute reclamation for cash payment of assessed penalties. OSM disagrees that eligibility must be contingent upon the abatement of outstanding violations. Federal rules at 30 CFR 845.20 do not require abatement of outstanding violations as a condition for payment of assessed penalties. Paragraph B of the revised amendment specifies operator eligibility based upon a history of timely compliance with previous consent orders and the satisfaction of backfilling obligations on permits held by the operator. Additionally, no qualified applicant can have a demonstrated pattern of willful violations indicating an intent or ability not to comply with the Federal act or State program requirements. OSM believes that these restrictive provisions in the amendment provide adequate assurance that reclamation will be completed and that the amendment is consistent with section 518 of SMCRA.

EPI, et al., stated that the Pennsylvania proposal did not provide a uniform measure of reclamation to be achieved when accepting reclamation work as payment for assessed penalties. OSM agrees that reclamation standards are needed. Paragraph H of the revised amendment states:"* * * reclamation work must conform to the standards and contract specifications applicable to reclamation projects approved under Pennsylvania's Abandoned Mine Land Reclamation Program." Thus Pennsylvania is adopting the same reclamation standards as applied to all other abandoned mine land reclamation projects done by the State.

EPI, et al., stated that the proposal did not specify enforcement sanctions for failure to comply with reclamation

VOL 54 ISS 212 NO 3 1989 UMI

specified in the agreement. Paragraph G(1) of the revised amendment specifies that failure to perform reclamation as contained in the agreement shall result in cash payment being due 30 days following DER notification. Failure to make payment subjects the operator to the enforcement provisions provided for all penalty debts. OSM finds these requirements consistent with section 516 of SMCRA.

EPI, et al., stated that Pennsylvania's proposal did not provide any meaningful participatory role for the public. OSM disagrees that there is a need for public participation in arranging payment of civil penalties beyond what is already provided under the Pennsylvania program. The Pennsylvania program provides public participation in the civil penalty assessment process by requiring the posting of the time and place of assessment conferences and providing any person the right to attend and speak on matters relative to violation correction, penalty amount and/or payment.

EPI, et al., stated there is potential for abuse when reclamation is allowed as a substitute for cash payment of civil penalties and recommended that OSM undertake a special study of the first twelve months of the program. The amendment under consideration must be evaluated on its merit. OSM believes there are sufficient safeguards to prevent abuse and will evaluate the amendments implementation through current oversight activities.

V. Director's Decision

For the reasons discussed in the finding above, the Director is approving the amendment as submitted to OSM on August 21, 1986, and revised on July 26, 1988.

The Federal rules at 30 CFR part 938 codifying decisions concerning the Pennsylvania program are being amended to implement this decision. This final rule is being made effective immediately to expedite the State program amendment process.

VI. Procedural Determinations

National Environmental Policy Act

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

Executive Order 12291 and the Regulatory Flexibility Act

On July 12, 1984, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action, OSM is exempt from the requirement to prepare a regulatory impact analysis, and this action does not require regulatory review by OMB.

The Department of Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 938

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: October 26, 1989.

David G. Simpson,

Acting Assistant Director, Eastern Field Operations.

For the reasons set out in the preamble, title 30, chapter VII, subchapter T of the Code of Federal Regulations is amended as set forth below:

PART 938—PENNSYLVANIA

1. The authority citations for part 938 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. In § 938.15, paragraph (r) is added to read as follows:

§ 938.15 Approval of regulatory program amendments.

* * * * *

(r) The following amendment to the Pennsylvania program as submitted on August 21, 1986, and revised on July 26, 1988, is approved effective November 3, 1989: Pennsylvania Policy Statement entitled Reclamation in Lieu of Cash Payment for Civil Penalties found in Department of Environmental Resources Program Guidance Manual at Section I:3:9, dated July 1, 1988.

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-1-FRL-3657-3]

Approval and Promulgation of Air Quality Implementation Plans; Massachusetts; Reasonably Available Control Technology for Cranston Print Works Co., Webster, MA

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the Commonwealth of Massachusetts. This revision establishes and requires the use of reasonably available control technology (RACT) to control volatile organic compound (VOC) emissions from Cranston Print Work Company, Webster Division Facility located in Webster, Massachusetts. The intended effect of this action is to approve a source-specific RACT determination made by the Commonwealth of Massachusetts in accordance with commitments made in its ozone attainment plan approved by EPA on November 9, 1983 (48 FR 51480). This action is being taken under section 110 of the Clean Air Act.

EFFECTIVE DATE: This rule will become effective on December 4, 1989.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Pesticides, and Toxics Management Division, U.S. Environmental Protection Agency, Region I, JFK Federal Building., Room 2313, Boston, MA 02203; and Division of Air Quality Control, Department of Environmental Protection, One Winter Street, 8th Floor, Boston, MA 02108.

FOR FURTHER INFORMATION CONTACT: Lynne A. Hamjian, (617) 565-3250; FTS 835-3250.

SUPPLEMENTARY INFORMATION: On February 2, 1989 (54 FR 5247), EPA published a Notice of Proposed Rulemaking (NPR) for the Commonwealth of Massachusetts. Using parallel processing rulemaking procedures, EPA proposed approval of two conditional Plan Approvals issued by the Massachusetts Department of Environmental Protection (DEP) which imposed and defined VOC control methods as RACT for Cranston Print Works Company, Webster Division Facility (Cranston) located in Webster, Massachusetts. This final rulemaking action approves the final, formal SIP revision submitted by the Massachusetts DEP on July 18, 1989. This notice is divided into four parts:

I. Background Information
II. Summary of SIP Revision Including the Changes Made to Secure Final EPA Approval
III. Public Comments
IV. Final Action

I. Background Information

On November 9, 1983 (48 FR 51480), EPA approved Massachusetts Regulation 310 CMR 7.18(17), "Reasonably Available Control Technology (RACT)," as part of the Commonwealth of Massachusetts 1982 ozone attainment plan. This regulation requires the Massachusetts DEP to determine and impose RACT on all facilities with the potential to emit one hundred tons per year (TPY) or more of VOC that are not already subject to Massachusetts' regulations developed pursuant to the EPA Control Techniques Guideline (CTG) documents.

On February 4, 1988 and February 29, 1988, the Massachusetts DEP submitted a SIP revision for Cranston to EPA for parallel processing. This SIP revision was composed of two Plan Approvals for Cranston which imposed VOC control requirements as RACT. On February 2, 1989 (54 FR 5247), EPA proposed approval of the two Plan Approvals with the understanding that the Massachusetts DEP would amend the Plan Approvals and submit additional documentation as outlined in the NPR prior to final rulemaking. On July 18, 1989, the Massachusetts DEP formally submitted an amended Plan Approval, dated and effective June 20, 1989, which supercedes the February 1988 Plan Approvals and incorporates all the provisions required by EPA's NPR.

II. Summary of the SIP Revision Including the Changes Made to Secure Final EPA Approval

Cranston is a fabric printing company. It prints fabrics which are used primarily in the high-fashion apparel industry. Its VOC emissions result from two processes, the acid ager process and the fabric printing process.

Acid Ager Process

The acid ager process is controlled by a scrubber which achieves 99% efficiency. The acid ager process and the details of the RACT plan were outlined in the NPR and will not be restated here. EPA's NPR required five changes to the Massachusetts DEP's SIP submittal prior to final rulemaking. How the Massachusetts DEP's July 18, 1989 submittal satisfies the requirements of the NPR for the acid ager process is summarized below:

1. The June 20, 1989 Plan Approval requires that Cranston maintain an overall scrubber efficiency greater than or equal to 99% at all times.
2. The June 20, 1989 Plan Approval requires that the acid ager emissions shall not exceed 0.6 lb/hr.
3. The June 20, 1989 Plan Approval contains additional operating limitations, monitoring provisions, and recordkeeping requirements to ensure that the 99% efficiency of the scrubber is maintained at all times.
4. The Massachusetts DEP formally submitted, and EPA has approved, a revision to the Massachusetts SIP requiring all non-CTG RACT sources subject to 310 CMR 7.18(17) to use EPA-approved test methods (54 FR 9212).
5. The Massachusetts DEP has certified that the inclusion of the acid ager line in the June 20, 1989, Plan Approval is a reasonable outgrowth of the RACT proposal which went to the public hearing on October 7, 1986.

For further details on these changes please refer to the Technical Support Document prepared for this revision which may be obtained from the EPA Regional Office listed in the **ADDRESSES** section of this notice.

Fabric Printing Process

The fabric printing process employs five roller and four rotary screen printing machines. The primary source of VOC emissions from this process was the mineral spirits print paste used on the roller printing machines. Cranston has reduced VOC emissions from its fabric printing operations by reformulation, changes in production schedules, and replacement of the roller printers with screen printers. The RACT emission limit imposed in the February 1988 Plan Approvals was 82.5 lb VOC/1000 lb fabric printed (averaged over 24 hours). The fabric printing process and the details of the RACT plan were outlined in the NPR and will not be restated here. EPA's NPR required that the Massachusetts DEP submit additional documentation prior to final rulemaking. The documentation was required to support that 82.5 lb VOC/1000 lb fabric printed was RACT for this process. The NPR required that the Massachusetts DEP justify why Cranston could not achieve a 65% reduction with add-on control technology, or could not use print pastes with equivalent formulations to those set forth in the Massachusetts SIP's Graphic Arts Regulation. Cranston now complies with limitations equivalent to the SIP's Graphic Arts RACT limitation by using low-solvent print paste formulations. The June 20, 1989, amended Plan Approval requires Cranston to use print pastes which comply at all times with the limits the Massachusetts SIP Graphic Arts Regulation. EPA's NPR required additional changes prior to final rulemaking. How the Massachusetts DEP's July 18, 1989, submittal satisfies the NPR's requirements for the Fabric Printing Process is briefly summarized below:

1. Cross-line averaging is not allowed.
2. The Massachusetts DEP has submitted, and EPA has approved, a SIP revision requiring non-CTG RACT sources subject to 310 CMR 7.18(17) to use EPA-approved test methods (54 FR 9212).
3. The Plan Approval requires Cranston to record the density of the mineral spirits on a daily basis.

For further details on these changes please refer to the Technical Support Document prepared for this revision which may be obtained from the EPA Regional Office listed in the **ADDRESSES** section of this notice.

III. Public Comments

EPA received a letter of public comment on its proposed approval of the Massachusetts DEP's SIP submittal. The comment letter was submitted by Cranston. The majority of the comments were on the feasibility of compliance with the Massachusetts Graphic Arts Regulation. These comments are no longer relevant because Cranston now complies with coating limits equivalent to Massachusetts Graphic Arts Regulation, and the June 20, 1989, imposes such limits. The two remaining comments are addressed below.

Comment: Cranston commented on EPA's statement that the reduction in VOC emissions from the fabric roller printers is 8% on a daily basis. Cranston claims that EPA compared a 1988 maximum daily emission rate (in the Plan Approval) of 82.5 lb VOC/1000 lb fabric printed with the yearly average emission rate in 1980 of 89.8 lb VOC/1000 lb fabric printed (8% reduction). Cranston states that the correct comparison is to compare the two averages of 89.8 lb VOC/1000 lb fabric printed in 1980 with the average of 38.6 lb VOC/1000 lb fabric printed in 1987. Cranston states that this comparison shows a decrease of 57%.

Response: The average emission rate of 38.6 lb VOC/1000 lb fabric printed was not included as an enforceable condition of the Massachusetts DEP's Plan Approvals. EPA agrees that the reduction (as averaged over a year) was 57%. However, this was not an

BEST COPY AVAILABLE

VOL 54 ISS 212 NO 3 1989 UMI

enforceable reduction achieved by Cranston on every day of operation. Cranston could have emitted up to 82.5 lb VOC/lb fabric printed under the previous Plan Approvals; there was no enforceable limit in the Plan Approvals to ensure compliance with a limit of 38.6 lb VOC/lb fabric printed. The Massachusetts DEP's June 20, 1989, revised Plan Approval requires Cranston to use print paste formulations equivalent to those set forth in the Massachusetts Graphic Arts Regulation. This meets the RACT requirements outlined in EPA's NPR and results in an enforceable 69% reduction in the VOC content of the volatile portion of the ink.

Comment: The Company asked for the use of 25% VOC print paste on the screen printers to ensure product quality and to remain competitive in the industry.

Response: The Massachusetts DEP's June 20, 1989, revised Plan Approval requires Cranston to comply with a limitation of 5.4% or less by volume VOC in the volatile portion of the print paste for each print paste formulation. Since the revised Plan Approval still requires a significant overall VOC reduction at the plant, the Massachusetts DEP believes that it is reasonable to allow Cranston to use low-solvent print pastes on the screen printers to give the Company some flexibility in its day-to-day printing operations. The Massachusetts DEP demonstrated that a 93% reduction is still achieved by installation of screen printers (which use low-solvent print pastes rather than no VOC print pastes). EPA concurs with this determination.

IV. Final Action

EPA is approving the Massachusetts DEP's June 20, 1989, Amended Plan Approval imposing RACT on Cranston Print Works Company as a revision to the Massachusetts SIP.

The NPR also required the Massachusetts DEP to submit additional documentation to support the proposed limit of 82.5 lb VOC/1000 lb fabric printed as RACT for the fabric printing process. The NPR stated that EPA would provide the opportunity for comment on the additional documentation submitted by the Massachusetts DEP prior to final approval of this revision. The Massachusetts DEP did not submit additional documentation; it imposed the more stringent Graphic Arts print paste limits on Cranston. Therefore, no additional opportunity for comment is necessary and this action will become effective 30 days from the date of publication.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Tables 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from date of publication). This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

INTERNATIONAL DEVELOPMENTAL COOPERATION AGENCY

Agency for International Development

48 CFR Parts 706, 714, 715, 716, 731, 732, 736, and 752

[AIDAR Notice 89–6]

Miscellaneous Amendments to Acquisition Regulations

AGENCY: Agency for International Development, IDCA.

ACTION: Final rule.

SUMMARY: The AID Acquisition Regulation (AIDAR) is being amended to provide additional guidance and information on the use of AID's special noncompetitive authority (impairment of foreign assistance objectives); use of prior government or prior overseas experience as an evaluation factor; and application of overseas recruitment incentives. In addition, a new requirement for prior approval by the Procurement Executive for use of a cost-sharing contract with an educational institution has been added; and several editorial changes correcting terminology and references, updating office titles, clarifying application, consolidating similar versions of clauses, and insuring internal consistency have been made.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: M/SER/PPE, Mr. James M. Kelly, Room 1600I, SA–14, Agency for International Development, Washington, DC 20523–1435. Telephone: (703) 875–1534.

SUPPLEMENTARY INFORMATION: The new requirement for prior Procurement Executive approval for use of a cost-sharing contract with an educational institution responds to AID's concern that any cost-sharing requirement fully meet FAR standards and requirements, and not disadvantage those institutions which cannot undertake cost-sharing. The remaining amendments clarify existing policies or procedures based on operating experience over the last few years or make editorial changes correcting, consolidating and clarifying existing coverage; there is no change in basic policy or procedure.

The changes being made by this Notice are not considered significant rules subject to FAR 1.301 or subpart 1.5. This Notice will not have an impact on a substantial number of small entities, nor does it establish any information collection as contemplated by the Regulatory Flexibility Act and Paperwork Reduction Act.

List of Subjects in 48 CFR Parts 706, 714, 715, 716, 731, 732, 736, and 752

Government procurement.

For the reasons set out in the Premable, chapter 7 of title 48 of the Code of Federal Regulations is amended as follows:

1. The authority citations in parts 706, 714, 715, 716, 731, 732, 736, and 752 continue to read as follows:

Authority: Sec. 621, Pub. L. 87–195, 75 Stat. 445 (22 U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979, 44 FR 56673, 3 CFR 1979 Comp., p. 435.

PART 706—COMPETITION REQUIREMENTS

Subpart 706.3—Other Than Full and Open Competition

2. Section 706.302–70 is amended by adding a new paragraph (c)(3) to read as follows:

706.302–70 Impairment of foreign aid programs.

* * * * *

(c) * * *

(3) The authority in 706.302–70(b)(3)(i) shall be used only when no other authority provided in FAR 6.302 or AIDAR 706.302 is suitable. The specific foreign assistance objective which would be impaired must be identified and explained in the written determination and finding. Prior consultation with the Agency Competition Advocate (see 706.501) is required before executing the written determination and finding, and this consultation must be reflected in the determination and finding.

Subpart 706.5—Competition Advocates

706.501 [Amended]

3. Section 706.501, requirement, is amended by removing all references to the "AID senior procurement executive" and replacing them with "AID Procurement Executive".

PART 714—SEALED BIDDING

Subpart 714.4—Opening of Bids and Award of Contract

714.406–3 [Amended]

4. Section 714.406–3, other mistakes disclosed before award, is amended by removing the reference to "Head of the Agency" and replacing it with "Procurement Executive".

PART 715—CONTRACTING BY NEGOTIATION

Subpart 715.6—Source Selection

5. Section 715.605–70 is revised to read as follows:

715.605–70 AID specific evaluation factors.

(a) Use of prior AID or other U.S. governmental experience as an evaluation factor is not usually appropriate. If such a criterion is proposed, its use must be approved by the Head of the Contracting Activity; no numerical value may be assigned, nor may such factor be listed as a significant evaluation factor or subfactor without the approval of the Head of the Contracting Activity.

(b) Prior overseas experience and experience in the region or country concerned is often a significant evaluation factor; when it is used, both organizational experience and experience of proposed personnel should be considered. When using prior overseas/regional/country experience as an evaluation factor, it is not to be a controlling factor and may not be assigned a value greater than 10% (e.g., 10 points in a 100 point matrix) without the approval of the cognizant Assistant Administrator or Mission Director.

PART 716—TYPES OF CONTRACTS

Subpart 716.3—Cost Reimbursement Contracts

in excess of the maximum payable annual or daily rate for a Foreign Service Officer Class FS–1, as set forth in the Uniform State/AID/USIA

10% of the base salary of the employee from date of arrival at overseas post to begin assignment to date of departure from post at the end of assignment. ORI

establishing an LOC; and § 732.406–70–5, Revocation of the LOC, are amended by removing all references to "M/FM/ PAFD", and replacing them with "PFM/

responsible for both the total AID program in the cooperating country including certain administrative responsibilities set forth in this contract, and for advising AID regarding

752.7019 Participant Training.

For use in any AID direct contract involving training of AID participants.

VOL 54 SS 212 NO 3 1989 UMI

PART 716—TYPES OF CONTRACTS

Subpart 716.3—Cost Reimbursement Contracts

6. Section 716.303 is added to read as follows:

716.303 Cost-sharing contracts.

(a) and (b) [Reserved]

(c) *Limitations.* In addition to the limitations specified in FAR 16.301–3, prior approval of the AID Procurement Executive (see 702.170–13) is required in order to use a cost-sharing contract with an educational institution.

PART 731—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 731.2—Contracts With Commercial Organizations

7. Section 731.205–6 is amended by revising paragraph (a)(3)(i) to read as follows:

731.205–6 Compensation for personal services.

(a) * * *

(3) * * *

(i) If a contractor employee serving overseas under a contract does not qualify for the exemption for overseas income provided under section 911 of the U.S. Internal Revenue Code (26 U.S.C. 911), such employee is eligible to receive an overseas recruitment incentive (ORI), to the extent the ORI: is authorized by the contractor's normal policy and practice; is deemed necessary by the contractor to recruit and retain qualified employees for overseas services; and does not exceed 10% of the base salary of the employee from date of arrival at overseas post to begin assignment to date of departure from post at the end of assignment. ORI is to be paid as a single payment at the end of the employee's tour of duty overseas. The Contractor shall take all reasonable and prudent steps to ensure that ORI is not paid to any employee who has received the IRS section 911 exemption.

* * * * *

Subpart 731.3—Contracts With Educational Institutions

8. Section 731.371 is amended by revising paragraph (a) and paragraph (c)(1) to read as follows:

731.371 Compensation for personal services.

(a) *Salary.* (1) Specific limitations on compensation for personal services are set forth in the contract clauses specified in subsection 752.7007. Contracting Officer approval of salaries in excess of the maximum payable annual or daily rate for a Foreign Service Officer Class FS–1, as set forth in the Uniform State/AID/USIA Regulation, as from time to time amended, will be based upon a memorandum from the technical office and approved by the Assistant Administrator or Mission Director having program responsibility for the project in support of which the contract is written. The technical office is responsible for evaluating the reasonableness of the proposed salary, taking into account such factors as the degree of technical competence required, the scope of supervisory responsibilities involved, the relationship of the proposed salary level to the contractor's customary salary level, and other pertinent information. Copies of all memoranda approved by the Assistant Administrator or Mission Director will be furnished to the Procurement Support Division, Office of Procurement.

(2) In considering consulting income as a factor when determining allowable salary for service under a contract:

(i) For faculty members working under annual appointments, salary for service under the contract may include the employee's on-campus salary plus "consulting income" (that is, income from employment other than the employee's regular on-campus appointment, excluding business or other activities not connected with the employee's profession) earned during the year preceding employment under the contract.

(ii) For faculty members working under academic year appointments, salary for service under the contract may include the employee's on-campus academic year salary plus "consulting income" as defined above earned during the year preceding employment under the contract, or salary for service under the contract may be derived by annualizing the academic year salary (in which case "consulting income" may not be included).

* * * * *

(c) * * *

(1) If a contractor employee serving overseas under a contract does not qualify for the exemption for overseas income provided under section 911 of the U.S. Internal Revenue Code (26 U.S.C. 911), such employee is eligible to receive an overseas recruitment incentive (ORI), to the extent the ORI: is authorized by the contractor's normal policy and practice; is deemed necessary by the contractor to recruit and retain qualified employees for overseas service; and does not exceed 10% of the base salary of the employee from date of arrival at overseas post to begin assignment to date of departure from post at the end of assignment. ORI is to be paid as a single payment at the end of the employee tour of duty overseas. The contractor shall take all reasonable and prudent steps to ensure that ORI is not paid to any employee who has received the IRS section 911 exemption.

* * * * *

Subpart 731.7—Contracts With Nonprofit Organizations

9. Section 731.772 is amended by revising paragraph (c)(1) to read as follows:

731.772 Compensation for personal services.

* * * * *

(c) * * *

(1) If a contractor employee serving overseas under a contract does not qualify for the exemption for overseas income provided under section 911 of the U.S. Internal Revenue Code (26 U.S.C. 911), such employee is eligible to receive an overseas recruitment incentive (ORI), to the extent the ORI: is authorized by the contractor's normal policy and practice; is deemed necessary by the contractor to recruit and retain qualified employees for overseas services; and does not exceed 10% of the base salary of the employee from date of arrival at overseas post to begin assignment to date of departure from post at the end of assignment. ORI is to be paid as a single payment at the end of the employee tour of duty overseas. The contractor shall take all reasonable and prudent steps to ensure that ORI is not paid to any employee who has received the IRS secion 911 exemption.

* * * * *

PART 732—CONTRACT FINANCING

Subpart 732.4—Advance Payments

732.406–70–2 [Amended]

10. Paragraph (c) of § 732.406–70–2, Circumstances for use of an LOC, is amended by removing the reference to "Program Accounting and Finance Division (M/FM/PAFD)", and replacing it with "Cash Management and Payment Division (PFM/FM/CMP)".

732.406–70–3 and 732.406–70–5 [Amended]

11. Paragraphs (a), (b) introductory text, (b)(7), (c) introductory text, (d),(e)(1) (ii) and (iii) and (e)(2) introductory text of § 732.406–70–3, establishing an LOC; and § 732.406–70–5, Revocation of the LOC, are amended by removing all references to "M/FM/PAFD", and replacing them with "PFM/FM/CMP".

PART 736—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Subpart 736.6—Architect-Engineer Services

12. Section 736.602–2 is revised to read as follows:

736.602–2 Evaluation boards.

(a) and (b) [Reserved]

(c) each evaluation board will include a representative of the Contracting Officer and, as appropriate, the cognizant bureau.

PART 752—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 752.2—Texts of Provisions and Clauses

752.232–70 [Amended]

13. The contract clause in § 752.232–70, Letter of Credit Advance Payment, is amended as follows:

a. The contract clause date is revised from "(AUG 1984)" to "(OCT 1989)";

b. The reference to "Program Accounting and Finance Division (M/FM/PAFD)" in paragraph (a) of the contract clause is removed and replaced with "Cash Management and Payment Division (PFM/FM/CMP)"; and

c. The references to "M/FM/PAFD" in paragraphs (b) and (d) of the contract clause are removed and replaced with "PFM/FM/CMP".

Subpart 752.70—Texts of AID Contract Clauses

14. Section 752.7013 is revised to read as follows:

752.7013 Contractor-Mission Relationships.

For use in all AID contracts involving performance overseas. Note that paragraph (f) of this clause is applicable only in contracts with an educational institution.

Contractor-Mission Relationships (Oct 1989)

(a) The Contractor acknowledges that this contract is an important part of the United States Foreign Assistance Program and agrees that its operations and those of its employees in the Cooperating Country will be carried out in such a manner as to be fully commensurate with the responsibility which this entails.

(b) The Mission Director is the chief representative of AID in the Cooperating Country. In this capacity, he/she is responsible for both the total AID program in the cooperating country including certain administrative responsibilities set forth in this contract, and for advising AID regarding the performance of the work under the contract and its effect on the United States Foreign Assistance Program. Although the Contractor will be responsible for all professional, technical, and administrative details of the work called for by the contract, it shall be under the guidance of the Mission Director in matters relating to foreign policy. The Chief of Party shall keep the Mission Director currently informed of the progress of the work under the contract.

(c) In the event the conduct of any Contractor employee is not in accordance with the preceding paragraphs, the Contractor's Chief of Party shall consult with the Mission Director and the employee involved and shall recommend to the Contractor a course of action with regard to such employee.

(d) The parties recognize the right of the U.S. Ambassador to direct the removal from a country of any U.S. citizen or the discharge from this contract of any third-country national or cooperating-country national when, at the discretion of the Ambassador, the interests of the United States so require. Under these circumstances termination of an employee and replacement by an acceptable substitute shall be at no cost to AID.

(e) If it is determined that the services of such employee shall be terminated, the Contractor shall use its best efforts to cause the return of such employee to the United States or point of origin as appropriate.

[The following paragraph (f) is applicable if the contract is with an educational institution:]

(f) It is understood by the parties that the Contractor's responsibilities shall not be restrictive of academic freedom. Notwithstanding these academic freedoms, the Contractor's employees, while in the Cooperating Country, are expected to show respect for its conventions, customs, and institutions, to abide by applicable laws and regulations, and not to interfere in its internal political affairs.

[End of clause]

752.7018 [Amended]

15. The contract clause in section 752.7018, Health and Accident Coverage for AID Participant Trainees, is amended as follows:

a. The contract clause date is revised from "(AUG 1984)" to "(OCT 1989)";

b. The reference to "M/FM/PAFD" in paragraph (d) introductory text of the contract clause is removed and replaced with "PFM/FM/CMP"; and

c. The reference to "Program Accounting and Finance Division" in paragraph (d)(1) of the clause is removed and replaced with "Cash Management and Payment Division".

16. Section 752.7019 is revised to read as follows:

752.7019 Participant Training.

For use in any AID direct contract involving training of AID participants. Note that paragraphs (d) through (g) of this clause are applicable only when the contract is with an educational institution.

Participant Training (Oct 1989)

(a) *Definitions.* (1) Participant training is the training of any foreign national outside of his or her home country, using AID funds.

(2) A Participant is any foreign national being trained under this contract outside of his or her country.

(b) *Applicable regulations.* Proposals for contracts involving training of AID participants, and participant training conducted under an AID contract shall follow the policies established in AID Handbook 10—"Participant Training," except to the extent that specific exceptions to AID Handbook 10 have been provided in this contract. (Handbook 10 may be obtained by submitting a request to the Office of International Training, at the address specified in paragraph (c) of this section.)

(c) *Reporting requirement.* Once each month the Contractor shall submit three copies of form AID 1361–4, "Participant Data Form" to the Office of International Training, AID, Washington, DC 20523.

[The following paragraphs (d) through (g) are applicable if this contract is with an educational institution.]

(d) To the extent foreign country national training is authorized in the schedule of this contract, the contractor shall be reimbursed for the following reasonable and allocable costs incurred in providing training and observation to participants in the United States or other approved location:

(1) Customary tuition and fees of the institution in which the training takes place, as published in catalogs and announcements.

(2) Typing of papers and allowances for required textbooks, the titles of which will be approved by the Contractor.

(3) Travel within the United States or other countries (other than the country of the participant), as approved by the Contractor, including the cost of travel from port of entry into the United States to Contractor's campus to port of embarkation from the United States.

(4) Subsistence while in the United States or in third countries not to exceed maximum AID rates established in AID Handbook 10, as from time to time amended.

(5) Other direct costs authorized in the operational plan or otherwise determined by the Contracting Officer to be allowable in accordance with the general provisions clause of this contract entitled "Allowable Cost and Payment".

(e) Health and accident coverage for foreign-country nationals is governed by the clause of this contract entitled "Health and Accident Coverage for AID Participant Trainees."

(f) For participants assigned to the Contractor for whom specifically-designed courses not otherwise covered in paragraph (d)(1) of this clause are authorized, the

Contractor shall be paid the following in lieu of the costs authorized in paragraph (d)(1) of this clause.

(1) For not exceeding 20 instructional days (days on which such courses are scheduled to meet and are actually conducted):

(i) One participant: $150 for the first day, and $50 per day for each additional day, up to 19 days.

(ii) Groups up to and including 10 participants: for the first day, $150 for the first participant, and $50 for each additional participant. For each additional day, up to 19 days, $50 for each participant.

(2) For more than 20 instructional days or more than 10 participants: The Contractor shall submit a proposal including supporting cost and pricing data to the Contracting Officer for approval.

(g) The Contractor shall prepare and submit to the Office of International Training a non-obligating Project Implementation Order/Participant, AID Form 1380–1, on all participants trained under this contract, in either the United States or a third country.

[End of clause]

17. Section 752.7026 is revised to read as follows:

752.7026 Reports.

For use in all AID contracts for technical or professional services.

Reports (Oct. 1989)

(a) *Reports required.* The Contractor shall prepare the following reports:

(1) A semi-annual, substantive report submitted within 45 days of the end of the period being covered, covering the status of the work under the contract, indicating progress, setting forth plans for the ensuing period, and including recommendations covering the current needs in the fields of activity covered under the terms of this contract.

(2) [This paragraph (a)(2) is applicable to cost reimbursement contracts only.] A semi-annual, administrative report submitted within 45 days of the end of the period being covered, covering expenditures by contract budget category, personnel employed under the contract, and foreign nationals being trained under the contract (if any).

(3) A final report which summarizes the accomplishments of the assignment, methods of work used, and recommendations regarding unfinished work and/or program continuation. The final report shall be submitted within 60 days after completion of the work hereunder unless required date of submission is extended by the Contracting Officer.

(4) Any other reports specified in the Schedule of this contract.

(b) *Distribution of reports.* Copies of reports required under paragraph (a) shall be distributed as follows:

(1) 3 copies to the Contracting Officer;

(2) 4 copies to the Project Officer; and

(3) 2 copies to the Bureau for Program and Policy Coordination, Center for Development Information and Evaluation, Development Information Division, addressed as follows: PPC/CDIE/DI, ACQUISITIONS, Room 209, SA–18, Agency for International Development, Washington, DC 20523.

(c) *General.* (1) The title page of all reports shall include a descriptive title, the author's name(s), contract number, project number and title, contractor's name, name of the AID project office, and the publication or issuance date of the report.

(2) When preparing reports, the contractor shall refrain from using elaborate art work, multicolor printing and expensive paper/binding, unless it is specifically authorized in the Contract Schedule. Wherever possible, pages should be printed on both sides using single spaced type.

[End of clause]

18. Section 752.7031 is revised to read as follows:

752.7031 Leave and Holidays.

For use in all AID cost-reimbursement contracts for technical or professional services.

Leave and Holidays (Oct. 1989)

(a) *Vacation leave.* (1) The Contractor may grant to its employees working under this contract vacations of reasonable duration in accordance with the Contractor's practice for its employees, but in no event shall such vacation leave be earned at a rate exceeding 26 work days per annum. Reimbursement for vacation leave is limited to the amount earned by employees while serving under this contract.

For regular employees during their tour of duty in the Cooperating Country, vacation leave is provided under this contract primarily for purposes of affording necessary rest and recreation. The Contractor's Chief of Party, the employee and the Cooperating Country institution associated with this project shall develop vacation leave schedules early in the employee's tour of duty taking into consideration project requirements, employee preference and other factors.

(2) Leave taken during the concluding weeks of an employee's tour shall be included in the established leave schedule and be limited to that amount of leave which can be earned during a twelve-month period unless approved in accordance with paragraph (a)(3) of this clause.

(3) Vacation leave earned but not taken by the end of the employee's tour pursuant to paragraphs (a) (1) and (2) of this clause will be forfeited unless the requirements of the project precluded the employee from taking such leave, and the Contracting Officer (with the endorsement of the Mission) approves one of the following as an alternative:

(i) Taking, during the concluding weeks of the employee's tour, leave not permitted under (a)(2) of this section, or

(ii) Lump-sum payment for leave not taken provided such leave does not exceed the number of days which can be earned by the employee during a twelve-month period.

(b) *Sick Leave.* Sick leave is earned by employees in accordance with the Contractor's usual practice but not to exceed 13 work days per annum or 4 hours every 2 weeks. Additional sick leave after use of accrued vacation leave may be advanced in accordance with Contractor's usual practice, if in the judgment of the Contractor's Chief of Party it is determined that such additional leave is in the best interest of the project. In no event shall such additional leave exceed 30 days. The Contractor agrees to reimburse AID for leave used in excess of the amount earned during the employee's assignment under this contract. Sick leave earned and unused at the end of a regular tour of duty may be carried over to an immediately-succeeding tour of duty under this contract. The use of home leave authorized under this clause shall not constitute a break in service for the purpose of sick leave carry-over. Contractor employees will not be compensated for unused sick leave at the completion of their duties under this contract.

(c) *Home leave.* (1) Home leave is leave earned for service abroad for use only in the United States, in the Commonwealth of Puerto Rico, or in the possessions of the United States.

(2) A regular employee who is a U.S. citizen or resident and has served at least 2 years overseas, as defined in paragraph (c)(4) of this clause, under this contract and has not taken more than 30 workdays leave (vacation, sick, or leave without pay) in the United States, may be granted home leave of not more than 15 calendar days for each such year of service overseas, provided that such regular employee agrees to return overseas upon completion of home leave under an additional 2 year appointment, or for a shorter period of not less than 1 year of overseas service under the contract if the Mission Director has approved in advance. Home leave must be taken in the United States, the Commonwealth of Puerto Rico, or the possessions of the United States; any days spent elsewhere will be charged to vacation leave or leave without pay.

(3) Notwithstanding the requirement in paragraph (c)(2), of this clause, that the Contractor's regular employee must have served 2 years overseas under this contract to be eligible for home leave, Contractor may grant advance home leave to such regular employee subject to all of the following conditions:

(i) Granting of advance home leave would in each case serve to advance the attainment of the objectives of this contract;

(ii) The regular employee shall have served a minimum of 18 months in the Cooperating Country on his/her current tour of duty under this contract; and

(iii) The regular employee shall have agreed to return to the Cooperating Country to serve out the remainder of his/her current tour of duty and an additional 2 year appointment under this contract, or such other additional appointment of not less than 1 year of overseas service as the Mission Director may approve.

(4) The period of service overseas required under paragraph (c)(2) or paragraph (c)(3) of this clause shall include the actual days spent in orientation in the United States (less language training) and the actual days overseas beginning on the date of departure from the United States port of embarkation on international travel and continuing, inclusive of authorized delays en route, to the date of arrival at the United States port of debarkation from international travel. Allowable vacation and sick leave taken while overseas, but not leave without pay, shall be included in the required period of service overseas. An amount equal to the number of days vacation and sick leave taken in the United States, the Commonwealth of Puerto Rico, or the possessions of the United States will be added to the required period of service overseas.

(5) Salary during travel to and from the United States for home leave will be limited to the time required for travel by the most expeditious air route. The Contractor will be responsible for reimbursing AID for salary payments made during home leave if in spite of the undertaking of the new appointment the regular employee, except for reasons beyond his/her control as determined by the Contracting Officer, does not return overseas and complete the additional required service. Unused home leave is not reimbursable under this contract.

(6) To the extent deemed necessary by the Contractor, regular employees in the United States on home leave may be authorized to spend not more than 5 days in work status for consultation at home office/campus or at AID/Washington before returning to their post of duty. Consultation at locations other than AID/Washington or home office/campus, as well as any time in excess of 5 days spent for consultation, must be approved by the Mission Director or the Contracting Officer.

(7) Except as provided in the schedule or approved by the Mission Director or the Contracting Officer, home leave is not authorized for TCN or CCN employees.

(d) *Holidays.* Holidays for Contractor employees serving in the United States shall be in accordance with the Contractor's established policy and practice. Holidays for Contractor employees serving overseas should take into consideration local practices and shall be established in collaboration with the Mission Director.

(e) *Military leave.* Military leave of not more than 15 calendar days in any calendar year may be granted in accordance with the Contractor's usual practice to each regular employee whose appointment is not limited to 1 year or less and who is a reservist of the United States Armed Forces, provided that such military leave has been approved in advance by the cognizant Mission Director or Assistant Administrator. A copy of any such approval shall be provided to the Contracting Officer.

(f) *Leave Records.* The Contractor's leave records shall be preserved and made available as part of the contractor's records which are required to be preserved and made available by the Examination of Records by the Comptroller General and Audit clauses of this contract.

[End of Clause]

Dated: October 24, 1989.

John F. Owens,

Procurement Executive.

Proposed Rules

Federal Register
Vol. 54, No. 212
Friday, November 3, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Chapter I

Issuance of Quarterly Report on the Regulatory Agenda

AGENCY: Nuclear Regulatory Commission.

ACTION: Issuance of regulatory agenda.

SUMMARY: The Nuclear Regulatory Commission (NRC) has issued the NRC Regulatory Agenda for the third quarter, July through September, of 1989. The agenda is issued to provide the public with information about NRC's rulemaking activities. Each issue of the agenda includes information for one quarter of the calendar year. The agenda briefly describes and gives the status for each rule that the NRC is considering, has proposed, or has published with an effective date. It also describes and gives the status of each petition for rulemaking that the NRC is considering.

ADDRESS: A copy of this report, designated NRC Regulatory Agenda (NUREG–0936) Vol. 8, No. 3, is available for inspection, and copying for a fee, at the Nuclear Regulatory Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC.

In addition, the U.S. Government Printing Office (GPO) sells the NRC Regulatory Agenda. To purchase it, a customer may call (202) 275–2060 or (202) 275–2171 or write to the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013–7082.

FOR FURTHER INFORMATION CONTACT: Michael T. Lesar, Chief, Rules Review Section, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 492–7758, toll-free number (800) 368–5642

Dated at Bethesda, Maryland, this 24th day of October 1989.

For the Nuclear Regulatory Commission.

Donnie H. Grimsley,

Director, Division of Freedom of Information and Publications Services, Office of Administration.

BILLING CODE 7590–01–M

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Part 3

[Docket No. 89–14]

Minimum Capital Ratio

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of the Comptroller of the Currency ("OCC") is proposing to amend its capital regulation in 12 CFR part 3. Primarily, this amendment would (1) make the definition of capital in 12 CFR 3.2 and in the OCC's risk-based capital guidelines consistent by replacing the definitions of primary and secondary capital with Tier 1 and Tier 2 capital, respectively and (2) change the minimum capital requirement in 12 CFR 3.6 to 3.0% Tier 1 capital-to-total assets (the leverage ratio). The new minimum leverage ratio would operate in conjunction with the OCC's risk-based capital guidelines and would limit the amount of leverage a national bank can undertake. The intended effect of this amendment is to ensure the continued safety and soundness of the national banking system. Certain technical amendments to Interpretive Ruling 3.100 are also proposed in this notice.

DATE: Comments must be submitted on or before January 2, 1990.

ADDRESS: Comments should be mailed or delivered to Docket No. 89–14, Communications Division, 5th Floor, 490 L'Enfant Plaza East, SW., Washington, DC 20219, Attention: Jacqueline England. Comments will be available for inspection and photocopying at this address.

FOR FURTHER INFORMATION CONTACT: Jennifer C. Kelly, National Bank Examiner, Supervision Policy/Research Division, (202) 447–1164; Mark D. Winer, Senior Financial Economist, Economic and Policy Analysis Division, (202) 447–1924; or Robert J. Roth, Attorney, Legal Advisory Services Division, (202)447–1880.

SUPPLEMENTARY INFORMATION:

Background

Since the early 1980s, the OCC has analyzed the capital adequacy of national banks using minimum ratios of primary and total capital to total assets. Similar standards are used by the other Federal bank regulatory agencies. In early 1989, the OCC, the Federal Deposit Insurance Corporation, and the Board of Governors of the Federal Reserve System adopted a risk-based capital standard for all commercial banks. The OCC's final risk-based capital guidelines were published on January 27, 1989 (54 FR 4168). That standard becomes effective for all national banks on December 31, 1990.

When the OCC published its risk-based capital proposal on March 15, 1988, (53 FR 8550), it raised the possibility that the existing minimum capital requirements in 12 CFR part 3 would be replaced by an 8.0 percent minimum risk-based capital standard. However, the OCC stated that, if it determined that a minimum leverage ratio should be retained in addition to risk-based capital, the definition of capital might be modified to be consistent with the one contained in the risk-based capital guidelines. *Id.*

The OCC received 122 comments in response to the risk-based capital proposal. Sixteen commenters discussed whether a minimum leverage ratio should remain in place alongside the new risk-based capital standard. That is, these commenters addressed the issue of whether there should be "tandem capital ratios," with one ratio calculated as a percentage of total assets and the other ratio based on a bank's risk-weighted assets. Most commenters stated that the existing capital requirements should be phased out as quickly as possible to avoid what they perceived as a potentially burdensome dual system of capital maintenance. These commenters stated that retaining a leverage constraint might decrease the incentive offered by

the risk-based capital system to minimize credit risk. They argued that the risk-based test is a superior measure of capital adequacy and, in order to operate effectively, it must not be constrained by the imposition of a separate minimum leverage ratio.

One commenter suggested that some minimum amount of capital should be required in response to the hypothetical possibility of a zero capital requirement. The commenter stated that some capital protection is needed against losses that might result from errors in management judgment, or from any number of other risks not recognized by risk-based capital—*e.g.*, fiduciary liability, underwriting liability, or employee dishonesty. Several commenters addressed the concern about the potential for a zero capital requirement and pointed out that the lower yields associated with relatively riskless assets serve as an inherent constraint against unrestricted growth.

On a related point, another commenter mentioned that, even if the OCC eliminated the present capital adequacy requirements, it should continue using the existing definition of capital for lending limits and other statutory and/or regulatory limits that are based on a bank's capital and/or capital and surplus. The rationale behind this comment was that the existing definition allows banks to include the entire amount of their allowance for loan and lease losses ("ALLL") in capital. The commenter stated that the full ALLL should be included for these purposes, because it is all available to meet risks associated with these statutory and regulatory limitations.

When the final risk-based capital guidelines were published on January 27, 1989, the OCC announced its decision to supplement risk-based capital with a minimum leverage ratio for the following reasons. First, the 8.0 percent minimum risk-based capital standard is designed principally as a measure of credit risk; therefore, there are a number of other banking risks that it does not address—*e.g.*, interest rate risk, operational risk and asset concentrations. Second, the leverage ratio, because it is based upon total, rather than risk-adjusted, assets, will eliminate the possibility for significant leverage that exists under the risk-based capital guidelines.

In order to implement that decision, the OCC, in this notice, is proposing to change the definition of capital in Part 3 to be consistent with the risk-based capital guidelines and adjust the minimum leverage ratio required by 12 CFR part 3. (The definitions of Tier 1 and Tier 2 capital are in § 3.2 of the attached amendments section.) The OCC believes that the changes in the definition of capital, the implementation of a risk-based capital standard, and the proposed minimum leverage ratio together will ensure sufficient capital for national banks. Therefore, the OCC is proposing that the revised leverage ratio become effective concurrent with risk-based capital guidelines on December 31, 1990. Until that date, the current capital requirements based on primary and total capital will remain effective.

This notice of proposed rulemaking also includes technical changes to the OCC's Interpretive Ruling 3.100 (*See* 12 CFR 3.100), which interprets the statutory terms "capital" and "surplus." However, it is not envisioned that these changes would have any substantive impact on those definitions. Thus, it is not intended that this rulemaking would have any effect on the lending limit or other activities that are limited by statute or regulation as a percentage of "capital" and/or "surplus."

Proposed Amendments

Minimum Capital Requirements

The OCC, like other domestic and foreign bank regulators, believes that a bank's capital requirement should be related to the risk associated with its assets and off-balance sheet activities, along with appropriate consideration of other relevant factors. Therefore, the risk-based capital standard, when it becomes effective on December 31, 1990, will be the OCC's primary focus in evaluating the adequacy of a national bank's capital. However, in addition to the minimum risk-based capital requirement, the OCC is proposing to retain a minimum leverage ratio. Under this proposal, a bank would have to meet both the minimum risk-based capital standard and the minimum leverage ratio. A bank that satisfies one minimum requirement, but not the other, would have to raise capital or adjust its portfolio so that it meets both of the requirements. Taken together, the tandem capital requirements establish a coherent, rational approach to bank capital regulation.

Illustration of Tandem Capital Requirements

The clearest way to demonstrate the combined effect of the risk-based capital guidelines and the proposed leverage ratio is with the assistance of some simple illustrations. The data needed to calculate capital ratios for three sample banks are presented in table 1.

TABLE 1.—CAPITAL AND ASSET DATA FOR ILLUSTRATIVE BANKS

[In millions of dollars]

	Bank #1	Bank #2	Bank #3
Tier 1 Capital	500	10	2
Tier 2 Capital	250	[1].875	[2].3
Risk Weighted Assets	10,000	70	25
Total Assets	10,000	100	100

[1] The actual allowance for loan and lease losses is 1 million dollars or one percent of total assets (.01×100=1). However, one-eighth of this is ineligible for inclusion in Tier 2 capital because it exceeds 1.25 percent of risk-weighted assets. These percentages are representative of the average community bank.

[2] In this case, 70 percent of the allowance for loan and lease losses is ineligible for Tier 2 capital because it exceeds 1.25 percent of risk-weighted assets.

Bank #1 is a hypothetical multinational bank. This bank has significant Tier 2 capital made up of the allowance for loan and lease losses, subordinated debt, and preferred stock. The bank also has significant off-balance sheet activities. The inclusion of off-balance sheet activities makes the risk adjusted assets approximately equal to total assets.

Bank #2 is a typical community bank. It has no Tier 2 capital other than the allowance for loan and lease losses. The risk-weighted assets are significantly lower than total assets because (1) many of the bank's assets are in the 50 percent or 20 percent risk-weight categories and (2) almost all of the bank's off-balance sheet activities receive a zero percent conversion factor.

Bank #3 is also a community bank. It is assumed that this bank is trying to minimize its capital levels. It has adopted a two-part strategy of reducing its capital level and rearranging its balance sheet into extremely low risk-weighted assets. The OCC does not expect banks to respond to the risk-based capital guidelines in this fashion. If a bank were to structure its assets in this manner, the proposed leverage ratio is designed to insure adequate capital.

TABLE 2.—CAPITAL RATIOS

	Bank #1 (percent)	Bank #2 (percent)	Bank #3 (percent)
Tier 1 Capital: Risk-Weighted Assets	5.0	14.3	8.0
Tier 1+Tier 2: Risk-Weighted Assets	7.5	15.5	9.2
Tier 1 Capital: Total Assets	5.0	10.0	2.0

VOL
54

NO
3
1989
UMI

The multinational bank does not meet the minimum capital requirements, even though it meets the minimum leverage ratio. It does not have sufficient capital to meet the 8.0 percent minimum total capital to risk-weighted assets ratio. The bank would have to increase Tier 1 capital, increase Tier 2 capital, decrease its assets or off-balance sheet activities, or rearrange its portfolio into lower risk weight categories to meet the minimum capital requirements. Because the risk-based capital requirements only account for credit risk, this bank also would likely be required to increase its capital levels beyond the 8.0 percent minimum to provide sufficient protection from the other risks inherent in the bank's activities.

Bank #2 has sufficient capital to meet all regulatory requirements. Like most community banks, it is currently operating well above minimum regulatory requirements. We would not expect such a bank to decrease its capital levels solely in response to the new minimum capital requirements.

The second community bank has significantly decreased its capital levels, but, because of changes in its portfolio, the bank continues to meet the risk-based capital requirements. However, it does not meet the minimum leverage ratio requirement. This bank would be forced to shrink its asset size or increase its Tier 1 capital to meet minimum capital requirements. In addition, because many of the items in the low-risk-weight categories may have significant interest rate risk (*e.g.*, mortgage-backed securities), this bank would likely be required to increase its capital levels well above the regulatory minimums.

Improved Capital Standards

Taken as a whole, the new capital framework is designed to strengthen capital in the national banking system by making two important changes. First, risk-based capital provides a refined methodology for relating capital adequacy to the individual risk profile of a particular bank. Second, the new definitions of capital utilized in both the risk-based capital guidelines and the proposed minimum leverage ratio reflect a more stringent capital standard with a strong emphasis on the purest forms of equity capital. This approach significantly reduces the ability of banks to use "soft" capital in fulfilling their capital requirements.

The minimum leverage ratio (capital-to-total assets) is in 12 CFR part 3. The OCC is proposing to amend the minimum capital ratio contained in 12 CFR 3.6 to a level that reflects the impact of the change in the definition of capital and the fact that it will be operating in tandem with the risk-based capital standard. The OCC, in evaluating this issue, contemplated several alternatives to the current minimum capital ratios found in 12 CFR 3.6.

After evaluating the alternatives, the OCC is proposing that, as of December 31, 1990, a national bank will have to satisfy both the minimum risk-based capital standard (7.25 percent until December 31, 1992 and thereafter, 8.0 percent) and the 3.0 percent Tier 1 capital-to-total assets.[2]

Capital standards must provide adequate protection against insolvency. They become counterproductive when they become so burdensome that they deny a bank the ability to compete or to provide a sufficient return to attract investors. The combination of risk-based capital and the proposed leverage ratio together with the new definition of capital provide an adequate level of capital protection for national banks.

Because of the significant changes in the definition of capital, the existing primary and total capital standards are not directly comparable to the proposed 3.0 percent leverage ratio. The definition of Tier 1 capital emphasizes equity capital by not including a number of items that are presently included in primary capital. For example, the allowance for loan and lease losses, cumulative perpetual preferred stock, and mandatory convertible debt which are included in primary capital, are not included in Tier 1 capital. Therefore, one cannot state categorically whether a 3.0 percent leverage ratio is more or less stringent than the current capital requirements. Furthermore, since the proposed leverage ratio would operate in conjunction with risk-based capital, it is inappropriate to view the proposed 3.0 percent Tier 1 requirement as the sole determination of capital adequacy. In fact, in most instances, the amount of capital required under the risk-based capital guidelines will exceed the amount required by the proposed 3.0 percent leverage ratio.

The OCC expects that many more banks will have more difficulty attaining the minimum capital requirements under the new tandem system than under the existing system and that overall, more capital will be required in the national banking system for all banks to meet minimum capital requirements.

The OCC considered, among other options, proposing to maintain the current 6.0 percent capital standard (consisting of 5.5 percent primary capital and 0.5 percent secondary capital), while substituting the new definitions of Tier 1 and Tier 2 capital for primary and secondary capital respectively. On the surface, a 6.0 percent minimum leverage ratio appears to resemble the current total capital requirement. However, because the new capital definitions place several restrictions on particular components that do not exist in the current capital requirements, a revised 6.0 percent leverage ratio using the new definitions would be significantly more severe than the current capital requirements. As a result, maintaining the minimum leverage ratio at 6.0 percent would have two undesirable effects. First, it would require a number of adequately capitalized banks to raise additional capital. Second, it, rather than the risk-based capital standard, would become the operative capital standard for most banks. This is contrary to the OCC's intention for the risk-based capital standard to be the primary focus in the evaluation of capital adequacy.

By limiting the minimum leverage ratio to Tier 1 capital, the OCC would require banks to have pure equity that is readily available to absorb losses. This approach is consistent with the OCC's recently proposed rule on equity insolvency that would change the definition of net worth for the purpose of declaring a national bank insolvent. *See* 54 FR 28072 (July 5, 1989). At present, the OCC declares a bank insolvent under the net worth standard when its primary capital is depleted. As proposed, the OCC would declare a bank insolvent when its equity capital, as opposed to primary capital, is exhausted. The major difference between the use of primary capital and equity capital as the insolvency standard is the exclusion from capital of the bank's allowance for loan and lease losses ("ALLL").

In addition to the capital standards prescribed by the OCC, every national bank must maintain an ALLL that adequately covers the reasonably anticipated losses in its loan portfolio. The OCC will continue to assess the adequacy of a bank's ALLL, relative to the quality of its assets, as part of the normal regulatory supervision of each institution. Thus, the ALLL provides an additional cushion that is available to supplement the protection offered by

[2] The total assets figure, used as the denominator of the leverage ratio, would be calculated by making the following adjustments to the average total assets figure reported in the bank's most recent Call Report. The period-end balance of the allowance for loan and lease losses would be added to the bank's average total assets, which does not include the allowance, and any intangible assets that have been deducted from Tier 1 capital, would also be deducted from average total assets.

both the risk-based capital standard and the proposed leverage ratio.

The minimum leverage ratio represents a floor below which capital may not decrease; the actual capital a bank will be required to hold will be at least as great as the amount that meets the risk-based capital standard and the leverage ratio. However, it is important to note that these capital requirements are minimums. As they have in the past, many banks, on their own initiative, will maintain capital levels that exceed the minimums. Additionally, the OCC will continue to assess both the quality of risk management systems and the level of overall risk in individual banks through the supervisory process and, as at present, will require additional capital as warranted. In other words, the OCC's final supervisory judgment on a bank's capital adequacy, in terms of both risk-based capital and the minimum leverage ratio, will still be based on an assessment of the relevant factors present in each bank and, in the case of most banks, will be higher than the regulatory minimums.

Transition Period

The transition period, announced upon adoption of the risk-based capital guidelines, provides banks with adequate time to raise additional capital or to make changes in the volume or structure of their assets and off-balance sheet activities in anticipation of the new capital standards. If adopted, these amendments to 12 CFR part 3 would become effective on December 31, 1990, and would coincide with the effective date of the risk-based capital guidelines. Therefore, as of that date, banks would be required (1) to comply with the provisions of the risk-based capital guidelines and, (2) to maintain a minimum leverage ratio of at least 3.0 percent Tier 1 capital-to-total assets.

Other Changes

The OCC is also proposing to add a new paragraph prior to paragraph (a) of § 3.100 and to make a few minor, technical corrections in that interpretive ruling. Paragraphs (a) and (c) of § 3.100 are the regulatory provisions interpreting the statutory terms "capital" and "surplus" respectively. The new paragraph, as proposed, will clarify that the definitions of § 3.100 are solely for use in determining statutory limits that are based on the amount of a bank's "capital," and/or "surplus," not its risk-based capital or minimum leverage ratios. Therefore, the proposal will not have any effect on either a bank's lending limit or the size of transactions a bank can permissibly conduct with its affiliates—the two most widely used limits calculated as a percentage of a bank's capital and surplus.

The proposal also amends certain other provisions of 12 CFR part 3 to make the risk-based capital guidelines an essential component in the process of establishing a bank's required minimum capital level. For example, a specific reference to Appendix A of part 3 (risk-based capital guidelines) has been added to § 3.8. That section gives the OCC the authority to establish a higher minimum capital requirement for an individual bank. The proposal makes Appendix A to part 3 an integral component of the formalized establishment of minimum capital ratios for an individual bank under subpart C of 12 CFR part 3. The incorporation of the risk-based capital guidelines into 12 CFR part 3 does not represent a substantive change as Appendix A is binding on national banks when it becomes effective.

Issues for Specific Comment

The OCC is seeking comments on all aspects of the proposed amendments to 12 CFR part 3. The agency especially invites comments on the following issues:

1. The proposed amendments set the minimum leverage ratio at 3.0 percent Tier 1 capital-to-total assets. The OCC is seeking comment on whether a different minimum leverage ratio, for example, 3.0 percent Tier 1 capital-to-total assets *and* 6.0 percent total (Tier 1 plus Tier 2) capital-to-total assets, would be more effective.

2. The proposed amendments do not envision making any substantive changes in the current definition of capital and surplus for the purposes of various statutory limits, such as the lending limit. The OCC is seeking comment on whether it should adjust the definition of capital and surplus in order to have a consistent regulatory definition of capital.

Regulatory Flexibility Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act, the Comptroller of the Currency certifies that these changes, if adopted, will not have a significant economic impact on a substantial number of small entities. Accordingly, a Regulatory Flexibility Analysis is not required.

Executive Order 12291

The OCC has determined that this proposal does not constitute a major rule within the meaning of Executive Order 12291. Accordingly, a Regulatory Impact Analysis will not be required on the grounds that this revision (1) would not have an annual effect on the economy of $100 million or more, (2) would not result in a major increase in the cost of bank operations or governmental supervision, and (3) would not have a significant adverse effect on competition (foreign or domestic), employment, investment, productivity, or innovation.

List of Subjects in 12 CFR Part 3

National banks, Capital, Leverage, Risk.

Authority and Issuance

For the reasons set forth in the preamble, title 12, chapter I, part 3 of the Code of Federal Regulations is proposed to be amended as follows:

PART 3—[AMENDED]

1. The authority citation for part 3 continues to read as follows:

Authority: 12 U.S.C. 1 *et seq.*, 93a, 161, 1818; and 12 U.S.C. 3907 and 3909.

2. Section 3.1 is revised to read as follows:

§ 3.1 Authority.

This part is issued under the authority of 12 U.S.C. 1 *et seq.*, 93a, 161, 1818; and the International Lending Supervision Act of 1983 (Pub. L. 98-181, Title IX, 97 Stat. 1153), 12 U.S.C. 3907 and 3909.

2. Section 3.2, paragraphs (a), (c), (d) and (e) are revised to read as follows:

§ 3.2 Definitions.

For the purposes of this part:

(a) *"Adjusted total assets"* means the average total assets figure required to be computed for and stated in a bank's most recent quarterly "Consolidated Report of Condition and Income" (Call Report), plus the end-of-quarter allowance for loan and lease losses, minus end-of quarter intangible assets that are deducted from Tier 1 capital. The OCC reserves the right to require a bank to compute and maintain its capital ratios on the basis of actual, rather than average, total assets when necessary to carry out the purposes of this regulation.

(b) • • •

(c) *"Tier 1 capital"* means the sum of paragraphs (c) (1), (2), (3) and (4) of this section.

(1) Common stockholders' equity;

(2) Noncumulative perpetual preferred stock and related surplus, excluding preferred stock issues where the dividend rate is reset periodically based upon current market conditions and the bank's current credit rating, including but not limited to Dutch auction, money market or remarketable preferred stock; and

(3) Minority interests in the equity accounts of consolidated subsidiaries.

(4) Deductions from Tier 1 capital:

(i) Unidentifiable intangibles, (*e.g.*,

instruments must meet the following criteria:[1]

(i) The instrument must be unsecured,

Tier 1 capital until December 31, 1992. However, when combined with other qualifying intangible assets, these intangibles are limited to 25 percent of

minimum capital ratios for an individual bank above the ratios that would otherwise be applicable to the bank under § 3.6 or appendix A to this part. The Comptroller is authorized under 12

appropriate, including the issuance of a Directive pursuant to subpart E of this part, other enforcement action, assessment of civil money penalties,

contained in § 3.2 or appendix A to this part.

• • • • • •

(3) Minority interests in the equity accounts of consolidated subsidiaries.

(4) Deductions from Tier 1 capital:

(i) Unidentifiable intangibles, (*e.g.*, goodwill), subject to the transition rules contained in § 3.3.

(ii) Identifiable intangible assets, unless they meet the following criteria:

(A) The intangible asset must be able to be separated and sold apart from the bank or from the bulk of the bank's assets;

(B) The market value of the intangible asset must be established on an annual basis through an identifiable stream of cash flows, and there must be a high degree of certainty that the asset will hold this market value notwithstanding the future prospects of the bank; and

(C) The bank must demonstrate that a market exists which will provide liquidity for the intangible asset;

(5) Intangibles which are not deducted from Tier 1 capital are limited to 25 percent of total Tier l capital; amounts in excess of 25 percent of total Tier I capital must be deducted from Tier 1 capital.

(6) Intangibles not deducted from Tier 1 capital must be valued, for capital adequacy purposes, at the lower of either their current amortized book value or their current market value established as part of the bank's annual audit.

(d) *"Tier 2 capital"* means the sum of paragraphs (d) (1), (2), (3) and (4) of this section, up to 100 percent of the bank's Tier 1 capital.

(1) Allowance for loan and lease losses, up to a maximum of 1.25 percent of risk-weighted assets; however, a national bank may deduct reserves for loan and lease losses in excess of the amount permitted to be included as capital, as well as allocated transfer risk reserves and reserves held against other real estate owned, from the gross sum of risk-weighted assets in computing the denominator of its total risk-based capital ratio;

(2) Cumulative perpetual preferred stock, long-term preferred stock, convertible preferred stock, and any related surplus, if the issuing national bank has the option to defer payment of dividends on these instruments. For long-term preferred stock, the amount that is eligible to be included as Tier 2 capital is reduced by 20 percent of the original amount of the instrument (net of redemptions) at the beginning of each of the last five years of the life of the instrument;

(3) Hybrid capital instruments, *i.e.*, those instruments that combine certain characteristics of debt and equity. To be included as Tier 2 capital, these instruments must meet the following criteria:[1]

(i) The instrument must be unsecured, subordinated to the claims of depositors and general creditors, and fully paid-up;

(ii) The instrument must not be redeemable at the option of the holder prior to maturity, except with the prior approval of the OCC;

(iii) The instrument must be available to participate in losses while the issuer is operating as a going concern (in this regard, the instrument must automatically convert to common stock or perpetual preferred stock, if the sum of the retained earnings and capital surplus accounts of the issuer shows a negative balance); and

(iv) The instrument must provide the option for the issuer to defer principal and interest payments, if

(A) The issuer does not report a net profit for the most recent combined four quarters, and

(B) The issuer eliminates cash dividends on its common and preferred stock.

(4) Term subordinated debt instruments, and intermediate-term preferred stock and related surplus are included in Tier 2 capital, but only to a maximum of 50 percent of Tier 1 capital. To be considered Tier 2 capital, term subordinated debt instruments must meet the requirements of § 3.100(f)(1). Also, at the beginning of each of the last five years of the life of either type of instrument, the amount that is eligible to be included as Tier 2 capital is reduced by 20 percent of the original amount of that instrument (net of redemptions).

(e) *"Total capital"* means the sum of Tier 1 capital and qualifying Tier 2 capital, less the following items:

(1) Investments, both equity and debt, in unconsolidated banking and finance subsidiaries that are deemed to be capital of the subsidiary—the OCC may require deduction of investments in other subsidiaries and associated companies, on a case-by-case basis; and

(2) Reciprocal holdings of bank capital instruments.

3. Section 3.3 is revised to read as follows:

§ 3.3 Transition rules.

Intangible assets, other than those that meet the criteria contained in § 3.2(c)(4)(ii), purchased prior to April 15, 1985, and accounted for in accordance with the instructions of the OCC, do not have to be deducted from Tier 1 capital until December 31, 1992. However, when combined with other qualifying intangible assets, these intangibles are limited to 25 percent of Tier 1 capital. After December 31, 1992, only those intangible assets that meet the criteria contained in § 3.2(c)(4)(ii) will not be deducted from Tier 1 capital.

4. Section 3.4 is revised to read as follows:

§ 3.4 Reservation of authority.

Notwithstanding the definitions of "Tier 1 capital" and "Tier 2 capital" in § 3.2 (c) and (d), the OCC may find that a particular type of purchased intangible asset or newly developed or modified capital instrument constitutes or may constitute "Tier 1 capital" or "Tier 2 capital", and the OCC may permit one or more banks to include all or a portion of such intangible asset or funds obtained through such capital instruments as Tier l or Tier 2 capital, permanently or on a temporary basis, for the purposes of compliance with this Part or for other purposes. Similarly, the OCC may find that a particular asset or Tier 1 or Tier 2 capital component has characteristics or terms that diminish its contribution to a bank's ability to absorb losses, and the OCC may require the discounting or deduction of such asset or component from the computation of Tier 1 or Tier 2 capital.

5. Section 3.6 is revised to read as follows:

§ 3.6 Minimum capital ratio.

National banks must have and maintain Tier 1 capital in an amount equal to at least 3.0 percent of adjusted total assets.

6. Section 3.7 is revised to read as follows:

§ 3.7 Plan to achieve minimum capital ratios.

Any bank having capital ratios less than the minimums set forth in § 3.6 and Appendix A to this part shall, within 60 days of December 31, 1990, submit to the OCC a plan describing the means and schedule by which the bank shall achieve the minimum capital ratios. The plan may be considered acceptable unless the bank is notified to the contrary by the OCC. A bank in compliance with an acceptable plan to achieve the minimum capital ratios will not be deemed to be in violation of § 3.6 or Appendix A.

7. Section 3.9 is revised to read as follows:

§ 3.9 Purpose and scope.

The rules and procedures specified in this subpart are applicable to a proceeding to establish required minimum capital ratios for an individual bank above the ratios that would otherwise be applicable to the bank under § 3.6 or appendix A to this part. The Comptroller is authorized under 12 U.S.C. 3907(a)(2) to establish such minimum capital requirements for a bank as the OCC, in its discretion, deems necessary or appropriate in light of the particular circumstances of the bank. Proceedings under this subpart also may be initiated to require a bank having capital ratios above those set forth in § 3.6, appendix A or other legal authority, to continue to maintain capital at those levels or higher levels.

8. Section 3.10 introductory text and paragraph (d) are revised to read as follows:

§ 3.10 Applicability.

Higher minimum capital ratios may be required for an individual bank when the OCC believes that the bank's capital is or may become inadequate in view of its circumstances. For example, higher capital ratios may be appropriate for:

* * * * *

(d) A bank exposed to a high degree of asset depreciation or interest rate, funding, transfer, or similar risks; or having a low level of liquid assets in relation to short term liabilities;

* * * * *

9. Section 3.12, paragraph (a) is revised to read as follows:

§ 3.12 Procedures.

(a) *Notice.* When the OCC determines that minimum capital ratios above those set forth in § 3.6, Appendix A to this part or other legal authority, are necessary or appropriate for a particular bank, the OCC will notify the bank in writing of the proposed minimum capital ratios and the date by which they should be reached (if applicable), and will provide an explanation of why the ratios proposed are considered necessary or appropriate for the bank.

* * * * *

10. Section 3.14 is revised to read as follows:

§ 3.14 Remedies.

A bank that does not have or does not maintain the minimum capital ratios applicable to it, whether established in Subpart B of this part, Appendix A to this part, in a decision pursuant to subpart C of this part, in a written agreement or temporary or final order under 12 U.S.C. 1818 (b) or (c), or in a condition for approval of an application, or a bank that has failed to submit or comply with an acceptable plan to attain those minimum capital ratios will be subject to such administrative action or sanctions as the OCC considers appropriate, including the issuance of a Directive pursuant to subpart E of this part, other enforcement action, assessment of civil money penalties, and/or the denial, conditioning, or revocation of applications. Failure to achieve or maintain these minimum capital ratios may also be the basis for an action by the Federal Deposit Insurance Corporation to terminate federal deposit insurance. *See* 12 CFR part 325.

11. Section 3.15 is revised to read as follows:

§ 3.15 Purpose and scope.

This subpart is applicable to proceedings by the OCC to issue a directive under 12 U.S.C. 3907(b)(2). A directive is an order issued to a bank that does not have or does not maintain capital at or above the minimum ratios set forth in § 3.6 or Appendix A, or established for the bank under Subpart C of this part, by a written agreement under 12 U.S.C. 1818(b), or as a condition for approval of an application. A directive may order the bank to:

(a) Achieve the minimum capital ratios applicable to it by a specified date;

(b) Adhere to a previously submitted plan to achieve the applicable capital ratios;

(c) Submit and adhere to a plan acceptable to the OCC describing the means and time schedule by which the bank shall achieve the applicable capital ratios;

(d) Take other action, such as reduction of assets or the rate of growth of assets, or restrictions on the payment of dividends, to achieve the applicable capital ratios; or

(e) A combination of any of these or similar actions.

A directive issued under this rule, including a plan submitted under a directive, is enforceable in the same manner and to the same extent as an effective and outstanding cease and desist order which has become final as defined in 12 U.S.C. 1818(k). Violation of a directive may result in assessment of civil money penalties in accordance with 12 U.S.C. 3909(d).

12. In § 3.100, introductory text is inserted immediately following the section heading and preceding paragraph (a), and paragraphs (e)(5) and (f) (1) introductory text, (2) and (3) are revised to read as follows:

§ 3.100 Capital and surplus.

For purposes of determining statutory limits that are based on the amount of a bank's "capital" and/or "surplus," the provisions of this section are to be used, rather than the definitions of capital contained in § 3.2 or appendix A to this part.

* * * * *

(e) * * *

(5) *"Mandatory convertible debt"* means subordinated debt instruments which unqualifiedly require the issuer to exchange either common or perpetual preferred stock for such instruments by a date at or before the maturity of the instrument. The maturity of these instruments must be 12 years or less. In addition, the instrument must meet requirements of paragraph (f)(1)(i) through (v) of this section for subordinated notes and debentures or other requirements published by the OCC.

* * * * *

(f) * * *

(1) *Requirements.* Issues of limited life preferred stock and subordinated notes and debentures (except mandatory convertible debt) must have original weighted average maturities of at least five (5) years to be included in the definition of "surplus." In addition, a subordinated note or debenture must also:

* * * * *

(2) *Restrictions.* The total amount of mandatory convertible debt not included in paragraph (c)(3) of this section, limited life preferred stock, and subordinated notes and debentures considered as surplus is limited to 50 percent of the sum of paragraphs (a) and (c) (1), (2) and (3) of this section.

(3) *Reservation of Authority.* In exigent circumstances, the OCC expressly reserves the authority to waive the minimum maturity requirement and the percentage restriction set forth in paragraphs (f) (1) and (2) of this section, in order to allow the inclusion of other limited life preferred stock, mandatory convertible notes and subordinated notes and debentures in the capital base of any national bank for capital adequacy purposes. The OCC further expressly reserves the authority, in exigent circumstances, to impose more stringent conditions than those set forth in paragraphs (f) (1) and (2) of this section in order for any component of Tier 1 or Tier 2 capital to be included, in whole or in part, as part of a national banking association's capital and surplus for any purpose.

Dated: October 30, 1989.

Robert L. Clarke,

Comptroller of the Currency.

[FR Doc. 89-25895 Filed 11-2-89; 8:45 am]

BILLING CODE 4810-33-M

[1] Mandatory convertible debt instruments that meet the requirements of 12 CFR 3.100(e)(5), or that have been previously approved as capital by the OCC, are treated as qualifying hybrid capital instruments.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-NM-201-AD]

Airworthiness Directives; Boeing Model 737-300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to certain Boeing Model 737-300 series airplanes, which would require a one-time inspection of the engines' nacelle strut firewall duct assemblies for proper application of firewall sealant. This proposal is prompted by a manufacturer's production report that firewall sealant may not have been applied to all the mating surfaces of the engines' nacelle strut firewall door assemblies. This condition, if not corrected, could compromise the integrity of the engines' nacelle strut firewall seal.

DATES: Comments must be received no later than December 26, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-201-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen S. Bray, Propulsion Branch, ANM-140S; telephone (206) 431-1969. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-201-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

A recent manufacturer's factory inspection revealed that firewall sealant was not applied to all the mating surfaces of the engines' nacelle strut firewall door assemblies. There must not be gaps, holes, or voids in an engine's firewall seal. This condition, if not corrected, could compromise the integrity of the engines' nacelle strut firewall seal.

The FAA has reviewed and approved Boeing Service Bulletin 737-54-1028, dated August 17, 1989, which provides instructions for the inspection of the engines' nacelle strut firewall door assemblies for proper application of the firewall sealant and application of sealant, if necessary.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require a one-time inspection of the engines' nacelle strut firewall door assemblies for proper application of the firewall sealant, and application of sealant, if necessary, in accordance with the service bulletin previously described. Additionally, this AD would require operators to report the findings of their inspection to the FAA.

There are approximately 50 Model 737-300 series airplanes of the affected design in the worldwide fleet. It is estimated that 20 airplanes of U.S. registry would be affected by this AD, that it would take approximately 2 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $1,600.

Information collection requirements contained in this regulation have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub.L. 96-511) and have been assigned OMB Control Number 2120-0056.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to Model 737-300 series airplanes, listed in Boeing Service Bulletin 737-54-1028, dated August 17, 1989, certificated in any category. Compliance required as indicated, unless previously accomplished.

To ensure the integrity of the engines' nacelle strut firewall seal, accomplish the following:

A. At the next engine removal or within one year after the effective date of this AD, which ever occurs sooner, inspect the engines' nacelle strut door assemblies for proper application of firewall sealant in accordance with Boeing Service Bulletin 737-54-1028, dated August 17, 1989. The door assemblies are located between nacelle stations 200.00 and 235.00 and attached to the underside of the strut and spar web at approximately nacelle waterline 132.00. If there are gaps, holes, or voids in the firewall sealant, apply sealant prior to further flight, in accordance with the service bulletin.

B. Within 10 days after completion of the inspection required by this AD, submit a report of findings, positive or negative, to the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region. The report must include the line number of the airplane inspected and the findings.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Seattle Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on October 26, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89-NM-208-AD]

Airworthiness Directives; Boeing Model 737-300 and 737-400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to supersede an existing airworthiness directive (AD), applicable to certain Boeing Model 737-300 and 737-400 series airplanes, which currently requires the inspection of the left and right outboard flap inboard track forward support fitting attach bolts and the replacement of all titanium bolts with steel parts. This action would require the inspection of the nuts and replacement, if necessary, with the proper steel nuts. This proposal is prompted by a report that titanium bolts with aluminum nuts instead of steel bolts and nuts may have been used to attach the outboard flap inboard track forward support fitting to the wing structure. This condition, if not corrected, could result in separation of the outboard flap from the airplane, which could adversely affect controllability.

DATES: Comments must be received no later than December 26, 1989.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-208-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Shardul R. Panchal, Airframe Branch, ANM-120S; telephone (206) 431-1954. Mailing address: FAA Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-208-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

On August 25, 1989, the FAA issued Telegraphic AD T89-18-51, applicable to certain Boeing Model 737-300 and -400 series airplanes, to require the inspection of the left and right outboard flap inboard track forward support fitting attach bolts at wing body line (WBL) 254.0 and the replacement of titanium bolts and aluminum nuts with A286 corrosion resistant (CRES) steel parts. That action was prompted by a report by the manufacturer, which indicated that titanium bolts with aluminum nuts instead of A286 CRES steel bolts and nuts may have been used to attach the outboard flap inboard track forward support fitting to the wing structure. Analysis shows that titanium bolts and aluminum nuts do not meet the strength requirements at this location and could result in failure of all four fasteners. This condition, if not corrected, could result in separation of the outboard flap from the airplane, which could adversely affect controllability.

The FAA did not require immediate inspection of the nuts in the above referenced Telegraphic AD because the probability of finding an aluminum nut on a steel bolt was sufficiently remote as to enable the FAA to allow the public an opportunity to comment; nonetheless, because such a combination could exist, however remote, this proposed action is considered necessary.

The FAA has reviewed and approved Boeing Alert Service Bulletin 737-57A1202, dated August 24, 1989, which describes procedures for the inspection, removal, and replacement of the left and right outboard flap inboard track forward fitting attach bolts and nuts.

VOL
54
SS
2
1
2
NO
3
1989
UMI

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would supersede Telegraphic AD T89-18-51 with a new airworthiness directive that, in addition to the inspection of the bolts required by AD T89-18-51, would require the inspection of the nuts (even if the part number of the bolt has been determined to be correct), in accordance with the service bulletin previously described.

This inspection would not be required if it was previously accomplished during the bolt inspection and replacement required by the existing AD.

There are approximately 763 Model 737-300 and 737-400 series airplanes of the affected design in the worldwide fleet. It is estimated that 350 airplanes of U.S. registry would be affected by this AD, that it would take approximately 50 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $700,000.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by superseding Telegraphic AD T89-18-51, issued on August 25, 1989, with the following new airworthiness directive:

Boeing: Applies to Model 737-300 and 737-400 series airplanes, line numbers 1001 through 1762, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent separation of the outboard flap from the airplane, accomplish the following:

A. Within the next 30 days after August 25, 1989 (the issuance date of Telegraphic AD T89-18-51), inspect the bolts used to secure track forward support fitting of the inboard tracks to determine the bolt head designation.

B. If a bolt other than A286 CRES steel, Boeing part number BACB30LE, is installed, replace it with a proper bolt and nut prior to next flight, in accordance with Boeing Alert Service Bulletin 737-57A1202, dated August 24, 1989. Ensure that the replacement nut is Boeing Part Number BACN10HR.

C. Within the next 1,500 cycles or 6 months after the effective date of this amendment, whichever occurs first, inspect the nuts used to secure track forward support fitting of the inboard track for proper part number designation and material, in accordance with Boeing Alert Service Bulletin 737-57A1202, dated August 24, 1989.

Note: Inspection of nuts must be accomplished even if the part numbers of the bolts were previously determined to be correct.

D. If a nut other than A286 CRES steel, Boeing part number BACN10HR, is installed, replace it with a proper nut, prior to further flight, in accordance with Boeing Alert Service Bulletin 737-57A1202, dated August 24, 1989.

E. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, Seattle Aircraft Certification Office.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on October 26, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89-NM-204-AD]

Airworthiness Directives; McDonnell Douglas Model DC-9-10, -20, and -30 Series Airplanes Equipped With a Non-ventral Aft Pressure Bulkhead

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC-9-10, -20, and -30 series airplanes, which would require more explicit aft pressure bulkhead emergency exit (tailcone exit hatch) opening instructions to be displayed on the aft side of the exit hatch. This proposal is prompted by a report of an accident in which passenger evacuation through the aft pressure bulkhead emergency exit was delayed because the opening instructions on the outside of the exit were inadequate. This condition, if not corrected, could result in delayed passenger evacuation during an emergency situation.

DATES: Comments must be received no later than December 26, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-204-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90801, Attention: Director of Publication, C1-L00 (54-60). This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Robert T. Razzeto, Aerospace Engineer, Los Angeles Aircraft Certification Office, Systems and Equipment Branch, ANM 131L, FAA, Northwest Mountain Region, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (213) 988-5355.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-204-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

In one reported accident involving a Model DC-9 series airplane, impact damage and debris in the area of the aft tailcone exit hatch delayed passenger evacuation. Contributing to the delay was the fact that outside rescuers were hampered by limited visibility around the exit hatch area. The only instruction printed on the outside of the exit hatch was the word "Pull" on a placard near the exit hatch release handle. The exit hatch must be unlocked and then moved into the cabin to clear the evacuation route. After reviewing the Model DC-9 aft pressure bulkhead emergency exit installation and opening instructions, the FAA has determined that more complete opening instructions are necessary. This situation, if not corrected, could result in delay of passenger evacuation during an emergency situation.

The FAA has reviewed and approved McDonnell Douglas Service Bulletin 52-167, dated August 31, 1989, which describes procedures for installing a placard with proper exit opening instructions on the aft side of the aft pressure bulkhead emergency exit. The new placard states, "Pull handle to unlock/push door to open."

Since this situation is likely to exist on other airplanes of this same type design, an AD is proposed which would require a placard with explicit opening instructions to be installed on the aft side of the aft pressure bulkhead emergency exit, in accordance with the service bulletin previously described.

There are approximately 280 McDonnell Douglas Model DC-9-10, -20, and -30 series airplanes of the affected design in the worldwide fleet. It is estimated that 183 airplanes of U.S. registry would be affected by this AD, that it would take approximately 0.5 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Each airplane would require one placard, at an estimated cost of $29 per placard. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $3,997.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

McDonnell Douglas: Applies to Model DC-9-10, -20, and -30 series airplanes, equipped with a non-ventral aft pressure bulkhead, as listed in McDonnell Douglas Service Bulletin 52-167, dated August 31, 1989, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent delayed passenger evacuation through the aft pressure bulkhead emergency exit during an emergency evacuation, accomplish the following:

A. Within three months after the effective date of this AD, install a placard with exit opening instructions, in accordance with the Accomplishment Instructions of McDonnell Douglas Service Bulletin 52-167, dated August 31, 1989.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Los Angeles Aircraft Certification Office.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199, to operate to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90801-0001, ATTN: Director of Publications, C1-L00 (54-60). These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-NM-113-AD]

Airworthiness Directives; SAAB-Scania Model SF-340A and SAAB 340B Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental Notice of Proposed Rulemaking (NPRM); Reopening of Comment Period.

SUMMARY: This notice proposes to amend an earlier proposed airworthiness directive (AD), applicable to certain SAAB-Scania Model SF-340A series airplanes, that would have required inspection of the AC generators for modification status, and replacement of the AC generators, if necessary. This action revises the proposal to add Model SAAB 340B series airplanes to the AD applicability.

DATES: Comments must be received no later than November 30, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-113-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from SAAB-Scania AB, Product Support, S-581.88, Linkoping, Sweden. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Quam, Standardization Branch, ANM-113; telephone (206) 431-1978. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submited will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-113-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

A proposal to amend part 39 of the Federal Aviation Regulations to add an airworthiness directive which would have required inspection of AC generators on SAAB-Scania Model SF-340A series airplanes, and replacement, if necessary, was published as Notice of Proposed Rulemaking (NPRM) in the Federal Register on July 18, 1989 (54 FR 30062). That NPRM was prompted by numerous reports of failure of the AC generators due to inadequate anti-drive end bearing support. This condition, if not corrected, could result in loss of ice protection for the one engine inlet; and when combined with the loss of the other AC generator output (engine or generator system failure), could result in loss of ice protection for both engine inlets, windshields, pitot systems, alpha systems, and propeller.

Since the issuance of the proposal, SAAB-Scania has issued Service Bulletin SF340-24-016, Revision 1, dated August 28, 1989, to include Model SAAB 340B series airplanes in the effectivity. The Swedish Airworthiness Authority has classified the revised service bulletin as mandatory, and has issued Swedish Airworthiness Directive No. 1-033, Revision A, to include the additional model.

Further, two comments were received in response to the original proposal. Both commenters supported the rule, but one commenter noted that the proposed rule should be made appliable to the newly certified Model SAAB 340B series airplanes.

The FAA has determined that Model SAAB 340B series may also be subject to the unsafe condition addressed by this action. Therefore, the applicability statement in this Supplemental NPRM has been revised to include this model. Additionally, the proposed rule has been revised to require inspection of the AC generator, P/N 31342-001, for modification status, and replacement of the generator, if necessary, in accordance with SAAB-Scania Service Bulletin SF340-24-016, Revision 1, dated August 28, 1989.

Since these changes expand the scope of the proposed rule, the FAA has determined that it is necessary to reopen the comment period to provide additional time for public comment.

This airplane model is manufactured in Sweden and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

It is estimated that by December 1989, 83 airplanes of U.S. registry would be affected by this AD, that it would take approximately 3 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $9,960.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11-89.

2. By revising the Notice of Proposed Rulemaking, Docket No. 89-NM-113-AD, FR Doc. 89-16742, published in the Federal Register on July 18, 1989 (54 FR 30062), as follows:

SAAB-Scania: Applies to Model SF-340A and SAAB 340B series airplanes, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent the loss of certain ice protection systems due to AC generator failures, accomplish the following:

A. Inspect the AC generators, P/N 31342-001, for the modification status.

1. If the modification status blocks are X-stamped in the D (or later) modification status block, no further action is required.

2. If the modification status blocks are X-stamped in the A, B, or C modification status block, prior to further flight, replace the AC generator with one X-stamped in the D (or later) modification status block, in accordance with SAAB Service Bulletin SF340-24-016, Revision 1, dated August 28, 1989.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to SAAB-Scania AB, Product Support, S-581.99, Linkoping, Sweden. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on October 25, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF STATE

22 CFR Part 35

[Public Notice 1131]

RIN 1400-AA13

Program Fraud Civil Remedies Regulations

AGENCY: Department of State.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of State proposes rules to implement the Program Fraud Civil Remedies Act of 1986. The Department proposed to establish administrative procedures for imposing the statutorily authorized civil penalties and assessments against any person who makes, submits, or presents a false, fictitious, or fraudulent claim or written statement to the Department.

DATES: Comments must be submitted on or before December 4, 1989.

ADDRESSES: Comments should be sent to Jean Bailly, Office of the Legal Adviser, Room 4427A, Department of State, 2201 C Street NW., Washington, DC 20520.

FOR FURTHER INFORMATION CONTACT: Jean Bailly (202) 647-2350.

SUPPLEMENTARY INFORMATION: The Program Fraud Civil Remedies Act established a new administrative procedure as a remedy against those who knowingly make false claims or statements. The statute requires Federal agencies to follow certain procedures to recover penalties, and assessments against persons who file false claims or statements. It provides for designated investigative and reviewing officials, an administrative hearing process, and an agency appeal procedure with limited judicial review. The President's Council on Integrity and Efficiency developed draft model regulations in order to facilitate and promote uniformity in implementing the new procedure. The State Department, with minor variations, has adopted the model regulations. Consistent with the statute's requirements, the Department's proposed regulations provide that the Office of Inspector General will act as the Investigating Official; the Comptroller of the Department will act as Reviewing Official; an administrative law judge will be the Presiding Official; and the Deputy Secretary or his designee will act as Authority Head on appeals. The new administrative process should serve to deter fraud in cases where costs of litigation formerly made it uneconomical to press such claims, and should give the Department an effective remedy against persons submitting false claims to the Department.

The proposed rules would have no direct effect on the economy, or on Federal or State expenditures, and thus do not constitute a "major rule" within the meaning of section 1(b) of Executive Order 12291. Consequently, we have concluded that an initial regulatory impact analysis is not required. Nor do the requirements of the Regulatory Flexibility Act, 5 U.S.C. 605(b) apply. The proposed rules contain no information collection or recordkeeping requirements as defined by the Paperwork Reduction Act of 1978, and fall within the exceptions to coverage.

List of Subjects in 22 CFR Part 35

Administrative practice and procedure, Claims, Fraud, Penalties.

Accordingly, title 22, chapter I of the Code of Federal Regulations is proposed to be amended to add part 35 to read as follows:

PART 35—PROGRAM FRAUD CIVIL REMEDIES

Authority: 31 U.S.C. 3801–3812.

§ 35.1 General.

(a) *Basis.* This part implements the Program Fraud Civil Remedies Act of 1986, Pub. L. No. 99–509, secs. 6101–6104, 100 Stat. 1874 (October 21, 1986), to be codified at 31 U.S.C. 3801–3812. 31 U.S.C. 3809 of the statute requires each authority head to promulgate regulations necessary to implement the provisions of the statute.

(b) *Purpose.* This part establishes administrative procedures for imposing civil penalties and assessments against persons who make, submit, or present, or cause to be made, submitted, or presented, false, fictitious, or fraudulent claims or written statements to authorities or to their agents; and specifies the hearing and appeal rights of persons subject to allegations of liability for such penalties and assessments.

(c) *Special considerations abroad.* Where a party, witness or material evidence in a proceeding under these regulations is located abroad, the investigating official, reviewing official or ALJ, as the case may be, may adjust the provisions below for service, filing of documents, time limitations, and related matters to meet special problems arising out of that location.

§ 35.2 Definitions.

(a) *ALJ* means an Administrative Law Judge in the authority appointed pursuant to 5 U.S.C. 3105 or detailed to the authority pursuant to 5 U.S.C. 3344.

(b) *Authority* means the United States Department of State.

(c) *Authority head* means the Under Secretary for Management.

(d) *Benefit* means, in the context of "statement," anything of value, including but not limited to, any advantage, preference, privilege, license, permit, favorable decision, ruling, status, or loan guarantee.

(e) *Claim* means any request, demand, or submission—

(1) Made to the authority for property, services, or money (including money representing grants, loans, insurance, or benefits);

(2) Made to a recipient of property, services, or money from the authority or to a party to a contract with the authority—

(i) For property or services if the United States—

(A) Provided such property or services;

(B) Provided any portion of the funds for the purchase of such property or services; or

(C) Will reimburse such recipient or party for the purchase of such property or services; or

(ii) For the payment of money (including money representing grants, loans, insurance or benefits) if the United States—

(A) Provided any portion of the money requested or demanded; or

(B) Will reimburse such recipient or party for any portion of the money paid on such request or demand; or

(3) Made to the authority which has the effect of decreasing an obligation to pay or account for property, services or money.

(f) *Complaint* means the administrative complaint served by the reviewing official on the defendant under § 35.7.

(g) *Defendant* means any person alleged in a complaint under § 35.7 to be liable for a civil penalty or assessment under § 35.7 to be liable for a civil penalty or assessment under § 35.3.

(h) *Department* means the Department of State.

(i) *Government* means the United States Government.

(j) *Individual* means a natural person.

(k) *Initial decision* means the written decision of the ALJ required by § 35.10 or § 35.37, and includes a revised initial decision issued following a remand or a motion for reconsideration.

(l) *Investigating official* means the Inspector General of the Department of State or an officer or employee of the Office of Inspector General designated by the Inspector General and serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS–16 under the General Schedule.

(m) *Knows or has reason to know* means that a person, with respect to a claim or statement—

(1) Has actual knowledge that the claim or statement is false, fictitious, or fraudulent;

(2) Acts in deliberate ignorance of the truth or falsity of the claim or statement; or

(3) Acts in reckless disregard of the truth or falsity of the claim or statement.

(n) *Makes,* wherever it appears, shall include the terms presents, submits, and causes to be made, presented, or submitted. As the context requires, making or made, shall likewise include the corresponding forms of such terms.

(o) *Person* means any individual, partnership, corporation, association or private organization, and includes the plural of the term.

(p) *Representative* means an attorney who is a member in good standing of the bar of any state, territory, or possession of the United States, or of the District of Columbia, or the Commonwealth of Puerto Rico.

(q) *Reviewing official for the Authority* means the Counsel to the Inspector General.

(r) *Reviewing official* means the Comptroller of the Department or his designee who is—

(1) Not subject to supervision by, or required to report to, the investigating official;

(2) Not employed in the organizational unit of the authority in which the investigating official is employed; and

(3) Serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS–16 under the General Schedule.

(s) *Statement* means any representation, certification, affirmation, document, record, or accounting or bookkeeping entry made—

(1) With respect to a claim or to obtain the approval or payment of a claim (including relating to eligibility to make a claim); or

(2) With respect to (including relating to eligibility for)—

(i) A contract with, or a bid or proposal for a contract with; or

(ii) A grant, loan or benefit from, the authority, or any state, political subdivision of a state, or other party, if the United States Government provides any portion of the money or property under such contract or for such grant, loan, or benefit, or if the Government will reimburse such state, political subdivision, or party for any portion of the money or property under such contract of for such grant, loan, or benefit.

§ 35.3 Basis for civil penalties and assessments.

(a) *Claims* (1) Except as provided in paragraph (c) of this section, any person who makes a claim that the person knows or has reason to know the following shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than $5,000 for each such claim:

(i) Is false, fictitious, or fraudulent;

(ii) Includes or is supported by any written statement which asserts a material fact which is false, fictitious, or fraudulent;

(iii) Includes or is supported by any written statement that—

(A) Omits a material fact;

(B) Is false, fictitious, or fraudulent as a result of such omission, and

(C) Is a statement in which the person making the statement has a duty to include such material fact; or

(iv) Is for payment for the provision of property or services which the person has not provided as claimed—

(2) Each voucher, invoice, claim form, or other individual request or demand for property, services, or money constitutes a separate claim.

(3) A claim shall be considered made to the authority, recipient, or party when such claim is actually made to an agent, fiscal intermediary, or other entity, including any state or political subdivision thereof, acting for or on behalf of the authority, recipient, or party.

(4) Each claim for property, services, or money is subject to a civil penalty regardless of whether such property, services, or money is actually delivered or paid.

(5) If the Government has made any payment (including transferred property or provided services) on a claim, a person subject to a civil penalty under paragraph (a)(1) of this section to an assessment of not more than twice the amount of such claim or that portion thereof that is determined to be in violation of paragraph (a)(1) of this section. Such assessment shall be in lieu of damages sustained by the Government because of such claim.

(b) *Statements.* (1) Except as provided in paragraph (c) of this section, any person who makes a written statement that—

(i) The person knows or has reason to know—

(A) Asserts a material fact which is false, fictitious, or fraudulent; or

(B) Is false, fictitious, or fraudulent because it omits a material fact that the person making the statement has a duty to include in such statement; and

(ii) Contains or is accompained by an express certification or affirmation of the truthfulness and accuracy of the contents of the statement, shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than $5,000 for each such statement.

(2) Each written representation, certification, or affirmation constitutes a separate statement.

(3) A statement shall be considered made to the authority when such statement is actually made to an agent, fiscal intermediary, or other entity, including any state or political subdivision thereof, acting for or on behalf of the authority.

(c) No proof of specific intent to defraud is required to establish liability under this section.

(d) In any case in which it is determined that more than one person is liable for making a claim or statement under this section, each such person may be held liable for a civil penalty under this section.

(e) In any case in which it is determined that more than one person is liable for making a claim under this section on which the Government has made payment (including transferred property or provided services), an assessment may be imposed against any such person or jointly and severally against any combination of such persons.

§ 35.4 Investigation.

(a) If an investigating official concludes that a subpoena pursuant to the authority conferred by 31 U.S.C. 3804(a) is warranted—

(1) The subpoena so issued shall notify the person to whom it is addressed of the authority under which the subpoena is issued (and, in the case of a subpoena to be served outside the jurisdiction of the United States, the basis for such service), and shall identify the records or documents sought;

(2) The investigating official may designate a person to act on his or her behalf to receive the documents sought; and

(3) The person receiving such subpoena shall be required to tender to the investigating official or the person designated to receive the documents a certification that the documents sought have been produced, or that such documents are not available and the reasons therefore, or that such documents, suitably identified, have been withheld based upon the assertion of an identified privilege.

(b) If the investigating official concludes that an action under the Program Fraud Civil Remedies Act may be warranted, the investigating official shall submit a report containing the findings and conclusions of such investigation to the reviewing official.

(c) Nothing in this section shall preclude or limit an investigating official's discretion to refer allegations directly to the Department of Justice for suit under the False Claims Act or other civil relief, or to preclude or limit such official's discretion to defer or postpone a report or referral to the reviewing official to avoid interference with a criminal investigation or prosecution.

(d) Nothing in this section modifies any responsibility of an investigating official to report violations of criminal law to the Attorney General.

§ 35.5 Review by the reviewing official.

(a) If, based on the report of the investigating official under § 35.4(b), the reviewing official determines that there is adequate evidence to believe that a person is liable under § 35.3 of this part, the reviewing official shall transmit to the Attorney General a written notice of the reviewing official's intention to issue a complaint under § 35.7.

(b) Such notice shall include—

(1) A statement of the reviewing official's reasons for issuing a complaint;

(2) A statement specifying the evidence that supports the allegations of liability;

(3) A description of the claims or statements upon which the allegations of liability are based;

(4) An estimate of the amount of money or the value of property, services, or other benefits requested or demanded in violation of § 35.3;

(5) A statement of any exculpatory or mitigating circumstances that may relate to the claims or statements known by the reviewing official or the investigating official; and

(6) A statement that there is a reasonable prospect of collecting an appropriate amount of penalties and assessments. Such a statement may be based upon information indicating that the person may be unable to pay such an amount.

§ 35.6 Prerequisites for issuing a complaint.

(a) The reviewing official may issue a complaint under § 35.7 only if—

(1) The Department of Justice approves the issuance of a complaint in a written statement described in 31 U.S.C. 3803(b)(1); and

(2) In the case of allegations of liability under § 35.3(a) with respect to a claim, the reviewing official determines that, with respect to such claim or a group of related claims submitted at the same time such claim is submitted (as defined in paragraph (b) of this section), the amount of money or the value of property or services demanded or

requested in violation of § 35.3(a) does not exceed $150,000.

(b) For purposes of this section, a related group of claims submitted at the same time shall include only those claims arising from the same transaction (*e.g.*, grant loan, application, or contract) that are submitted simultaneously as part of a single request, demand or submission.

(c) Nothing in this section shall be construed to limit the reviewing official's authority to join in a single complaint against a person's claims that are unrelated or were not submitted simultaneously, regardless of the amount of money, or the value of property or services, demanded or requested.

§ 35.7 Complaint.

(a) On or after the date the Department of Justice approves the issuance of a complaint in accordance with 31 U.S.C. 3803(b)(1), the reviewing official may serve a complaint on the defendant, as provided in § 35.8

(b) The complaint shall state—

(1) The allegations of liability against the defendant, including the statutory basis for liability, an identification of the claims or statements that are the basis for the alleged liability, and the reasons why liability allegedly arises from such claims or statements;

(2) The maximum amount of penalties and assessments for which the defendant may be held liable;

(3) Instructions for filing an answer to request a hearing, including a specific statement of the defendant's right to request a hearing by filing an answer and to be represented by a representative; and

(4) That failure to file an answer within 30 days of service of the complaint will result in the imposition of the maximum amount of penalties and assessments without right to appeal, as provided in § 35.10.

(c) At the same time the reviewing official serves the complaint, he or she shall serve the defendant with a copy of these regulations.

§ 35.8 Service of complaint.

(a) Service of a complaint must be made by certified or registered mail or by delivery in any manner authorized by Rule 4(d) of the Federal Rules of Civil Procedure. Service is complete upon receipt.

(b) Proof of service, stating the name and address of the person on whom the complaint was served, and the manner and date of service, may be made by—

(1) Affidavit of the individual serving the complaint by delivery;

(2) A United States Postal Service return receipt card acknowledging receipt;

(3) Written acknowledgment of receipt by the defendant or his representative; or

(4) In case of service abroad authenticated in accordance with the Convention on the Service Abroad of Judicial and Extra Judicial Documents in Civil or Commercial Matters.

§ 35.9 Answer.

(a) The defendant may request a hearing by filing an answer with the reviewing official within 30 days of service of the complaint. An answer shall be deemed to be a request for hearing.

(b) In the answer, the defendant—

(1) Shall admit or deny each of the allegations of liability made in the complaint;

(2) Shall state any defense on which the defendant intends to rely;

(3) May state any reasons why the defendant contends that the penalties and assessments should be less than the statutory maximum; and

(4) Shall state the name, address and telephone number of the person authorized by the defendant to act as defendant's representative, if any.

(c) If the defendant is unable to file an answer meeting the requirements of paragraph (b) of this section within the time provided, the defendant may, before the expiration of 30 days from service of the complaint, file with the reviewing official a general answer denying liability and requesting a hearing, and a request for an extension of time within which to file an answer meeting the requirements of paragraph (b) of this section. The reviewing official shall file promptly with the ALJ the complaint, the general answer denying liability, and the request for an extension of time as provided in § 35.10. For good cause shown, the ALJ may grant the defendant up to 30 additional days within which to file an answer meeting the requirements of paragraph (b) of this section.

§ 35.10 Default upon failure to file an answer.

(a) If the defendant does not file an answer within the time prescribed in § 35.9(a), the reviewing official may refer the complaint to the ALJ.

(b) Upon the referral of the complaint, the ALJ shall promptly serve on defendant in the manner prescribed in § 35.8, a notice that an initial decision will be issued under the section.

(c) If the defendant fails to answer, the ALJ shall assume the facts alleged in the complaint to be true, and, if such facts established liability under § 35.3, the ALJ shall issue an initial decision imposing the maximum amount of penalties and assessments allowed under the statute.

(d) Except as otherwise provided in this section, by failing to file a timely answer, the defendant waives any right to further review of the penalties and assessments imposed under paragraph (c) of this section, and the initial decision shall become final and binding upon the parties 30 days after it is issued.

(e) If, before such an initial decision becomes final, the defendant files a motion with the ALJ seeking to reopen on the grounds that extraordinary circumstances prevented the defendant from filing an answer, the initial decision shall be stayed pending the ALJ's decision on the motion.

(f) If, on such motion, the defendant can demonstrate extraordinary circumstances excusing the failure to file a timely answer, the ALJ shall withdraw the initial decision in paragraph (c) of this section, if such a decision has been issued, and shall grant the defendant an opportunity to answer the complaint.

(g) A decision of the ALJ denying a defendant's motion under paragraph (e) of this section is not subject to reconsideration under § 35.38.

(h) The defendant may appeal to the authority head, the decision denying a motion to reopen by filing a notice of appeal with the authority head within 15 days after the ALJ denies the motion. The timely filing of a notice of appeal shall stay the initial decision until the authority head decides the issue.

(i) If the defendant files a timely notice of appeal with the authority head, the ALJ shall forward the record of the proceeding to the authority head.

(j) The authority head shall decide expeditiously whether extraordinary circumstances excuse the defendant's failure to file a timely answer based solely on the record before the ALJ.

(k) If the authority head decides that extraordinary circumstances excused the defendant's failure to file a timely answer, the authority head shall remand the case to the ALJ with instructions to grant the defendant an opportunity to answer.

(l) If the authority head decides that the defendant's failure to file a timely answer is not excused, the authority head shall reinstate the initial decision of the ALJ, which shall become final and binding upon the parties 30 days after the authority head issues such decision.

§ 35.11 Referral of complaint and answer to the ALJ.

Upon receipt of an answer, the reviewing official shall file the complaint and answer with the ALJ.

§ 35.12 Notice of hearing.

(a) When the ALJ receives the complaint and answer, the ALJ shall promptly serve a notice of hearing upon the defendant in the manner prescribed by § 35.8. At the same time, the ALJ shall send a copy of such notice to the representative for the Authority.

(b) Such notice shall include—

(1) The tentative time and place, and the nature of the hearing;

(2) The legal authority and jurisdiction under which the hearing is to be held;

(3) The matters of fact and law to be asserted;

(4) A description of the procedures for the conduct of the hearing;

(5) The name, address, and telephone number of the representative of the Government and of the defendant, if any; and

(6) Such other matters as the ALJ deems appropriate.

§ 35.13 Parties of the hearing.

(a) The parties to the hearing shall be the defendant and the Authority.

(b) Pursuant to 31 U.S.C. 3730(c)(5), a private plaintiff under the False Claims Act may participate in these proceedings to the extent authorized by the provisions of that Act.

§ 35.14 Separation of functions.

(a) The investigating official, the reviewing official, and any employee or agent of the authority who takes part in investigating, preparing, or presenting a particular case may not, in such case or a factually related case—

(1) Participate in the hearing as the ALJ;

(2) Participate or advise in the initial decision or the review of the initial decision by the authority head, except as a witness or a representative in public proceedings; or

(3) Make the collection of penalties and assessments under 31 U.S.C. 3806.

(b) The ALJ shall not be responsible to, or subject to the supervision or direction of the investigating official or the reviewing official.

(c) Except as provided in paragrah (a) of this section, the representative for the Government may be employed anywhere in the authority, including in the offices of either the investigating official or the reviewing official.

§ 35.15 Ex parte contacts.

No party or person (except employees of the ALJ's office) shall communicate in any way with the ALJ on any matter at issue in a case, unless on notice and opportunity for all parties to participate. This provision does not prohibit a person or party from inquiring about the status of a case or asking routine questions concerning administrative functions or procedures.

§ 35.16 Disqualification of reviewing official or ALJ.

(a) A reviewing official or ALJ in a particular case may disqualify himself or herself at any time.

(b) A party may file with the ALJ a motion for disqualification of a reviewing official or an ALJ. Such motion shall be accompanied by an affidavit alleging personal bias or other reason for disqualification.

(c) Such motion and affidavit shall be filed promptly upon the party's discovery of reasons requiring disqualification, or such objections shall be deemed waived.

(d) Such affidavit shall state specific facts that support the party's belief that personal bias or other reason for disqualification exists and the time and circumstances of the party's discovery of such facts. It shall be accompanied by a certificate of the representative of record that it is made in good faith.

(e) Upon the filing of such a motion and affadavit, the ALJ shall proceed no further in the case until he or she resolves the matter of disqualification in accordance with paragraph (f) of this section.

(f) If the ALJ—

(1) Determines that a reviewing official is disqualified, the ALJ shall dismiss the complaint without prejudice;

(2) Disqualifies himself or herself, the case shall be reassigned promptly to another ALJ; or

(3) Denies a motion to disqualify, the authority head may determine the matter only as part of his or her review of the initial decision upon appeal, if any.

§ 35.17 Rights of parties.

Except as otherwise limited by this part, all parties may—

(a) Be accompanied, represented, and advised by a representative;

(b) Participate in any conference held by the ALJ;

(c) Conduct discovery;

(d) Agree to stipulations of fact or law, which shall be made part of the record;

(e) Present evidence relevant to the issues at the hearing;

(f) Present and cross-examine witnesses;

(g) Present oral arguments at the hearing as permitted by the ALJ; and

(h) Submit written briefs and proposed findings of fact and conclusions of law after the hearing.

§ 35.18 Authority of the ALJ.

(a) The ALJ shall conduct a fair and impartial hearing, avoid delay, maintain order, and assure that a record of the proceeding is made.

(b) The ALJ has the authority to—

(1) Set and change the date, time, and place of the hearing upon reasonable notice to the parties;

(2) Continue or recess the hearing in whole or in part for a reasonable period of time;

(3) Hold conferences to identify or simplify the issues, or to consider other matters that may aid in the expeditious disposition of the proceeding;

(4) Administer oaths and affirmations;

(5) Issue subpoenas to be served within the United States requiring the attendance of witnesses and the production of documents at depositions or at hearings. Subpoenas to be served outside the jurisdiction of the United States shall state on their face the authority therefore;

(6) Rule on motions and other procedural matters;

(7) Regulate the scope and timing of discovery;

(8) Regulate the course of the hearing and the conduct of representatives and parties;

(9) Examine witnesses;

(10) Receive, rule on, exclude, or limit evidence;

(11) Upon motion of a party, take official notice of facts;

(12) Upon motion of a party, decide cases, in whole or in part, by summary judgment where there is no disputed issue of material fact;

(13) Conduct any conference, argument, or hearing on motions in person or by telephone; and

(14) Exercise such other authority as is necessary to carry out the responsibilities of the ALJ under this part.

(c) The ALJ does not have the authority to find treaties and other international agreements or federal statutes or regulations invalid.

§ 35.19 Prehearing conferences.

(a) The ALJ may schedule prehearing conferences as appropriate.

(b) Upon the motion of any party, the ALJ shall schedule at least one prehearing conference at a reasonable time in advance of the hearing.

(c) The ALJ may use prehearing conferences to discuss the following:

(1) Simplification of the issues;

(2) The necessity or desirability of amendments to the pleadings, including the need for a more definite statement;

(3) Stipulations and admissions of fact

§ 35.21 Discovery.

(a) The following types of discovery are authorized:

(1) Requests for production of

shall make available to all other parties for inspection and copying.

an individual under the control of a party may be served within the United States by first class mail.

mileage need not accompany the subpoena.

alleged, and shall be filed with the ALJ and served on all other parties.

(2) The necessity or desirability of amendments to the pleadings, including the need for a more definite statement;

(3) Stipulations and admissions of fact or as to the contents and authenticity of documents;

(4) Whether the parties can agree to submission of the case on a stipulated record;

(5) Whether a party chooses to waive appearance at an oral hearing and to submit only documentary evidence (subject to the objection of other parties) and written argument;

(6) Limitation of the number of witnesses;

(7) Scheduling dates for the exchange of witness lists and of proposed exhibits;

(8) Discovery;

(9) The time and place for the hearing; and

(10) Such other matters as may tend to expedite the fair and just disposition of the proceedings.

(d) The ALJ may issue an order containing all matters agreed upon by the parties or ordered by the ALJ at a prehearing conference.

§ 35.20 Disclosure of documents.

(a) Upon written request to the reviewing official, the defendant may review any relevant and material documents, transcripts, records, and other materials that relate to the allegations set out in the complaint and upon which the findings and conclusions of the investigating official under § 35.4(b) are based, unless such materials are subject to a privilege under federal law or classified pursuant to Executive Order. Upon payment of fees for duplication, the defendant may obtain copies of such documents.

(b) Upon written request to the reviewing official, the defendant also may obtain a copy of all exculpatory information in the possession of the reviewing official or investigating official relating to the allegations in the complaint, even if it is contained in a document that would otherwise be privileged. If the document would otherwise be privileged, only that portion containing exculpatory information must be disclosed.

(c) The notice sent to the Attorney General from the reviewing official as described in § 35.5 is not discoverable under any circumstances.

(d) The defendant may file a motion to compel disclosure of the documents subject to the provisions of this section. Such a motion may only be filed with the ALJ following the filing of an answer pursuant to § 35.9.

§ 35.21 Discovery.

(a) The following types of discovery are authorized:

(1) Requests for production of documents for inspection and copying;

(2) Requests for admissions of the authenticity of any relevant document or of the truth of any relevant fact;

(3) Written interrogatories; and

(4) Depositions.

(b) For the purpose of this section and §§ 35.22 and 35.23, the term "documents" includes information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence. Nothing contained herein shall be interpreted to require the creation of a document.

(c) Unless mutually agreed to by the parties, discovery is available only as ordered by the ALJ. The ALJ shall regulate the timing of discovery.

(d) Motions for discovery. (1) A party seeking discovery may file a motion with the ALJ. Such a motion shall be accompanied by a copy of the requested discovery, or in the case of depositions, a summary of the scope of the proposed deposition.

(2) Within ten days of service, a party may file an opposition to the motion and/or a motion for protective order as provided in § 35.24.

(3) The ALJ may grant a motion for discovery only if he finds that the discovery sought—

(i) Is necessary for the expeditious, fair, and reasonable consideration of the issues;

(ii) Is not unduly costly or burdensome;

(iii) Will not unduly delay the proceeding; and

(iv) Does not seek privileged or classified information.

(4) The burden of showing that discovery should be allowed is on the party seeking discovery.

(5) The ALJ may grant discovery subject to a protective order under § 35.24.

(e) Depositions. (1) If a motion for deposition is granted, the ALJ shall issue a subpoena for the deponent, which may require the deponent to produce documents. The subpoena shall specify the time and place at which the deposition will be held.

(2) The party seeking to depose shall serve the subpoena in the manner prescribed in § 35.6.

(3) The deponent may file with the ALJ a motion to quash the subpoena or a motion for a protective order within ten days of service.

(4) The party seeking to depose shall provide for the taking of a verbatim transcript of the deposition, which it shall make available to all other parties for inspection and copying.

(f) Each party shall bear its own costs of discovery.

§ 35.22 Exchange of witness lists, statements and exhibits.

(a) At least 15 days before the hearing or at such other time as may be ordered by the ALJ, the parties shall exchange witness lists, copies of prior statements of proposed witnesses, and copies of proposed hearing exhibits, including copies of any written statements that the party intends to offer in lieu of live testimony in accordance with § 35.33(b). At the time the above documents are exchanged, any party that intends to rely on the transcript of deposition testimony in lieu of live testimony at the hearing, if permitted by the ALJ, shall provide each party with a copy of the specific pages of the transcript it intends to introduce into evidence.

(b) If a party objects, the ALJ shall not admit into evidence the testimony of any witness whose name does not appear on the witness list or any exhibit not provided to the opposing party as provided above unless the ALJ finds good cause for the failure or that there is no prejudice to the objecting party.

(c) Unless another party objects within the time set by the ALJ, documents exchanged in accordance with paragraph (a) of this section shall be deemed to be authentic for the purpose of admissibility at the hearing.

§ 35.23 Subpoenas for attendance at hearing.

(a) A party wishing to procure the appearance and testimony of any individual at the hearing may request that the ALJ issue a subpoena.

(b) A subpoena requiring the attendance and testimony of an individual may also require the individual to produce documents at the hearing.

(c) A party seeking a subpoena shall file a written request therefore not less than 15 days before the day fixed for the hearing unless otherwise allowed by the ALJ for good cause shown. Such request shall specify any documents to be produced and shall designate the witnesses and describe the address and location thereof with sufficient particularity to permit such witness to be found.

(d) The subpoena shall specify the time and place at which the witness is to appear and any documents the witness is to produce.

(e) The party seeking the subpoena shall serve it in the manner prescribed in § 35.6. A subpoena on a party or upon an individual under the control of a party may be served within the United States by first class mail.

(f) A party or the individual to whom the subpoena is directed may file with the ALJ a motion to quash the subpoena within ten days after service or on or before the time specified in the subpoena for compliance if it is less than ten days after service.

§ 35.24 Protective order.

(a) A party or a prospective witness or deponent may file a motion for a protective order with respect to discovery sought by an opposing party or with respect to the hearing, seeking to limit the availability or disclosure of evidence.

(b) In issuing a protective order, the ALJ may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, including one or more of the following:

(1) That the discovery not be had;

(2) That the discovery may be had only on specified terms and conditions, including a designation of the time or place;

(3) That the discovery may be had only through a method of discovery other than that requested;

(4) That certain matters not be inquired into, or that the scope of discovery be limited to certain matters;

(5) That discovery be conducted with on one present except persons designated by the ALJ;

(6) That the contents of discovery or evidence be sealed;

(7) That a deposition after being sealed be opened only by order of the ALJ;

(8) That a trade secret or other confidential research, development, commercial information, classified material, or facts pertaining to any criminal investigation, proceeding, or other administrative investigation not be disclosed or be disclosed only in a designated way; or

(9) That the parties simultaneously file specified documents or information enclosed in sealed envelopes to be opened as directed by the ALJ.

§ 35.25 Fees.

The party requesting a subpoena shall pay the cost of the fees and mileage of any witness subpoenaed in the amounts that would be payable to a witness in a proceeding in the United States District Court. A check for witness fees and mileage shall accompany the subpoena when served, except that when a subpoena is issued on behalf of the authority, a check for witness fees and mileage need not accompany the subpoena.

§ 35.26 Form, filing and service of papers.

(a) *Form.* (1) Documents filed with the ALJ shall include an original and two copies.

(2) Every pleading and paper filed in the proceeding shall contain a caption setting forth the title of the action, the case number assigned by the ALJ, a designation of the paper (*e.g.*, motion to quash subpoena), and shall be in English or accompanied by an English translation.

(3) Every pleading and paper shall be signed by, and shall contain the address and telephone number of the party or the person on whose behalf the paper was filed, or his or her representative.

(4) Papers are considered filed when they are mailed. Date of mailing may be established by a certificate from the party or its representative or by proof that the document was sent by certified or registered mail.

(b) *Service.* A party filing a document with the ALJ shall, at the time of filing, serve a copy of such document on every other party. Service upon any party of any document other than the complaint or notice of hearing, shall be made by delivering or mailing a copy to the party's last known address. When a party is represented by a representative, service shall be made upon such representative in lieu of the actual party.

(c) *Proof of service.* A certificate of the individual serving the document by personal delivery or by mail, setting forth the manner of service, shall be proof of service.

§ 35.27 Computation of time.

(a) In computing any period of time under this part or in an order issued thereunder, the time begins with the day following the act, event, or default, and includes the last day of the period, unless it is a Saturday, Sunday, or legal holiday observed by the Federal Government, in which event it includes the next business day.

(b) When the period of time allowed is less than seven days, intermediate Saturdays, Sundays, and legal holidays observed by the Federal Government shall be excluded from the computation.

(c) Where a document has been served or issued by mail, or by airmail abroad, an additional five days will be added to the time permitted for any response.

§ 35.28 Motions.

(a) Any application to the ALJ for an order or ruling shall be by motion. Motions shall state the relief sought, the authority relied upon, and the facts alleged, and shall be filed with the ALJ and served on all other parties.

(b) Except for motions made during a prehearing conference or at the hearing, all motions shall be in writing. The ALJ may require that oral motions be reduced to writing.

(c) Within 15 days after a written motion is served, or such other time as may be fixed by the ALJ, any party may file a response to such motion.

(d) The ALJ may not grant a written motion before the time for filing responses thereto has expired, except upon consent of the parties or following a hearing on the motion, but may overrule or deny such motion without awaiting a response.

(e) The ALJ shall make a reasonable effort to dispose of all outstanding motions prior to the beginning of the hearing.

§ 35.29 Sanctions.

(a) The ALJ may sanction a person, including any party or representative for—

(1) Failing to comply with an order, rule, or procedure governing the proceeding;

(2) Failing to prosecute or defend an action; or

(3) Engaging in other misconduct that interferes with the speedy, orderly, or fair conduct of the hearing.

(b) Any such sanction, including but not limited to those listed in paragraphs (c), (d), and (e) of this section, shall reasonably relate to the severity and nature of the failure or misconduct.

(c) When a party fails to comply with an order, including an order for taking a deposition, the production of evidence within the party's control, or a request for admission, the ALJ may—

(1) Draw an inference in favor of the requesting party with regard to the information sought;

(2) In the case of requests for admission, deem each matter of which an admission is requested to be admitted;

(3) Prohibit the party failing to comply with such order from introducing evidence concerning, or otherwise relying upon, testimony relating to the information sought; and

(4) Strike any part of the pleadings or other submissions of the party failing to comply with such request.

(d) If a party fails to prosecute or defend an action under this part commenced by service of a notice of hearing, the ALJ may dismiss the action or may issue an initial decision imposing penalties and assessments.

(e) The ALJ may refuse to consider any motion, request, response, brief or

VOL 54 NO 3 1989 ISS 212 UMI

other document which is not filed in a timely fashion.

§ 35.30 The hearing and burden of proof.

(a) The ALJ shall conduct a hearing on the record in order to determine whether the defendant is liable for a civil penalty or assessment under § 35.3 and, if so, the appropriate amount of any such civil penalty or assessment considering any aggravating or mitigating factors.

(b) The authority shall prove defendant's liability and any aggravating factors by a preponderance of the evidence.

(c) The defendant shall prove any affirmative defenses and any mitigating factors by a preponderance of the evidence.

(d) The hearing shall be open to the public unless otherwise ordered by the ALJ for good cause shown.

§ 35.31 Determining the amount of penalties and assessments.

(a) In determining an appropriate amount of civil penalties and assessments, the ALJ and the authority head, upon appeal, should evaluate any circumstances that mitigate or aggravate the violation and should articulate in their opinions the reasons that support the penalties and assessments they impose. Because of the intangible costs of fraud, the expense of investigating such conduct, and the need to deter others who might be similarly tempted, ordinarily double damages and a significant civil penalty should be imposed.

(b) Although not exhaustive, the following factors are among those that may influence the ALJ and the authority head in determining the amount of penalties and assessments to impose with respect to the misconduct (*i.e.*, the false, fictitious, or fraudulent claims or statements) charged in the complaint:

(1) The number of false, fictitious, or fraudulent claims or statements;

(2) The time period over which such claims or statements were made;

(3) The degree of the defendant's culpability with respect to the misconduct;

(4) The amount of money or the value of the property, services, or benefit falsely claimed;

(5) The value of the Government's actual loss as a result of the misconduct, including foreseeable consequential damages and the costs of investigation;

(6) The relationship of the amount imposed as civil penalties to the amount of the Government's loss;

(7) The potential or actual impact of the misconduct upon national defense, public health or safety, or public confidence in the management of government programs and operations, including particularly the impact on the intended beneficiaries of such programs;

(8) Whether the defendant has engaged in a pattern of the same or similar misconduct;

(9) Whether the defendant attempted to conceal the misconduct;

(10) The degree to which the defendant has involved others in the misconduct or in concealing it;

(11) Where the misconduct of employees or agents is imputed to the defendant, the extent to which the defendant's practices fostered or attempted to preclude such misconduct;

(12) Whether the defendant cooperated in or obstructed an investigation of the misconduct;

(13) Whether the defendant assisted in identifying and prosecuting other wrongdoers;

(14) The complexity of the program or transaction, and the degree of the defendant's sophistication with respect to it, including the extent of the defendant's prior participation in the program or in similar transactions;

(15) Whether the defendant has been found, in any criminal, civil, or administrative proceeding to have engaged in similar misconduct or to have dealt dishonestly with the Government of the United States or of a state, directly or indirectly; and

(16) The need to deter the defendant and others from engaging in the same or similar misconduct.

(c) Nothing in this section shall be construed to limit the ALJ or the authority head from considering any other factors that in any given case may mitigate or aggravate the offense for which penalties and assessments are imposed.

§ 35.32 Location of hearing.

(a) The hearing may be held—

(1) In any judicial district of the United States in which the defendant resides or transacts business;

(2) In any judicial district of the United States in which the claim or statement in issue was made; or

(3) In such other place within the United States as may be agreed upon by the defendant and the ALJ.

(b) Each party shall have the opportunity to present argument with respect to the location of the hearing.

(c) The hearing shall be held at the place and at the time ordered by the ALJ.

§ 35.33 Witnesses.

(a) Except as provided in paragraph (b) of this section, testimony at the hearing shall be given orally by witnesses under oath or affirmation.

(b) At the discretion of the ALJ, testimony may be admitted in the form of a written statement or deposition. Any such written statement must be provided to all other parties along with the last known address of such witness, in a manner which allows sufficient time for other parties to subpoena such witness for cross-examination at the hearing. Prior written statements of witnesses proposed to testify at the hearing and deposition transcripts shall be exchanged as provided in § 35.22(a).

(c) The ALJ shall exercise reasonable control over the mode and order of interrogating witnesses and presenting evidence in order to make—

(1) The interrogation and presentation effective for the ascertainment of the truth;

(2) To avoid needless consumption of time; and

(3) To protect witnesses from harassment or undue embarrassment.

(d) The ALJ shall permit the parties to conduct such cross-examination as may be required for a full and true disclosure of the facts.

(e) At the discretion of the ALJ, a witness may be cross-examined on matters relevant to the proceeding without regard to the scope of his or her direct examination. To the extent permitted by the ALJ, cross-examination on matters outside the scope of direct examination shall be conducted in the manner of direct examination and may proceed by leading questions only if the witness is a hostile witness, an adverse party, or a witness identified with an adverse party.

(f) Upon motion of any party, the ALJ shall order witnesses excluded so that they cannot hear the testimony of other witnesses. This rule does not authorize exclusion of—

(1) A party who is an individual;

(2) In the case of a party that is not an individual, an officer or employee of the party designated by the party's representative; or

(3) An individual whose presence is shown by a party to be essential to the presentation of its case, including an individual employed by the Government engaged in assisting the representative for the Government.

§ 35.34 Evidence.

(a) The ALJ shall determine the admissibility of evidence.

(b) Except as provided herein, the ALJ shall not be bound by the Federal Rules of Evidence. However, the ALJ may apply the Federal Rules of Evidence where appropriate, *e.g.*, to exclude unreliable evidence.

(c) The ALJ shall exclude irrelevant and immaterial evidence.

(d) Although relevant, evidence may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or by considerations of undue delay or needless presentation of cumulative evidence.

(e) Although relevant, evidence may be excluded if it is classified or otherwise privileged under Federal law.

(f) Evidence concerning offers or compromise or settlement shall be inadmissible to the extent provided in Rule 408 of the Federal Rules of Evidence.

(g) The ALJ shall permit the parties to introduce rebuttal witnesses and evidence.

(h) All documents and other evidence offered or taken for the record shall be open to examination by all parties, unless otherwise ordered by the ALJ pursuant to § 35.24.

§ 35.35 The record.

(a) The hearing will be recorded and transcribed. Transcripts may be obtained following the hearing from the ALJ at a cost not to exceed the actual cost of duplication.

(b) The transcript of testimony, exhibits and other evidence admitted at the hearing, and all papers and requests filed in the proceeding constitute the record for the decision by the ALJ and the authority head.

(c) The record may be inspected and copied (upon payment of a reasonable fee) by anyone, unless otherwise ordered by the ALJ pursuant to § 35.24.

§ 35.36 Post-hearing briefs.

The ALJ may require the parties to file post-hearing briefs. In any event, any party may file a post-hearing brief. The ALJ shall fix the time for filing such briefs, not to exceed 60 days from the date the parties receive the transcript of the hearing or, if applicable the stipulated record. Such briefs may be accompanied by proposed findings of fact and conclusions of law. The ALJ may permit the parties to file reply briefs.

§ 35.37 Initial decision.

(a) The ALJ shall issue an initial decision based only on the record, which shall contain findings of fact, conclusions of law, and the amount of any penalties and assessments imposed.

(b) The findings of fact shall include a finding on each of the following issues:

(1) Whether the claims or statements identified in the complaint, or any portions thereof, violate § 35.3; and

(2) If the person is liable for penalties or assessments, the appropriate amount of any such penalties or assessments considering any mitigating or aggravating factors that he or she finds in the case, such as those described in § 35.31.

(c) The ALJ shall promptly serve the initial decision on all parties within 90 days after the time for submission of post-hearing briefs and reply briefs (if permitted) has expired. The ALJ shall at the same time serve all defendants with a statement describing the right of any defendant determined to be liable for a civil penalty or assessment to file a motion for reconsideration with the ALJ or a notice of appeal with the authority head. If the ALJ fails to meet the deadline contained in this paragraph, he or she shall notify the parties of the reason for the delay and shall set a new deadline.

(d) Unless the initial decision of the ALJ is timely appealed to the authority head, or a motion for reconsideration of the initial decision is timely filed, the initial decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after it is issued by the ALJ.

§ 35.38 Reconsideration of initial decision.

(a) Except as provided in paragraph (d) of this section, any party may file a motion for reconsideration of the initial decision within 20 days of receipt of the initial decision. If service was made by mail within the United States, receipt will be presumed to be five days from the date of mailing in the absence of contrary proof.

(b) Every such motion must set forth the matters claimed to have been erroneously decided and the nature of the alleged errors. Such motion shall be accompanied by a supporting brief.

(c) Responses to such motions shall be allowed only upon request of the ALJ.

(d) No party may file a motion for reconsideration of an initial decision that has been revised in response to a previous motion for reconsideration.

(e) The ALJ may dispose of a motion for reconsideration by denying it or by issuing a revised initial decision.

(f) If the ALJ denies a motion for reconsideration of the initial decision, the initial decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after the ALJ denies the motion, unless the initial decision is timely appealed to the authority head in accordance with § 35.39.

(g) If the ALJ issues a revised initial decision, that decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after it is issued, unless it is timely appealed to the authority head in accordance with § 35.39.

§ 35.39 Appeal to authority head.

(a) Any defendant who has filed a timely answer and who is determined in an initial decision to be liable for a civil penalty or assessment may appeal such decision to the authority head by filing a notice of appeal with the authority head in accordance with this section.

(b) (1) No notice of appeal may be filed until the time period for filing a motion for reconsideration under § 35.38 has expired.

(2) If a motion for reconsideration is timely filed, a notice of appeal must be filed within 30 days after the ALJ denies the motion or issues a revised initial decision, whichever applies.

(3) If no motion for reconsideration is timely filed, a notice of appeal must be filed within 30 days after the ALJ issues the initial decision.

(4) The authority head may extend the initial 30-day period for an additional 30 days if the defendant files with the authority head a request for an extension within the initial 30-day period and shows good cause.

(c) If the defendant files a timely notice of appeal with the authority head and the time for filing motions for reconsideration under § 35.38 has expired, the ALJ shall forward the record of the proceeding to the authority head.

(d) A notice of appeal shall be accompanied by a written brief specifying exceptions to the initial decision and reasons supporting the exceptions.

(e) The representative for the Government may file a brief in opposition to exceptions within 30 days of receiving the notice of appeal and accompanying brief.

(f) There is no right to appear personally before the authority head.

(g) There is no right to appeal any interlocutory ruling by the ALJ.

(h) In reviewing the initial decision, the authority head shall not consider any objection that was not raised before the ALJ unless a demonstration is made of extraordinary circumstances causing the failure to raise the objection.

(i) If any party demonstrates to the satisfaction of the authority head that additional evidence not presented at such hearing is material and that there were reasonable grounds for the failure to present such evidence at such hearing, the authority head shall remand the matter to the ALJ for consideration of such additional evidence.

(j) The authority head may affirm, reduce, reverse, compromise, remand, or settle any penalty or assessment, determined by the ALJ in any initial decision.

(k) The authority head shall promptly serve each party to the appeal with a copy of the decision of the authority head and a statement describing the right of the defendant to seek judicial review.

(l) Unless a petition for review is filed as provided in 31 U.S.C. 3805 after a defendant has exhausted all administrative remedies under this part and within 60 days after the date on which the authority head serves the defendant with a copy of the authority head's decision, a determination that a defendant is liable under § 35.3 is final and is not subject to judicial review.

§ 35.40 Stays ordered by the Department of Justice.

If at any time the Attorney General or an Assistant Attorney General designated by the Attorney General transmits to the authority head a written finding that continuation of the administrative process described in this part with respect to a claim or statement may adversely affect any pending or potential criminal or civil action related to such claim or statement, the authority head shall stay the process immediately. The authority head may order the process resumed only upon receipt of the written authorization of the Attorney General.

§ 35.41 Stay pending appeal.

(a) An initial decision is stayed automatically pending disposition of a motion for reconsideration or of an appeal to the authority head.

(b) No administrative stay is available following a final decision of the authority head.

§ 35.42 Judicial review.

Section 3805 of title 31, United States Code, authorizes judicial review by an appropriate United States District Court of a final decision of the authority head imposing penalties or assessments under this part and specifies the procedures for such review.

§ 35.43 Collection of civil penalties and assessments.

Sections 3806 and 3808(b) of title 31, United States Code, authorize actions for collection of civil penalties and assessments imposed under this part and specify the procedures for such actions.

§ 35.44 Right to administrative offset.

The amount of any penalty or assessment which has become final, or for which a judgment has been entered under § 35.42 or § 35.43, or any amount agreed upon in a compromise or settlement under § 35.46, may be collected by administrative offset under 31 U.S.C. 3717, except that an administrative offset may not be made under this subsection against a refund of an overpayment of federal taxes, then or later owing by the United States to the defendant.

§ 35.45 Deposit in Treasury of United States.

All amounts collected pursuant to this part shall be deposited as miscellaneous receipts in the Treasury of the United States, except as provided in 31 U.S.C. 3806(g).

§ 35.46 Compromise or settlement.

(a) Parties may make offers of compromise or settlement at any time.

(b) The reviewing official has the exclusive authority to compromise or settle a case under this part at any time after the date on which the reviewing official is permitted to issue a complaint and before the date on which the ALJ issues an initial decision.

(c) The authority head has exclusive authority to compromise or settle a case under this part at any time after the date on which the ALJ issues an initial decision, except during the pendency of any review under § 35.42 or during the pendency of any action to collect penalties and assessments under § 35.43.

(d) The Attorney General has exclusive authority to compromise or settle a case under this part during the pendency of any review under § 35.42 or of any action to recover penalties and assessments under 31 U.S.C. 3806.

(e) The investigating official may recommend settlement terms to the reviewing official, the authority head, or the Attorney General, as appropriate. The reviewing official may recommend settlement terms to the authority head, or the Attorney General, as appropriate.

(f) Any compromise or settlement must be in writing.

§ 35.47 Limitations.

(a) The notice of hearing with respect to a claim or statement must be served in the manner specified in § 35.8 within six years after the date on which such claim or statement is made.

(b) If the defendant fails to file a timely answer, service of notice under § 35.10(b) shall be deemed a notice of hearing for purposes of this section.

(c) The statute of limitations may be extended by agreement of the parties.

Dated: October 30, 1989.

Jill E. Kent,

Acting Under Secretary for Management.

[FR Doc. 89-25935 Filed 11-2-89; 8:45 am]

BILLING CODE 4710-08-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 199

[DoD Reg. 6010.8-R]

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Revisions to CHAMPUS Peer Review Organization Program; Accommodation of Voluntary Discounts Under Provider Reimbursement Methods

AGENCY: Office of the Secretary, DoD.

ACTION: Proposed Rule.

SUMMARY: This proposed rule would make a series of revisions to the CHAMPUS (PRO) Program, including the addition of procedures pertinent to preauthorization of some hospital admissions. The proposed rule would also clarify the authority of CHAMPUS to accommodate discounts from health care providers under provider reimbursement methods, including voluntary discounts from prospectively determined DRG based or per diem based payment rates.

DATE: Written comments on this proposed rule are due by December 4, 1989.

ADDRESS: Comments should be sent to: Office of the Assistant Secretary of Defense for Health Affairs (Health Program Management), The Pentagon, Washington, DC 20301-1200.

FOR FURTHER INFORMATION CONTACT: With respect to the PRO program: Nancy Gidley at (202)695 5016; and with respect to the accommodation of discounts: LCDR Arthur Miller, USN, at (202)695-3331.

SUPPLEMENTARY INFORMATION:

I. Introduction

This proposed rule has two substantive parts: the first proposes to make a series of refinements to the CHAMPUS Peer Review Organization (PRO) program, and the second proposes to clarify authority of OCHAMPUS to accommodate voluntary discounts from health care providers under provider reimbursement methods. These are discussed below in turn.

II. Peer Review Organization (PRO) Program Refinements

A. Background

When CHAMPUS instituted its DRG-based payment system at the beginning of fiscal year 1988, it also created authority in the CHAMPUS regulation for a program of utilization of quality review of hospital care covered by the DRG system. On March 6, 1989, CHAMPUS issued a final rule supplementing the rules and procedures initially established with a series of provisions essentially designed to flesh out the CHAMPUS PRO program in ways conforming to the operations of the Medicare PRO program.

The provisions of this proposed rule concerning the PROs represent a next step in the process of refining the program, with the major theme continuing to be to maintain consistency with the rules and procedures of the Medicare PRO program. This key theme is based on our continued belief that it is in the best interest of beneficiaries, hospitals, providers, PROs and CHAMPUS for us to take advantage of the requirements and procedures that have been worked out by Congress and the Department of Health and Human Services for the Medicare PRO program.

This policy has recently been endorsed by the Senate in a provision pending final Congressional approval. It states:

> The Secretary of Defense may by regulation adopt any quality and utilization review requirements and procedures in effect for the Peer Review Organization program under title XVIII of the Social Security Act (Medicare) that the Secretary determines necessary, and may adapt the Medicare requirements and procedures to the circumstances of the CHAMPUS PRO program as the Secretary determines appropriate.

H.R. 3072, section 9091 (Senate version).

This provision, based on a legislative proposal of the Department of Defense, will, if enacted, provide statutory endorsement of our program and reinforce our statutory authority.

B. Provisions of Proposed Rule

The specific provisions of this proposed rule are in the nature of refinements to our existing regulation. There are no major new policy directions. A summary of the various changes follows.

1. *Limitation on financial liability in certain cases.* Currently, the regulation (section 199.4(h)) includes provisions, like those applicable to Medicare, under which beneficiaries are generally protected from financial liability for medical care determined by the PRO to have been provided unnecessarily. In some cases, providers may also be protected if they had not learned of the PRO's review standards or otherwise could not reasonably have been expected to know the care provided was excludable as unnecessary care. The proposed revision to section § 199.4(h)(1) clarifies that these limitations on liability rules apply only to the PRO program activities; they do not apply to normal medical benefit coverage issues that occur from time to time.

This clarification conforms with the Medicare rule (see 42 CFR 466.86(c)). It recognizes the distinction between those matters on which the controlling issue for CHAMPUS payment is the PRO's determination—based on medical judgment of medical necessity—versus those cases in which the controlling issues are CHAMPUS rules and interpretations regarding what care is covered by the CHAMPUS program.

2. *Recodification of Provisions regarding PRO Program.* The regulatory provisions pertinent to the operations of the PRO program have been set forth as a part of the group of provisions in section 199.14, Provider Reimbursement Methods, pertaining to the DRG based payment system. To more accurately reflect the applicability of dimensions of the PRO program and to facilitate comprehension of the regulation, we propose to recodify the existing PRO regulatory provisions, set forth as paragraph (a)(1)(iv) of § 199.14, as a new § 199.15 of the CHAMPUS regulation. The description of the proposed revisions, below, refers to the new section designation and, where applicable, the old.

3. *Regulatory guidance.* In the introductory paragraph applicable to the PRO program (new § 199.15(a); old § 199.14(a)(1)(iv)), we propose to add a general statement that in applying the rule, we will be guided by established Medicare PRO rules and procedures. This is consistent with the approach we have taken since initiating the PRO program. We hope that including this statement in the regulation will provide useful guidance to interested parties.

4. *Preadmission review procedures.* Our regulation had previously not referenced those provisions of Medicare's regulation governing cases subject to preadmission review by the PRO. We propose, in new § 199.15(c)(5), to incorporate by reference the provisions of Medicare's 42 CFR 466.78(b) (5)-(7). In summary, these provisions establish that for cases covered by any PRO preadmission review requirements: hospitals have a responsibility to obtain preadmission approval; hospitals agree that if they fail to obtain preadmission approval for care the PRO later determines was unnecessary, the hospital will generally be financially liable; and hospitals agree that if they fail to obtain preadmission approval, the care is subject to PRO prepayment review. Adoption of these Medicare procedures is reasonable and appropriate to establish ground rules for the initiation of a preadmission review activity under the CHAMPUS PRO program.

It is our view that preadmission review of selected inpatient admissions, and perhaps some other services, will be preferable to retrospective review. It is preferable from the standpoint of beneficiaries because it protects them from unnecessary hospital stays or procedures and it provides independent verification of the necessity of approved care. It is better for providers because it protects them from incurring costs for care that may later be denied and it provides continuous education on what is appropriate and what is not. Preadmission review is less expensive for the PROs than retrospective review. And from the viewpoint of CHAMPUS, it is likely to be more effective in assuring the provision of necessary care while discouraging care that may not be necessary or could be provided at a level more economical for both the beneficiary and the program.

As a result of instituting preadmission review, we expect CHAMPUS will move more into line with increasingly strong trends in the medical community of shifting some selected types of care from expensive hospitalizations to the more economical outpatient care setting. Medicare has also moved in this direction, now requiring each PRO to conduct preadmission review on at least 10 procedures. At this time, the precise dimensions of our preadmission review activity are under development. We expect to provide detailed information about this activity later this fall and expect to have it become operational beginning early next year. For purposes of this proposed rule, however, the focus is on the establishment of the basic ground rules that will apply.

5. *PRO review of non-DRG covered services.* Our current PRO program regulatory provisions are perhaps less clear than they might be on PRO review of services not covered by the DRG-based payment system. Consistent with the context of the initial development of the PRO program, as well as its continuing emphasis, much of our PRO program regulation is addressed to review of DRG covered hospital care. Other provisions of our regulation, such

as those applicable to sanction procedures, apply to all providers.

However, just as the Medicare program has moved into PRO review of

such technical or procedural adjustments must maintain substantive comparability with the regular procedures.

are simply changing our reference from the Medicare statute to the appropriate Medicare regulation. Consistent with our intent regarding many other

Claims, Health insurance, Military personnel.

VOL 54 SS 212 NO 3 1989 UMI

as those applicable to sanction procedures, apply to all providers.

However, just as the Medicare program has moved into PRO review of other types of care, such as certain ambulatory procedures, our policy is to have in place the basic regulatory authorities and procedures to permit PRO review of all CHAMPUS services, allowing PRO review to be activated when necessary and appropriate. This policy recognizes that the underlying substantive requirement of assuring consistency with prevailing standards of quality and medical necessity applies to all CHAMPUS care; the PRO program is one procedural system to implement that requirement. To clarify this basic approach, we propose to add to our regulation a provision (new § 199.15(f)) stating that if the Director of OCHAMPUS decides to activate PRO program review (using the same PROs or other similar organizations) of services not covered by the DRG based payment system, the basic rules and procedures of the regulations will apply. To the extent some technical or procedural provisions would need to be adapted to the circumstances of that type of health care service, that could be done as long as substantive comparability with the regular DRG-related provisions is maintained. Similarly, the proposed provision further states that some services that are covered by the DRG-based payment system, but that also have other special circumstances, could be the subject of technical or procedural adjustments.

To illustrate the purpose and effect of this section, if OCHAMPUS decides to activate PRO program review of certain ambulatory surgical procedures, all the basic requirements concerning PRO authorities, applicable remedies, limitations on financial liability, due process rights and the like would be applicable. However, certain procedural steps applicable to DRG-covered hospital care, such as expedited review procedures to protect against premature discharges, would not be necessary. As another example, medical care services being provided under a special set of circumstances, such as a model similar to a pre-paid health care system (for example, a Health Maintenance Organization), could raise a different set of quality and utilization issues, even if covered by the DRG based hospital payment system. The proposed regulatory provision would clarify the authority and intent of CHAMPUS to adopt procedural adjustments appropriate to the circumstances presented. But again, by way of securing all substantive rights and obligations, all such technical or procedural adjustments must maintain substantive comparability with the regular procedures.

6. *Appeals and hearings.* Our current regulation [old § 199.14(a)(1)(iv)(G)] states that providers (unlike beneficiaries) may not appeal to OCHAMPUS reconsidered determinations of PROs. In adopting this provision, we intended to follow the Medicare practice. We failed to note, however, that under Medicare (42 CFR 473.14(c)(2)), providers may appeal adverse decisions on an issue of whether the provider knew or could reasonably have been expected to know the services were excludable by the PRO in connection with limitation of liability decisions. This is not inconsistent with the underlying policy thrust of accepting PRO reconsidered determinations on matters of medical judgment; this type of issue involves, not medical judgments, but administrative matters, such as reasonable notice and the like.

We propose (new § 199.15(i)(2)&(3)) to adopt the same approach as applies under Medicare: PRO reconsidered determinations regarding limitations of liability are appealable by providers to OCHAMPUS.

7. *Qualified immunity for peer reviewers.* Under our current regulation (old § 199.14(a)(1)(iv)(H)), a person who performs CHAMPUS PRO functions has the same qualified civil immunity, as applies to the external civilian peer review program that reviews care in military hospitals. This is pursuant to 10 U.S.C. 1102, which provides for confidentiality of records and qualified immunity under all DoD quality assurance program activities.

As additional authority for assuring immunity for good faith PRO program participation, we propose to add to our regulation adoption of the requirement of section 1157 of the Social Security Act (42 U.S.C. 1320c–6), the federal statute assuring immunity under the Medicare PRO program. This is set forth in our proposed new § 199.15(k).

8. *Obligations, sanctions and procedures.* Our current regulation (§ 199.14(a)(1)(iv)(J)) incorporates by reference the provisions of section 1156(a) of the Social Security Act (42 U.S.C. 1320c–5(a)) regarding provider obligations, sanctions and procedures under the Medicare PRO program. Without changing the effect of the regulation, we propose to revise this provision (new § 199.15(m)) to incorporate the Medicare regulation, 42 CFR 1004.1–1004.80, corresponding to the statutory provision. In other words, we are simply changing our reference from the Medicare statute to the appropriate Medicare regulation. Consistent with our intent regarding many other provisions of our regulation, our hope is that this will facilitate understanding of the CHAMPUS PRO procedures.

In addition, we propose to add to our provision regarding obligations and sanctions an obligation comparable to 42 U.S.C. 1395ww(f)(2). That section states that, under Medicare, if a hospital is determined through the PRO program to be attempting to circumvent the PPS system, payments may be denied or other corrective actions required. Our proposed new paragraph § 199.15(m)(2) would establish the same rule for CHAMPUS. Any hospital affected by this provision has appeal rights to OCHAMPUS.

III. Accommodation of Discounts

A. *Background.* As discussed above, at the beginning of Fiscal Year 1988, CHAMPUS began to pay for most inpatient hospital care on the basis of diagnosis related groups (DRGs). In fiscal year 1989, the DRG based payment system was extended to several additional categories of care and a separate prospective payment method, one using set per diem rates, was instituted for reimbursing psychiatric hospitals and units. Under these payment systems, even if a provider's billed charges would be greater than the set payment amounts, reimbursement under CHAMPUS will be at the applicable established payment amount.

Questions have recently arisen regarding whether providers may seek reimbursements *less than* the prospectively determined rates, whether DRG-based, per diem or other system, as part of a program to offer discounted rates. One context in which this has arisen is in connection with the Air Force "Health Care Finder" program, under which providers are asked to, at a minimum, accept assignment for all CHAMPUS claims. Some providers, including institutional providers normally paid on the basis of pre-set standard rates, have indicated an interest in an arrangement whereby they would provide CHAMPUS services at a rate less than the applicable DRG or per diem rate Presumably, such providers would see their number of CHAMPUS patients increase.

The Department of Defense is developing plans to expand programs similar to the Health Care Finder by establishing a DoD-wide "Participating Provider Program." Under this program, individual and institutional providers will be given the opportunity to become Participating Providers, meaning that they will, at a minimum, always accept the CHAMPUS allowable payment rates and will handle the claims paperwork for the beneficiaries. Military facility Health Benefits Advisors, CHAMPUS Fiscal Intermediaries and others will make lists of Participating Providers widely available to beneficiaries.

We expect that in connection with the Participating Provider Program, some providers, including institutional providers, would welcome the opportunity to offer discounts below the usual fixed rate (for example, DRG or per diem rate) or prevailing charge level (such as for physicians' fees). It is in recognition of this that we propose this amendment to the CHAMPUS regulation.

B. Provisions of Proposed Rule

The proposed rule would simply clarify, in proposed new § 199.14 (a)(4) and (i), the authority of the Director of CHAMPUS to reimburse a provider, including an institutional provider, at an amount below the amount usually paid under the regulation's provider reimbursement methods when, under a program approved by the Director, the provider has agreed to the lower amount. In the case of physicians and other noninstitutional providers, the normal rule is the allowed charge is the lesser of the billed charge or the prevailing charge level. If a discounted fee is below the provider's normal billed charge and the normal prevailing charge level, the discounted fee will be deemed to be the true billed charge. In the case of institutional providers normally paid on the basis of a pre-set amount (such as DRG-based amount or per-diem amount), reimbursement will be at the lower amount as an exception to the usual rule that the pre-set rate is paid regardless of the institutional provider's normal billed charges.

The proposed rule would also clarify, in proposed new § 199.4(f)(8), that in cases in which special discount arrangements are recognized for purposes of provider reimbursements, they may be comparably recognized for purposes of the beneficiary's cost-sharing amount. In other words, the Director of OCHAMPUS will have authority to assure that beneficiaries also benefit from any discount arrangements that might be made.

These new authorities only apply to circumstances when both the provider and the Director have agreed to the discounted payment rate The Director's agreement may be in the context of approval of a program (such as the Participating Provider Program) that allows for such discounts. The Director of OCHAMPUS may establish uniform terms, conditions and limitations for this payment method in order to avoid administrative complexity.

As an example of the operation of this proposed rule, suppose a hospital and all the individual providers affiliated with that hospital decide, under an official DoD program approved by the Director of OCHAMPUS, to offer a 10% discount for CHAMPUS care. Regarding the hospital payment, assume that for the inpatient care of a retired member the normal DRG-based payment amount would be $8,000 for the admission and the normal beneficiary copayment (based on the copayment per diem amount times the number of days of care) would be $2,000. Regarding the professional fees, assume the total billed charges are $2,900 and the prevailing charge levels for all of the procedures performed total to $3,000.

Applying the discounts would result in a payment amount of $7,200 (rather than $8,000) to the hospital. The beneficiary's copayment for the hospital charges would be $1,800 (the normal copayment of $2,000, reduced by the discount percentage of 10%). Regarding the professional fees, taking 10% off the prevailing charge levels produces a total maximum payment of $2,700. Because these fees are lower than the usual billed charges, the lower amounts are treated as the actual billed charges and become the basis for payments (both the CHAMPUS share and beneficiary share) to the professional providers.

The proposed rule would allow discounts such as these to be offered by providers and be accommodated within the CHAMPUS provider reimbursement methods as exceptions to the usual calculations.

IV. Regulatory Procedures

With respect to regulatory procedures, this proposed rule involves primarily a series of refinements and clarifications. Therefore, it is not a major rule within the scope of Executive Order 12291. In addition, we certify that this proposed rule will not have a significant impact on small entities within the scope of the Regulatory Flexibility Act. Also, there are no Paperwork Reduction Act implications concerning this proposed rule.

We welcome public comments on this proposed rule. We are simultaneously seeking comments from other interested components of DoD and other agencies. We anticipate publication of a final rule in approximately 60 days, which would take effect 30 days thereafter.

List of Subjects in 32 CFR Part 199

Claims, Health insurance, Military personnel.

For the reasons set forth in the preamble, 32 CFR part 199 is proposed to be amended as follows:

PART 199—[AMENDED]

The authority citation for Part 199 continues to read as follows:

Authority: 10 U.S.C. 1079, 1086, 5 U.S.C. 301.

2. Section 199.4 is amended by adding at the end of paragraph (f) a new paragraph (8), by revising the first sentence of paragraph (h)(1), and by adding a new sentence at the end of paragraph (h)(1), to read as follows:

§ 199.4 Basic Program Benefits.

* * * * *

(f) *Beneficiary or sponsor liability.*

* * *

(8) *Cost-sharing for services provided under special discount arrangements—*(i) *General rule.* With respect to services determined by the Director, OCHAMPUS (or designee) to be covered by § 199.14(i), the Director, OCHAMPUS (or designee) has authority to establish, as an exception to the cost-sharing amount normally required pursuant to this section, a different cost-share amount that appropriately reflects the application of the statutory cost share to the discount arrangement.

(ii) *Specific applications.* The following are examples of applications of the general rule; they are not all inclusive.

(A) In the case of services provided by individual health care professionals and other noninstitutional providers, the cost-share shall be the usual percentage of the CHAMPUS allowable charge determined under § 199.14(i).

(B) In the case of services provided by institutional providers normally paid on the basis of a pre-set amount (such as DRG-based amount under § 199.14(a)(1) or per diem amount under § 199.14(a)(2)), if the discount rate is lower than the pre-set rate, the cost-share amount that would apply for a beneficiary other than an active duty dependent pursuant to the normal pre-set rate would be reduced by the same percentage by which the pre-set rate was reduced in setting the discount rate.

* * * * *

(h) *Payment and liability for certain potentially excludable services under the Peer Review Organization program—*(1) *Applicability.* This subsection provides special rules that apply only to services retrospectively determined under the Peer Review

Organization (PRO) program (operated pursuant to section 199.15) to be potentially excludable (in whole or in part) from the basic program under

provider's billed charges or other factors.

(3) *Procedures.* (i) This paragraph only applies when both the provider and the

including their appeal rights. A hospital which does not cooperate in this activity shall be subject to termination as a CHAMPUS authorized provider.

(ii) CHAMPUS admissions to a hospital or hospital unit subject to the CHAMPUS DRG-based payment system

OCHAMPUS shall be subject to focused review.

(e) *Actions as a result of review—(1)*

review (using the same PROs or other similar organizations) of services not covered by the DRG-based payment

Organization (PRO) program (operated pursuant to section 199.15) to be potentially excludable (in whole or in part) from the basic program under paragraph (g) of this section. * * * This paragraph does not apply to coverage determinations made by OCHAMPUS or the fiscal intermediaries which are not based on medical necessity determinations made under the PRO program.

* * * * *

3. Section 199.14 is amended by adding a new paragraph (a)(4) by redesignating the second paragraph (h) as paragraph (j), by redesignating paragraph (i) and newly redesignated paragraph (j) as paragraphs (j) and (k), and by adding a new paragraph (i), to read as follows:

§ 199.14 Provider Reimbursement Methods.

(a) *Hospitals.* The CHAMPUS determined allowable cost for reimbursement of a hospital shall be determined on the basis of one of the following methodologies.

* * * * *

(4) *CHAMPUS discount rates.* The CHAMPUS-determined allowable cost for authorized care in any hospital may be based on discount rates established under paragraph (i) of this section.

* * * * *

(i) *Accommodation of discounts under provider reimbursement methods*—(1) *General rule.* The Director, OCHAMPUS (or designee) has authority to reimburse a provider at an amount below the amount usually paid pursuant to this section when, under a program approved by the Director, the provider has agreed to the lower amount.

(2) *Special applications.* The following are examples of applications of the general rule; they are not all inclusive.

(i) In the case of individual health care professionals and other noninstitutional providers, if the discounted fee is below the provider's normal billed charge and the prevailing charge level (see paragraph (g) of this section), the discounted fee shall be the provider's actual billed charge and the CHAMPUS allowable charge.

(ii) In the case of institutional providers normally paid on the basis of a pre-set amount (such as DRG based amount under paragraph (a)(1) or per-diem amount under paragraph (a)(2) of this section), if the discount rate is lower than the pre-set rate, the discounted rate shall be the CHAMPUS-determined allowable cost. This is an exception to the usual rule that the pre-set rate is paid regardless of the institutional provider's billed charges or other factors.

(3) *Procedures.* (i) This paragraph only applies when both the provider and the Director have agreed to the discounted payment rate. The Director's agreement may be in the context of approval of a program that allows for such discounts.

(ii) The Director of OCHAMPUS may establish uniform terms, conditions and limitations for this payment method in order to avoid administrative complexity.

* * * * *

4. Section 199.14 is further amended by removing paragraph (a)(1)(iv).

5. A new § 199.15 is added to read as follows:

§ 199.15 Peer Review Organization Program

(a) *General.* This section establishes rules and procedures applicable to the CHAMPUS Peer Review Organization (PRO) program for utilization and quality review of services, especially services provided in hospitals for which the hospital care is covered by the CHAMPUS DRG-based payment system. In implementing the provisions of this section, OCHAMPUS will be guided by the general policy of following Medicare PRO program requirements and procedures, with appropriate adaptations.

(b) *Objectives of review system.* There are four required functions:

(1) A review of the completeness, adequacy and quality of care provided;

(2) A review of the reasonableness, necessity and appropriateness of hospital admissions under CHAMPUS DRG reimbursement;

(3) A validation of diagnoses and procedural information that determines CHAMPUS reimbursement; and

(4) A review of the necessity and appropriateness of care for which payment is sought on an outlier basis.

(c) *Hospital cooperation.* All hospitals which participate in CHAMPUS and submit CHAMPUS claims are required to provide all information necessary for CHAMPUS to properly process the claims. In order for CHAMPUS to be assured that services for which claims are submitted meet quality of care standards, hospitals are required to provide the Peer Review Organization (PRO) responsible for quality review with all the information, within timeframes to be established by OCHAMPUS, necessary to perform the review functions required by this paragraph. Additionally, all participating hospitals shall provide CHAMPUS beneficiaries, upon admission, with information about the admission and quality review system including their appeal rights. A hospital which does not cooperate in this activity shall be subject to termination as a CHAMPUS authorized provider.

(1) Documentation that the beneficiary has received the required information about the CHAMPUS PRO program must be maintained in the same manner as is the notice required for the Medicare program by 42 CFR 466.78(b).

(2) The physician attestation and physician acknowledgement required for Medicare under 42 CFR 412.40 and 412.46 are also required for CHAMPUS as a condition for payment and may be satisfied by the same statements as required for Medicare, with substitution or addition of "CHAMPUS" when the word "Medicare" is used.

(3) Participating hospitals must execute a memorandum of understanding with the PRO providing appropriate procedures for implementation of the PRO program.

(4) Participating hospitals may not charge a CHAMPUS beneficiary for inpatient hospital services excluded on the basis of § 199.4(g)(1) (not medically necessary), § 199.4(g)(3) (inappropriate level), or § 199.4(g)(7) (custodial care) unless all of the conditions established by 42 CFR 412.42(c) with respect to Medicare beneficiaries have been met with respect to the CHAMPUS beneficiary. In such cases in which the patient requests a PRO review while the patient is still an inpatient in the hospital, the hospital shall provide to the PRO the records required for the review by the close of business of the day the patient requests review, if such request was made before noon. If the hospital fails to provide the records by the close of business, that day and any subsequent working day during which the hospital continues to fail to provide the records shall not be counted for purposes of the two day period of 42 CFR 412.42(c)(3)(ii).

(5) With respect to cases subject to preadmission review, the provisions of 42 CFR 466.78(b)(5)–(b)(7) shall apply to CHAMPUS cases as those provisions apply to Medicare cases.

(d) *Areas of review*—(1) *Admissions.* The following areas shall be subject to review to determine whether inpatient care was medically appropriate and necessary, was delivered in the most appropriate setting and met acceptable standards of quality. This review may include preadmission or prepayment review when appropriate.

(i) Transfers of CHAMPUS beneficiaries from a hospital or hospital unit subject to the CHAMPUS DRG-based payment system to another hospital or hospital unit.

(ii) CHAMPUS admissions to a hospital or hospital unit subject to the CHAMPUS DRG-based payment system which occur within a certain period (specified by OCHAMPUS) of discharge from a hospital or hospital unit subject to the CHAMPUS DRG-based payment system.

(iii) A random sample of other CHAMPUS admissions for each hospital subject to the CHAMPUS DRG-based payment system.

(iv) CHAMPUS admissions in any DRGs which have been specifically identified by OCHAMPUS for review or which are under review for any other reason.

(2) *DRG validation.* The review organization responsible for quality of care reviews shall be responsible for ensuring that the diagnostic and procedural information reported by hospitals on CHAMPUS claims which is used by the fiscal intermediary to assign claims to DRGs is correct and matches the information contained in the medical records. In order to accomplish this, the follcwing review activities shall be done.

(i) Perform DRG validation reviews of each case under review.

(ii) Review of claim adjustments submitted by hospitals which result in the assignment of a higher weighted DRG.

(iii) Review for physician certification as to the major diagnoses and procedures and the physician's acknowledgment of annual receipt of the penalty statement as contained in the Medicare regulations at 42 CFR 412.40 and 412.46.

(iv) Review of a sample of claims for each hospital reimbursed under the CHAMPUS DRG-based payment system. Sample size shall be determined based upon the volume of claims submitted.

(3) *Outlier review.* Claims which qualify for additional payment as a long-stay outlier or as a cost-outlier shall be subject to review to ensure that the additional days or costs were medically necessary and appropriate and met all other requirements for CHAMPUS coverage. In addition, claims which qualify as short-stay outliers shall be reviewed to ensure that the admission was medically necessary and appropriate and that the discharge was not premature.

(4) *Procedure review.* Claims for procedures identified by OCHAMPUS as subject to a pattern of abuse shall be the subject of intensified quality assurance review.

(5) *Other review.* Any other cases or types of cases identified by OCHAMPUS shall be subject to focused review.

(e) *Actions as a result of review— (1) Findings related to individual claims.* If it is determined, based upon information obtained during reviews, that a hospital has misrepresented admission, discharge, or billing information, or is found to have quality of care defects, or has taken an action that results in the unnecessary admissions of an individual entitled to benefits, unnecessary multiple admission of an individual, or other inappropriate medical or other practices with respect to beneficiaries or billing for services furnished to beneficiaries, the PRO, in conjunction with the fiscal intermediary, shall, as appropriate:

(i) Deny payment for or recoup (in whole or in part) any amount claimed or paid for the inpatient hospital and professional services related to such determination.

(ii) Require the hospital to take other corrective action necessary to prevent or correct the inappropriate practice.

(iii) Advise the provider and beneficiary of appeal rights, as required by section 199.10.

(iv) Notify OCHAMPUS of all such actions.

(2) *Findings related to a pattern of inappropriate practices.* In all cases where a pattern of inappropriate admissions and billing practices that have the effect of circumventing the CHAMPUS DRG-based payment system is identified, OCHAMPUS shall be notified of the hospital and practice involved.

(3) *Revision of coding relating to DRG validation.* The following provisions apply in connection with the DRG validation process set forth in paragraph (d)(2) of this section.

(i) If the diagnostic and procedural information attested to by the attending physician is found to be inconsistent with the hospital's coding or DRG assignment, the hospital's coding on the CHAMPUS claim will be appropriately changed and payments recalculated on the basis of the appropriate DRG assignment.

(ii) If the information attested to by the physician as stipulated under paragraph (e)(2) of this section is found not to be correct, the PRO will change the coding and assign the appropriate DRG on the basis of the changed coding.

(f) *Procedures regarding certain services, including services not covered by the DRG-based payment system.* Paragraphs (b) through (e) of this section are directed to the context of services covered by the CHAMPUS DRG-based payment system. The Director, OCHAMPUS may activate PRO program review (using the same PROs or other similar organizations) of services not covered by the DRG-based payment system. For any such review activity designated by the Director, OCHAMPUS, the provisions of paragraphs (g) through (m) of this section shall apply. In addition, the Director, OCHAMPUS may establish procedures, appropriate to the types of services to be reviewed, substantively comparable to those applicable to services covered by the DRG-based payment system pertaining to obligations of providers to cooperate in PRO program review activities, authority to require precertification of services proposed to be required and authorities to require appropriate corrective actions. The Director, OCHAMPUS may also establish such procedures for review of services which, although covered by the DRG based payment system, are also affected by some other special circumstances concerning payment method, nature of care or other potential quality or utilization issue.

(g) *Procedures regarding initial determinations.* The CHAMPUS PROs shall establish and follow procedures for initial determinations that are substantively the same or comparable to the procedures applicable to Medicare under 42 CFR 466.83 to 466.104. In addition, these procedures shall provide that a PRO's determination that an admission is medically necessary is not a guarantee of payment by CHAMPUS; normal CHAMPUS benefit and procedural coverage requirements must also be applied.

(h) *Procedures regarding reconsiderations.* The CHAMPUS PROs shall establish and follow procedures for reconsiderations that are substantively the same or comparable to the procedures applicable to reconsiderations under Medicare pursuant to 42 CFR 473.15 to 473.34, except that the time limit for requesting reconsideration (see 42 CFR 473.20(a)(1)) shall be 90 days. A PRO reconsidered determination is final and binding upon all parties to the reconsideration except to the extent of any further appeal pursuant to paragraph (i) of this section.

(i) *Appeals and hearings.* (1) Beneficiaries may appeal a PRO reconsideration determination to OCHAMPUS and obtain a hearing on such appeal to the extent allowed and under the procedures set forth in section 199.10(d).

(2) Except as provided in paragraph (i)(3) of this section, a PRO reconsidered determination may not be further appealed by a provider.

VOL 54 ISS 212 NO 3 1989 UMI

(3) A provider may appeal a PRO reconsideration determination to OCHAMPUS and obtain a hearing on such appeal to the extent allowed under the procedures set forth in section 199.10(d) if it is a determination pursuant to section 199.4(h) that the provider knew or could reasonably have been expected to know that the services were excludable.

(4) For purposes of the hearing process, a PRO reconsidered determination shall be considered as the procedural equivalent of a formal review determination under § 199.10.

(5) The provisions of § 199.10(e) concerning final action shall apply to hearings cases.

(j) *Acquisition, protection and disclosure of peer review information.* The provisions of 42 CFR part 476, except § 476.108, shall be applicable to the CHAMPUS PRO program as they are to the Medicare PRO program.

(k) *Limited immunity from liability for participants in PRO program.* The provisions of section 1157 of the Social Security Act (42 U.S.C. 1320c–6) are applicable to the CHAMPUS PRO program in the same manner as they apply to the Medicare PRO program. Section 1102(g) of title 10, United States Code also applies to the CHAMPUS PRO program.

(l) *Additional provision regarding confidentiality of records*—(1) *General rule.* The provisions of 10 U.S.C. 1102 regarding the confidentiality of medical quality assurance records shall apply to the activities of the CHAMPUS PRO program as they do to the activities of the external civilian PRO program that reviews medical care provided in military hospitals.

(2) *Specific applications.* (i) Records concerning PRO deliberations are generally nondisclosable quality assurance records under 10 U.S.C. 1102.

(ii) Initial denial determinations by PROs pursuant to paragraph (a)(1)(i)(E) of this section (concerning medical necessity determinations, DRG validation actions, etc.) and subsequent decisions regarding those determinations are not nondisclosable quality assurance records under 10 U.S.C. 1102.

(iii) Information the subject of mandatory PRO disclosure under 42 CFR part 476 is not a nondisclosable quality assurance record under 10 U.S.C. 1102.

(m) *Obligations, sanctions and procedures.* (1) The provisions of 42 CFR 1004.1–1004.80 shall apply to the CHAMPUS PRO program as they do the Medicare PRO program, except that the functions specified in those sections for the Office of Inspector General of the Department of Health and Human Services shall be the responsibility of OCHAMPUS.

(2) The provisions of 42 USC section 1395ww(f)(2) concerning circumvention by any hospital of the applicable payment methods for inpatient services shall apply to CHAMPUS payment methods as they do to Medicare payment methods.

(3) The Director, or a designee, of CHAMPUS shall determine whether to impose a sanction pursuant to paragraphs (m)(1) and (m)(2) of this section. Providers may appeal adverse sanctions decisions under the procedures set forth in § 199.10(d).

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

October 24, 1989.

32 CFR Part 297

[DoD Instruction 5120.4]

RIN 0790–AA56

DoD Newspapers and Civilian Enterprise Publications

AGENCY: American Forces Information Services, DoD.

ACTION: Proposed rule.

SUMMARY: This proposed amendment incorporates administrative and memorandum changes to DoD Instruction 5120.4 and adds a review civilian publishers requirement for DoD newspapers. It prohibits civilian publishers DoD civilian enterprise (CE) publications from accepting political advertising. It permits the addition of a telephone directory section in CE base guides. A new section, Appendix F, establishes a review and reporting system for DoD newspapers.

DATE: Forward comments to Department of Defense, American Forces Information Service (ATTN: PMP&P), 601 North Fairfax Street, #311, Alexandria, VA 22314–2007, no later than December 4, 1989.

FOR FURTHER INFORMATION CONTACT: Col. H. Baker, USAF, telephone (703) 274–4868.

SUPPLEMENTARY INFORMATION: In FR Doc. 50–32851 appearing in the **Federal Register** on August 15, 1985, the Office of the Secretary of Defense published a final rule reissuing policies on DoD newspapers and CE publications. OSD proposes to make minor revisions to these policies and establish certain internal reporting requirements.

List of Subjects in 32 CFR Part 297

Government publications, Newspapers and magazines.

Accordingly, 32 CFR part 297 is proposed to be amended as follows:

PART 297—[AMENDED]

1. The authority citation continues to read as follows:

Authority: 10 U.S.C. 121 and 133.

2. The table of contents is proposed to be amended:

a. By adding a new appendix F as follows:

Appendix F to Part 297—DoD Command Newspaper Review System

b. By revising the titles of enclosures 1 through 5 as follows:

"Enclosure 1–Funded Newspapers" to "Appendix A to Part 297–Funded Newspapers"

"Enclosure 2–Civilian Enterprise Publications" to "Appendix B to Part 297–Civilian Enterprise Publications"

"Enclosure 3—*Stars and Stripes*" to "Appendix C to Part 297—*Stars and Stripes*"

"Enclosure 4–Mailing of DoD Newspapers and Civilian Enterprise Publications Other Than Newspapers; Sales and Distribution of Non–DoD Publications" to "Appendix D to Part 297–Mailing of DoD Newspapers and Civilian Enterprise Publications Other Than Newspapers; Sales and Distribution of Non–DoD Publications"

"Enclosure 5–American Forces Press and Publications Service" to "Appendix E to Part 297—American Forces Press and Publications Service"

3. Part 297 is proposed to be amended by changing the following references throughout the text to read as follows:

a. "Enclosure 1" to "Appendix A".
a. "Enclosure 2" to "Appendix B".
c. "Enclosure 3" to "Appendix C".
d. "Enclosure 4" to "Appendix D".
e. "Enclosure 5" to "Appendix E".

§ 297.2 [Amended]

4. Section 297.2 is proposed to be amended by removing the words "Organization of the" and replacing them with "Joint Staff,"

5. Section 297.5 is proposed to be amended as follows:

a. Paragraph (b)(8), after the word "may" appears a second time, add the word "not"

b. Redesignating paragraph (d)(6) as (d)(5)(i)

c. Adding a new paragraph (5)(ii)

d. Redesignating paragraph (d)(7) as (d)(6)

e. Amending paragraph (e) by changing the words "§ 297.5(d)(1)(i)(F)" to "§ 297.5(d)(5)(i)"

f. Adding a new paragraph (i).

§ 297.5 Procedures.

* * * * *

(d) * * *

(5) * * *

(ii) This provision is not intended to prohibit the headquarters of a geographically dispersed command that receives its local coverage in the host-installation newspaper from publishing a command-wide newspaper; nor is it intended to prohibit a command that has information needs that are significantly different from the majority of the host-installation audience from publishing a separate newspaper, when authorized by the designated approving authority (see section C., appendix F).

* * * * *

(i) *DoD Command Newspaper Review System.* See appendix F.

7. Newly redesignated appendix A is proposed to be amended by revising paragraph D as follows:

Appendix A to Part 297—Funded Newspapers

* * * * *

D. Masthead

The masthead shall include the names of the commanding officer and the public affairs officer (PAO), and the names and editorial titles of the staff of the newspaper.

* * * * *

8. Newly redesignated Appendix B is proposed to be amended as follows:

a. Revising paragraph A

b. Amending paragraph D. by changing the words "§ 297.5(b)(5)" to "§ 297.5(b)(6)"

c. Amending paragraph F.4., second sentence, by adding the words "public affairs," after the word "include"

d. Removing the sentence: The public affairs officer shall serve as executive secretary and advisor.

e. Revising paragraph I.

Appendix B to Part 297—Civilian Enterprise Publications

* * * * *

A. Purpose

Civilian Enterprise (CE) publications consist of newspapers, guides and maps. They support command internal communications. The command provides the editorial content. Commercial publishers sell advertising to cover costs and secure earnings, print the publications, and may make all or part of the distribution. Periodically, commercial publishers compete for contracts to publish these publications. Appropriated or non-appropriated funds may not be used to pay for any part of a commercial publisher's costs incurred in publishing a CE publication.

* * * * *

I. Civilian Enterprise Guides and Maps

1. The name of the publication may include the name and emblem of the command or installation.

2. At the discretion of the commander, an installation official telephone directory may be included as a section of a CE guide. The telephone section shall be integral to the guide and not separable. (Separate CE telephone directories are not authorized). Required communication security (COMSEC) information shall be printed on the first page of the telephone section and not on the cover of the guide. The cover of the guide may notify users that the publication contains the official telephone directory. Publishing contracts shall establish a firm delivery date and ensure control of distribution by the command executing the contract.

3. A CE mission and services pocket guide for transient personnel that contains advertising from businesses in the community whose services may be needed by transients may be contracted for in addition to the installation guide. Normally, these pocket guides will be procured as a part of the installation guide contract.

* * * * *

Appendix E to Part 297—[Amended]

9. Newly redesignated Appendix E is proposed to be amended as follows:

a. Removing the word "monthly" in paragraphs A.1. and A.2.

b. Amending paragraph D.1. by changing the address to "601 North Fairfax Street, Room 311, Alexandria, VA 22314–2007"

c. Removing paragraph E.

10. Appendix F is proposed to be added as follows:

Appendix F to Part 297—DoD Command Newspaper Review System

A. Purpose

The purpose of the DoD command newspaper review system is to assist commanders in establishing and maintaining cost-effective internal communications essential to mission accomplishment. The system also enables internal information managers to assess the cost and effective use of resources devoted to command newspapers and to provide requested reports.

B. Policy

DoD newspaper (except those covered by Appendix C) shall be reviewed and reported biennially. The review process is not intended to replace day-to-day quality assurance procedures or established critique prorams.

C. Approving Authorities

1. The Assistant Secretary of Defense (Public Affairs) (ASD(PA)) shall be the approving authority for newspapers published by DoD Components, less the Military Department.

2. Within the Military Departments, the Secretary or a designated representative shall be the approving authority. This authority may be delegated no lower than the major command or equivalent level.

D. Review Criteria

1. Each newspaper shall be evaluated on the basis of mission essentiality, communication effectiveness, cost effectiveness, and compliance with applicable regulations.

2. In implementing the requirement that only one newspaper is authorized at each installation, any competing needs of an installation and its tenant commands shall be considered (see paragraphs 297.5(d)(5)(i) and (ii) of this part).

E. OSD Command Newspaper Review Board

The OSD Command Newspaper Review Board shall be chaired by the Director, American Forces Information Service (AFIS). Members shall be senior personnel representing functional areas of the command communication process (public affairs, editorial, design and layout, production, etc.). Members shall be drawn from OSD and Defense Agencies, nominated by office and agency heads at the invitation of the chair. A technical advisory panel of relevant specialties (printing, postal, distribution, contracting, legal, etc.) may be established at the discretion of the chair.

1. Recommendations may include the establishement, disestablishment, or continuance of a newspaper; changes in volume, frequency, format, or paper stock; and cost reduction measures.

2. Recommendations shall have the concurrence of two-thirds of the voting board members.

F. Military Department Command Newspaper Review

Military Departments shall establish appropriate procedures to accomplish command newspaper review and reporting requirements.

G. Appeals

Appeals shall be made within 30 calendar days of the approving authority's decision if publishing activities have new information to present. Representatives of a publishing activity may make presentations to a board and respond to questions during open sessions of the board.

H. Reporting Requirements

1. DoD Components (less the Military Departments) shall forward, by January 31 of each even numbered year, the information indicated on attachment 1 of this Appendix for each newspaper published, and four recent copies of the newspaper to: Director, American Forces Information Service, ATTN:

VOL 54 ISS 212 NO 3 1989 UMI

Print Media Plans and Policy, 601 North Fairfax Street, #311, Alexandria, VA 22314–2007.

Requests for approval of new newspapers may be submitted at any time, using the format at attachment 1 of this Appendix.

2. No later than April 15 of each even numbered year, the Secretary, or designee, of each Military Department shall forward to the ASD(PA) (ATTN: Director, AFIS) a report of the Department's review of newspaper. A cover memorandum shall include summary data on total number of newspapers, number eliminated, and total cost for the year being reported, along with a listing of the information indicated on attachment 2 of this Appendix.

3. One information copy of each issue of all DoD newspapers shall be forwarded on publication date to the address in paragraph H.1. of this Appendix.

4. Information copies of CE newspaper contracts shall be forwarded to the address in paragraph H.1. of this Appendix.

5. Administrative Instructions shall be issued by the Director, AFIS, for the biennial review and reporting of newspapers.

I. Report Control Requirement

The information requirements prescribed in this Appendix are assigned Report Control Symbol DD PA(B1) 1638.

Attachment 1 to Appendix F—Request for Continuation or Establishment of DoD Newspaper

As required by Section H. of this appendix, the following information shall be provided biennially on newspapers published by DoD Components (less Military Departments), and when requesting approval for a new newspaper:

A. Name of newspaper.
B. Publishing command and mailing address.
C. Printing arrangement:
1. Government equipment.
2. Government contract with commercial printer.
3. CE contract with commercial printer (give name and mailing address of commercial printer).
D. Frequency and number of issues per year.
E. Number of copies printed and estimated readership.
F. Paper size (metro, tabloid, or magazine/newsletter) and average number of pages per issue.
G. Size of newspaper staff, listed as full time and part time.
H. Annual costs:
1. Editorial and administrative.
2. Supply and equipment.
3. Printing (funded only).
4. Distribution and mailing.
5. Staff transportation.
I. Attach four recent copies of newspaper.
J. For requests for approval of new newspapers:
1. Provide comprehensive statement of the necessity for the newspaper, including, if a tenant command, why host installation newspaper does not serve the needs of the requester's audience.
2. Attach four recent copies of newspapers published by host and any other tenants.

Attachment 2 to Appendix F—Military Department Newspaper Data

As required by section H., paragraph 2., of this appendix, the following information shall be provided biennially on each newspaper published by the Military Departments.

A. Name of newspaper.
B. Publishing command and mailing address.
C. Printing arrangement:
1. Government equipment.
2. Government contract with commercial printer.
3. CE contract with commercial printer (give name and mailing address of commercial printer).
D. Frequency and number of issues per year.
E. Number of copies printed and estimated readership.
F. Paper size (metro, tabloid, or magazine/newsletter) and average number of pages per issue.
G. Size of newspaper staff, listed as full time and part time.
H. Annual costs:
1. Editorial and administrative.
2. Supply and equipment.
3. Printing (funded only).
4. Distribution and mailing.
5. Staff transportation.

Dated: October 30, 1989.

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7

RIN 1024–AA91

Cape Cod National Seashore; Off-Road Vehicle Regulations

AGENCY: National Park Service, Interior.

ACTION: Proposed Rule; Withdrawal.

SUMMARY: On January 6, 1989 (54 FR 429), the Department of the Interior published a proposed rule in the **Federal Register** to modify the existing off-road vehicle (ORV) regulations at Cape Cod National Seashore. The rulemaking proposed minor revisions in the current restrictions that apply to ORV use. Of the 4,722 public comments received in response to the proposed rule, 98% indicated opposition to the proposal in some manner. The National Park Service (NPS) has determined that further review is warranted prior to any change in the current ORV regulations. The NPS will continue to evaluate the current regulations in terms of their effectiveness. The Service intends to address ORV use as one of the elements to be considered in the comprehensive planning process initiated in 1989 that will lead to the development of a General Management Plan for Cape Cod National Seashore. For these reasons, the National Park Service is withdrawing the proposed rule.

DATE: The proposed rule is withdrawn as of November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Anthony Bonanno, Chief Ranger, Cape Cod National Seashore, South Wellfleet, MA 02663, Telephone: (508) 349–3785.

Dated: October 27, 1989.

Constance B. Harriman,

Assistant Secretary for Fish and Wildlife and Parks.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of public comment period.

SUMMARY: On August 14, 1989 (54 FR 33245), EPA proposed approval of a revision submitted by the Commonwealth of Massachusetts for the Acushnet Company, Plant A. On October 13, 1989, Acushnet Company requested a second extension of the public comment period. EPA has evaluated this request and is hereby granting a thirty (30) day extension of the public comment period. This will be the final extension request granted for this action.

DATES: Comments should be received on or before November 13, 1989.

FOR FURTHER INFORMATION CONTACT: Cynthia L. Greene; (617) 565–3244; FTS 835–3244.

Authority: 42 U.S.C. 7401–7642.

Dated: October 24, 1989.

Paul Keough,

Acting Regional Administrator, Region I.

[FR Doc. 89–25952 Filed 11–2–89; 8:45 am]

BILLING CODE 6560–50–M

Response Claims Procedures for the Hazardous Substance Superfund; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; correction.

SUMMARY: EPA is correcting errors in the preamble and regulatory text of the proposed Response Claims Procedures for the Hazardous Substance Superfund which appeared in the **Federal Register** on September 13, 1989 (54 FR 37892).

FOR FURTHER INFORMATION CONTACT: William O. Ross at (FTS or Commercial) (202) 382–4645.

SUPPLEMENTARY INFORMATION: On September 23, 1989, EPA proposed regulations to establish the procedures for filing, evaluating, and resolving claims for response costs incurred for responding to releases of hazardous substances, pollutants, or contaminants asserted against the Hazardous Substance Superfund established under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986, 42 U.S.C. 9601 *et seq.* In addition, this proposed regulation would establish procedures for notifying concerned parties regarding limitations on the payment of response claims. The proposed regulation is consistent with EPA's proposed revisions to the National Oil and Hazardous Substances Pollution Contingency Plan (53 FR 51394 *et seq.*). The proposed regulation contained errors which are discussed briefly below and are corrected by this notice.

Dated: October 26, 1989.

Robert Wayland,

Acting Assistant Administrator, Office of Solid Waste and Emergency Response.

The following corrections are made in FRL–3399–6, the Response Claims Procedures for the Hazardous Substance Superfund published in the **Federal Register** on September 13, 1989 (54 FR 37892).

1. On page 37892, first column, under the heading "**FOR FURTHER INFORMATION CONTACT,**" line 2, change "(WH–220)" to "(OS–220)".

2. On page 37895, first column, line 21, change "(See 40 CFR part 35, subpart O regarding assurances from Indian Tribes.)" to "(see 40 CFR part 35, subpart O regarding assurance from Indian Tribes.)".

3. On page 37895, third column, line 5, change the subsection number "(1)" in "111(1)" to lower case letter "(l)".

4. On page 37897, first column, line 62, change "(b)(5)" to "(b)(4)".

5. On page 37899, the first sentence of the third full paragraph, second column, line 66, which reads, "For sites that are on the NPL, EPA will consider applications for preauthorization of remedial actions where the Agency does not in the near future intend: (1) To bring an enforcement action against responsible parties; (2) to initiate a Fund-financed response through contracts or cooperative agreements with States; or (3) where the Agency finds it desirable to allow claims in addition to one or more of the above mechanisms (e.g., mixed funding)." is revised to read as follows:

"For sites that are on the NPL, EPA will consider applications for preauthorization of remedial actions where the Agency: (1) does not in the near future intend to bring an enforcement action against responsible parties; (2) does not intend to initiate a Fund-financed response through contracts or cooperative agreements with States; or (3) finds it desirable to allow claims in addition to one or more of the above mechanisms (e.g., mixed funding)."

6. On page 37900, first column, line 57, change "§ 307.21(g)" to "§ 307.21(h)".

7. On page 37900, second column, line 37, change "§ 307.21(f)" to "§ 307.2l(g)".

8. On page 37900, second column, line 55, change "§ 307.21(g)" to "§ 307.21(h)".

9. On page 37900, second column, line 66, change "§ 307.21(g)" to "§ 307.21(h)".

10. On page 37900, third column, first paragraph under the heading, "2. Elements of the Application for Preauthorization", line 5, change "for" to "from".

11. On page 37901, first column, line 13, change "the" to "that".

12. On page 37901, first column, line 34, change "sities" to "sites".

13. On page 37901, first column, line 38, change "or" to "of".

14. On page 37901, third column, line 7, the comma following the word "revision" should be deleted.

15. On page 37901, third column, line 23, the sentence that reads, "Section 300.430(e)(70)(iii) (300.68(i) except for paragraph (iv), regarding waivers) on selection of the remedy." is revised to read as follows:

"Section 300.430(f)(3) (except for the waivers in paragraph (iv)) (300.68(i)) on selection of the remedy.".

16. On page 37901, third column, line 59, change "section 300.430(e)" to "§ 300.430(e)(2)–(6)".

17. On page 37901, third column, line 64, the sentence that reads, "The proposed remedy must also have been selected from the alternatives in accordance with proposed § 300.430(f)(3) (§ 300.68(i) except for the waivers in paragraph (iv) of the 1985 NCP." is revised to read as follows:

"The proposed remedy must also have been selected from the alternatives in accordance with proposed § 300.430(f)(3) (except for the waivers in paragraph (iv)) (§ 300.68(i) of the 1985 NCP)."

18. On page 37902, first column, line 46, change "employes" to "employs".

19. On page 37903, second column, line 15, change "may be reflect" to "may reflect".

20. On page 37906, third column, line 2, add a comma after the word "actions".

21. On page 37907, first column, first paragraph under the heading, "4. State and Indian Tribe Consultation", line 13, change "(see Section IV.D.2.f)." to "(see Section IV.D.2.g.).".

22. On page 37907, second column, line 63, delete the word "the".

23. On page 37909, second column, line l, change "§ 307.32(i)" to "§ 307.32(h)".

24. On page 37909, third column, line 18, change "or" to "of".

§ 307.21 [Corrected]

25. Section 307.21(e) on page 37913, second column, line 46 is correctly revised to include the word "transactions" after the word "procurement".

§ 307.22 [Corrected]

26. Section 307.22(b) on page 37914, first column, line 19, replace the period after the word "available" with a colon.

27. Section 307.22(b)(5) on page 37914, first column, line 49, change "section" to "§".

28. Section 307.22(e)(9) on page 37914, third column, line 5, is revised to read, "Takes into account Appendix D ' (methods of remedying releases) (section 300.70 of the existing 40 CFR).".

§ 307.23 [Corrected]

29. Section 307.23(b)(10) on page 37915, second column, line 54, add a comma after the word "study".

§ 307.30 [Corrected]

30. Section 307.30(c) on page 37916, second column, line 36, change "§ 307.20(d)" to "§ 307.20(c)".

§ 307.32 [Corrected]

31. Section 307.32(1) on page 37917, second column, line 13, change the

Decabromodiphenyl Ether; Toxic Chemical Release Reporting; Community Right-to-Know Denial of Petition

AGENCY: Environmental Protection Agency (EPA).

ACTION: Denial of petition.

SUMMARY: EPA is denying a petition to delete decabromodiphenyl ether (DBDPE) from the list of toxic chemicals under section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA). The decision is based on evidence that the chemical can be reasonably anticipated to cause developmental and chronic toxicological effects in humans. As a result of the review of the petition, EPA will consider initiating a rulemaking to add octabromodiphenyl ether (OBDPE) to the EPCRA section 313 list because of evidence that the chemical can be reasonably anticipated to cause developmental toxicological effects in humans. OBDPE was included in the petition review because it is a photolysis product of DBDPE and health and hazard assessment information of OBDPE was included in the documentation on DBDPE.

DATES: Written comments must be submitted on or before January 2, 1990.

ADDRESSES: Written comments should be submitted in triplicate to: OTS Docket Clerk, TSCA Public Docket Office (TS-793), Environmental Protection Agency, Rm. NE-G004, 401 M St., SW., Washington, DC 20460. Attention: Docket Control Number OPTS-400036.

FOR FURTHER INFORMATION CONTACT: Robert J. Israel, Petitions Coordinator, Emergency Planning and Community Right-to-Know Information Hotline, Environmental Protection Agency, Mail Stop OS-120, 401 M St. SW., Washington, DC 20460, Toll free: 800-535-0202, In Washington, DC and Alaska, 202-479-2449.

SUPPLEMENTARY INFORMATION:

I. Introduction

A. Statutory Authority

The denial is issued under section 313 (d) and (e)(1) of the Emergency Planning and Community Right-to-Know Act of 1986 (Pub. L. 99-499, "EPCRA" or the "Act"). EPCRA is also referred to as Title III of the Superfund Amendments and Reauthorization Act (SARA) of 1986.

B. Background

Section 313 of EPCRA requires certain facilities that manufacture, process, or otherwise use toxic chemicals to report annually their environmental releases of such chemicals. Section 313 establishes an initial list of toxic chemicals that is composed of more than 300 chemicals and chemical categories. Any person may petition the Agency to add chemicals to or delete chemicals from the list.

EPA issued a statement of petition policy and guidance in the **Federal Register** of February 4, 1987 (52 FR 3479), to provide guidance regarding the recommended content and format for submitting petitions. EPA must respond to petitions within 180 days either by initiating a rulemaking or by issuing an explanation of why the petition is denied.

II. Description of Petition

On May 15, 1989, EPA received a petition from Great Lakes Chemical Corporation to delete decabromodiphenyl ether (DPDPE) from the EPCRA section 313 list of toxic chemicals. The petition was based on Great Lakes' contention that DBDPE does not meet the EPCRA section 313 criteria for listing. The statutory deadline for EPA's response is November 11, 1989.

III. EPA's Review of Decabromodiphenyl Ether

A. Chemistry Profile

DBDPE, which is also known as decabromodiphenyl oxide (DBDPO), is a white solid. DBDPE is synthesized by treating diphenyl ether with bromine in the presence of a Friedel-Crafts catalyst. DBDPE melts at 300 to 310 °C, has a vapor pressure of less than 1 torr at 250 °C, and a solubility in water of 30 parts per billion.

1. *Photolysis.* Photolysis of DBDPE in organic solvents under ultraviolet (UV) light (using a mercury lamp) or artificial sunlight rapidly yields the lesser brominated congeners, including octabromodiphenyl ether (OBDPE), and polybrominated dibenzofurans (PBDFs). The formation and distribution of photoproducts by sunlight were similar to those by UV irradiation. It appears that debromination occurs more rapidly than cyclization which gives the dibenzofurans. The half-life for photodegradation in octanol under artificial sunlight is 4 hours. Photolysis in hexane-benzene-acetone (8:1:1) under artificial sunlight is 18 minutes. The half-life for photolysis under UV light is 100 minutes. The amount of PBDFs formed by photolysis in sunlight is substantial, about a 10 percent yield for 16 hours of irradiation. The amount of PBDFs formed after irradiation with UV light for 16 hours is 20 percent.

DBDPE also undergoes photolysis in water. Photohydroxylation, in which bromine is replaced by hydroxyl and yields phenolic derivatives, is the favored route. The degradation products decompose rapidly via increased UV absorption, due to the hydroxyl groups, resulting ultimately in the rupture of the aromatic ring.

Photodegradation may therefore occur in surface waters, in the atmosphere, or on soil surfaces exposed to sunlight.

2. *Thermal degradation.* Data has been submitted to EPA under section 8(e) of the Toxic Substances Control Act (TSCA) which demonstrates that under certain conditions brominated dibenzofurans may be formed during thermal processing of polyester resins (polybutylene terephthalate) which contain DBDPE. The data suggest that PBDFs may be formed at temperatures as low as 200 °C.

B. Toxicity Evaluation

Information on the most significant health and environmental hazards likely to be associated with DBDPE was assessed. All readily available data were received, including those provided by studies retrieved from a search of the recent literature, and documents prepared by EPA. Included in the materials researched were hazard and health assessments of the lesser brominated diphenyl ethers, such as OBDPE, which is known to be in production in the U.S. Thus, readily available information on the most significant health hazards associated with OBDPE (all isomers), which is a photolysis product of DBDPE, was also assessed.

Decabromodiphenyl Ether

1. *Developmental toxicity.* DBDPE can be reasonably anticipated to cause developmental toxicity in humans.

A standard teratology study performed in Sprague-Dawley rats showed an increased incidence of resorptions after treatment with doses as low as 10 mg/kg of DBDPE, and

increased incidence of subcutaneous edema and delayed ossification of portions of the calvarium after treatment with doses of 1,000 mg/kg of DBDPE. The lowest observed adverse effect level (LOAEL) for this study was 10 mg/kg/day and a no observed adverse effect level (NOAEL) was not established.

2. *Chronic toxicity.* DBDPE can be reasonably anticipated to cause chronic toxicity in humans.

Chronic exposure to DBDPE may cause liver toxicity in humans based on a repeated dose 30-day study in Sprague-Dawley rats. In that sudy, marked liver toxicity was seen at 80 and 800 mg/kg/day. In addition, there is some liver toxicity which was observed in the chronic bioassay which utilized Fischer rats; this heptatoxicity, however, was observed at much higher dose levels. The data from these studies indicate that the liver is the major target organ in the rat and there is a strain difference in the susceptibility to the effects of DBDPE. The liver was found to be the target organ for toxicity in carcinogenesis bioassays in both Fischer rats and $B_6C_6F_1$ mice.

In 14 to 30-day repeated dose studies in three strains of rats and one mouse strain, the greatest toxicity was evident in a 30-day study of DBDPE at doses of 0, 8, 80, or 800 mg/kg/day in Sprague-Dawley rats. The mixture of DBDPE used in that study consisted of 77.4 percent DBDPE, 21.8 percent nonabromodiphenyl ether (NBDPE), and 0.8 percent OBDPE. Treatment-related effects of DBDPE in Sprague-Dawley rats were found in the liver, spleen, thyroid, and kidneys. The effects observed in the liver included increased absolute and relative liver weight, liver enlargement at gross necropsy, and centrilobular hypetrophy with vacuolation. The effects observed in the spleen included increased absolute and relative weight, but it is not clear whether the spleen was examined microscopically. Hyperplasia was observed in the thyroid and hyaline droplet degenerative changes were observed in the kidneys. The lowest dose at which a treatment-related effect, specifically increased absolute and relative spleen weight, occurred in this study was at 8 mg/kg/day, which was also the lowest dose tested. In contrast to the positive findings in the 30-day study in Sprague-Dawley rats, no treatment related effects were found in the following studies: a 28-day study in Charles River CD rats using a mixture of DBDPE of unstated purity at a maximum dose of 100 mg/kg/day; several 14-day studies in F344/N rats using a mixture of DBDPE of 99 percent purity (2 unidentified impurities) at a maximum dose of 5,100 mg/kg/day; and a study in $B_6C_6F_1$ mice using a mixture of DBDPE of 99 percent purity (2 unidentified impurities) at a maximum dose of 15,500 mg/kg/day.

Administration of high doses of DBDPE in the diet of $B_6C_6F_1$ mice for 2 years produced treatment-related nonneoplastic lesions in males in the liver and thyroid. Centrilobular hypertrophy with vacuolation was observed in the liver and follicular cell hyperplasia was observed in the thyroid. In that 2-year study, the mixture of DBDPE used was of 94 to 97 percent purity, with 2 impurities identified as isomers of NBDPE and 2 unidentified impurities. In males, the LOAEL based upon all these lesions is 3,200 mg/kg/day, which was the lowest dose tested; a NOAEL was not established. No treatment-related nonneolastic lesions were reported in females when a maximum dose of 7,780 mg/kg/day was administered.

The chronic oral (diet) LOAEL for DBDPE, derived from studies on F344/N rats and $B_6C_6F_1$ mice, is much higher than the lowest doses that produced treatment-related effects in the 30-day dietary study in Sprague-Dawley rats. Compared to the Sprague-Dawley rats, F344/N rats and $B_6C_6F_1$ mice appeared relatively insensitive to toxic effects from prolonged oral exposure to DBDPE. This may be due to strain/species difference and/or to the higher purity or different compositions of the DBDPE tested. Data are not available to eliminate strain/species differences as a basis for this apparent sensitivity difference. However, it is clear that purity or the proportion of lesser brominated diphenyl ethers may play a role. In equivalent 28-day feeding studies of 100 or 1,000 ppm of DBDPE of unstated purity or OBDPE of unstated purity in Charles River CD rats, OBDPE produced toxic effects at both doses whereas DBDPE did not (See the discussion of OBDPE studies below). These studies did not include information on organ weights.

Octabromodiphenyl Ether

1. *Developmental toxicity.* OBDPE can be reasonably anticipated to cause developmental toxicity in humans.

A pilot and standard teratology study of OBDPE showed maternal toxicity (decreased weight gain) at doses as low as 50 mg/kg and developmental toxicity at doses as low as 10 mg/kg. Signs of developmental toxicity included increased incidence of resorptions, decreased fetal body weight, increased incidence of malformations such as shortened or bent leg bones, and increased incidence of delayed ossification of the axial skeleton at doses as low as 25 mg/kg and decreased fetal body weight at doses as low as 10 mg/kg. The LOAEL for this study was 10 mg/kg/day and the NOAEL was 2.5 mg/kg/day.

2. *Chronic toxicity.* OBDPE can be reasonably anticipated to cause chronic toxicity in humans.

There have been a number of studies carried out on OBDPE. Every study had some deviations from standard test guidelines, which precluded a full evaluation of the potential chronic toxicity of OBDPE.

Following repeated oral exposure of rodents to DBDPE or OBDPE, common target organs included the liver, thyroid, and kidney. Compared to DBDPE, the number of alterations produced in these organs by OBDPE appeared to be more extensive. Although treatment-related spleen and stomach effects were noted in studies of DBDPE but not OBDPE, the studies of the latter were inadequate to determine whether or not the spleen or stomach may be a target organ for OBDPE. Treatment-related effects produced by OBDPE included decreased body weight, hypoglycemia, and hematologic changes including reduced hemoglobin, hematocrit, and erythrocyte count. The lowest dose at which treatment related effects such as increased liver weight and liver lesions occurred was 10 mg/kg/day. These effects were seen as the result of prolonged exposure to OBDPE in 28-day and 13-week studies in Charles River CD rats.

C. Use, Release, and Exposure

1. *Production and use.* DBDPE is currently manufactured domestically by the Great lakes Chemical Corporation in El Dorado, AR, the Ethyl Corporation in Magnolia, AR, and Dow Chemical Company in Midland, MI. DBDPE is processed by Quabaug Corporation in North Brookfield, MA, Thermofil, Incorporated in Brighton, MI, and General Felt Industries in Philadelphia, PA, for on-site processing and use. Total domestic consumption in 1989 is estimated to be 13.5 million kilograms.

DBDPE is currently being imported by Lamtec Corporation in Flanders, NJ, and by the Nassau Chemical Corporation in Trenton, NJ. No information is available on the quantity of DBDPE imported.

DBDPE is used as a non-reactive flame retardant in plastics, resins, foams, and textiles. It is incorporated during the thermal molding process or physically blended in. Its major application is in thermoplastics, such as

high impact polystyrene for use in television cabinets, radios and phonographs, and business plastics such

EPA is to use in section 313(d) when modifying the list of toxic chemicals. When denying a petition, EPA must

base (100-year) flood elevations previously published at 20150 on May 10, 1989. This correction notice provides

specific fishing regulations in 50 CFR part 33. Refuge-specific fishing regulations are issued only after the

the determinations required by these Acts are made prior to the addition of the refuge to the list of areas open to

VOL 54 SS 212 NO 3 1989 UMI

high impact polystyrene for use in television cabinets, radios and phonographs, and business plastics such as computer housings.

2. *Exposure and release.* Exposure and release data were obtained from the Toxic Chemical Release Inventory (TRI). For the 1987 reporting year, 47 Form Rs were submitted under section 313 of EPCRA.

The largest release of DBDPE was 59,990 kg/yr to air from the Great Lakes plant in El Dorado, AR. The Industrial Source Complex Long-Term and Short-Term (ISCLT, ISCST) dispersion models were used to estimate fenceline exposures. The maximum annual average concentration was estimated to be 21.8 $\mu g/m^3$. The maximum short-term concentration was estimated to be 1,092 $\mu g/m^3$.

The largest releases of DBDPE to surface waters were 5,083 kg/yr from the White Chemical Company's Newark, NJ, facility, 3,773 kg/yr from the Tanner Corporation's Greenville, SC, facility, and 1,364 kg/yr from the Walsh Chemical Company's facility in Philadelphia, PA. The maximum drinking water exposure, 0.164 mg/yr, was estimated to result from the Tanner Corporation facility. Exposure resulting from DBDPE that has been landfilled was not estimated because the chemical is expected to remain bound to the soil and should not leach into the groundwater.

DBDPE has been found in samples of air particulates, soil, and sediments taken from the vicinity of the Great Lakes facility in El Dorado, AR, and the Ethyl Corporation facility in Magnolia, AR. Sediment samples collected near the Great Lakes facility were found to contain maximum concentrations of 1,000 mg/kg of DBDPE. Ambient air samples collected at this facility contained maximum levels of 98.1 $\mu g/m^3$. DBDPE levels of 5 $\mu g/kg$ have been detected in composite samples of human hair from barber shops in the two Arkansas towns. Based on these studies, it was estimated that a minimum of 5 percent of the population in each town had detectable levels of DBDPE.

IV. Explanation for Proposed Denial

A. General Policy

EPA has broad discretion in determining whether to grant or deny petitions under section 313 of EPCRA. When granting a petition, EPA has an obligation to show how the granting of the petition fulfills the statutory criteria EPA is to use in section 313(d) when modifying the list of toxic chemicals. When denying a petition, EPA must issue an explanation of why the petition is denied.

B. Reasons for Denial

EPA is denying the petition submitted by Great Lakes Chemical Corporation to delete DBDPE from the EPCRA section 313 list of toxic chemicals. The decision to deny the petition is based on evidence that DBDPE can be reasonably anticipated to cause developmental and chronic toxicity in humans. EPA's consideration of initiating action to add OBDPE to the EPCRA section 313 list is based on evidence that the chemical can be reasonably anticipated to cause developmental toxicity in humans. The effects noted for these chemicals are in accordance with the criteria in section 313(d)(2)(B) of EPCRA.

V. Administrative Record

The record supporting this decision is contained in docket control number OPTS-400036. All documents, including an index of the docket are available to the public in the TSCA Public Docket Office from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The TSCA Public Docket Office is located at EPA Headquarters, room NE-G004, 401 M Steet SW., Washington, DC 20460.

50 CFR Part 33

RIN 1018-AA50

Refuge-Specific Fishing Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service (Service) would amend certain regulations in 50 CFR part 33 that pertain to fishing on individual national wildlife refuges (NWRs). Refuge fishing programs are reviewed annually to determine whether the regulations governing fishing on individual refuges should be modified. Changing environmental conditions, state and Federal regulations and other factors affecting fish populations and habitats may warrant such amendments. The modifications would ensure the continued compatibility of fishing with the purposes for which the individual refuges involved were established and, to the extent practical, make refuge fishing programs consistent with state regulations.

DATES: Comments must be received on or before December 4, 1989.

ADDRESS: Send comments to: Assistant Director, Refuges and Wildlife, U.S. Fish and Wildlife Service, 18th and C Streets, NW., MS 670-ARLSQ, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Larry LaRochelle, Division of Refuges, Fish and Wildlife Service, 18th and C Streets NW., MS 670-ARLSQ, Washington, DC 20240; Telephone 703-358-2043.

SUPPLEMENTARY INFORMATION: 50 CFR part 33 contains the provisions that govern fishing on NWRs. Fishing is regulated on refuges to (1) ensure compatibility with primary refuge purposes, (2) properly manage the fishery resource and (3) protect other refuge values. On many refuges, the Service policy of adopting state fishing regulations is an adequate way of meeting these objectives. On other refuges it is necessary to supplement state regulations with refuge-specific fishing regulations which will ensure that the Service meets its management responsibilities, as outlined under the section entitled "Conformance with Statutory and Regulatory Authorities." These regulations may list the seasons, methods of taking fish, descriptions of open areas and other provisions. The Service has previously issued refuge-specific fishing regulations in 50 CFR part 33. Refuge-specific fishing regulations are issued only after the final publication of the opening of a wildlife refuge to fishing.

This proposed rule would amend and supplement certain refuge-specific regulations in 50 CFR part 33, §§ 33.6 through 33.51, which pertain to fishing on individual refuges in their respective alphabetically listed state.

The policy of the Department of the Interior (Department) is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. It is, therefore, the purpose of this proposed rulemaking to seek public input regarding the proposed amendments to refuge-specific fishing regulations. Accordingly, interested persons may submit written comments concerning this proposal to the Assistant Director, Refuges and Wildlife (address above), by the end of the comment period. All substantive comments will be considered by the Department prior to issuance of a final rule.

Conformance With Statutory and Regulatory Authorities

The National Wildlife Refuge System Administration Act (NWRSAA) of 1966, as amended (16 U.S.C. 668dd), and the Refuge Recreation Act (RRA) of 1962 (16 U.S.C. 460k) govern the administration and public use of NWRs. Specifically, section 4(d)(1)(A) of the NWRSAA authorizes the Secretary of the Interior (Secretary), under such regulations as he may prescribe, to permit the use of any area within the System for any purpose, including but not limited to hunting, fishing, public recreation and accommodations and access when he determines that such uses are compatible with the major purposes for which such areas were established.

The RRA authorizes the Secretary to administer refuge areas within the National Wildlife Refuge System for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary purposes for which the area was established. The RRA also authorizes the Secretary to issue regulations to carry out the purposes of the Act.

Fishing plans are developed for each fishing program on a refuge prior to its opening to fishing. In many cases, refuge-specific fishing regulations are included as part of fishing plans to ensure the compatibility of the fishing programs with the purposes for which the refuge was established. Compliance with the NWRSAA and RRA is ensured when fishing plans are developed and the determinations required by these Acts are made prior to the addition of the refuge to the list of areas open to fishing in 50 CFR part 33. Continued compliance is ensured by annual review of fishing programs and regulations.

Economic Effect

Executive Order 12291 requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; a major increase in cost or prices for consumers, individual industries, government agencies or geographic regions; or significant adverse effects on the ability of United States-based enterprises to compete with foreign-based enterprises. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) further requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions.

The proposed amendments to the codified refuge-specific fishing regulations would make relatively minor adjustments to existing fishing programs. The regulations are not expected to have any gross economic effect and will not cause an increase in costs or prices for consumers, individual industries, Federal, state or local governments, agencies or geographic regions. The benefits accruing to the public are expected to exceed the costs of administering this rule. Accordingly, the Department has determined that this rule is not a "major rule" within the meaning of Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Paperwork Reduction Act

The Service has approval from the Office of Management and Budget (OMB) for the information collection requirements of these regulations pursuant to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). These requirements are presently approved by OMB as cited below:

Type of information collection	OMB approval No.
Economic and public use permits	1018-0014

Public reporting burden for this form is estimated to average six (6) minutes per response, including time for reviewing instructions, gathering and maintaining data, and completing and

reviewing the form. Direct comments on the burden estimate or any other aspect of this form to: Information Collection Officer, U.S. Fish and Wildlife Service, MS 224 ARLSQ, Washington, DC 20240; and the Office of Management and Budget, Paperwork Reduction Project (1018–0014), Washington, DC 20503.

Environmental Considerations

Compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2)(C)) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) is ensured when fishing plans are developed and the determinations required by these Acts are made prior to the addition of refuges to the list of areas open to sport fishing in 50 CFR part 33. Refuge-specific fishing regulations are subject to a categorical exclusion from the NEPA process if they do not significantly alter the existing use of a particular refuge. The changes proposed in this rulemaking would not significantly alter the existing uses of the refuges involved.

Information regarding the conditions that apply to individual refuge fishing programs, any restrictions related to public use on the refuge and a map of the refuge are available at refuge headquarters. This information can also be obtained from the regional offices of the Service at the addresses listed below:

Region 1—California, Hawaii, Idaho, Nevada, Oregon and Washington:
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 1002 NE Holladay Street, Portland, Oregon 97232; Telephone (503) 231–6214.
Region 2—Arizona, New Mexico, Oklahoma and Texas:
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 1306, Albuquerque, New Mexico 87103; Telephone (505) 766–1829.
Region 3—Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio and Wisconsin:
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111; Telephone (612) 725–3507.
Region 4—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Puerto Rico, Tennessee and the Virgin Islands:
Assitant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Richard B. Russell Federal Building, 75 Spring Street SW, Atlanta, Georgia 30303; Telephone (404) 331–0633.
Region 5—Connecticut, Delaware, District of Columbia, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia:
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158; Telephone (617) 965–5222.
Region 6—Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming:
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 25486, Denver Federal Center, Denver, Colorado 80225; Telephone (303) 236–8145.
Region 7—Alaska:
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, Alaska 99503; Telephone (907) 786–3538.

Larry LaRochelle, Division of Refuges, U.S. Fish and Wildlife Service, Washington, DC, is the primary author of this proposed rulemaking document.

List of Subjects in 50 CFR Part 33

Fishing, National Wildlife Refuge System, Wildlife refuges.

PART 33—[AMENDED]

Accordingly, it is proposed to amend part 33 of chapter I of title 50 of the Code of Federal Regulations as set forth below:

1. The authority citation for part 33 continues to read as follows:

Authority: 5 U.S.C. 301; 16 U.S.C. 460K, 664, 668dd and 715[s].

2. Section 33.4 would be amended to reflect a name change by deleting the Columbian White-tailed Deer National Wildlife Refuge and adding the Julia Butler Hansen Refuge for the Columbian White-tailed Deer in alphabetical sequence under the State of Washington as follows:

§ 33.4 List of open areas; sport fishing

* * * * *

Washington

* * * * *

Julia Butler Hansen Refuge for the Columbian White-tailed Deer.

* * * * *

3. Section 33.8 would be amended by revising paragraph (a) introductory text and adding paragraph (a)(6) as follows:

§ 33.8 Arkansas.

(a) *Big Lake National Wildlife Refuge.* Fishing and frogging are permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(6) Frogging is permitted from the beginning of the State frogging season through October 31. The use of archery equipment for taking frogs is not permitted.

* * * * *

4. Section 33.13 would be amended by removing paragraph (h); redesignating paragraphs (a) through (g) as (b) through (h) and adding a new paragraph (a) as follows:

§ 33.13 Florida.

(a) *Arthur R. Marshall Loxahatchee National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following conditions:

(1) Fishing is permitted only from sunrise to sunset on all areas of the refuge except the management impoundments and those areas marked by signs as closed to public entry or fishing.

(2) Only the use of rods and reels or poles and lines is permitted, and this fishing equipment must be attended at all times.

(3) Commercial fishing or the taking of frogs or turtles is not permitted.

(4) The possession or use of trotlines, gigs, jugs, seines, castnets or other fishing devices not described above is not permitted.

* * * * *

5. Section 33.17 would be amended by revising paragraph (b)(4) and the heading of paragraph (d) as follows:

§ 33.17 Illinois.

* * * * *

(b) *Crab Orchard National Wildlife Refuge.* * * *

* * * * *

(4) Largemouth bass under 15" in length may not be taken from A–41, Bluegill or Blue Huron Ponds, Crab Orchard Lake or Managers or Honkers Ponds.

* * * * *

(d) *Upper Mississippi River National Wildlife and Fish Refuge.* * * *

* * * * *

6. Section 33.19 would be amended by revising the heading of paragraph (d) as follows:

§ 33.19 Iowa.

* * * * *

(d) *Upper Mississippi River National Wildlife and Fish Refuge.* * * *

* * * * *

7. Section 33.22 would be amended by revising paragraph (e), redesignating paragraphs (g) as (h) and (f) as (g); adding new paragraph (f) and revising newly designated paragraph (g)(4) as follows:

§ 33.22 Louisiana.

(e) *Lacassine National Wildlife Refuge.* Fishing and crayfishing are permitted on designated areas of the refuge subject to the following condition:

Fishing is permitted from 1 hour before sunrise until 1 hour after sunset during the period of March 15 through October 15.

(f) *Lake Ophelia National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following conditions:

(1) Fishing and public access is permitted from one-half hour before sunrise until one-half hour after sunset only from March 1 through October 15 in areas posted by refuge signs and/or designated in refuge brochures.

(2) Fishing and public access is permitted year-round from one-half hour before sunrise until one-half hour after sunset in areas posted by refuge signs and/or designated in refuge brochures.

(3) Access to refuge fishing areas is restricted to those roads and trails posted by refuge signs and/or designated by refuge brochures.

(4) Only nonmotorized boats, boats with electric motors, and boats with motors of 25 horsepower or less are permitted in refuge wates. Boats may not be left on the refuge overnight.

(5) The ends of trotlines must consist of a length of cotton line that extends from the point of attachment into the water.

(g) *Sabine National Wildlife Refuge.* * * *

* * * * *

(4) All other refuge waters are open to fishing, crabbing, crayfishing and shrimping from March 15 through October 15 only.

* * * * *

8. Section 33.26 would be amended by revising paragraph (a)(2)(i); removing paragraph (a)(2)(ii) and redesignating paragraphs (a)(2)(iii) through (v) as paragraphs (a)(2)(ii) through (iv) as follows:

§ 33.26 Michigan.

(a) *Seney National Wildlife Refuge.* * * *

* * * * *

(2) *Summer fishing.* (i) Fishing is permitted from May 15 through September 30 during daylight hours only.

* * * * *

9. Section 33.27 would be amended by revising paragraph (b) and the heading of paragraph (f) as follows:

§ 33.27 Minnesota.

* * * * *

(b) *Minnesota Valley National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following conditions:

(1) Only bank fishing is permitted.

(2) Ice fishing is permitted when ice conditions are safe.

(3) Ice fishing shelters must be removed from the refuge following each day's fishing activity.

* * * * *

(f) *Upper Mississippi River National Wildlife and Fish Refuge.* * * *

10. Section 33.32 would be amended by revising paragraphs (a) (1) through (3); revising paragraph (b)(2), adding paragraphs (b) (4) through (8) as follows:

§ 33.32 Nevada.

(a) *Pahranagat National Wildlife Refuge.* * * *

(1) Fishing is permitted year-round with the exception of North Marsh which is closed annually during the waterfowl hunting season.

(2) Only non-motorized boats and boats with electric motors are permitted on Upper Lake, Middle Pond, and Lower Lake.

(3) The use of boats, rubber rafts or other flotation devices is not permitted on North Marsh.

(b) *Ruby Lake National Wildlife Refuge.* * * *

* * * * *

(2) Only dike fishing is permitted in the areas north of the Brown Dike and east of the Collection Ditch with the exception that fishing by wading and from personal flotation devices (float tubes) is permitted in Unit 21 and portions of Unit 10.

* * * * *

(4) Beginning June 15 annually and continuing until December 31 annually, motorless boats with battery powered electric motors are permitted only on the South Sump.

(5) Beginning August 1 annually and continuing until December 31 annually, boats propelled with a motor or combination of motors in aggregate not to exceed 10 horsepower rating are permitted on the South Sump.

(6) Boats may be launched only from designated landings.

(7) No boats of any kind may be stored on the refuge from January 1 through March 31.

(8) Fishing is prohibited from the west bank of the Collection Ditch between Bressman Cabin and Passey Springhole, in the hatchery rearing and brooding from the dike between Units 14 and 20 as posted.

* * * * *

11. Section 33.34 would be amended by revising paragraphs (a)(2) and (a)(3) as follows:

§ 33.34 New Jersey.

(a) *Edwin B. Forsythe National Wildlife Refuge.* * * *

* * * * *

(2) Boat and bank fishing are permitted in and along Lily Lake. Boat ramp facilities are not available; only cartop launches will be permitted.

(3) Fishing, clamming and crabbing are not permitted from land or on any waters within tract 122X locally known as the AT&T properties. This area is closed to all public use.

* * * * *

12. Section 33.53 would be amended by revising paragraph (d) as follows:

§ 33.53 Wisconsin.

* * * * *

(d) *Upper Mississippi River National Wildlife and Fish Refuge.* Fishing is permitted subject to the following condition:

(1) Only hand powered boats or boats with electric motors are permitted on Mertes' Slough in Buffalo County, Wisconsin.

Dated: September 22, 1989.

Richard N. Smith,

Acting Director, Fish and Wildlife Service.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

[Docket No. 89-026N]

National Advisory Committee on Microbiological Criteria for Foods; Meeting

Notice is hereby given that a meeting of the National Advisory Committee on Microbiological Criteria for Foods, will be held on Monday, Tuesday, and Wednesday, November 27–29, 1989, at the Marriott Key Bridge Hotel, 1401 Lee Highway, Arlington, VA 22209. On Monday, November 27, 1989, the Meat and Poultry and the Seafood Working Groups will meet from 1:00 p.m. to 5:00 p.m. to prepare for the full committee discussions on Tuesday and Wednesday. The full committee will meet from 9:00 a.m. to 5:00 p.m. on November 28 and 29.

The committee provides advice and recommendations to the Secretaries of Agriculture and Health and Human Services concerning the development of microbiological criteria by which the safety and wholesomeness of food can be assessed, including criteria for microorganisms that indicate whether foods have been produced using good manufacturing practices.

The Agenda for this meeting follows:

(1) Approval of Meeting Agenda,
(2) Approval of the June 21–23, 1989, Meeting Minutes,
(3) Presentation of the Seafood Subcommittee Recommendations,
(4) Presentation of the Meat and Poultry Subcommittee Recommendations,
(5) Presentation of the HACCP Subcommittee Recommendations,
(6) Committee Discussions of Recommendations,
(7) New Business, and
(8) Future Assignments.

The Committee meetings are open to the public on a space available basis. Comments of interested persons may be filed prior to or after the meeting and should be addressed to Ms. Catherine M. DeRoever, Director, Executive Secretariat, U.S. Department of Agriculture, Food Safety and Inspection Service, Room 3175, South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC 20250. In submitting comments, please reference the docket number appearing in the heading of this notice. Background materials are available for inspection by contacting Ms. DeRoever on (202) 447–9150.

Done at Washington, DC on: October 30, 1989.

Lester M. Crawford,

Chairman.

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Warren E. Thompson; Order

In the matter of Warren E. Thompson, 1064 Gridley Street, Bayshore, New York 11706, Respondent.

On October 10, 1989, then-Acting Assistant Secretary for Export Enforcement Skidmore signed an Order in the above-captioned matter which denied the export privileges of Warren E. Thompson (Thompson). 54 FR 42969, October 19, 1989. Through inadvertence, that Order did not include Thompson's address.

In view of the foregoing, I am hereby amending the October 10, 1989 Order by inserting in line five of the second full paragraph of that Order, after the word "[Thompson]", the following address: 1064 Gridley Street, Bayshore, New York 11706.

Entered this 27th day of October, 1989.

Kenneth A. Cutshaw,

Acting Assistant Secretary for Export Enforcement.

BILLING CODE 3510-DT-M

Foreign-Trade Zones Board

[Order No. 447]

Approval for Expansion of Foreign-Trade Zone 83; Huntsville, AL

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board adopts the following Resolution and Order:

Whereas, the Huntsville-Madison County Airport Authority, Grantee of Foreign-Trade Zone No. 83, has applied to the Board for authority to expand its general-purpose zone at the Huntsville International Airport, within the Huntsville Customs port of entry;

Whereas, the application was accepted for filing on December 22, 1988, and notice inviting public comment was given in the **Federal Register** on January 9, 1989 (Docket 39–88, 54 FR 650);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to improve and expand zone services in the Huntsville area; and,

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby orders:

That the Grantee is authorized to expand its zone in accordance with the application filed December 22, 1988. The grant does not include authority for manufacturing operations, and the Grantee shall notify the Board for approval prior to the commencement of any manufacturing or assembly operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the District Army Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, DC, this 30th day of October, 1989.

Eric I. Garfinkel,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 89-25981 Filed 11-2-89; 8:45 am]

BILLING CODE 3510-DS-M

[Order No. 445]

Approval for Expansion of Foreign-Trade Zone 23; County of Erie, NY

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 USC 81a–81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

Whereas, the County of Erie, New York, Grantee of Foreign-Trade Zone No. 23, has applied to the Board for authority to expand its general-purpose zone at the Gateway Trade Center in Buffalo and Lackawanna, New York, within the Buffalo Customs port of entry;

Whereas, the application was accepted for filing on December 16, 1987, and notice inviting public comment was given in the **Federal Register** on December 24, 1987 (Docket 45–87, 52 FR 48732);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to improve and expand zone services in the Buffalo area; and,

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby orders:

That the Grantee is authorized to expand its zone in accordance with the application filed December 16, 1987. The grant does not include authority for manufacturing operations, and the Grantee shall notify the Board for approval prior to the commencement of any manufacturing or assembly operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the District Army Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, DC, this 30th day of October, 1989.

Eric I. Garfinkel,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

[Docket No. 21-89]

Foreign-Trade Zone 141—Monroe County, NY; Application for Subzone Hickey-Freeman Apparel Plant, Rochester, NY

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the County of Monroe, New York, grantee of FTZ 141, requesting special-purpose subzone status for the apparel manufacturing plant of Hickey-Freeman Company, Inc. (a subsidiary of Hartmarx Corporation), in Rochester, New York, within the Rochester Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on October 25, 1989.

The Hickey-Freeman plant (6 acres) is located at 1155 Clinton Avenue North, Rochester. The facility employs some 1,200 persons and is used to manufacture men's suits. The primary material is woven worsted wool fabric, which is purchased mostly from foreign sources. Within the activated zone area, material would be inspected, sprayed, shrunk and cut under zone procedures, resulting in unfinished shells. The shells would be sewn and finished into men's suits elsewhere at the plant outside the activated zone area.

Zone procedures would allow Hickey-Freeman to accelerate its claims for drawback on products to be exported. On domestic sales, the company would be able to choose the duty rate on cut suit shells (15.5%), whereas the duty rate on woolen fabric is 36.1 percent. The application indicates that subzone status will result in savings that will help the plant compete with foreign plants, which are increasing shipments to the United States.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Edward A. Goggin, Deputy Assistant Regional Commissioner, U.S. Customs Service, Northeast Region, 10 Causeway Street, Boston, Massachusetts 02222; and Colonel Hugh F. Boyd IV, District Engineer, U.S. Army Engineer District Buffalo, 1776 Niagara Street, Buffalo, New York 14207.

Comments concerning the proposed subzone are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before December 8, 1989.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

U.S. Department of Commerce, Branch Office, 121 East Avenue, Rochester, New York 14604;
Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th and Pennsylvania Avenue, NW., Room 2835, Washington, DC 20230.

Dated: October 27, 1989.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 89-25909 Filed 11-2-89; 8:45 am]

BILLING CODE 3510-DS-M

[Docket No. 23-89]

Foreign-Trade Zone 78—Nashville, TN; Extension of Time Limit for Subzone 78D, Global Power Company Equipment Storage Facility, Phipps Bend, TN

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Metropolitan Nashville Port Authority (Port Authority), grantee of FTZ 78, requesting an extension of the time limit on Subzone 78D (to 10–25–93) at the Global Power Company's nuclear equipment storage facility in Phipps Bend, Tennessee. Global Power Company (Global), a Delaware Corp., (an affiliate of Park Co.) replaced the Tennessee Valley Authority (TVA) as operator in January 1989. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 USC 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on October 23, 1989.

Subzones 78C and 78D were approved by the Board on March 30, 1984, to allow TVA to defer duties on certain foreign-sourced nuclear power plant equipment purchased for power plants that were never built (Board Order 246, 49 FR 13562). Approval was granted for five

years (3–30–89), during which time TVA had expected to sell the equipment. In 1988, TVA executed an agreement with Global and its affiliate Park Company (Park), pursuant to which Park purchased the equipment and Global applied to become operator. Park planned to sell the equipment to foreign customers. Based on a request from the Port Authority on behalf of Park, the Board approved a time extension of subzone status until December 31, 1989 for Subzone 78D, and October 25, 1993 for Subzone 78C (Board Order 413, 53 FR 51575). The Port Authority is now requesting that the time limit for Subzone 78D be extended to October 25, 1993. This would give Park additional time to sell the equipment at that site.

The examiners committee which will review the request consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Joel Mish, District Director, U.S. Customs Service, South Central Region, 423 Canal Street, New Orleans, Louisiana 70130–2341; and, Colonel James P. King, District Engineer, U.S. Army Engineer District Nashville, P.O. Box 1070, Nashville, TN 37202–1070.

Comments concerning the proposed time extension are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before November 24, 1989.

A copy of the application is available for public inspection at each of the following locations:

U.S. Department of Commerce, District Office, Suite 1114 Parkway Towers, 404 James Robertson Parkway, Nashville, TN 37219–1505;

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 2835, 14th & Pennsylvania Ave., NW., Washington, DC 20230.

Dated: October 26, 1989.

John J. Da Ponte, Jr.,

Executive Secretary.

Certain Circular Welded Carbon Steel Pipes and Tubes From Taiwan; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On November 16, 1988, the Department of Commerce published the preliminary results of its administrative review and tentative determination to revoke in part the antidumping duty order on certain circular welded carbon steel pipes and tubes from Taiwan. The review covers four manufacturers and/or exporters of this merchandise to the United States for the period May 1, 1986 through April 30, 1987.

We gave interested parties an opportunity to comment on our preliminary results. Based on our analysis of the comments received, we have changed the final results from those presented in our preliminary results of review for one of the four manufacturers.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Anne D'Alauro or Robert Marenick, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC, 20230; telephone (202) 377–5255.

SUPPLEMENTARY INFORMATION:

Background

On November 16, 1988, the Department of Commerce ("the Department") published in the Federal Register (53 FR 46102) the preliminary results of its administrative review and tentative determination to revoke in part the antidumping duty order on certain circular welded carbon steel pipes and tubes from Taiwan (49 FR 19369, May 7, 1984). We have now completed that administrative review in accordance with section 751 of the Tariff Act of 1930, as amended ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS number(s).

Imports covered by this review are shipments of certain circular welded carbon steel pipes and tubes. The Department defines such merchandise as welded carbon steel pipes and tubes of circular cross section, with walls not thinner than 0.065 inch, and 0.375 inch or more but not over 4.5 inches in outside diameter, which were classified under items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243 and 610.3252 of the Tariff Schedules of the United States Annotated ("TSUSA"); this merchandise is currently classified under HTS item number 7306.30.50. The TSUSA and HTS item numbers are provided for convenience and customs purposes. The written product description remains dispositive.

The review covers four manufacturers/exporters of certain Taiwan circular welded carbon steel pipes and tubes and the period May 1, 1986 through April 30, 1987.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. We received comments from the petitioner, the standard pipe subcommittee of the Committee on Pipe and Tube Imports, and one respondent, An Mau Steel Company ("An Mau").

Petitioner's Comment 1

Petitioner contends that the Department's tentative decision to revoke the antidumping duty order with respect to Yieh Hsing Enterprise ("Yieh Hsing") was inappropriate, since such a decision may only be made pursuant to a review under section 751(b) of the Tariff Act, subsequent to a section 751(a) finding of no sales at less than fair value. Petitioner cites as authority for this claim the decision of the Court of Appeals for the Federal Circuit in *Oregon Steel Mills, Inc.* v. *United States*, Slip Op. 88–1242 (November 23, 1988).

Department's Position

We disagree. Under the statute, a section 751(c) revocation can be made pursuant to either a section 751(a) or 751(b) review. Petitioner misplaces its reliance on *Oregon Mills*, which held that a section 751(b) review, by itself, is adequate to authorize 751(c) revocation, not that both 751(a) and 751(b) reviews are necessary.

Petitioner's Comment 2

Petitioner faults the Department for failing to honor petitioner's withdrawal of its request for a review of the respondent, Kao Hsing Chang Iron and Steel ("Kao Hsing Chang"), stating that nothing in section 751(a) of the Tariff Act gives the Department the authority to continue an administrative review without a valid request on the record. The petitioner cites similar instances where the Department has terminated a review following the withdrawal of the sole request by the requester after a substantial period of time has passed and after the questionnaire response has been received.

Department's Position

As the Department stated in its preliminary results of review, the petitioner withdrew its request for review with respect to Kao Hsing Chang on July 25, 1988, 404 days after initiation of the review. The length of time in this case far exceeds the time elapsed in the examples cited by the petitioner in which the Department has terminated a case upon withdrawal of a request. The Department's new regulations now permit a party to withdraw a request for review no later than 90 days after the date of publication of the notice of initiation, although the Secretary may extend this time limit if the Secretary decides it is reasonable to do so (§ 353.22(a)(5) of the Department's regulations published in the Federal Register on March 28, 1989 (54 FR 12742) (to be codified at 19 CFR 353.22(a)(5)). Although the Department's prior regulations did not address this question, we determine that 404 days is an excessive length of time after initiation to withdraw a request and terminate a review; therefore, we have not terminated the review of Kao Hsing Chang.

Petitioner's Comment 3

Petitioner questions a U.S. price change reported by Yieh Hsing and requests the Department to obtain documentation to verify the revised price.

Department's Position

The Department was able to confirm through U.S. Customs that the price change reported by Yieh Hsing is accurate.

Petitioner's Comment 4

Petitioner comments that it is unclear from Yieh Hsing's response whether its reported home market price included value added tax ("VAT"). If Yieh Hsing did not include VAT in its reported home market prices, the VAT adjustment made in the preliminary results of review should not be made in the final results.

Department's Position

The Department received confirmation from Yieh Hsing that VAT was not included in the home market selling price reported. We have deleted the adjustment for VAT in these final results

Petitioner's Comment 5

The petitioner argues that the Department should decline to grant Yieh Hsing a circumstance of sale adjustment since its home market credit experience was insufficiently documented.

Department's Position

We disagree. Yieh Hsing provided complete credit information on the home market transactions specifically selected by the Department and on which the Department has reasonably relied as support for Yieh Hsing's home market credit experience.

Petitioner's Comment 6

Petitioner argues that costs associated with the discontinuation of An Mau's pipe producing operations should be included in the constructed value of its pipe and tube sold during the period of this review.

Department's Position

We disagree. Costs associated with the dismantling and disposal of the pipe mill equipment were not incurred in the course of producing pipes and tubes for sale. Since all scheduled depreciation was included in the production costs corresponding with sales made during the period of review, the subsequent nonoperating expenses of retiring equipment should not be included in the calculation of constructed value.

An Mau's Comments

An Mau 's Comment 1

An Mau argues that the Department should not be relying on production costs incurred after August 1986 in its constructed value calculations, since from September 1986 until January 1987, An Mau was in the process of shutting down production, and as a result of this cessation of normal production, An Mau's fixed factory overhead and labor costs per metric ton of pipe produced increased substantially. Such artificially inflated costs during this latter period do not represent costs incurred "at a time preceding the date of exportation of the merchandise under consideration which would ordinarily permit the production of that particular merchandise in the ordinary course of business," as required by section 773(e)(1)(A) of the Tariff Act. Alternatively, should the Department conclude that constructed value can be based on costs incurred for producing merchandise during September 1986–January 1987, such production costs should only be utilized for merchandise actually produced during these months. Merchandise produced prior to September 1986 cannot be compared to costs incurred in this subsequent period of time.

Department's Position

In its final results of review, the Department has weight averaged the costs of production used in determining constructed value throughout the review period. Although the costs of production for the September 1986–January 1987 period are included in the average, the quantities produced within that period are significantly smaller than the quantities of merchandise produced earlier and, as a result, are not distortive. By using the weighted-average costs of production in this case, the Department is relying on the actual costs incurred in a manner which is representative of production costs throughout the period of review.

Comment 2

An Mau argues that depreciation associated with three idle forming machines that were never put into production should be excluded from constructed value. In particular, An Mau alleges that these three machines are no longer useful, were designed to produce furniture tubing, and could not have been used to produce merchandise exported to the United States.

Department's Position

An Mau never previously indicated that the forming machines in question could not have been used to produce merchandise it exported to the United States even though the issue was discussed and treated similarly in the previous review (See *Final Results of Antidumping Duty Administrative Review, Certain Circular Welded Carbon Steel Pipes and Tubes*, 53 FR 41219, October 20, 1988). An Mau failed to provide any evidence in the course of this review to support this assertion and only raised the issue following the preliminary results of review. Therefore, An Mau has not provided adequate factual or sufficiently timely information to enable the Department to evaluate this claim. For these reasons, we have continued to include the depreciation associated with these three machines as a cost of production in our calculation of constructed value.

Comment 3

An Mau requests the Department to correct two errors it made in its U.S. sales listing. The corrections cited involve an incorrect pipe designation for one transaction as well as an incorrect U.S. price for a second transaction.

Department's Position

We consider these corrections submitted by An Mau subsequent to the preliminary results to be untimely. We

will not allow respondents to selectively amend responses to their advantage unless the errors are so obvious they

and § 353.22 of the Department's regulations.

We verified in Japan and in the United States the questionnaire responses submitted by Sharp Corporation and

and Japanese brokerage fees, Japanese customs clearance fees, export license fees, forwarding and handling charges,

warranties, advertising, royalties, physical characteristics of the merchandise, and packing. We made

respect to Toshiba (48 FR 44101). We preliminarily find margins for Toshiba in this review. If we determine that

2
NO
3
1989
UMI

will not allow respondents to selectively amend responses to their advantage unless the errors are so obvious they can be corrected without additional information. An Mau had ample time between the submission of its response in October 1987 and the preliminary results in November 1988 to correct any errors in its U.S. sales data.

Final Results of the Review

As a result of the comments received, we have revised our preliminary results and determine that the following margins exist for the period May 1, 1986 through April 30, 1987:

Manufacturer	Margin (percent)
An Mau	.66
Yieh Hsing	0
Kao Hsing Chang	[1] 0
Far East Machinery Co	[1] 0

[1] No shipments during the period. Rates noted are from the preceding antidumping duty administrative review.

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above for An Mau. The Department will issue appraisement instructions directly to the Customs Service.

As provided for in section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margin will be required for An Mau. Because there was no margin for Yieh Hsing, Kao Hsing Chang, and Far East Machinery Co., no cash deposit shall be required for those companies. For shipments from the remaining known manufacturer not covered by this review, the cash deposit will continue to be at the rate established in the final results of antidumping duty administrative review for this firm (51 FR 43948, December 5, 1986). For any future entries of this merchandise from a new exporter not covered in this or prior reviews, whose first shipments occurred after April 30, 1987 and who is unrelated to any previously reviewed firm, a cash deposit of .66 percent shall be required. These deposit requirements and waivers are effective for all shipments of certain circular pipes and tubes from Taiwan entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.22 of the Department's regulations.

Dated: October 30,1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

Television Receivers, Monochrome and Color, From Japan; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration/ International Trade Administration, Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to requests by two domestic parties to the proceeding and two respondents, the Department of Commerce (the Department) has conducted an administrative review of the antidumping finding on television receivers from Japan. The review covers four manufacturers/exporters of this merchandise to the United States and various periods from April 1, 1981, through February 28, 1989. As a result of the review, the Department has preliminarily determined the dumping margins for these firms to range from zero to 28.29 percent.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: J.E. Downey or John R. Kugelman, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-3601/ 4733.

SUPPLEMENTARY INFORMATION:

Background

On August 28, 1989, the Department published in the **Federal Register** (54 FR 35517) the final results of its last administrative review of the antidumping finding on television receivers from Japan. Two domestic parties to the proceeding and two respondents requested in accordance with 19 CFR 353.53a(a) of the Commerce Regulations (1988) that we conduct these administrative reviews. We published notices of initiation of the antidumping duty administrative reviews on November 27, 1985, April 18, 1986, July 9, 1986, and April 28, 1988. As required by section 751 of the Tariff Act of 1930 (the Tariff Act), we have now conducted these administrative reviews.

We verified in Japan and in the United States the questionnaire responses submitted by Sharp Corporation and Toshiba Corporation. Sharp failed to provide supplementary model match data that we requested for the fifth, sixth, and seventh administrative reviews. NEC did not respond to our questionnaire for the tenth review period.

For Sharp's fifth, sixth, and seventh administrative reviews, we used the highest rate for any firm from each respective period as BIA. We used NEC's rate from the ninth review period (54 FR 13917, April 6, 1989) as BIA for its tenth review period.

Scope of Review

Imports covered by the review are shipments of television receiving sets, monochrome and color, from Japan. Television receiving sets include, but are not limited to, units known as projection televisions, receiver monitors, and kits (containing all parts necessary to receive a broadcast television signal and produce a video image). Not included are certain monitors not capable of receiving a broadcast signal, certain combination units (combination television receivers with other electrical entertainment components such as tape recorders, radio receivers, etc.), and certain subassemblies not containing the components essential for receiving a broadcast television signal and producing a video image.

This review covers four manufacturers/exporters of Japanese television receivers, monochrome and color, and various periods from April 1, 1981 through February. 28, 1989.

On November 27, 1985 (50 FR 48852), the Department initiated reviews for Toei Electronics Co., Ltd. for the periods April 1, 1981 through March 31, 1982 and April 1, 1982 through March 31, 1983. Since Toei did not have sales of merchandise included in the scope of the antidumping finding during these periods, we preliminarily determine to terminate those reviews.

United States Price

In calculating United States price, we used purchase price (PP) or exporter's sales price (ESP), as defined in section 772 of the Tariff Act, where appropriate. PP and ESP were based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in the United States. We made adjustments, where appropriate, for discounts, rebates, commissions to unrelated parties, royalties, ocean freight, marine insurance, U.S. and Japanese inland freight, inland freight insurance, U.S. and Japanese brokerage fees, Japanese customs clearance fees, export license fees, forwarding and handling charges, export selling expenses incurred in Japan, and the U.S. subsidiaries, selling expenses. We accounted for taxes imposed in Japan, but rebated or not collected by reason of the exportation of the merchandise to the United States, by multiplying the ex-factory price of the televisions sold in the United States by the tax rate and adding the result to the U.S. price.

Foreign Market Value

In calculating foreign market value (FMV), we used home market price, as defined in section 773 of the Tariff Act, when sufficient quantities of such or similar merchandise were sold in the home market to provide a basis for comparison. For Sharp, when the quantities of such or similar merchandise sold in the home market were insufficient to provide a basis for comparison, we used constructed value. A domestic party to the proceeding, Zenith, alleged sales below cost in the home market by Toshiba during the fifth review. We considered those allegations sufficient to warrant a below-cost investigation of that firm for that period.

Toshiba's response to our production cost questionnaire was inadequate in various respects. For example, it did not explain its cost accounting system, its calculation of labor costs, its calculation of factory overhead, its treatment of assists, or its production capacity, nor did it furnish adequate data on its general and administrative expenses, as requested in our questionnaire. As best information available (BIA) for Toshiba, we used the company's incomplete response data to derive constructed value in the partial fifth review period. Those data were adverse to Toshiba.

We calculated constructed value as the sum of material and fabrication costs, general expenses, profit, and the cost of U.S. packing. Since Toshiba's actual general expenses were greater than the statutory minimum of ten percent of the sum of materials and fabrication costs, we used its actual general expenses. Since Sharp's actual general expenses were lower than ten percent, we used the statutory minimum of ten percent, as provided by section 773 of the Act. We used Sharp's and Toshiba's actual profits because their actual profits were above the statutory minimum.

Home market price was based on the packed, ex-factory or delivered price to unrelated purchasers in the home market. Where applicable, we made adjustments for discounts, inland freight, differences in credit expenses, warranties, advertising, royalties, physical characteristics of the merchandise, and packing. We made further adjustments in ESP calculations, where appropriate, for indirect selling expenses to offset U.S. commissions and U.S. indirect selling expenses, but not exceeding the amount of those U.S. expenses. Finally, we made circumstance-of-sale adjustments for commodity tax differences, where appropriate.

For Toshiba, we made no adjustments to constructed value because our calculations were based on BIA.

No other adjustments were claimed or allowed for any firm.

Preliminary Results of Review

As a result of our review, we preliminarily determine the margins to be:

Manufacturer	Review No.	Period of review	Margin (percent)
Funai	10	03/01/88-02/28/89	[1] 21.93
NEC	10	03/01/88-02/28/89	26.94
Sharp	3	04/01/81-03/31/82	0.00
	4	04/01/82-03/31/83	1.59
	5	04/01/83-03/31/84	16.21
	6	04/01/84-02/28/85	7.37
	7	03/01/85-02/28/86	7.16
Toshiba	Partial		
	5	04/01/83-09/27/83	28.29
	9	03/01/87-02/29/88	[1] 28.29

[1] No shipments during the period; rate from last review in which there were shipments.

Interested parties may submit written comments on these preliminary results within 21 days of the date of publication of this notice and may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held as early as is convenient for the parties but not later than 30 days after the date of publication or the first workday thereafter. Pre-hearing briefs from interested parties may be submitted not later than 9 days before the date of the hearing or the first workday thereafter. Rebuttal briefs and rebuttal comments, limited to issues raised in the initial round of comments, may be filed not later than 7 days after the submission of the initial round of comments. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

On September 27, 1983, the Department published in the **Federal Register** a tentative determination to revoke in part the antidumping finding on Japanese television receivers with respect to Toshiba (48 FR 44101). We preliminarily find margins for Toshiba in this review. If we determine that Toshiba has higher than *de minimis* margins in the final results of this review, we will not consider Toshiba further for revocation.

The Department will determine, and the Customs Service will assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the most recent of the above margins will be required for the above firms. For any shipments of this merchandise manufactured by Fujitsu General Ltd., Hitachi Ltd., Matsushita Electric Industrial Corporation, Mitsubishi Electric Corporation, Sanyo Electric Company, Ltd., or Victor Company of Japan, the cash deposit will continue to be the same as the rates published in the final results of the last administrative review for these firms (Fujitsu General, Hitachi, and Sanyo: 54 FR 35517, August 28, 1989; Matsushita, and Victor: 54 FR 13917, April 6, 1989; Mitsubishi: 53 FR 4050, February 11, 1988).

For any future entries of this merchandise from a new exporter, not covered in this or prior reviews, whose first shipments of this merchandise occurred after February 28, 1989 and which is unrelated to any reviewed firm or any previously reviewed firms, a cash deposit of 26.94 percent shall be required. This is the rate for Matsushita in the eighth review (54 FR 13917, April 6, 1989). These deposit requirements are effective for all shipments of Japanese television receivers, monochrome or color, entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and section 353.22 of the Department's regulations (54 FR 12742) (to be codified at 19 CFR 353.22).

Dated: October 31, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

[A-588-015]

Television Receivers, Monochrome and Color, From Japan; Determination Not To Revoke Antidumping Finding in Part

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of determination not to revoke antidumping finding in part.

SUMMARY: On August 28, 1989, the Department of Commerce published the final results of its review of the antidumping finding on television receivers, monochrome and color, from Japan. In that review, we found antidumping margins for Sharp Corporation for the period April 1, 1980 through March 30, 1981. Based on those results, we determine not to revoke in part the antidumping finding on Japanese television receivers with respect to Sharp.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: J.E. Downey or John R. Kugelman, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-3601/4733.

SUPPLEMENTARY INFORMATION: On August 18, 1983, the Department of Commerce ("the Department") published a tentative determination to revoke in part the antidumping finding with respect to Sharp (48 FR 37508) based on all sales at not less than fair value, or sales resulting in *de minimis* weighted-average margins, during the period April 1, 1979 through March 31, 1981. On August 28, 1989, the Department published the final results of its review of the antidumping finding on television receivers, monochrome and color, from Japan (54 FR 35517). In that review, we found antidumping margins for Sharp Corporation for the period April 1, 1980 through March 31, 1981. Since we found higher than *de minimis* margins for Sharp, we determine not to revoke in part the antidumping finding on Japanese television receivers with respect to Sharp.

This notice and determination are in accordance with section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)) and, because the tentative revocation for Sharp was published prior to the effective date of the Commerce Regulations published in the **Federal Register** on March 28, 1989 (54 FR 12742) (to be codified at 19 CFR 353.25), this notice and determination are in accordance with 19 CFR 353.54 (1988).

Dated: October 31, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import/Administration.

Pressure Sensitive Plastic Tape From Italy; Preliminary Results of Antidumping Duty Administrative Review and Intent To Revoke in Part

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review and Intent to Revoke in Part.

SUMMARY: In response to requests by the petitioner and respondents, the Department of Commerce has conducted an administrative review of the antidumping finding on pressure sensitive plastic tape from Italy. The review covers three manufacturers and/or exporters of this merchandise to the United States and generally the period October 1, 1987 through September 30, 1988. We preliminarily determine the dumping margins to be zero, 8.67 percent, and 0.14 percent for Manuli S.p.A. ("Manuli"), Boston S.p.A. ("Boston"), and NAR S.p.A. ("NAR"), respectively. We also intend to revoke the finding with respect to Boston.

Interested parties are invited to comment on these preliminary results and intent to revoke in part.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Eugenio Parisi or John Kugelman, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2923/3601.

SUPPLEMENTARY INFORMATION:

Background

On March 30, 1989, the Department published in the **Federal Register** (54 FR 13091) the final results of its last administrative review of the antidumping finding on pressure sensitive plastic tape from Italy (42 FR 56110, October 21, 1977). We published a tentative determination to revoke with respect to Boston on August 5, 1988 (53 FR 29507). We published a notice of initiation of the antidumping duty administrative review on December 5, 1988 (53 FR 48951). The petitioner, Minnesota Mining and Manufacturing ("3M"), and one respondent, NAR, requested in accordance with 19 CFR 353.53a(a) (1988) that we conduct an administrative review. The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 et. seq. of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by this review are shipments of pressure sensitive plastic tape measuring over 1⅜ inches in width and not exceeding 4 mils in thickness. During this review period such merchandise was classified under items 790.5530, 790.5545, and 790.5555 of the Tariff Schedules of the United States Annotated ("TSUSA"). This merchandise is currently classifiable under HTS items 3919.90.20 and 3919.90.50. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers three manufacturers and/or exporters to the United States of Italian pressure sensitive plastic tape and generally the period October 1, 1987 through September 30, 1988.

United States Price

In calculating United States price, we used purchase price, as defined in section 772 of the Tariff Act. Purchase price was based on the packed, c.i.f. price to unrelated purchasers in the United States. We made adjustments, where applicable, for brokerage fees, ocean freight, foreign inland freight, and marine insurance. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value, we used home market price, as defined in section 773 of the Tariff Act, because sufficient quantities of such or similar merchandise were sold in the home market to provide a basis for comparison. Home market price was based on the packed, ex-factory or delivered price to unrelated purchasers in the home market. Where applicable, we made adjustments for inland freight, differences in credit expenses, discounts, rebates, differences in packing, and differences in merchandise. No other adjustments were claimed or allowed.

Preliminary Results of Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine the dumping margins to be:

Manufacturer/Exporter	Time period	Margin (percent)
NAR	10/1/87-9/30/88	0.14
Manuli	10/1/87-9/30/88	[1] 0
Boston	10/1/87-8/05/88	[1] 8.67

[1] No shipments during the period; margin from last review in which there were shipments.

Parties to the proceeding may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication or the first workday thereafter. Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 37 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of issues raised in any such comments or at a hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required for these firms. Since the margin for NAR is less than 0.5 percent and, therefore, *de minimis* for cash deposit purposes, the Department shall not require a cash deposit of estimated antidumping duties on entries for this firm. For any shipments of this merchandise manufactured or exported by the remaining known manufacturers and/or exporters not covered in this review, the cash deposit will continue to be the rate published in the final results of the last administrative review for these firms (54 FR 13091, March 30, 1989). For any future entries of this merchandise from a new exporter, not covered in this or prior administrative reviews, whose first shipments occurred after September 30, 1988 and who is unrelated to the reviewed firms or any previously reviewed firm, no cash deposit shall be required. These deposit requirements are effective for all shipments of Italian pressure sensitive plastic tape entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

Boston made no shipments of the subject merchandise to the United States for more than four years. We published a tentative determination to revoke the antidumping finding with respect to Boston on August 5, 1988 (53 FR 29507). Boston has agreed in writing to an immediate suspension of liquidation and reinstatement of the finding under circumstances specified in the written agreement.

Therefore, we intend to revoke in part the antidumping finding on pressure sensitive plastic tape from Italy with respect to Boston. If this partial revocation is made final, it will apply to all unliquidated entries of this merchandise manufactured and exported by Boston and entered, or withdrawn from warehouse, for consumption on or after August 5, 1988.

This administrative review, intent to revoke in part, and notice are in accordance with sections 751(a)(1) and (c) of the Tariff Act (19 U.S.C. 1675(a)(1), (c)) and §§ 353.22 and 353.25 of the Department's new regulations, published in the **Federal Register** on March 28, 1989 (54 FR 12742) (to be codified at 19 CFR 353.22 and 353.25).

Dated: October 27, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Quarterly Update of Foreign Government Subsidies on Articles of Quota Cheese

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Publication of quarterly update of foreign government subsidies on articles of quota cheese.

SUMMARY: The Department of Commerce, in consultation with the Secretary of Agriculture, has prepared a quarterly update to its annual list of foreign government subsidies on articles of quota cheese. We are publishing the current listing of those subsidies that we have determined exist.

EFFECTIVE DATE: October 1, 1989.

FOR FURTHER INFORMATION CONTACT: Patricia W. Stroup or Paul J. McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION: Section 702(a) of the Trade Agreements Act of 1979 ("the TAA") requires the Department of Commerce ("the Department") to determine, in consultation with the Secretary of Agriculture, whether any foreign government is providing a subsidy with respect to any article of quota cheese, as defined in section 701(c)(1) of the TAA, and to publish an annual list and quarterly updates of the type and amount of those subsidies.

The Department has developed, in consultation with the Secretary of Agriculture, information on subsidies (as defined in section 702(h)(2) of the TAA) being provided either directly or indirectly by foreign governments on articles of quota cheese.

In the current quarter the Department has determined that the subsidy amounts have changed for each of the countries for which subsidies were identified in the last quarterly update to our January 1, 1989 annual subsidy list. The appendix to this notice lists the country, the subsidy program or programs, and the gross and net amount of each subsidy on which information is currently available.

The Department will incorporate additional programs which are found to constitute subsidies, and additional information on the subsidy programs listed, as the information is developed.

The Department encourages any person having information on foreign government subsidy programs which benefit articles of quota cheese to submit such information in writing to the Assistant Secretary for Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

This determination and notice are in accordance with section 702(a) of the TAA (19 U.S.C. 1202 note).

Dated: October 25, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

Appendix—Quota Cheese Subsidy Programs

Country	Program(s)	Gross [1] subsidy (cents per lb.)	Net [2] subsidy (cents per lb.)

Preliminary Affirmative Countervailing Duty Determination: Carbon Steel Butt-Weld Pipe Fittings From Thailand

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Thailand of carbon steel butt-weld pipe fittings ("pipe fittings") as described in the "Scope of Investigation" section of this notice. The estimated net bounty or grant is 2.85 percent *ad valorem* for all manufacturers, producers or exporters in Thailand of pipe fittings.

We are directing the U.S. Customs Service to suspend liquidation of all entries of pipe fittings from Thailand that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and to require a cash deposit or bond on entries of these products in an amount equal to 2.85 percent *ad valorem*.

If this investigation proceeds normally, we will make a final determination on or before January 10, 1990.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Kay Halpern or Carole Showers, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-0192 or 377-3217.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based on our investigation, we preliminarily determine that there is reason to believe or suspect that benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Thailand of pipe fittings. For purposes of this investigation, the following programs are preliminarily found to confer bounties or grants:

- Short-Term Loans Provided under the Export Packing Credits Program
- Tax Certificates for Exports
- Business Tax and Import Duty Exemptions for Machinery under Section 28 of the Investment Promotion Act

The estimated net bounty or grant is 2.85 percent *ad valorem*.

Case History

Since publication of the Notice of Initiation in the **Federal Register** (54 FR 35914, August 30, 1989), the following events have occurred. On September 5, 1989, we presented a questionnaire to the Government of Thailand (GOT) in Washington, DC, concerning petitioner's allegations. On October 11, 1989, after granting an extension, we received responses from the GOT and from the three respondent companies, Awaji Sangyo Co., Ltd. (AST), Thai Benkan Co., Ltd. (TBC), and TTU Industrial Corp., Ltd. (TTU). On October 19, 1989, we issued a supplemental/deficiency questionnaire to the GOT and the respondent companies, and received responses on October 25, 1989. We issued an additional questionnaire to the respondent companies on October 25, 1989, for which responses are due November 1, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the Harmonized Tariff Schedule (HTS), and all merchandise entered or withdrawn from warehouse for consumption on or after that date is now classified solely according to the appropriate HTS item number. The Department is providing both the appropriate Tariff Schedules of the United States Annotated (TSUSA) item number and the appropriate HTS item number with its product descriptions for convenience and Customs purposes. The Department's written description of the product under investigation remains dispositive as to the scope of the products covered by this investigation.

The product covered by this investigation is carbon steel butt-weld pipe fittings, having an inside diameter of less than 360 millimeters (fourteen inches), imported in either finished or unfinished form. These formed or forged pipe fittings are used to join sections in piping systems where conditions require permanent, welded connections, as distinguished from fittings based on other fastening methods (*e.g.*, threaded, grooved, or bolted fittings). The product is classified under HTS subheading 7307.93.30 and was formerly classifiable under TSUSA item 610.88.00.

Analysis of Programs

Consistent with our practice in preliminary determinations, when a response to an allegation denies the existence of a program, receipt of benefits under a program, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses, however, are subject to verification. If the response cannot be supported at verification, and the program is otherwise countervailable, the program will be considered a bounty or grant in the final determination.

For purposes of this preliminary determination, the period for which we are measuring bounties or grants ("the review period") is calendar year 1988, which corresponds to the fiscal year of all three respondent companies. Based upon our analysis of the petition and the responses to our questionnaires, we preliminarily determine the following:

I. Programs Preliminarily Determined To Confer Bounties or Grants

We preliminarily determine that bounties or grants are being provided to manufacturers, producers, or exporters in Thailand of pipe fittings under the following programs:

A. Short-Term Loans Provided Under the Export Packing Credits Program

Export packing credits (EPCs) are short-term loans used for either pre-shipment or post-shipment financing. Exporters apply to commercial banks for EPCs. The commercial banks, in turn, must submit an application for approval to the Bank of Thailand (BOT). Under the "Regulations Governing the Purchase of Promissory Notes Arising from Exports" (B. E. 2528), effective January 2, 1986, the BOT repurchases promissory notes issued by creditworthy exporters through commercial banks. To qualify for the repurchase arrangement, promissory notes must be supported by a letter of credit, sales contract, purchase order, usance bill or warehouse receipt. The notes are available for up to 180 days, and interest is paid on the due date of the loan rather than the date of receipt.

The BOT charges an interest rate of five percent per annum to commercial banks on repurchased packing credits issued in connection with exports of goods specified in categories one and two of the "Notification of the Board of Investment No. 40/2521." The commercial banks are permitted to charge exporters no more than seven percent per annum for the purchase of such notes.

On the due date of the loan, the BOT debits the commercial bank's account for the principal amount and the interest charged the commercial bank. If the terms of the loan are not met, the BOT charges the commercial bank a penalty, retroactive to the first day of the loan.

Similarly, on the due date of the loan, the commercial bank debits the exporter's account for the principal amount and the maximum of seven percent interest charged the exporter. If the exporter has not met the terms of the loan, the commercial bank passes on the penalty charge over the term of the loan.

The penalty is refunded to the commercial bank by the BOT and by the commercial bank to the exporter if the company can prove shipment of the goods took place within 60 days after the due date (in the case of pre-shipment loans), or the foreign currency was received within 60 days after the due date (in the case of post-shipment loans). Otherwise, the penalty is not refunded. The purpose of the penalty charge is to ensure that companies take out EPC loans only to finance actual export sales.

On October 1, 1988, the GOT issued new regulations that coexisted with the prior regulations until December 31, 1988. On January 1, 1989, the new regulations completely replaced the former ones. Until January 1, 1989, exporters could still receive EPC loans under the terms of the program described above. Under the new regulations, the maximum rate commercial banks can charge exporters was raised from seven to ten percent. In addition, the BOT now rediscounts only up to 50 percent of the loan amount, whereas under the previous program the BOT could rediscount the full value of the loan.

According to the responses, TBC and TTU received EPC loans on which interest was paid during the review period. Because only exporters are eligible for these loans, we determine that they are countervailable to the extent that they are provided at preferential rates.

As the benchmark for short-term loans, it is our practice to use the predominant form of short-term financing or a national average commercial interest rate. In the absence of a predominant form of short-term financing in the Thai economy, we are using the weighted-average interest rate charged by commercial banks on domestic loans, bills and overdrafts during 1988, and, where loans were issued in 1987, the weighted-average interest rate of the same composition for 1987. This is the benchmark that we have applied in all previous Thai cases, most recently in Final Affirmative Countervailing Duty Determination and Partial Countervailing Duty Order: Ball Bearings and Parts Thereof from Thailand; Final Negative Countervailing Duty Determinations: Antifriction Bearings (Other Than Ball or Tapered Roller Bearings) and Parts Thereof from Thailand, (54 FR 19130, May 3, 1989) (Bearings).

Comparing the weighted-average interest rates for 1987 and 1988, as reported in the GOT response, to the rate charged on EPCs, as reported in the company responses, we find that the rate on EPCs is preferential and, therefore, confers a bounty or grant on exports of pipe fittings.

To calculate the benefit from the EPC loans on which interest was paid during the review period, we followed the short-term loan methodology which has been applied consistently in our past determinations (see, for example, Bearings) and which is described in more detail in the Subsidies Appendix attached to the notice of Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order (49 FR 18006, April 26, 1984); see also, *Alhambra Foundry* v. *United States*, 626 F. Supp. 402 (CIT, 1985).

We compared the amount of interest actually paid during the review period to the amount that would have been paid at the benchmark rate. Because the responses specified which EPC loans were tied to exports to the United States, we calculated the amount of interest that would have been paid on such loans at the benchmark rate and subtracted the amount of interest that was actually paid. We then divided the result by the respondents' exports to the United States during the review period to obtain an estimated net bounty or grant of 0.14 percent *ad valorem*.

TTU has argued that, in addition to subtracting the interest actually paid from the interest that would have been paid at the benchmark rate, we should also subtract an interest cost to the company associated with penalty payments which were subsequently refunded. TTU argues that because it had to forego use of these funds, the company had to borrow money and,

therefore, incurred increased financing costs. TTU has calculated the increase in its financing costs by using the national average benchmark described

determined that each company used this program during the review period. We also preliminarily determine that, because this program is available only

investigations involving products from Thailand, the most recent of which was Bearings, we undertook the analysis described above and reiterated that

The value of all domestically produced finished goods, as shown in the I/O tables, is an ex-factory value. However, because the rebate is applied

II. Programs Preliminarily Determined Not to Confer Bounties or Grants

We preliminarily determine that bounties or grants are not being

banks by the BOT is five percent per annum. According to the responses, none of the respondents participated in this program during the review period.

VOL 54 ISS 212 NO 3 1989 UMI

therefore, incurred increased financing costs. TTU has calculated the increase in its financing costs by using the national average benchmark described above. We are not subtracting the cost due to subsequently refunded penalty payments for purposes of our preliminary determination because we are not convinced that TTU's calculation is appropriate. We are seeking more information and will continue to examine this issue for purposes of our final determination.

B. Tax Certificates for Exports

The GOT issues to exporters tax certificates which are freely transferable and which constitute a rebate of indirect taxes and import duties used to produce exports. This rebate program is provided for in the "Tax and Duty Compensation of Exported Goods Produced in the Kingdom Act" (Tax and Duty Act). The rebate rates under the Tax and Duty Act are computed on the basis of an Input/Output (I/O) study published in 1980, based on 1975 data, and updated in 1985 using 1980 data.

Using the I/O study, the Thai Ministry of Finance computes the value of total inputs (both imports and local purchases) used in a discrete range of sector-specific products at ex-factory prices. It also calculates the import duties and indirect taxes on each input. The Ministry then calculates two rebate rates. The "A" rate includes both import duties and indirect taxes. The "B" rate includes only indirect domestic taxes. The "B" rate is claimed when firms participate in Thailand's customs duty drawback program or duty exemption program on imported raw materials, or when firms do not use imported materials in their production process. New rebate rates, announced on February 5, 1988, were computed using the study published in 1985. Since 1988, the "A" rate applicable to exports of pipe fittings has been 8.11 percent and the "B" rate has been 4.98 percent. The "A" or "B" rate, as appropriate, is then applied to the FOB value of the export to determine the amount of rebate that will be provided.

Under the Tax and Duty Act, the rebates are paid to companies through tax certificates which can be used to pay other tax liabilities. These tax certificates can also be transferred to other companies which can use them to pay their tax liabilities.

According to the responses, only TTU actually received tax certificates during the review period.

However, all three respondent companies earned the "B" rate on exports made during the review period. Therefore, we have preliminarily determined that each company used this program during the review period. We also preliminarily determine that, because this program is available only to exporters, it is countervailable to the extent that it confers an overrebate of indirect taxes.

To determine whether an indirect tax rebate system confers an overrebate and, therefore a bounty or grant, we must apply the following analysis. First, we examine whether the system is intended to operate as a rebate of both indirect taxes and import duties. Next, we analyze whether the government properly ascertained the level of the rebate. This includes a review of a sample from the I/O study used by the Government to quantify the rebate. We analyze the documentation supporting the study to determine the accuracy of the sample on input coefficients, the import prices and rates of duty on imported inputs, the ratio of imported inputs to domestically produced inputs (when, for a given imported input, there is also domestic production of the input), and the exchange rates used to convert import prices denominated in a foreign currency to the local currency. Finally, we review whether the rebate schedules are revised periodically in order to determine whether the rebate amount reasonably reflects the amount of duty and indirect taxes paid.

When the study upon which the indirect tax and import duty rebate system is based is shown to bear a reasonable relation to the actual indirect tax rebate incidence, the Department will consider that the system does not confer a bounty or grant unless the amount rebated for duties and indirect taxes on physically incorporated inputs exceeds the fixed amount set forth in the rebate schedule for the exported product. When the system rebates duties and indirect taxes on both physically incorpated and non-physically incorporated inputs, we find a bounty or grant exists to the extent that the fixed rebate exceeds the allowable rebate on physically incorporated inputs.

In the Final Affirmative Countervailing Duty Determination and Countervailing Duty Order: Certain Apparel from Thailand (50 FR 9818, 9820, March 12, 1985), we examined Thailand's rebate system under the Tax and Duty Act. We found that the program was intended to rebate indirect taxes and import duties and that the rebate rates had been reasonably calculated. However, to the extent that the program rebates indirect taxes and import duties on non-physically incorporated inputs, we found that the remissions are excessive. In subsequent investigations involving products from Thailand, the most recent of which was Bearings, we undertook the analysis described above and reiterated that these rebates are countervailable only to the extent that the remissions are excessive. In the present investigation, we will verify whether rebates under this program continue to reasonably reflect the incidence of indirect taxes and import duties on inputs.

For purposes of our preliminary determination, to determine whether, and the extent to which, the tax certificates confer an excessive remission of indirect taxes, we calculated the indirect taxes and import duties paid on physically incorporated inputs according to the most recent I/O table. We divided the tax incidence on all items physically incorporated into all products classified in the secondary steel products sector, which includes carbon steel butt-weld pipe fittings, by the value of all domestically produced finished goods in this sector. Given that the aggregated data used in the I/O study is broken down only by sector, and that each sector covers many individual products, it is impossible to isolate the value of domestically produced pipe fittings.

Although the methodology described above is a deviation from that used in previous investigations involving products from Thailand (see, for example, Bearings), we believe that it more accurately reflects the amount of allowable rebate. Furthermore, unlike previous investigations in which respondents either failed to provide a comprehensive list of all items physically incorporated into the sector, or failed to provide such information prior to verification, respondents in the present investigation have provided the necessary information in a timely manner.

We recognize that, by using the tax incidence on all physically incorporated inputs into secondary steel products, we may be including the tax incidence on inputs used in the production of pipe fittings but not physically incorporated into pipe fittings. We have determined, however, that for purposes of this preliminary determination the inclusion of this tax incidence provides the most accurate measure of the allowable rebate percentage for secondary steel products and, as such, the most reasonable calculation of the allowable percentage for pipe fittings. However, because this is a significant change in methodology with respect to this program, we will continue to examine this issue for purposes of our final determination.

The value of all domestically produced finished goods, as shown in the I/O tables, is an ex-factory value. However, because the rebate is applied to the FOB value of a company's exports, we had to adjust the ex-factory value to reflect an FOB value. We did this by dividing the wholesale margin and transportation costs for all domestically produced finished goods in the sector, including exports, by the ex-factory value and then multiplying the ex-factory value by this ratio. We added the result to the ex-factory value in order to obtain the FOB-adjusted value.

In order to obtain the allowable rebate rate, we divided the tax incidence on all items physically incorporated into secondary steel sector products by the FOB-adjusted value of all domestically produced finished goods in the secondary steel sector. We then compared the authorized rebate rate of 4.98 percent, which is based on both physically and non-physically incorporated inputs, to the allowable rebate rate and found that there is an excessive remission of indirect taxes to exporters of pipe fittings. The difference between the two rebate rates equals the net overrebate. On this basis, we calculated an estimated net bounty or grant of 0.94 *ad valorem*.

C. Tax and Duty Exemptions Under Section 28 of the Investment Promotion Act

The Investment Promotion Act (IPA) of 1977 provides incentives for investment to promote development of the Thai economy. Administered by the Board of Investment, the IPA authorizes, among other incentives, the exemption of import duties and certain taxes with respect to qualifying projects. Section 28 provides for exemption from payment of import duties and business taxes on machinery. All three respondent companies received exemptions under section 28 that became effective during the review period. According to the responses, all three respondent companies are required to export a certain percentage of their output as a condition for receipt of benefits under this program.

Because benefits to the respondent companies under this program are contingent upon their export performance, we preliminarily determine that it is countervailable.

We divided the total amount of exemptions received by respondents during the review period by the respondents' total export sales during the review period. On this basis, we calculated an estimated net bounty or grant of 1.77 *ad valorem*.

II. Programs Preliminarily Determined Not to Confer Bounties or Grants

We preliminarily determine that bounties or grants are not being provided to manufacturers, producers, or exporters in Thailand of pipe fittings under the following program:

IPA Section 36(1)

Section 36(1) of the IPA authorizes exemptions from import duties and business taxes on "raw and necessary materials." All three respondent companies received exemptions under this section of the IPA during the review period. According to the responses, all exemptions were received for items physically incorporated into exported goods.

III. Programs Preliminarily Determined Not To Be Used

We preliminarily determine that the following programs were not used by manufacturers, producers, or exporters in Thailand of pipe fittings during the review period:

A. Electricity Discounts for Exporters

The Electricity Generating Authority of Thailand, the Metropolitan Electricity Authority, and the Provincial Electricity Authority provide discounts on electricity rates charged to producers of export products. According to the responses, this program provides discounts of 20 percent of the cost of electricity consumed to produce exports. Any producer that consumes electricity in manufacturing products that are eligible to receive tax certificates for exports is eligible for the electricity discount. Once a producer has qualified for the electricity discount and has completed an export transaction involving eligible products, it may apply to the electricity authority from which it receives its electricity bill. The authority then calculates the amount of the discount and credits a deduction on a subsequent electricity bill. According to the responses, none of the respondents received benefits under this program during the review period.

B. Rediscount of Industrial Bills

The BOT authorizes rediscounts for short-term promissory notes arising from industrial activity. The BOT's "Regulations Governing the Rediscount of Promissory Notes Arising from Industrial Undertakings" permit commercial banks to rediscount short-term promissory notes for industrial purchases. Commercial banks may charge their industrial customers a maximum of seven percent per annum, while the rate charged to commercial banks by the BOT is five percent per annum. According to the responses, none of the respondents participated in this program during the review period.

C. International Trade Promotion Fund

This fund is used to finance export promotion activities, such as marketing research and trade fairs. According to the responses, none of the respondents applied for, or received, benefits under this program during the review period.

D. Export Processing Zones

Under the Industrial Estates Authority of Thailand Act, firms located in designated export processing zones and industrial estates receive tax and import duty exemptions on: (1) Machinery used for factory construction and operation; (2) goods imported for use in the production of exports; (3) items produced for export; and (4) items imported for re-export. According to the responses, none of the respondents have facilities located in government-sponsored export processing zones or industrial estates.

E. Additional Incentives Under the IPA

Petitioner alleges that the following incentives are available to manufacturers, producers and exporters of pipe fittings:

- *Section 31* of the IPA provides a three-to-eight year exemption from payment of corporate income tax on profits derived from promoted activities, as well as deductions from net profits for losses incurred during the tax exemption period.
- *Section 33* of the IPA provides a five-year tax exemption for goodwill and royalty payments.
- *Section 34* provides an additional deduction from taxable income for dividends paid on promoted activities.
- *Section 36(2)* provides an exemption of import duties and business taxes on items imported for re-export.
- *Section 36(3)* provides an exemption of export duties and business taxes on products produced or assembled by promoted firms.
- *Section 36(4)* provides a deduction from assessable income of an amount equal to five percent of the increased income over the previous year derived from exports.

According to the responses, none of the respondent companies received benefits under any of these sections of the IPA during the review period.

Verification

In accordance with section 776(b) of the Act, we will verify the information used in making our final determination.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation on all entries of pipe fittings from Thailand which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register** and to require a cash deposit or bond for each such entry equal to 2.85 percent *ad valorem*. This suspension will remain in effect until further notice.

Public Comment

In accordance with 19 CFR 355.38 of the Department's regulations published in the **Federal Register** on December 27, 1988 (54 FR 52306, to be codified at 19 CFR § 355.38), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination on December 15, 1989 at 10:30 a.m., at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request within ten days of the publication of this notice in the **Federal Register** to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B-099, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, ten copies of the business proprietary version and five copies of the nonproprietary version of the case briefs must be submitted to the Assistant Secretary no later than December 8, 1989. Ten copies of the business proprietary version and five copies of the nonproprietary version of the rebuttal briefs must be submitted to the Assistant Secretary no later than December 13, 1989. An interested party may make an affirmative presentation only on arguments included in that party's case or rebuttal briefs. Written arguments should be submitted in accordance with § 35.38 of the Commerce Department's regulations and will be considered if received within the time limits specified in this notice.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

Dated: October 27, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

[C-469-004]

Stainless Steel Wire Rod From Spain; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on stainless steel wire rod from Spain. We preliminarily determine the net subsidy for the period January 1, 1988, through December 31, 1988, to be 0.19 percent *ad valorem*, a rate we consider *de minimis*. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Laurie Goldman or Paul McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On June 28, 1989, the Department of Commerce ("the Department") published in the **Federal Register** (54 FR 26826) the final results of its last administrative review of the countervailing duty order on stainless steel wire rod from Spain (48 FR 52; January 3, 1983). On January 31, 1989, a Spanish exporter, Roldan S.A., requested an administrative review of the order in accordance with section 355.22 of the Commerce Regulations published in the **Federal Register** on December 27, 1988 (55 FR 52354) (to be codified at 19 CFR 355.22). We published the initiation on March 8, 1989 (54 FR 9868). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

Imports covered by the review are shipments of Spanish stainless steel wire rod, which includes coiled, semifinished, hot-rolled stainless steel products of approximately round solid cross section, not under 0.20 inch nor over 0.74 inch in diameter, whether or not tempered or treated or partly manufactured. During the review period, such merchandise was classifiable under item numbers 607.2600 and 607.4300 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under item numbers 7221.00.0020 and 7221.00.0040 of the Harmonized Tariff Schedule.

The review covers the period January 1, 1988 through December 31, 1988 and five programs.

Analysis of Programs

(1) Long Term Loans

Under the Concerted Action Program established by Royal Decree 689/74, the Spanish government directs banks to make long-term loans to steel companies at below market rates. Such loans are provided for approximately ten years. Roldan received a long-term loan for financing new plant and equipment that had an outstanding balance during the review period. The loan was received in multiple disbursements from 1977 to 1981. Because the loans under the Concerted Action Program are provided to a specific industry at rates and terms inconsistent with commercial considerations, we preliminarily determine that this loan confers a countervailable domestic subsidy.

Roldan did not obtain any comparable commercial loans in the year in which it received the preferential long-term loan. Therefore, we used as our long-term commercial benchmark the "free" long-term (three or more years) lending rate published by the Bank of Spain in its Boletin Estatistico. We treated the multiple disbursements as individual loans.

To calculate the benefit, we found the difference between the annual amounts of principal and interest Roldan actually paid and the annual amounts of principal and interest Roldan would have paid if it had received each disbursement at our commercial benchmark rate. We then calculated the "grant equivalent" of each disbursement by determining present value (at the time the preferential loan was made) of the difference in annual payments that would occur during the life of the loan. Using our declining balance methodology with the long-term commercial benchmark as the discount rate, we allocated the grant equivalents over the life of the loan. We then totaled the benefits allocated to the review period for each disbursement.

Since these loans benefit a company's total production, we allocated the benefit over the company's total sales during the review period. On this basis, we preliminarily determine the benefit from this program to be 0.19 percent *ad valorem* during the review period.

(2) Other Programs

We also examined the following programs and preliminarily determine that Roldan did not use them during the review period:

A. Operating Capital Loans
B. Capital Grants
C. Regional Incentives Program
D. Prefinancing of Exports

Preliminary Results of Review

As a result of our review, we preliminarily determine the net subsidy for the period January 1, 1988 through December 31, 1988 to be 0.19 percent *ad valorem*. The Department considers any rate less than 0.50 percent to be *de minimis*.

The Department intends to instruct the Customs Service to liquidate, without regard to countervailing duties, all shipments of this merchandise exported on or after January 1, 1988 and on or before December 31, 1988.

The Department also intends to instruct the Customs Service to waive cash deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 44 days after the date of publication or the first workday thereafter. Rebuttal briefs and rebuttals to written comments, limited to issues in those comments, must be filed not later than 37 days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and section 355.22 of the Commerce Regulations.

Dated: October 30, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Michigan Department of Public Health; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket number: 89-131. *Applicant:* Michigan Department of Public Health, Lansing, MI 48909. *Instrument:* Mass Spectrometer System, Model TS-250. *Manufacturer:* VG Analytical Ltd., United Kingdom. *Intended use:* See notice at 54 FR 21090, May 16, 1989.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides an air-core magnet capable of 10 scans per second and a cycle time of 0.4 second for magnetic selected ion recording (SIR). The National Intitutes of Health advises in its memorandum dated August 29, 1989 that (1) this capability is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

National Institutes of Health, et al.; Notice of Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 A.M. and 5 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, was being manufactured in the United States at the time the instrument was ordered.

Docket number: 89-042. *Applicant:* National Institutes of Health, Bethesda, MD 20892. *Instrument:* Nuclear Magnetic Resonance Spectrometer, Model AM-500. *Manufacturer:* Bruker Instruments, West Germany. *Intended use:* See notice at 52 FR 48851, December 28, 1987. *Reasons:* The foreign instrument provides a S/N with 0.1% ethylbenzene of 650:1; 16-bit digitization over a range of 50 kHz and a 24-bit computer word length. *Order date:* June 30, 1987. *Advice submitted by:* National Bureau of Standards, March 22, 1988.

Docket numbers: 88-208R and 88-212R. *Applicant:* USDA-ARS, Athens, GA 30613 and Fargo, ND 58105. *Instrument:* NMR Spectrometers, Model MSL-300 (System E and System F). *Manufacturer:* Bruker Analytische Messtechnik, West Germany. *Intended use:* See notices at 53 FR 22685, June 17, 1988. *Reasons:* The foreign instrument provides (1) a sensitivity (S/N) of 53/1 for the alpha carbon of glycine and (2) demonstrated and guaranteed resolution of 20 μm for microimaging. *Order Dates:* September 11 and 16, 1987. *Advice submitted by:* National Institutes of Health, August 3, 1989.

The National Bureau of Standards and National Institutes of Health advise that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value to any of the foreign instruments for the applicant's intended use being manufactured at the time the foreign instrument was ordered.

We know of no other domestic instrument or apparatus of equivalent scientific value to any of the foreign instruments being manufactured at the time it was ordered.

Frank W. Creel,

Director, Statutory Import Programs Staff.

University of California, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in Room

VOL 54 SS 212 NO 3 1989 UMI

2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket number: 89–181. *Applicant:* University of California at Davis, Davis, CA 95616.

Docket number: 89–188. *Applicant:* University of Michigan, Ann Arbor, MI 48109–1063.

Instrument: Mass Spectrometer, MAT 251. *Manufacturer:* Finnigan MAT, West Germany. *Intended use:* See notices at 54 FR 34541 and 34542, August 21, 1989. *Reasons:* The foreign instrument provides high precision automated analysis of small samples (0.006°/oo for CO_2 with a 40 bar μl sample size, 0.006°/oo for N_2, SO_2 and SF_6 and 0.080°/oo with a 100 bar μl sample size).

Docket number: 89–184. *Applicant:* University of North Carolina, Chapel Hill, NC 27599–1100.

Docket number: 89–185. *Applicant:* Lehigh University, Bethlehem, PA 18015.

Docket number: 89–193. *Applicant:* University of California, Davis, CA 95616.

Instrument: FTIR Interferometer System, Model DA3.16.

Manufacturer: Bomem, Canada. *Intended use:* See notices at 54 FR 34541 and 34543, August 21, 1989. *Reasons:* The foreign instrument provides an unapodized resolution of 0.026 cm^{-1}.

The capability of each of the foreign instruments described above is pertinent to each applicant's intended purposes. We know of no instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–M

University of Illinois; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 am and 5:00 pm in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 89–164. *Applicant:* University of Illinois at Chicago, Chicago, IL 60680. *Instrument:* Excimer Laser, Model 201F MSC. *Manufacturer.* Lambda Physik, West Germany. *Intended Use:* See notice at 54 FR 30788, July 24, 1989.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, was being manufactured in the United States at the time the instrument was ordered (October 27, 1988).

Reasons: The foreign article provides a 10 mJ pulse energy and a maximum pulse rate of 60 Hz. This capability is pertinent to the applicant's intended purpose and we know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use being manufactured at the time the foreign instrument was ordered.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 89–25905 Filed 11–2–89; 8:45 am]

BILLING CODE 3510–DS–M

University of Michigan; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 89–189. *Applicant:* University of Michigan, Ann Arbor, MI 48109–1063. *Instrument:* Mass Spectrometer, Model MAT Delta S. *Manufacturer:* Finnigan MAT, West Germany. *Intended Use:* See notice at 54 34542, August 21, 1989.

Comments: None received.

Decision: Approved. No domestic manufacturer was both "able and willing" to manufacture an instrument or apparatus of equivalent scientific value to the foreign instrument for such purposes as the instrument was intended to be used, and have it available to the applicant without unreasonable delay in accordance with § 301.5(d)(2) of the regulations, at the time the foreign instrument was ordered (September 30, 1988).

Reasons: The foreign instrument includes an automated carbonate reaction system, a six Faraday cup multi-element collector and automated changeover from CNOS to HD providing precise isotope ratio data.

These capabilities are pertinent to the applicant's intended purposes. We know of no domestic manufacturer both able and willing to provide an instrument with the required features at the time the foreign instrument was ordered.

As to the domestic availability of instruments, § 301.5(d)(2) of the regulations provides that, in determining whether a U.S. manufacturer is able and willing to produce an instrument, and have it available without unreasonable delay, "the normal commercial practices applicable to the production and delivery of instruments of the same general category shall be taken into account, as well as other factors which in the Director's judgment are reasonable to take into account under the circumstances of a particular case." This subsection also provides that, if "a domestic manufacturer was formally requested to bid an instrument, without reference to cost limitations and within a leadtime considered reasonable for the category of instrument involved, and the domestic manufacturer failed formally to respond to the request, for the purposes of this section the domestic manufacturer would not be considered willing to have supplied the instrument."

The regulations require that domestic manufacturers be both "able and willing" to produce an instrument for the purposes of comparison with the foreign instrument. Where an applicant, as in this case, received no response to a formal request for quotation sent to the only known domestic manufacturer of comparable instrument it is apparent that the domestic manufacturer was either not able or not willing to produce an instrument of equivalent scientific value to the foreign instrument for such purposes as the foreign instrument was intended to be used at the time the foreign instrument was ordered.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 89–25906 Filed 11–02–89; 8:45 am]

BILLING CODE 3510–DS–M

Utah State University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 am and 5:00 pm in Room 2841, U.S. Department of Commerce, 14th and

Constitution Avenue, NW., Washington, DC.

Docket Number: 89–116. *Applicant:* Utah State University, Logan, UT 84322–8300. *Instrument:* Rapid Kinetic Spectrometer Accessory with Pneumatic Drive Unit, Model RX–1000. *Manufacturer:* Applied Photophysics Ltd., United Kingdom. *Intended Use:* See notice at 54 FR 18689, May 2, 1989.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: This is a compatible accessory for an instrument previously imported for the use of the applicant. The instrument and accessory were made by the same manufacturer. The National Institutes of Health advises in its memorandum dated August 29, 1989 that the accessory is pertinent to the intended uses and that it knows of no comparable domestic accessory.

We know of no domestic accessory which can be readily adapted to the instrument.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1989; Proposed Additions

AGENCY: Committee for Purchase From the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to Procurement List 1989 commodities to be produced and services to be provided by workshops for the blind or other severely handicapped.

Comments Must Be Received on or Before December 4, 1989.

ADDRESS: Committee for Purchase From the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3500.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and services to Procurement List 1989, which was published on November 15, 1988 (53 FR 46018):

Commodities

Bag, Cargo
1670–00–587–3421
Folder, IRS Tax Form
IRS Document No. 6982
IRS Document No. 6983

Services

Commissary Shelf Stocking & Custodial, Fort Stewart, Georgia.
Commissary Shelf Stocking & Custodial, White Sands Missile Range, White Sands, New Mexico.

BILLING CODE 6820–33–M

DEPARTMENT OF DEFENSE

National Guard Bureau

Availability of a Draft Environmental Impact Statement; Camp Shelby Army National Guard Training Site, Mississippi

AGENCY: National Guard Bureau/ Mississippi Military Department, DOD.

ACTION: Notice of availability of a draft environmental impact statement: proposed mission expansion/multiple construction at Camp Shelby Army National Guard Training Site, Mississippi.

Background

Camp Shelby is a state operated, federally funded Army National Guard Training Site located near the town of Hattiesburg, Mississippi. Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the National Guard Bureau and the Mississippi Military Department have, acting as co-lead agencies, prepared a Draft Environmental Impact Statement on the proposed master plan mission expansion/multiple construction at Camp Shelby, Mississippi. On July 22, 1988, a Notice of Intent to prepare an Environmental Impact Statement was published in the Federal Register. A scoping meeting (in accordance with the Council on Environmental Quality Regulations (40 CFR 1500–1506)) was conducted on July 30, 1988, at Hattiesburg, Mississippi, to identify significant issues related to the proposed master plan mission expansion/multiple construction at Camp Shelby.

Action

The proposed action includes renovation and rehabilitation of existing facilities, construction of new facilities, range improvements, and a potential for increased training site utilization. The Draft Environmental Impact Statement addresses direct and indirect environmental impacts, both beneficial and detrimental. Environmental impacts addressed include those affecting air quality, noise, physical setting, natural resources, land use, waste disposal, water resources, cultural resources, and social and economic resources.

This draft Environmental Impact Statement pertains only to master plan construction projects. Any contemplated land transfer or real estate action associated with Camp Shelby will be evaluated in a separate document in accordance with the National Environmental Policy Act.

Document Availability

The identification of preferred alternatives in the Draft Environmental Impact Statement does not constitute a final decision. The Draft EIS and any comments received will be used by the Army National Guard to prepare a Final Environmental Impact Statement and Record of Decision. Copies of the Draft EIS may be obtained from: Mississippi Military Department, The Adjutant General's Office, ATTN: LTC Samuel K. McLellan, Facilities Management Office, P.O. Box 5027, Jackson, Mississippi 39216–1027.

Lewis D. Walker,

Deputy for Environmental, Safety, and Occupational Health, OASA (I.L. & E).

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

VOL
54
NO
3
1989
ISS
212
UMI

DATES: Interested persons are invited to submit comments on or before December 4, 1989.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Jim Houser, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 732-3915.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Office of Information Resources Management, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following:

(1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: October 30, 1989.

Carlos U. Rice,

Director, for Office of Information Resources Management.

Office of Planning, Budget, and Evaluation

Type of Review: New.
Title: Design for a Study of the Provision of Chapter 1 Services to Limited English Proficient Students.
Frequency: One time.
Affected Public: State of local governments.
Reporting Burden:
Responses: 344.
Burden Hours: 127.
Recordkeeping Burden:
Recordkeepers: 0.
Burden Hours: 0.
Abstract: The purpose of this study is to provide the Department with detailed information about elementary and secondary schools on Chapter 1 programs serving limited English proficient students. The Department will use this information to assess the accomplishments of program goals and objectives and to aid in effective program management.

BILLING CODE 4000-1-M

Office of Elementary and Secondary Education

Intent To Repay to the Oregon State Department of Education Funds Recovered as a Result of a Final Audit Determination

AGENCY: Department of Education.

ACTION: Intent to award grantback funds.

SUMMARY: Under section 456 of the General Education Provisions Act (GEPA), 20 U.S.C. 1234e (1982), the U.S. Secretary of Education (Secretary) intends to repay to the Oregon State Department of Education, the State educational agency (SEA), an amount equal to 75 percent of the funds recovered by the U.S. Department of Education (Department) as a result of a final audit determinaiton. This notice describes the SEA's plan, submitted on behalf of Central Linn School District, the local educational agency (LEA), for the use of the repaid funds and the terms and conditions under which the Secretary intends to make those funds available. The notice invites comments on the proposed grantback.

DATE: All written comments must be received on or before December 4, 1989.

ADDRESS: All written comments should be submitted to Dr. James Spillane, Director, Division of Program Support, Compensatory Education Programs, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 2043), Washington, DC 20202-6132.

FOR FURTHER INFORMATION CONTACT: Dr. James Spillane. Telephone: (202) 732-4692.

SUPPLEMENTARY INFORMATION:

A. Background

The Department recovered $38,045 from the Oregon SEA in satisfaction of a final audit determination issued to the LEA by the SEA on March 30, 1987. This claim arose from an audit conducted under the requirements of the Single Audit Act of 1984 of the LEA's administration of Federal programs during fiscal year (FY) 1986. Specifically, the LEA had a balance of $38,045 of FY 1985 funds on hand and the availability period for the use of FY 1985 funds had expired. The FY 1985 funds were available for obligation from July 1, 1984, to September 30, 1985. Section 412(b) of GEPA provides that funds that remain unobligated at the end of the year for which they were appropriated shall remain available for obligation and expenditure during the succeeding fiscal year. With this additional year of availability, FY 1985 funds remained available for obligation through September 30, 1986. The LEA was unable to support its claim that FY 1985 funds had been obligated in a timely manner for allowable program costs, and that timely obligations were not reflected because of inefficient bookkeeping practices.

Of the lapsed FY 1985 funds, an amount of $28,641 was from Chapter 1 of the Education Consolidation and Improvement Act of 1981, a program that addressed the special educational needs of educationally deprived children in areas with high concentrations of children from low-income families. The remaining $9,404 of the funds was from Part B of the Education of the Handicappped Act (EHA).

B. Authority for Awarding a Grantback

Section 456(a) of GEPA provides that whenever the Secretary has recovered funds following a final audit determination with respect to an applicable program, the Secretary may consider those funds to be additional funds available for the program and may arranged to repay to the SEA or LEA affected by that determination an amount not to exceed 75 percent of the recovered funds. The Secretary may enter into this "grantback" arrangement if the Secretary determines that—

(1) The practices and procedures of the SEA or LEA that resulted in the audit determination have been corrected, and the SEA or LEA is, in all other respects, in compliance with the requirements of the applicable program;

(2) The SEA or LEA has submitted to the Secretary a plan for the use of the funds to be awarded under the grantback arrangement that meets the requirements of the program, and, to the extent possible, benefits the population that was affected by the failure to comply or by the misexpenditures that resulted in the audit exception; and

(3) The use of the funds to be awarded under the grantback arrangement in accordance with the SEA's plan would serve to achieve the purposes of the program under which the funds were originally granted.

C. Plan for Use of Funds Awarded Under a Grantback Arrangement

Pursuant to section 456(a)(2) of GEPA the SEA has applied for a grantback of $21,480, which is 75 percent of the Chapter 1 funds recovered by the Department. No request was made for a grantback on behalf of the EHA funds. The SEA has submitted a plan on behalf of the LEA for the use of the grantback funds to meet the special educational needs of educationally deprived children in programs administered under chapter 1 of title I of the Elementary and Secondary Education Act of 1965, as amended. According to the plan, the LEA would use the grantback funds during school year 1989-90 to purchase supplies and equipment to enhance its regular Chapter 1 program. The LEA is located in an economically deprived area where funds for educational purposes are limited. Furthermore, the LEA's allocation for its regular Chapter 1 program is only sufficient to pay salaries and benefits for two teachers, who provide services to approximately 63 students in reading and mathematics at the LEA's only two elementary schools. The LEA would purchase two computers, printers, software, and other instructional supplies and materials with the grantback funds to expand and supplement the regular Chapter 1 program. In the regular Chapter 1 program, the educationally deprived children in grades 1-4 receive 30 minutes of extra instruction in reading or mathematics each day. Each child is provided an individual program designed to address his or her special educational needs. The grantback funds would provide materials and equipment that would encourage and facilitate learning at the Chapter 1 center.

D. The Secretary's Determinations

The Secretary has carefully reviewed the plan submitted by the SEA. Based upon the review, the Secretary has determined that the conditions under section 456 of GEPA have been met.

These determinations are based upon the best information available to the Secretary at the present time. If this information is not accurate or complete, the Secretary is not precluded from taking appropriate administrative action. In finding that the conditions of section 456 of GEPA have been met, the Secretary makes no determination concerning any pending audit recommendations or final audit determinations.

E. Notice of the Secretary's Intent To Enter Into a Grantback Arrangement

Section 456(d) of GEPA requires that, at least 30 days before entering into an arrangement to award funds under a grantback, the Secretary must publish in the **Federal Register** a notice of intent to do so, and the terms and conditions under which the payment will be made.

In accordance with section 456(d) of GEPA, notice is hereby given that the Secretary intends to make funds available to the Oregon SEA under a grantback arrangement. The grantback award would be in the amount of $21,480, which is 75 percent—the maximum percentage authorized by the statute—of the Chapter 1 funds recovered by the Department as a result of the audit.

F. Terms and Conditions Under Which Payments Under a Grantback Arrangement Would Be Made

The SEA and LEA agree to comply with the following terms and conditions under which payments under a grantback arrangement would be made:

(1) The funds awarded under the grantback must be spent in accordance with—

(a) All applicable statutory and regulatory requirements;

(b) The plan that the SEA submitted and any amendments to that plan that are approved in advance by the Secretary; and

(c) The budget that was submitted with the plan and any amendments to the budget that are approved in advance by the Secretary.

(2) All funds received under the grantback arrangement must be obligated by September 30, 1990, in accordance with section 456(c) of GEPA and the SEA's plan.

(3) Not later than January 1, 1991, the SEA will submit, on behalf of the LEA, a report to the Secretary which—

(a) Indicates that the funds awarded under the grantback have been spent in accordance with the proposed plan and approved budget, and

(b) Describes the results and effectiveness of the project for which the funds were spent.

(4) Separate accounting records must be maintained documenting the expenditure of funds awarded under the grantback arrangement.

BILLING CODE 4000-01-M

Office of Intergovernmental and Interagency Affairs

Procedures for Requesting Authoritative Guidance Under Part E of the General Education Provisions Act

AGENCY: Department of Education.

ACTION: Amended notice of procedure for requesting authoritative guidance under part E of the General Education Provisions Act.

In the May 5, 1989 issue of the **Federal Register**, the Secretary of Education issued a notice of the procedure to be used by certain recipients of funds in requesting authoritative guidance from Department of Education officials under part E of the General Education Provisions Act (54 FR 19523, corrected May 19, 1989 (54 FR 21726)). The Secretary amends that notice to increase the number of officials who may provide authoritative guidance and reissues the notice in its entirety.

Final regulations implementing the core provisions of part E were published in the **Federal Register** on May 5, 1989 (54 FR 19512, corrected May 19, 1989 (54 FR 21622, 21726)). Section 81.23 of those regulations provides that a State or local educational agency that has received a grant or cooperative agreement under an applicable program and that has made an unallowable expenditure or otherwise failed to account properly for funds is not required to return any amount that is attributable to certain "mitigating circumstances."

Section 81.23 (b) of the regulations, relating to erroneous written guidance from the Department of Education, provides in relevant part as follows:

(b) Mitigating circumstances exist if it would be unjust to compel the recovery of funds because the recipient's violation was caused by erroneous written guidance from the Department. To prove mitigating circumstances under this paragraph, the recipient shall prove that—

(1) The guidance was provided in response to a specific written request from the recipient that was submitted to the Department at the address provided by notice published in the **Federal Register** under this section; [and]

(2) The guidance was provided by a Departmental official authorized to provide the guidance, as described by that notice[.]

Section 81.23(c) of the regulations, relating to the Department's failure to

2
NO
3
1989
UMI

provide timely guidance, provides in relevant part as follows:

(c) Mitigating circumstances exist if it would be unjust to compel the recovery of funds because the recipient's violation was caused by the Department's failure to provide timely guidance. To prove mitigating circumstances under this paragraph, the recipient shall prove that—

(1) The recipient in good faith submitted a written request for guidance with respect to the legality of a proposed expenditure or practice; [and]

(2) The request was submitted to the Department at the address provided by notice published in the **Federal Register** under this section[.]

Requests for guidance referred to in § 81.23(b) and (c) must be submitted to the following address: U.S. Department of Education, Box 4799, Washington, DC 20202–4799.

Department officials who are authorized to provide guidance under § 81.23 (b)(2), quoted above, are listed below:

Office of Management: Deputy Under Secretary for Management; Comptroller; Director, Grants and Contracts Service; Director, Financial Management Service.

Office of Elementary and Secondary Education: Assistant Secretary for Elementary and Secondary Education; Deputy Assistant Secretary for Elementary and Secondary Education; Deputy Assistant Secretary for Regulations, Innovation, and Development; Director, Compensatory Education Programs; Director, Office of Migrant Education; Director, Office of Indian Education; Director, School Improvement Programs.

Office of Postsecondary Education: Assistant Secretary for Postsecondary Education.

Office of Educational Research and Improvement: Assistant Secretary for Educational Research and Improvement; Commissioner, National Center for Education Statistics; Director, Library Programs; Director, Programs for the Improvement of Practice; Director, Fund for the Improvement and Reform of Schools and Teaching; Director, Office of Research.

Office of Special Education and Rehabilitative Services: Assistant Secretary for Special Education and Rehabilitative Services; Commissioner, Rehabilitation Services Administration; Director, National Institute on Disability and Rehabilitation Research; Director, Office of Special Education Programs.

Office of Vocational and Adult Education: Assistant Secretary for Vocational and Adult Education; Director, Division of Vocational-Technical Education; Director, Division of National Programs; Director, Division of Adult Education.

Office of Bilingual Education and Minority Languages Affairs: Director, Office of Bilingual Education and Minority Languages Affairs.

EFFECTIVE DATE: The regulations implementing part E and the notice that was published with the regulations took effect on June 19, 1989. The amendments to the notice in this document take effect November 3, 1989.

FOR FURTHER INFORMATION CONTACT: Barry W. Stevens, U.S. Department of Education, Office of the General Counsel, 400 Maryland Avenue SW., Room 4091 FOB–6, Washington, DC 20202; Telephone: (202) 732–2730.

Dated: October 30, 1989.

Lauro F. Cavazos,

Secretary of Education.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Idaho Operations Office; Research and Development of Nickel/Cadmium (Ni/Cd) Alkaline Batteries

AGENCY: Idaho Operations Office, DOE.

ACTION: Solicitation for Financial Assistance Applications No. DE–PS07–90ID12873 for Research and Development of Nickel/Cadmium (Ni/Cd) Alkaline Electric Vehicle Batteries.

SUMMARY: "Research and Development of Nickel/Cadmium (Ni/Cd) Alkaline Batteries." The U.S. Department of Energy (DOE), Idaho Operations Office (ID), is seeking applications on the basis of open competition, for cost-sharing research and development of Nickel/Cadmium (Ni/Cd) alkaline batteries in support of its Electric and Hybrid Vehicle (EV) Program. The statutory authority for this action is the Electric Vehicle and Hybrid Vehicle Research, Development and Demonstration Act of 1976. This announcement is the complete solicitation document and no other document for this work is available. The objective of this program is to execute one or more cooperative agreements to evaluate currently available fiber-electrode technologies and identify those which possess the potential for advancing nickel/cadmium batteries for Electric Vehicle traction applications. A cooperative agreement is the anticipated instrument because, in accordance with the DOE financial assistance rules, 10 CFR part 600.202, DOE will be substantially involved in the project. The substanital involvement between DOE and the awardee and DOE's authorities and responsibilities under this agreement shall be as follows: (1) DOE will monitor project status and expenditures, and counsel the awardee if significant variance with plans and budgets occur. DOE will convene periodic project reviews, at a time and place agreeable to the awardee, to permit review of the project status by DOE and/or DOE contractor personnel. The reviews will determine if satisfactory progress towards the goals of the project are being met and determining whether to continue funding the project, redirecting the research efforts, or canceling support of the project. (2) Within 30 days of any project review meeting or within 30 days of receipt of any technical progress report, DOE will inform the awardee of any required changes or additions. (3) DOE review and approval is required prior to building any cells and prior to testing for cells. (4) DOE will recommend technology transfer activities for consideration by the awardee as part of the activities. DOE will review and approve all technology transfer activities planned by the awardee to ensure that the activities will be effective in helping development and commercial acceptance of the technology. All projects will be cost-shared by DOE and the Participant and project duration is expected to be approximately 36 months. Applicants should be aware that any awardee will be required to have a cost-share of not less than 10% (ten percent). No fee or profit will be paid to the Participant. DOE anticipates that approximately $130,000 will be available for support of activities during the first year, and $150,000 to $300,000 for each of the following two years. Negotiation, award, and administration will be in accordance with DOE Financial Assistance Regulations (10 CFR part 600). The Catalog of Federal Assistance number for this program is 81.086. Profit making entities, individuals, educational institutions, nonprofit institutions and other entities are eligible to submit applications in response to the solicitation. Federal agencies and/or laboratories owned, operated, or under the cognizance of the Federal Government are not eligible for award and should not submit applications. Applications which anticipate participation of such a laboratory by subcontract, use agreement, or other arrangement must include satisfactory evidence of specific authorization from the cognizant Federal agency.

BEST COPY AVAILABLE

Background

Public Law 94–413, enacted on September 17, 1976, then modified by Public Law 95–238, authorized the U.S. Department of Energy (DOE) to conduct a program of research, development and demonstration designed to promote electric and hybird vehicle technologies to commercial feasibility. Basic and applied research on batteries for electric and hybrid vehicles were among the activities specified by the legislation. Over the past ten years DOE has searched for the battery type that would be the breakthrough for electric vehicle transportation. The search goes on with static electrolyte, flowing electrolyte and solid electrolyte types. Progress toward achievement of the long range goals is as elusive as ever. Several battery types, in their earliest stages of development, have exhibited high promise, but that promise has become more and more modest as research turns up additional problems of a practical nature. Currently only two battery types show field operational capability: Lead/acid and nickel/iron (Ni/Fe). Research work on the nickel/cadmium (Ni/Cd) battery for EV traction has focused on the non-sintered nickel electrode, in an effort to produce a low cost Ni/Cd battery. However, the power limitation of this technology has always been a concern. This limitation is perhaps fundamental. At issue is internal "resistance" versus pore structure as an explanation for the battery's poorer performance when compared with the lead/acid battery of the same ampere/hour rating. This is a paradox, because standard rechargeable Ni/Cd batteries are popular because of their high power with high voltage cranking ability. The non-sintered nickel electrode technology has a rapid temperature-rise characteristic at high discharge rates. The high internal heat generation causes graphite oxidation, cell swelling, and loss of cell capacity of each cycle following a high rate demand. The standard Ni-Cd battery technology possesses two characteristics which make it attractive as an improved power source of EV traction. It is a high power delivery device, as described above, and exhibits better operating characteristics at cold ambient temperatures than the lead-acid battery. Thermal management is required on battery types that lose their capability at low ambient temperatures. Thermal management is a complication in the system that elevates cost, adds bulk and weight to the vehicle, and requires energy from the battery to maintain its operating temperature which reduces the energy available for powering the vehicle.

Scope

This technology evaluation program is designed to refocus the Ni/Cd efforts along more conventional lines. First it is designed to evaluate available fiber-electrode technologies and identify the best technology. Assuming that this evaluation identifies a technology that possesses the potential to reduce cost without sacrificing performance and live, the next effort would be directed at identification of a suitable cadmium recombination electrode technology. If successful on both counts, this project could lead to a cost-reduced Ni/Cd battery technology with low maintenance requirements. This technology would offer significant advantages over Ni/Fe batteries, which possess no known potential for gas recombination and require almost daily watering.

The applicant is to provide a concise but definitive scope of work for inclusion into any resulting agreement. The individual key tasks are to be defined and listed in logical sequence. It is the responsibility of the applicant to include all items in the scope of work that are required to accomplish the stated purpose of the project. Each task is to be priced separately. DOE may choose none, all, or some combination of the tasks to be funded. As a minimum, the following tasks should be included and discussed in the statement of work:

1. Perform a survey of all fiber nickel and cadmium electrode technologies (without carbon or graphite additivies) available for both foreign and domestic battery developers. Using 50 Wh/kg (at 3-hour discharge rate) as the specific energy, 120 W/kg (at 50% depth of discharge) as the peak specific power, and −20 to +60 °C as the operating temperature range as targets, the surveyed technologies shall be ranked and current status documented.

2. Build three sample cells each, of the top three rated electrode combinations (20 Ah minimum size). Charge-discharge performance shall be established at five different temperatures within the range of interest (room temperature being one point).

A second series of tests shall be performed with the cells charged at room temperature and then discharged at each of the five temperatures previously chosen. Room temperature charging shall be at the 5- to 6-hour rate, with all discharging at the one-hour rate. When operating at temperatures other than room temperature, the charging rates shall be established at the gassing threshold for each temperature. These thresholds will be reported as part of the cell characteristics.

3. Identify the best technologies from task 2 to perform life cycle tests. Eight cells (20 Ah minimum size) are to be built. Four cells are to be cycled at the one-hour discharge rate using a water bath to control temperature. The Simplified Federal Urban Driving Cycle (SFUDC) is to be run at regular intervals (i.e., every 50 cycles) to determine if any degradation of the dynamic characteristics is occurring. The objective is to determine if the best fiber nickel electrode, in combination with the best cadmium electrode, can achieve or exceed 1000 cycles. The life testing requirement is to extract 70% of the maximum one-hour rate energy from the battery. Beginning-of-life performance is to be established after 20 break-in or conditioning cycles. End-of-life is to be determined when the voltage under load drops below the cutoff voltage before the specified energy is delivered; or when the acceleration fails to meet the driving cycle requirements on two consecutive cycles or twice during the same cycle on the SFUDC regime. Cutoff voltage may not be defined lower than sixty percent (60%) of the open circuit voltage. The remaining four cells are to be sent to an independent testing facility designated by DOE.

4. Survey the available cadmium recombination electrode technologies and report on the feasibility of using one or more of these technologies to build sealed or low maintenance batteries. The objective is to prove the potential for one-year (minimum) maintenance-free operation in an EV traction application. Noble metal catalysts are not an acceptable alternative to a recombining electrode technology.

5. Build eight cells (20 Ah minimum size) of the type from Task 3 and include the best cadmium recombination electrode, if the recombination technology shows promise. Establish a test plan and test four cells to show the effectiveness of the recombination electrode. Testing shall include an initial charge current equivalent to a 5- to 6-hour discharge rate, with allowance for taper current charging after 80% SOC. The data must be usable to define the maximum taper charge current that the recombination electrode can accommodate. The applicant will send the remaining four cells to a test facility designated by DOE.

6. Demonstrate scale-up of the chosen technologies: (1) Build six full-size EV cells (150–200 Ah capacity) and (2) upon approval from DOE, build eight full-size 6-volt modules for delivery.

VOL

SS
2
1
2
NO
3
1989
UMI

7. Prepare a detailed weight and cost analysis of the technology used in tasks 3 and 5. The analysis shall highlight costly materials and manufacturing areas. This analysis shall identify and address the high-cost aspects of mass production; e.g., inherent materials costs and/or high-cost steps in the production process (due to high labor requirements, expensive equipment, low production rates, and/or low yields).

Note: Any hazardous waste produced or the handling of hazardous material must be handled in accordance with applicable EPA and/or OSHA regulations. The proposal must reference applicable EPA regulations and your procedures on how the waste will be treated or disposed, and how hazardous material is to be handled.

Evaluation Criteria

All timely proposals received will be evaluated and point scored in accordance with the technical evaluation criteria listed below.

The criteria are listed in descending order of importance.

Technical Proposal Evaluation Criteria

The Technical Evaluation Criteria are weighted in the following manner: Criterion A is weighted approximately equal to Criterion B and three times as much as Criterion C. Subcriterion A.1 is weighted about one and one-fourth as much as subcriterion A.2. Subcriterion B.1 is weighted equal to subcriterion B.2. Subcriterion C.1 is weighted twice as much as subcriteria C.2.

Criterion A: Statement of Objectives and Facility Description

1. The statement of work will be evaluated for technical quality, merit of proposed approach, and probability of achieving positive results.

2. The facility description will be evaluated to determine the capabilities of the facility to build and test NiCd cells and batteries, to handle hazardous material and dispose of hazardous waste.

Criterion B: Qualification and Capabilities

1. Key personnel will be evaluated as to their work experience in the required technology areas and understanding of the technology involved, as demonstrated by education, publications, inventions and work experience in the required technology areas.

2. The proposing organization, including subcontractor's, capabilities will be evaluated relative to (1) experience and expertise in the required technology areas, (2) the ability to manage the proposed effort, (3) past technical performance, and (4) ability to handle hazardous material and hazardous waste.

Criterion C: Project Management Plan

1. Quality of the management plan provisions for technical, quality, and administrative controls, to assure appropriate project maintenance and overall management for the building and testing of cells and batteries.

2. Cost effectiveness of building and testing cells and batteries as required.

Applications shall be responsive to all the above criteria. Cost considerations will not be point scored or adjectively rated. In making the selection decision, the apparent advantages of individual technical applications will be weighed against the evaluated probable cost to the Government (including cost sharing) to determine whether better applications, excluding cost considerations are worth the evaluated probable cost differentials over other applications. If applications are very closely ranked and the Source Selection Official determines that the superiority in the technical aspects of the higher related application(s) is not meaningful when viewed in relationship to lower rated applications, evaluated probable costs to the Government may form the basis for selection.

Instructions

Each application in response to this solicitation should be prepared in one volume. One original and seven copies of each application is required. Applications shall exclude material not essential to evaluation of the proposal. Applications shall be as short as possible consistent with completeness, clearly and concisely written and neat and logically assembled. The importance of supplying full and completely responsive information for each of the evaluation criteria cannot be overemphasized. If the offer is submitted under a joint venture arrangement, this fact must be clearly set forth. In conducting the evaluation of applications, the Government may utilize assistance and advice from non-Government personnel. Applicants that do not consent to the use of non-Government personnel in evaluating their application(s) are required to make that statement on the cover of their application(s). Applicants are further advised that DOE may be unable to give full consideration to an application submitted without such consent. Information contained in the applications shall be treated in accordance with the policies and procedures set forth in 10 CFR part 600.18. DOE reserves the right to fund, in whole or in part, any, all, or none of the applications submitted in response to this solicitation. DOE may require applications to be clarified or supplemented either through additional written submissions or oral presentations; however, the award may be made solely on the information contained in the application. Unsuccessful applications will not be returned but will be destroyed by DOE. DOE is under no obligations to pay for any costs associated with preparation or submission of applications of an award is not made. If an award is made, such costs may be allowable as provided in the applicable cost principles. Further, costs incurred prior to the signing of a cooperative agreement are not reimbursable. The cost principles that shall apply will depend on the type of awardee(s): FAR 31.2 shall apply to commercial organizations, OMB Circular A–21 shall apply to educational institutions; OMB Circular A–87 shall apply to state and local governments; and OMB Circular A–122 shall apply to nonprofit organizations. Reporting under any agreement awarded will be in accordance with DOE Order 1332.2 "Uniform Reporting System for Federal Assistance." The awardee(s) must have an accounting system capable of accumulating costs by project. All applicants are required to provide in their proposal the nine-digit Taxpayer Identification Number (TIN) assigned by the U.S. Internal Revenue Service. Applications should be submitted to the contact given below.

Applications must include a completed Standard Form 424 "Application for Federal Assistance," a 424A "Budget Information," and 424B "Assurances," including the Drug-Free Workplace Certification. These may be obtained from the Contract Specialist named below. The specific reporting requirements, prepared in accordance with DOE Order 1332.2 "Uniform Reporting System for Federal Assistance," are also obtainable from the Contract Specialist. Notice of Possible Availability of Loans for Bid Proposal Preparation by Minority Business Enterprises Seeking DOE Contracts and Assistance section 211(e)(1) of the DOE Act (Public Law 95–91 as amended by Public Law 95–619) authorizes the Department of Energy (DOE) to provide financial assistance to minority business enterprises to assist them in their efforts to participate in DOE acquisition and assistance programs. Financial assistance is in the form of direct loans to enable the preparation of bids or proposals for DOE contracts and assistance awards, subcontracts with DOE operating contractors, and contracts with subcontracts of DOE operating contractors. The loans are limited to 75 percent of the costs involved. Availability of these loans is subject to annual appropriation of funds and the remaining availability of funds from such appropriations. DOE does not warrant that such assistance can be made available in sufficient time to prepare an application for this solicitation. DOE does point out that the program includes provisions for a preliminary review in advance of a specific loan request. Information regarding loan availability, eligibility critieria, and how to apply may be obtained from: San Francisco Operations Office, U.S. DOE, ATTN: Minority Loan Program Office, 1333 Broadway, Oakland, CA 94612, (415) 273–6403.

The closing date and time will be : 4:00 p.m., Idaho Falls, Idaho local time, on December 7, 1989. Be aware that the applications must be submitted no later than the closing date and time, according to the criteria of 10 CFR Part 600.13 entitled "Application Deadlines." Evaluation of the applications will commence approximately one week after the closing date. Late applications will be handled in accordance with 10 CFR part 600.13. Prospective applicants who intend to submit an application in response to this solicitation should so notify the contact below in writing.

Questions regarding this solicitation should also be submitted to the contact below in writing and postmarked prior to November 10, 1989. Questions and answer will be issued in writing by amendment to this solicitation. Copies of all amendments to this solicitation will be sent only to those notifying this office of their intent to submit an application. Selection and award are expected to be made within four months of the closing date of this solicitation.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. ER90-36-000, et al.]

Florida Power & Light Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

October 27, 1989.

Take notice that the following filings have been made with the Commission:

1. Florida Power & Light Company

[Docket No. ER90-36-000]

Take notice that on October 24, 1989, Florida Power & Light Company (FPL), tendered for filing a document entitled Amendment Number Seven to Agreement to Provide specified Transmission Service Between Florida Power & Light Company and City of Tallahassee, Florida (Rate Schedule FERC No. 47).

FPL states that under Amendment Number Seven, FPL will transmit power and energy for City of Tallahassee, Florida as is required in the implementation of its interchange agreement with the Utility Board of the City of Key West, Florida.

FPL requests that waiver of § 35.3 of the Commission's Regulations be granted and that the proposed Amendment be made effective immediately. FPL states that a copy of the filing was served on City of Tallahassee, Florida.

Comment date: November 13, 1989, in accordance with Standard Paragraph E at the end of this notice.

2. Southwestern Public Service Company

[Docket No. ER90-35-000]

Take notice that Southwestern Public Service Company (Southwestern) on October 23, 1989, tendered for filing a supplemental filing to change the rate schedules for full requirements electric power service to Central Valley Electric Cooperative, Inc., Farmers' Electric Cooperative, Inc., of New Mexico Lea County Electric Cooperative, Inc., and Roosevelt County Electric Cooperative, Inc.

The supplemental filing was made to clarify certain provisions of the new rate schedules and to correct a rate rider so that it is consistent with the currently effective rider.

Copies of the supplemental filing were served upon the four customers and the New Mexico Public Service Commission.

Comment date: November 13, 1989, in accordance with Standard Paragraph E at the end of this notice.

3. Bangor Hydro-Electric Company UNITIL Power Corporation

[Docket No. ER90-32-000]

Take notice that Bangor Hydro-Electric Company ("Bangor") and UNITIL Power Corporation (UNITIL) on October 23, 1989 tendered for filing as an Initial Rate Schedule, an Electric Generating Capability Agreement. The Agreement provides for the sale by Bangor to UNITIL of 10,000 kw of electric generating capability during November 1, 1989 through October 31, 1990 and the total output associated therewith.

Comment date: November 13, 1989, in accordance with Standard Paragraph E at the end of this notice.

2. Southwestern Public Service Company

[Docket No. ER90-35-000]

Take notice that Southwestern Public Service Company (Southwestern) on October 23, 1989, tendered for filing a supplemental filing to change the rate schedules for full requirements electric power service to Central Valley Electric Cooperative, Inc., Farmers' Electric Cooperative, Inc., of New Mexico Lea County Electric Cooperative, Inc., and Roosevelt County Electric Cooperative, Inc.

The supplemental filing was made to clarify certain provisions of the new rate schedules and to correct a rate rider so that it is consistent with the currently effective rider.

Copies of the supplemental filing were served upon the four customers and the New Mexico Public Service Commission.

Comment date: November 13, 1989, in accordance with Standard Paragraph E at the end of this notice.

3. Bangor Hydro-Electric Company UNITIL Power Corporation

[Docket No. ER90-32-000]

Take notice that Bangor Hydro-Electric Company ("Bangor") and UNITIL Power Corporation (UNITIL) on October 23, 1989 tendered for filing as an Initial Rate Schedule, an Electric Generating Capability Agreement. The Agreement provides for the sale by Bangor to UNITIL of 10,000 kw of electric generating capability during November 1, 1989 through October 31, 1990 and the total output associated therewith.

Comment date: November 13, 1989, in accordance with Standard Paragraph E at the end of this notice.

VOL 54 SS 212 NO 3 1989 UMI

4. Arizona Public Service Company

[Docket No. ER89-649-000]

Take notice that on October 24, 1989, Arizona Public Service Company ("APS" or "Company") tendered for filing an amended filing revising the methodology used in developing the proposed purchased power adder pursuant to Commission Staff's recommendations.

Comment date: November 13, 1989, in accordance with Standard Paragraph E at the end of this notice.

5. New York State Electric & Gas Corporation

[Docket No. ER90-31-000]

Take notice that New York State Electric & Gas Corporation (NYSEG) on October 23, 1989, tendered for filing pursuant to § 35.13 of the regulations under the Federal Power Act, as a rate schedule, an agreement with New England Power Company (NEP). The short term agreement provides that NYSEG shall sell surplus capability and associated energy to NEP. Service under this agreement will commence on October 31, 1989 and shall terminate on April 30, 1990 unless extended in writing by mutual agreement.

NYSEG has filed a copy of this filing with New England Power Company with the Massachusetts Department of Public Utilities, and with the Public Service Commission of the State of New York.

NYSEG requests that the 60-day filing requirement be waived and that October 31, 1989 be allowed as the effective date of the filing.

Comment date: November 13, 1989, in accordance with Standard Paragraph E end of this notice.

6. Connecticut Light and Power Company

[Docket No. ER90-33-000]

Take notice that on October 23, 1989, Northeast Utilities Service Company (NUSCO) as agent for Connecticut Light and Power Company (CL&P) tendered for filing Notices of Termination of the following rate schedules:

Sales Agreement with respect to slice-of-system units between CL&P and Boston Edison Company, dated January 1, 1969 (CL&P Rate Schedule FERC 424).

Sales Agreement with respect to slice-of-system units between CL&P and Public Service Company of New Hampshire, dated August 1, 1968 (CL&P Rate Schedule FERC 409).

Sales Agreement with respect to slice-of-system units between CL&P and the United Illuminating Company, dated August 1, 1968 (CL&P Rate Schedule FERC 410).

NUSCO states that the schedules are to be terminated in accordance with their own terms. NUSCO requests that the Commission allow the terminations for each of the Agreements to take effect on October 31, 1989.

Comment date: November 13, 1989, in accordance with Standard Paragraph E at the end of this notice.

7. Iowa Power and Light Company

[Docket No. ES90-4-000]

Take notice that on October 24, 1989, Iowa Power and Light Company (Applicant) filed an application seeking authority pursuant to section 204 of the Federal Power Act to issue on or before December 31, 1991, bank notes maturing not more than one year after date of issue and commercial paper notes maturing not more than nine months after the date of issue in principal amounts not exceeding $135,000,000 of which up to an amount not exceeding twenty-five percent (25%) of the Company's gross revenues during the preceding twelve (12) months of operations in the aggregate at any one time may be issued as commercial paper, and that the Company may issue and sell commercial paper either directly to buyers, insofar as allowed by state law, or through established commercial paper dealers.

Comment date: November 23, 1989, in accordance with Standard Paragraph E at the end of this notice.

8. Public Service Company of Indiana, Inc.

[Docket No. ER89-672-000]

Take notice that on October 24, 1989, Public Service Company of Indiana, Inc. (PSI or the Company) submitted an amendment to its filing in the above captioned docket of proposed rate Schedule FS-1. The Company's original filing requests authorization to provide long-term firm power sales at negotiated rates to certain unaffiliated customers. Should such authorizations be granted, PSI has committed to file a Transmission Service Tariff with the Commission that would cover Transmission Service on PSI's transmission system. The Amendments to the initial filing clarify that PSI's authorization to make such sales to a customer would be suspended in the event PSI is unable to construct facilities necessary to provide transmission service to such customer consistent with its transmission tariff, which PSI filed as a *pro forma* tariff to its rate schedule.

Copies of the Amendments to the initial filing have been served on the Indiana Utility Regulatory Commission, the Attorney General of the State of Indiana, the Utility Consumer Counselor, the Indiana Municipal Power Agency, the Wabash Valley Power Association, the City of Logansport, Indiana, PSI's existing wholesale customers who purchase under Rate MUN and Rate REMC-1, and upon persons who have intervened in this docket.

Comment date: November 13, 1989, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-24901 Filed 11-2-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP90-91-000 et al.]

ANR Pipeline Co., et al.; Natural Gas Certificate Filings

October 27, 1989.

Take notice that the following filings have been made with the Commission:

1. ANR Pipeline Company

[Docket No. CP90-91-000]

Take notice that on October 24, 1989, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP90-91-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations for authorization to transport natural gas for Coastal Gas Marketing (Coastal), a marketer of natural gas, under ANR's blanket certificate issued in Docket No. CP88-532-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANR proposes to transport on an interruptible basis up to 150,000 dt equivalent of natural gas on a peak day, 150,000 dt equivalent on an average day and 54,750,000 dt equivalent on an annual basis for Coastal. ANR states that it would perform the transportation service for Coastal under ANR's Rate Schedule ITS. ANR indicates that it would transport the gas from receipt points in Oklahoma, Texas and Kansas, to a delivery point located in Roberts County, Texas.

It is explained that the service commenced September 1, 1989, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST90-67. ANR indicates that no new facilities would be necessary to provide the subject service.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Algonquin Gas Transmission Company

[Docket No. CP90-134-000]

Take notice that on October 26, 1989, Algonquin Gas Transmission Company (Algonquin) 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket No. CP90-134-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing sales and transportation services for certain customers and for authority to abandon sales services to certain specified customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Algonquin states that its application is the end result of extensive negotiations between Algonquin and its firm sales customers for over three years regarding the terms and conditions of new services to replace Algonquin's existing Rate Schedules F-1 and F-4. Algonquin further states that the primary goal of those negotiations has been to flow through, to the extent permitted by Algonquin's operating situation, to Algonquin's customers the benefits resulting from the restructuring of service by Texas Eastern Transmission Corporation (Texas Eastern).[1] Algonquin states that it has been able to offer this comprehensive restructuring to its F-1 and F-4 customers only because Texas Eastern and Algonquin have agreed to restructure Texas Eastern's existing service obligations to Algonquin in accordance with the terms and conditions of Texas Eastern's approved new Rate Schedules CD-1, CD-2, and FT-1 which became effective as of August 1, 1989 under Texas Eastern's restructuring program.[2] Algonquin states that it has executed new service agreements for sales service under Rate Schedules CD-1 and CD-2 and firm transportation under Rate Schedule FT-1. According to Algonquin, these new agreements with Texas Eastern reflect Algonquin's customers nominations for new service proposed herein.

Algonquin states that its restructuring proposal involves no increase in the aggregate contractual quantities of service to existing customers. Rather, it simply replaces the existing firm sales service under Rate Schedules F-1 and F-4 with a comparable level of firm transportation, sales and standby sales services which will be rendered in accordance with the terms and conditions of Rate Schedules AFT-1 and ATAP, as modified herein (Rate Schedule ATAP is currently pending acceptance in Docket No. RP89-241-000).

Algonquin alleges that approval of its proposal to restructure its services will have the effect of enhancing competition in the market place since its customers will have the opportunity to convert existing sales service to new firm sales services and/or firm transportation. Consequently, such customers will be able to purchase supply directly from multiple sources. Further, Algonquin proposes to implement a transportation assignment program for shippers under Algonquin's Rate Schedule AFT-1. Algonquin proposes to allow AFT-1 shippers to assign on either a firm or interruptible basis their firm transportation service to third parties, provided such shippers submit a notice in writing to Algonquin indicating their desire to engage in the assignment of transportation service. Algonquin further states that assignees who have been assigned rights on a firm basis may also reassign these firm rights on either a firm or interruptible bases. Algonquin's instant proposal includes mechanisms to flow through gas supply inventory charges from Texas Eastern should they be incurred as a result of purchase patterns of Algonquin's customers. Algonquin requests that the Commission expeditiously approve its proposal with an effective date of December 1, 1989, in order to provide the benefits of Algonquin's proposal to its customers during the upcoming winter heating season.

Algonquin also requests authority to modify its Rate Schedules STB and SS-III to allow customers under those rate schedules to inject gas from supply sources other than Algonquin. Currently, Algonquin states that Rate Schedule STB and SS-III customers must purchase Algonquin Rate Schedules F-1 and/or I-1 supply for injection into storage. Algonquin states that customers will benefit from this change if they are able to purchase supply form sources other than Algonquin. Algonquin also requests authorization to receive such third party gas for injection at points of receipt under these storage rate schedules corresponding to the points of delivery under Rate Schedule ATAP.

Specifically, Algonquin requests that the Commission issue a certificate authorizing a comprehensive restructuring of its existing service obligations by permitting Algonquin (a) to render to existing firm sales customers under Rate Schedules F-1 and F-4 a firm sales and firm standby sales service in accordance with the terms and conditions to proposed new Rate Schedules ACD-1 and ACD-4, (b) to establish for each firm sales customer under Rate Schedules ACD-1, ACD-4, F-1 and F-4 a gas supply inventory cost provision pursuant to which Algonquin will recover from those customers, on a quarterly basis, the monthly costs billed to Algonquin by Texas Eastern pursuant to Texas Eastern's Gas Supply Inventory Reservation Charge, (c) to modify existing Rate Schedule AFT-1 to reflect the impact of standby sales service under Rate Schedules ACD-1 and ACD-4 proposed in its application and to reflect a transportation assignment program for Algonquin's Rate Schedule AFT-1 shippers, (d) to modify Algonquin's Rate Schedule ATAP as filed on September 25, 1989, to reflect the impact of standby sales service under Rate Schedules ACD-1 and ACD-4 and (e) to implement certain tariff provisions set forth in the pro forma General Terms and Conditions set forth Exhibit P to the application. In addition, Algonquin requests that to the extent customers elect to convert to services under Rate Schedules ACD-1, ACD-4, ATAP and AFT-1, Algonquin requests permission and approval of the related abandonment of its sales services obligations to such customers under Algonquin's Rate Schedules F-1 and F-4.

Comment date: November 13, 1989 in accordance with Standard Paragraph F at the end of the notice.

[1] Algonquin states that, historically, the gas purchased from Texas Eastern has been resold under Rate Schedules F-1, F-4 and WS-1. It is states that the instant application contemplates a restructuring of Algonquin's Rate Schedules F-1 and F-4. Algonquin states that it anticipates filing a comprehensive restructuring of its Rate Schedule WS-1 in the near future.

3. ANR Pipeline Company

[Docket No. CP90-62-000]

Take notice that on October 24, 1989, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP90-62-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations for authorization to transport natural gas for Santanna Natural Gas Corp. (Santanna), a marketer of natural gas, under ANR's blanket certificate issued in Docket No. CP88-532-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANR proposes to transport on an interruptible basis up to 75,000 dt equivalent of natural gas on a peak day, 75,000 dt equivalent on an average day and 27,375,000 dt equivalent on an annual basis for Santanna. ANR states that it would perform the transportation service for Santanna under ANR's Rate Schedule ITS. ANR indicates that it would transport the gas from receipt points in Louisiana, Oklahoma, Texas, Kansas, Wisconsin, offshore Texas, and offshore Louisiana, to delivery points located in Wisconsin.

It is explained that the service commenced September 1, 1989, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST90-52. ANR indicates that no new facilities would be necessary to provide the subject service.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. Canyon Creek Compression Company

[Docket No. CP90-86-000]

Take notice that on October 20, 1989, Canyon Creek Compression Company (Canyon), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP90-86-000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations for authorization to transport natural gas for Chevron USA, Inc. (Chevron), a producer of natural gas, under Canyon's blanket certificate issued in Docket No. CP89-1497-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Canyon proposes to transport on an interruptible basis up to 100,000 MMBtu of natural gas on a peak day, 50,000 MMBtu on an average day and 18,250,000 MMBtu on an annual basis for Chevron. Canyon states that consistent with Canyon's Rate Schedule ICS, Chevron may request and Canyon may agree to accept additional quantities as overrun gas. Canyon indicates that it would transport the gas from two receipt points in Uinta, Wyoming to two delivery points in Uinta, Wyoming.

It is explained that the service commenced September 21, 1989, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST90-183. Canyon indicates that no new facilities would be necessary to provide the subject service.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

5. Natural Gas Pipeline Company of America

[Docket No. CP90-49-000]

Take notice that on October 11, 1989, Natural Gas Pipeline Company of America (Natural) 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP89-1430-000 a request, as supplemented October 17, 1989, pursuant to § 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to operate an existing tap for the sale, delivery, and transportation of natural gas to Iowa Electric Light and Power Company (Iowa Electric), an existing customer of Natural's, for resale to Green Valley Chemical Company (Green Valley) in Union County, Iowa, under its blanket authorization issued in Docket No. CP82-402-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Natural avers that it recently discovered that a certificate of public convenience and necessity had apparently never been issued for the construction and operation of the facilities required for delievery to Green Valley. This delivery point was constructed in 1966 at the request of Iowa Electric and is listed on Natural's currently effective Seventh Revised Sheet No. 402 of Third Revised Volumes No. 1, as well as Natural's "Annual Report of System Flow Diagrams", Format No. FERC 567. It is alleged that Iowa Electric is an existing sales customer of Natural's receiving such service under Natural's Rate Schedule DMQ-1. Natural received authority to provide resale service to Iowa Electric in an order issued October 13, 1942, in Docket No. G-235.

The sales deliveries at the Green Valley meter station enables Iowa Electric to service the end use needs of Green Valley, which are the manufacture of anhydrous ammonia for fertilizer and dry ice for food processing. It is averred that it is not necessary for Iowa Electric to increase its total entitlements form Natural in order to provide this sales service for Green Valley. Natural contends that this action was not, and is not, prohibited by Natural's tariff, and Natural had and has sufficient capacity to provide this service without detriment or disadvantage to any other customers.

Natural asserts that it received authority in Docket Nos. G-651 and G-1423, pursuant to orders issued May 10, 1946, and August 8, 1950, respectively, to construct and operate one two-inch lateral approximately 6.7 miles long and one three-inch lateral approximately 6.7 miles long (Creston Laterals), extending from connections to Natural's mainlines in Adair County, Iowa, to the City of Creston located in Union County, Iowa, in Docket Nos. G-651 and G-1423, pursuant to orders issued May 10, 1946 and August 8, 1950, respectively. Natural states that it received authority to replace the two-inch lateral with a four-inch lateral in Docket No. CP62-229. In 1966, Iowa Electric requested that Natural install two three-inch taps, 311 feet of three-inch lateral and one four-inch meter to connect Green Valley to the Creston Laterals in order to provide a new sales and delivery point for Iowa Electric. Natural contends that the physical work was completed on April 28, 1966, and that the total cost of the facilities was $10,331.

It is stated that Iowa Electric has been purchasing natural gas from Natural and selling this natural gas to Green Valley at the Green Valley meter station since 1966. The Green Valley meter station is the only delivery point on Natural's system connected to Green Valley, an enduser. It is also stated that Natural has also been transporting natural gas for the account of Green Valley since 1966.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Natural Gas Pipeline Company of America

[Docket No. CP90-87-000]

Take notice that on October 20, 1989, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP90-87-000 a request pursuant to § 157.205 of the Commission's Regulation under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Midcon Marketing Corporation (Midcon), a marketer of natural gas, under Natural's blanket certificate issued in Docket No. CP86-582-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Pursuant to a tranportation agreement dated March 23, 1989, as amended, Natural requests authority to transport up to 100,000 MMBtu of gas per day (plus any additional volumes accepted pursuant to the overrun provisions of its Rate Schedule ITS), on an interruptible basis, for Midcon. Natural states that the agreement provides for it to receive the gas at various existing points of receipt along its system and to deliver the gas to various existing points of delivery located in Texas, offshore Texas, Louisiana, offshore Louisiana and Illinois. Midcon has informed Natural that it expects to have only 50,000 MMBtu of gas transported on an average day and, based thereon, Natural estimates that 18,250,000 MMBtu of gas would be transported annually. Natural advises that the transportation service commenced on August 23, 1989, as reported in Docket No. ST90-185-000 pursuant to § 284.223 of the Commission's Regulations.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Panhandle Eastern Pipe Line Company

[Docket No. CP90-96-000]

Take notice that on October 23, 1989, Panhandle Eastern Pipeline Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP90-96-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas for Panhandle Trading Company (PTC), a shipper and marketer of natural gas, pursuant to Panhandle's blanket certificate issues in Docket No. CP86-585-000 and section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Specifically, Panhandle requests authority to transport up to 50,000 DT per day on an interruptible basis on behalf of PTC pursuant to a transportation agreement dated May 2, 1988, between Panhandle and PTC. It is stated that the agreement provides for Panhandle to receive gas from various existing points of receipt located in Colorado, Illinois, Kansas, Michigan, Ohio, Oklahoma and Texas. Panhandle would then transport and redeliver subject gas, less fuel used and unaccounted for line loss, to Union Gas in Wayne County, Michigan, it is stated. It is further stated that the estimated annual quantities would be 20,000 Dt and 7,300,000 Dt, respectively. Panhandle states that service under § 284.223(a) commenced on September 1, 1989, as reported in Docket No. ST89-4780.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

8. Canyon Creek Compression Company

[Docket No. CP90-114-000]

Take notice that on October 23, 1989, Canyon Creek Compression Company (Canyon), 701 East 22nd Street, Lombard, Illinois, 60148, filed in Docket No. CP90-114-000 a request pursuant to the notice procedure in §§ 157.205 and 284.223 of the Commission's Regulations for authorization to transport and compress, on an interruptible basis, for MidCon Marketing Corporation (MMC), a marketer of natural gas, under Canyon's blanket certificated issued in Docket No. CP89-1497-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Canyon Creek, pursuant to an agreement dated August 14, 1989, proposes to transport and compress for MMC on an interruptible basis from receipt points and delivery points in Uinta County, Wyoming. It is stated that the volumes to be transported on a peak day is up to a maximum of 193,000 MMBtu (plus any additional volumes accepted pursuant to the overrun provisions of Canyon's Rate Schedule ICS) for MMC, on an average day approximately 100,000 MMBtu, and on an annual basis approximately 36,500,000 MMBtu.

Canyon Creek states that service commenced on September 1, 1989, as reported in Docket No. ST90-19-000, pursuant to § 284.223(a) of the Commission's Regulations.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

9. Panhandle Eastern Pipe Line Company

[Docket No. CP90-106-000]

Take notice that on October 23, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP90-106-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to transport natural gas for Entrade Corporation (Entrade), a shipper and marketer of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle proposes to transport up to 100,000 dekatherms (dt) of natural gas equivalent per day on an interruptible basis on behalf of Entrade pursuant to a transportation agreement dated July 24, 1989, between Panhandle and Entrade. Panhandle would receive the gas at various existing points of receipt on its system in Texas, Oklahoma, Kansas, Colorado, Illinois, Michigan, Ohio and Wyoming and deliver equivalent volumes, less fuel used and unaccounted for line loss, to various points of redelivery in Missouri.

Panhandle states that the estimated daily and annual quantities would be 100,000 dt and 36,500,000 dt, respectively. Service under § 284.223(a) commenced on September 1, 1989, as reported in Docket No. ST89-4802-000.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

10. Moraine Pipeline Company

[Docket No. CP90-112-000]

Take notice that on October 23, 1989, Moraine Pipeline Company (Moraine), 701 East 22nd Street, Lombard, Illinois, 60148, filed in Docket No. CP90-112-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Carnation Company (Carnation), under Moraine's blanket certificate issued in Docket No. CP86-492-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Moraine requests authorization to transport, on an interruptible basis, up to a maximum of 1,700 MMBtu of natural gas per day (plus any additional volumes accepted pursuant to the overrun provisions of Moraine's Rate Schedule ITS) for Carnation from a receipt point located in Illinois to a delivery point located in Wisconsin. Moraine anticipates transporting, on an average day 1,500 MMBtu and an annual volume of 547,500 MMBtu.

Moraine states that the transportation of natural gas for Carnation commenced September 17, 1989, as reported in Docket No. ST90-102-000, for a 120-day period pursuant to § 284.223(a) of the

Commission's Regulations and the blanket certificate issued to Moraine in Docket No. CP86-492-000.

11. Panhandle Eastern Pipe Line Company

[Docket No. CP90-100-000]

Take notice that on October 23, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP90-100-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Centran Corporation (Centran), a marketer of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Pursuant to a gas transportation agreement dated April 27, 1989, Panhandle requests authority to transport up to 5,800 Dt. of natural gas per day, on an interruptible basis, on behalf of Centran. Panhandle states that the agreement provides for it to receive gas from various existing points of receipts along its system and to redeliver the gas, less fuel used and unaccounted for line loss, to Northern Indiana Public Service Company at an existing point of delivery in Fort Wayne, Adams County, Indiana. Centran has informed Panhandle that it expects to have only 4,000 Dt. transported on an average day and, based thereon, Centran estimates that the annual transportation quantity would be 1,825,000 Dt. Panhandle advises that the transportation service commenced on September 1, 1989, as reported in Docket No. ST89-4806, pursuant to § 284.223 of the Commission's Regulations.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

12. Panhandle Eastern Pipe Line Company

[Docket No. CP90-102-000]

Take notice that on October 23, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP90-102-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Unicorp Energy Inc. (Unicorp), a marketer of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Pursuant to a gas transportation agreement dated July 18, 1989, Panhandle requests authority to transport up to 150,000 Dt. of natural gas per day, on an interruptible basis, on behalf of Unicorp. Panhandle states that the agreement provides for it to receive gas from various existing points of receipts along its system and to redeliver the gas, less fuel used and unaccounted for line loss, to Haven Pool at an existing point of delivery in Reno County, Kansas. Unicorp has informed Panhandle that it expects to have the full 150,000 Dt. transported on an average day and, based thereon, estimates that the annual transportation quantity would be 54,750,00 Dt. Panhandle advises that the transportation service commenced on September 1, 1989, as reported in Docket No. ST89-4804, pursuant to § 284.223 of the Commission's Regulations.

Comment date: December 11, 1989, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP90-431-000]

Transcontinental Gas Pipe Line Corp.; Application

October 26, 1989.

Take notice that on October 25, 1989, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1396, Houston, Texas 77251, filed an application pursuant to section 7(c) of the Natural Gas Act, as amended, for a certificate of public convenience and necessity authorizing Transco to utilize a pipeline loop segment which was certificated as part of the SS-2 storage project to render firm transportation service for the Associated PennEast customer group (APEC) [1] during a narrowly defined interim period, all as more fully described in the application which is on file with the Commission and open to public inspection.

In an order issued June 7, 1989 (47 FERC ¶ 61,341), the Commission authorized Transco to render a firm, long-term winter season transportation service (November 15-March 31) for the APEC customers totalling 170,000 Mcf per day. Pursuant to such order, firm certificated service is scheduled to commence on November 15, 1989 to enable the APEC customers to receive delivery of their winter season volumes. In the order issued by the Commission approving the APEC service, Transco was authorized, *inter alia*, to construct an additional 12,600 horsepower of compression at existing Station No. 520. Transco has been unable to serve the APEC customers as of yet since the authorized compressor station upgrade is awaiting subsequent environmental approval. Without this additional compression, Transco cannot effectuate the previously authorized firm service.

In this application, Transco seeks authorization to utilize, on a temporary basis, 3.39 miles of 36-inch pipeline loop, which was certificated by the Commission in an order issued July 27, 1989 (48 FERC ¶ 61,223) as part of the SS-2 storage project, in order to render the firm transportation service for the APEC customers. Transco proposes that the temporary authorization sought herein expire on the earlier of (1) March 31, 1990 (the end of the APEC service "winter period"), or (2) the date on which the 12,600 horsepower compression upgrade is ready for service.

Transco states that the proposal does not involve any request for new facilities, but instead reflects Transco's desire for Commission approval to utilize a pipeline loop segment which was certificated as part of the SS-2 project to provide the APEC service during a narrowly defined interim period. Additionally, this request reflects a change in the previously authorized APEC firm transportation service by delaying the commencement of service to South Jersey Gas Company until November 1, 1990.[2]

Any person desiring to be heard or to make any protest with reference to said application should on or before November 6, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 OR 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Transco to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

---

[1] APEC is comprised of Public Service Electric & Gas Company, The Brooklyn Union Gas Company, Long Island Lighting Company, New Jersey Natural Gas Company, Elizabethtown Gas Company and South Jersey Gas Company.

[2] Transco states that on October 5, 1989, South Jersey Gas Company agreed to a one year delay in the commencement of the delivery of its 10,000 Mcf per day entitlement of the APEC firm transportation volumes.

Office of Energy Research

Fusion Policy Advisory Committee; Establishment

Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act (FACA), (Pub. L. 92-463) and in accordance with 41 CFR 101-6.10, and following consultation with the Committee Management Secretariat, General Services Administration (GSA), notice is hereby given that the Fusion Policy Advisory Committee has been established.

This Committee will, on a one-time basis, review the new draft fusion policy covering both magnetic and inertial confinement, and provide its recommendation for a fusion policy for the Department of Energy. The review will focus on the technical basis for, and the likely effectivness of, the proposed policy. The final written report will provide advice on how to structure the fusion programs—either by the proposed policy, some specific modifications to it, or some totally different approach.

The Committee members will be chosen to ensure appropriately balanced membership, taking into account: (1) The scientific disciplines to be represented, such as magnetic and inertial confinement plasma physics, laser and ion beam physics, and high-power technology; (2) the types of institutions needed to carry out the research, such as universities, national laboratories and industry; and (3) appropriate geographic distribution. Membership and representation of all interests will be determined in accordance with the requirements of FACA, section 624(b) of the Department of Energy Organization Act (Pub. L. 95-91) and implementing regulations.

The establishment of the Fusion Policy Advisory Committee has been determined necessary and in the public interest in connection with the performance of duties imposed upon the Department of Energy by law. The Committee will operate in accordance with the provisions of FACA, the Department of Energy Organization Act, the GSA Final Rule on Federal Advisory Committee Management, and other directives and instructions issued in implementation of those acts.

Further information regarding this Advisory Committee may be obtained from Elinor Donnelly at 586-3448.

Issued at Washington, DC on October 31, 1989.

Howard H. Raiken,

Advisory Committee Management Officer.

Office of Fossil Energy

[FE Docket No. 89-82-NG]

Suncor Inc.; Order Granting Blanket Authorization To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order granting blanket authorization to import natural gas from Canada.

SUMMARY: The Office of Fossil Energy (FE) of the United States Department of Energy (DOE) gives notice that it has issued an order granting blanket authorization to import natural gas from Canada to Suncor Inc. (Suncor). The order authorizes Suncor to import up to 54.75 Bcf of Canadian natural gas over a two-year term beginning on January 1, 1990, through December 31, 1991.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, 3F-056,

VOL 54 NO 3 1989 UMI

Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 30, 1989.

Constance L. Buckley,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6560–50–M

[ER–FRL–3678–1]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared October 16, 1989 through October 20, 1989 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 7, 1989 (54 FR 15006).

Draft EISs

ERP No. D1–AFS–J65134–WY, Rating EC2, Threemile Area Timber Sale and Road Construction, Medicine Bow National Forest Land and Resource Management Plan, Medicine Bow National Forest, Carbon County, WY.

Summary

EPA has concerns with the cumulative impacts of the proposed action upon wildlife in the area, especially as similar actions are planned for adjacent areas.

Additionally, the EPA requests for information on the anticipated effects of global climate change, cumulative impacts, and increased water yield, and monitoring programs.

ERP No. D–AFS–J65154–CO, Rating EC2, Hatchet Park Timber Sale, Implementation, Arapaho National Forest, Sulphur Ranger District, Grand County, CO.

Summary

EPA expressed concerns about the project's potential for cumulative water quality impacts. EPA requested that the final EIS include additional information on cumulative impact, global climate changes, water yield, and monitoring.

ERP No. D–FHW–J40117–CO, Rating EC2, CO–82 Improvement, East of Basalt to 7th and Main Streets in Aspen, Funding and Section 404 Permit, Pitkin County, CO.

Summary

EPA expressed environmental concerns due to the uncertainty of the final design right-of-way and impacts to wetlands. EPA recommended that the final EIS includes additional information on wetland mitigation.

ERP No. DS–MMS–A02116–00, Rating EC2, Mid 1987–Mid 1992 Outer Continental Shelf (OCS) Oil and Gas Lease Sales, 5 Year Program, Cumulative Impacts of OCS Development on Migratory Species, Lease Offerings, Offshore the Alaska and Pacific Regions, AK, WA, CA and OR.

Summary

EPA had two primary concerns about this document. The cumulative impact level definitions were too broad including failure to make any distinction between threatened and endangered species and nonendangered species. Also, the analysis did not fully address additive or synergistic responses to exposure to multiple activities.

Final EISs

ERP No. F–AFS–L65019–OR, Tepee Butte Fire Recovery Project, Implementation, August thru September 1988 Tepee Butte Fire Damage Recovery Land Management Plan, Hells Canyon National Recreation Area, Wallowa-Whitman National Forest, Wallowa County, OR.

Summary

Review of the final EIS was not deemed necessary. No formal letter was sent to the agency.

ERP No. F–BLM–L65122–ID, Idaho Statewide Small Wilderness Study Areas (WSAs), Wilderness Recommendations, Designation or Nondesignation, Box Creek, Lower Salmon Falls Creek, Henry's Lake, Worm Creek, Goldbury, Borah Peak, Boulder Creek, Little Wood River and Black Butte WSAs', Valley, Twin Falls, Fremont, Bear Lake, Custer, Blaine and Lincoln Counties, ID.

Summary

Review of the final EIS was not deemed necessary. No formal letter was sent to the agency.

Regulations

ERP No. R–USN–A86233–00, 32 CFR part 775; Procedures for Implementing the Procedural Provisions of the National Environmental Policy Act (54 FR 36816).

Summary

EPA finds the Navy's proposed rule revising its regulation for implementing procedural provisions of the National Environmental Policy Act would make several changes to the list of categorical exclusions contained in 32 CFR 775.6(c). EPA objected to the proposed categorical exclusions for the preparation of planning documents (32 CFR 775.6(c)(7)) and the identification, characterization, and clean-up of hazardous waste sites (32 CFR 775.6(c)(19)) and recommended their deletion.

Dated: October 31, 1989.

Office of Training

Board of Visitors for the Emergency Management Institute; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following committee meeting:

Name: Board of Visitors (BOV) for the Emergency Management Institute (EMI).

Dates of Meeting: November 29–December 1, 1989.

Place: Federal Emergency Management Agency, National Emergency Training Center, Emergency Management Institute, Conference Room, Building N, Emmitsburg, Maryland 21727.

Time: November 29—8:30 a.m. to 5:00 p.m.; November 30—8:30 a.m. to 5:00 p.m.; December 1—8:30 a.m. to Agenda Completion.

Proposed Agenda: The Board will continue preparation of their 1989 Annual Report, finalize a draft statement expressing their support of the FEMA's adoption of the Incident Command System (ICS) concept, discuss health issues as they relate to curriculum content, and continue discussions relative to FEMA/EMI's role in hazardous materials training.

The meeting will be open to the public with approximately ten seats available on a first-come, first serve basis. Members of the general public who plan to attend the meeting should contact the Office of the Superintendent, Emergency Management Institute, Office of Training, 16825 South Seton Avenue, Emmitsburg, Maryland 21727 (telephone number, 301–447–1251) on or before November 15.

Minutes of the meeting will be prepared by the Board and will be available for public viewing in the Director's Office, Office of Training, Federal Emergency Management Agency, Building N, National Emergency Training Center, Emmitsburg, Maryland 21727. Copies of the minutes will be available upon request 30 days after the meeting.

Dated: October 20, 1989.

Dave McLoughlin,

Director, Office of Training.

FEDERAL TRADE COMMISSION

[File No. 892-3051]

Black & Decker (U.S.) Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a Towson, MD based manufacturer of small appliances from representing that any consumer products are endorsed by a person, group or organization that is an expert, unless the endorser has the expertise that is represented and the endorsement is supported by a valid evaluation or test.

DATE: Comments must be received on or before January 2, 1990.

ADDRESS: Comments should be directed to: FTC/Office of the Secretary, Room 136, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Joel Winston, FTC/S-4002, Washington, DC 20580. (202) 326-3153.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

Agreement Containing Consent Order To Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Black & Decker (U.S.) Inc., a corporation, and it now appearing that Black & Decker (U.S.) Inc., hereinafter referred to as proposed respondent, is willing to enter into an agreement containing and order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Black & Decker (U.S.) Inc., by its duly authorized officer, and counsel for the Federal Trade Commission that:

1. Proposed respondent Black & Decker (U.S.) Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of Maryland, with its office and principal place of business at 701 East Joppa Road, in the City of Towson, State of Maryland.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) All claims under the Equal Access to Justice Act.

4. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint as attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it might have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or in the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the complaint and the order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

For the purposes of this order, "consumer product" shall mean any product advertised, offered for sale, sold, or distributed to consumers for their personal or household use, and not for commercial or industrial use.

I

It is ordered, That respondent Black & Decker (U.S.) Inc., a corporation; its successors and assigns; and its officers, representatives, agents and employees; directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of any consumer product sold under the "Black & Decker" trademark, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or by implication, that such product has been endorsed by a person, group or organization that is an expert with respect to the endorsement message unless:

A. The endorser's qualifications give it the expertise that the endorser is represented as possessing with respect to the endorsement; and

B. The endorsement is supported by an objective and valid evaluation or test using procedures generally accepted by experts in that science or profession to yield accurate and reliable results.

II

It is further ordered, That for three (3) years from the date that the representations to which they pertain are last disseminated, respondent shall maintain and upon request make available to the Federal Trade Commission or its staff for inspection and copying:

A. All materials relied upon to substantiate any claim or representation covered by this Order; and

B. All test reports, studies, surveys or other materials in its possession or control or of which it has knowledge that contradict, qualify or call into question such representation or the basis upon which respondent relied for such representation, including complaints from consumers.

III

It is further ordered, That respondent shall forthwith distribute a copy of this Order to each of its operating divisions and to each of its officers, agents, representatives or employees engaged in the preparation and placement of advertisements or other such sales materials covered by this Order.

IV

It is further ordered, That respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the corporation such as a dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations under this Order.

V

It is further ordered, That respondent shall, within sixty (60) days after service of this Order upon it, and at such other times as the Commission may require, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted subject to final approval an agreement to a proposed consent order from Black & Decker (U.S.) Inc.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement and take other appropriate action or make final the agreement's proposed order.

This action arises from advertisements claiming that the Black & Decker Automatic Shut-Off iron is "exclusively endorsed by the National Fire Safety Council, Inc." The Commission's complaint alleges that Black & Decker's advertisements falsely represent that the National Fire Safety Council, Inc. is an organization with expertise in the evaluation and testing of appliance fire safety and that it conferred its exclusive endorsement on the Black & Decker Automatic Shut-Off iron on the basis of independent, objective and valid evaluation or testing of the iron using procedures generally accepted in the field of appliance fire safety.

Under the terms of the proposed consent order, Black & Decker has agreed to cease and desist from

representing that any Black & Decker consumer product has the endorsement of any expert individual or group unless the endorser's qualifications give it the expertise that the endorser is represented as possessing with respect to the endorsement, and the endorsement is supported by an objective and valid evaluation or test using procedures generally accepted by experts in that science or profession.

The proposed order also requires Black & Decker to maintain materials relied upon to substantiate claims covered by the order, to distribute copies of the order to certain company officials and employees, to notify the Commission of any changes in corporate structure that may affect its compliance with the order, and to file one or more reports detailing its compliance with the order, and to file one or more reports detailing its compliance with the order.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Donald S. Clark,

Secretary.

BILLING CODE 6750-01-M

[File No. 861 0035]

New Jersey Movers Tariff Bureau, Inc., et al.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, the Highland Park, NJ based movers from entering into or maintaining any agreement to fix, maintain, or interfere with the prices charged by movers. The order would also prohibit respondent from discussing or formulating agreements among movers concerning intrastate prices to be charged for the transportation of property or related services.

DATE: Comments must be received on or before January 2, 1990.

ADDRESS: Comments should be directed to: FTC/OFFICE of the Secretary, room 159, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Michael J. Bloom, New York Regional Office, Federal Trade Commission, 150 William St., 13th Floor, New York, NY. 10038. (212) 264-8290.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

Agreement Containing Consent Order to Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of the New Jersey Movers Tariff Bureau, Inc., a corporation, and the New Jersey Warehousemen and Movers Association, a corporation (hereinafter sometimes referred to as "Tariff Bureau" or "Movers Association," respectively, or as "proposed respondents," collectively), and it now appearing that proposed respondents are willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It is hereby agreed by and between the Tariff Bureau, by its duly authorized officer, the Movers Association, by its duly authorized officer, their attorney, and counsel for the Federal Trade Commission that:

(1) Proposed respondent New Jersey Movers Tariff Bureau, Inc., is a corporation organized, existing, and doing business under and by virtue of the laws of the State of New Jersey. Proposed respondent New Jersey Warehousemen and Movers Association is a corporation organized, existing, and doing business under and by virtue of the laws of the State of New Jersey. Both proposed respondents have their offices and principal places of business located at 24 North Third Avenue, Highland Park, New Jersey, 08904.

(2) Proposed respondents admit all the jurisdictional facts set forth in the draft of complaint attached hereto.

(3) Proposed respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

(4) This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information with respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

(5) This agreement is for settlement purposes only and does not constitute an admission by proposed respondents that the law has been violated as alleged in the draft of complaint here attached.

(6) This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public with respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postsal Service of the complaint and decision containing the agreed-to order to proposed respondents' address as stated in this agreement shall constitute service. Proposed respondents waive any right they may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

(7) Proposed respondents have read the proposed complaint and order contemplated hereby. They understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order. Proposed respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

For purposes of this order, the following definitions shall apply:

(A) "*Household goods*" means personal effects, fixtures, equipment, stock and supplies, or other property usually used in or as part of the stock of a dwelling.

(B) "*Intrastate transportation*" or "*intrastate moves*" means the pickup or receipt, transportation and delivery of property for compensation within the State of New Jersey by a mover authorized by state law to engage therein.

(C) "*Member*" means any mover or other person which pays dues or belongs to the New Jersey Movers Tariff Bureau, Inc. or to the New Jersey Warehousemen and Movers Association, or to any successor corporation.

(D) "*Office goods*" means personal effects, fixtures, furniture, equipment, stock and supplies, or other property usually used in or as part of the stock of any office, or commercial, institutional, professional, or other type of establishment.

(E) "*Person*" means any individual, copartnership, association, company, or corporation, and includes any trustee, receiver, assignee, lessee, or personal representative of any person herein defined.

(F) "*Mover*" means any person engaged in the transportation of household goods, office goods, or special commodities by motor vehicle for compensation in intrastate commerce between points in the State of New Jersey.

(G) "*Special commodities*" means uncrated or unboxed works of art, fixtures, appliances, business machines, electronic equipment, displays, exhibits, home, office, store, theatrical or show equipment, musical instruments, or other articles.

(H) "*Tariff Bureau*" means the New Jersey Movers Tariff Bureau, Inc.

(I) "*Movers Association*" means the New Jersey Warehousemen and Movers Association.

(J) "*Tariff*" means a publication stating the prices charged by movers for services rendered in the transportation of household goods, office goods, and special commodities, within the State of New Jersey.

II

It is ordered, That respondents Tariff Bureau and Movers Association, their successors and assigns, and their directors, officers, committees, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the transportation of property, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, jointly and indivdually, do forthwith cease and desist from:

A. Entering into, adhering to, or maintaining, directly or indirectly, any contract, agreement, understanding, plan, program, combination, or conspiracy to construct, fix, stabilize, raise, maintain, or otherwise interfere or tamper with the prices charged by movers;

B. Suggesting, urging, encouraging or persuading in any way movers to charge, file, or adhere to any existing or proposed tariff provision, or otherwise to charge or refrain from charging any particular price for any services rendered or goods or equipment provided;

C. Inviting, coordinating, or providing a forum for any discussion or agreement between or among movers concerning intrastate prices charged or proposed to be charged by movers for the intrastate transportation of property or related services, goods, or equipment; and

D. Formulating, compiling, filing, or maintaining any tariff derived in whole or in part from price information that respondents or others have collected on forms that contain pre-selected prices or that use or refer to tables of prices.

Provided, however, That nothing contained in subpart II. D. of this Order shall prevent respondents from collecting and publishing individual tariffs or tariff information that movers have communicated to respondents on forms, other than forms devised, established or circulated to movers by respondents that contain pre-selected prices or that use or refer to tables of prices, in which each mover inserts or sets forth prices that are unilaterally determined by the mover, for the purpose of facilitating each mover's satisfaction of the tariff filing requirements of the State of New Jersey. And provided further that, after a period of one year from the effective date of this Order, nothing contained in this subpart shall prevent respondents from presenting to state regulatory authorities tariff filings that contain a tabularized or consolidated display of unilaterally determined mover prices.

III

It is further ordered, That respondents Tariff Bureau and Movers Association each shall:

(A) At the first opportunity after this order becomes final, but in no case later than six (6) months thereafter, cancel all tariffs and any supplements thereto on file with the Director of the Division of Consumer Affairs in the New Jersey Department of Law and Public Safety that establish prices for transportation of property or related services, goods, or equipment by movers in New Jersey and take such action as may be necessary to effectuate cancellation and withdrawal.

(B) Within thirty (30) days after this order becomes final, distribute a copy of the order to each of their members.

(C) Within thirty (30) days after this order becomes final, amend their by-laws, rules and regulations, and other of their materials to conform to the provisions of this order and provide each of their members with a copy of the amended by-laws, rules and regulations, and other materials.

(D) Within thirty (30) days after this order becomes final, amend their by-laws to require each of their members to observe the substantive provisions of the order as a condition of their membership.

(E) At the first opportunity after this order becomes final, but in no case later than six (6) months thereafter, terminate all previously executed powers of attorney and tariff service agreements between the Tariff Bureau and any mover utilizing its services that authorizes the publication and/or filing of intrastate tariffs within the State of New Jersey; provided, however, that nothing contained in this subpart shall prevent any new executions of such agreements or powers of attorney.

(F) For a period of three (3) years after this order becomes final, furnish a copy of the order to each of their new members within thirty (30) days of each new member's admission.

IV

It is further ordered, that respondents Tariff Bureau and Movers Association each shall:

(A) Within sixty (60) days after this order becomes final, file a verified written report with the Federal Trade Commission setting forth in detail the manner and form in which the

respondent has complied and is complying with this order.

(B) In addition to the report required by paragraph IV(A), annually for a period of three (3) years on or before the anniversary date on which this order becomes final, and at such other times as the Federal Trade Commission or its staff may by written notice to respondent require, file a verified written report with the Federal Trade Commission setting forth in detail the manner and form in which the respondent has complied and is complying with this order.

(C) For a period of five (5) years after this order becomes final, maintain and make available to the Commission staff for inspection and copying, upon reasonable notice, all documents that relate to the manner and form in which the respondent has complied and is complying with this order.

(D) Notify the Federal Trade Commission at least thirty (30) days prior to any proposed change in respondent, such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the respondent that may affect compliance obligations arising out of this order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from the New Jersey Movers Tariff Bureau, Inc., and the New Jersey Warehousemen and Movers Association (hereafter referred to as "Tariff Bureau" or "Movers Association," respectively, or as "respondents," collectively). The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Complaint

A complaint that the Commission would issue along with the proposed order alleges that the Tariff Bureau and the Movers Association have conspired with at least some of their members to restrain unreasonably price and service competition in the intrastate transportation of household goods, office goods, and special commodities. The complaint charges that respondents, in furtherance of the conspiracy, created and operated a joint tariff setting the prices their member movers charge for their transportation services, and that these acts and practices violated section 5 of the Federal Trade Commission Act.

According to the complaint, during much of the 1970's, respondent Tariff Bureau filed for its members a joint and common tariff; that tariff was subject to the approval of the Board of Public Utilities. In 1978, however, after the Board determined that the Tariff Bureau had acted anticompetitively and injured consumers, public movers who had been members of the Tariff Bureau began to file their rates individually instead of through a joint and common tariff. The State of New Jersey thereafter decided to move away from rate regulation and, although it now requires each mover to file tariffs semiannually with state authorities, New Jersey allows each mover to choose the rates on its tariff.

According to the complaint, in 1982, respondent Movers Association corresponded with its members and members of the Tariff Bureau, inviting them to stop filing their tariffs individually and to participate in the filing of a new joint tariff that would be designed and implemented by a newly reactivated Tariff Bureau. The Tariff Bureau then acted in conjunction with the Movers Association to design and implement a joint tariff in a manner that had the natural tendency and effect of raising the prices of moving services.

The complaint charges that, in furtherance of the alleged conspiracy, respondents and their members engaged in various acts and practices that restrained competition. Specifically, according to the complaint, beginning in the fall of 1982, respondents surveyed their membership concerning the rates that members wanted to have published in the new joint tariff, but then rejected the price preferences of their members reflected in the survey results. Instead respondents created a joint tariff containing menus of rates in tabular form and invited their members to select from among the rate tables.

The complaint further states that, although respondents' joint tariff allowed movers to select rates and terms of service that the tables did not reflect by "taking exception," in general, however, respondents designed and operated the tariff, including the exception process, in a way that discouraged movers' from taking exceptions to implement their individual pricing decisions.

According to the complaint, in the fall of 1987, the Tariff Bureau modified several of the tariff tables. In general, the modifications eliminated lower rates and added higher rates. The Tariff Bureau eliminated tables containing lower rates from the fall 1987 tariff even where the lower rates had been, during the most recent tariff period, movers' most popular choice of rates for their moving services. Thereafter, as the complaint charges, movers' rate selections revealed a marked price increase for several categories of moving services. Movers who had previously selected lower rates that were now no longer presented as rate options in the tariff generally did not seek to use the exception process to continue charging lower rates. In addition, the complaint states that the Tariff Bureau often ignored movers' requests for the same rates that they had selected in the previous tariff, and assigned them to the new higher rate tables.

The effects of these practices, as alleged in the complaint, are to restrain price competition in the intrastate transportation of household goods, office goods, and special commodities, and to deprive consumers of the benefits of price and service competition.

The Proposed Order

The proposed order would prohibit respondents from entering into or maintaining, directly or indirectly, any agreement or understanding to fix, stabilize or maintain, or otherwise interfere with the prices charged by movers. The proposed order prohibits respondents from suggesting or encouraging, in any way, movers to charge, file, or adhere to any existing or proposed tariff provision, or otherwise to charge or refrain from charging any particular price for any services rendered or goods or equipment provided. The proposed order also precludes respondents from inviting, coordinating, or providing a forum for any discussion or agreement between or among movers concerning intrastate prices charged or proposed to be charged by movers for the intrastate transportation of property or related services, goods, or equipment.

The proposed order further prohibits respondents from collecting price information from movers through a process that restricts the ability of movers to make individual and independent determinations as to the price each mover desires to charge for services rendered. Specifically, the proposed order contains a provision (paragraph II.D.) that precludes respondents from formulating, compiling, filing, or maintaining any tariff derived in whole or in part from price information that respondents or others have collected on forms that contain pre-selected prices or that use or refer to tables of prices.

A proviso contained in the proposed order expressly states that paragraph II.D. does not preclude respondents from collecting and publishing individual tariffs or tariff information that movers have communicated to respondents on forms that do not contain pre-selected prices or use or refer to tables of prices. Thus, II.D. does not prevent respondents from functioning as a pure compiler of individually-determined mover prices, where those prices are communicated to respondents on forms that are in accordance with the terms of the order. Each mover may convey price information to respondents using permissible forms to insert or set forth prices or price determinations that are unilaterally selected by the mover, for the purpose of facilitating each mover's satisfaction of the tariff filing requirements of the State of New Jersey.

The proviso further states that, after one year, paragraph II.D. shall not prevent respondents from presenting to state regulatory authorities tariff filings that contain a tabularized or consolidated display of unilaterally determined mover prices. In essence then, for a one-year period, the order precludes respondents from presenting to the state a consolidated or tabularized display of mover prices.

The proposed order would also require respondents to inform their members about the consent order; to conform their by-laws and rules to the order; to file compliance reports; to maintain and make available to the Federal Trade Commission staff certain documents; and to give advance notice of any change in respondents that may affect their compliance obligations. The proposed order further requires that, within six months after the order becomes final, respondents' existing tariff be canceled and withdrawn and all previously executed powers of attorney and tariff service agreements between the respondent Tariff Bureau and any member mover be terminated. The order, however, would permit the execution of new agreements and powers of attorney.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order nor to modify in any way their terms.

Donald S. Clark,

Secretary.

Public Health Service

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). The following requests have been submitted to OMB since the list was last published on October 20, 1989. (Call PHS Reports Clearance Officer on 202-245-2100 for copies of package)

1. Food Labeling Cost Survey—NEW—The proposed survey will obtain information from a sample of food manufacturers regarding food labeling costs, such as number of products, types of labels, and printing costs. In conjunction with other data, survey results will contribute to a data base for determining the costs of forthcoming FDA Labeling initiatives. The data also will be used in a microcomputer model that will enable the user to rapidly assess potential cost of a proposed regulation. *Respondents:* Businesses or other for-profit, small businesses or organizations; *Number of Respondents:* 1,459; *Number of Responses per Respondent:* 1; *Average Burden per Response:* 2.6 hours; *Estimated Annual Burden:* 3,794 hours.

2. Respiratory Protective Devices—30 CFR part 11—Regulation—0920-0109—Part 11 prescribes requirements and procedures which must be met in filing applications for joint approval by the Mine Safety and Health Administration and National Institute for Occupational Safety and Health of respirators and modifications of respirators. Applications contents, quality control plans and quality control records are required. *Respondents:* Businesses or other for-profit.

	No. of respondents	No. of hours per response	No. of responses per respondent

Social Security Administration

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Social Security Administration publishes a list of information collection packages that have been submitted to the Office of Management and Budget (OMB) for clearance in compliance with Public Law 96-511, The Paperwork Reduction Act. The following clearance packages have been submitted to OMB since the last list was published in the **Federal Register** on October 27, 1989.

Social Security Administration

(Call Reports Clearance Officer on (301) 965-4149 for copies of package)

1. SSA/DDS Cost-Effectiveness-Measurement System Data Reporting Form—0960-0384—The information collected on the form SSA-1461 is used by the Social Security Administration to assure effective and uniform administration of the disability program, assist in making payment decisions and measure the operating costs of State agencies on a per-case basis. The affected public consists of State Disability Determination Agencies.

Number of Respondents: 52.
Frequency of Response: Quarterly.
Average Burden Per Response: 5 hours.
Estimated Annual Burden: 1,040 hours.

2. Statement of Death by Funeral Director—0960-0142—The information collected on the form SSA-721 is used by the Social Security Administration to verify the death of an individual insured under the Social Security Act and to determine if there is a survivor eligible for a lump sum death payment. The affected public is comprised of funeral directors with knowledge of the death of a Social Security insured individual.

Number of Respondents: 900,000.
Frequency of Response: 1.
Average Burden Per Response: 3.5 minutes.

BILLING CODE 4190-11-M

Food and Drug Administration

[Docket Nos. 81D-0214 and 83D-0305]

Target Animal Safety Revised Guidelines; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA), Center for Veterinary Medicine (CVM) is announcing the availability of the June 1989 revision of its "Target Animal Safety Guidelines for New Animal Drugs." The previous target animal safety guidelines had been in use approximately 5 years The revision is based on numerous comments, a need for editorial modification and clarification, and a need for adding certain provisions for optional procedures.

ADDRESSES: Submit written requests for single copies of the June 1989 revision of the "Target Animal Safety Guidelines for New Animal Drugs" to the Industry Information Branch (HFV-12), Center for Veterinary Medicine, Food and Drug Administration, Rm. 7-81, 5600 Fishers Lane, Rockville, MD 20857. Requests should be identified with the docket numbers found in brackets in the heading of this document. Send two self-addressed adhesive labels to assist that office in processing your requests. The June 1989 revision of the guidelines is available for public examination in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Larry D. Rollins, Center for Veterinary Medicine (HFV-130), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1414.

SUPPLEMENTARY INFORMATION: CVM is announcing the availability of the June 1989 "Target Animal Safety Guidelines for New Animal Drugs." The revised guidelines reflect the following: CVM's position regarding use of experimental animals and animal welfare; FDA's position regarding the LD_{50} test; clarification of an experimental unit, need for statistical analyses, and presentation of data; addition of a requirement for a complete description of diet in the final report; use of the breed of animals as a factor when selecting test animals; a preferred option of using a 10X dosing regimen for the drug tolerance test; information on when a drug tolerance test is needed; removal of a requirement of extensive animal skin testing in dogs, cats, and horses of certain topical drugs known to be very irritating or caustic and intended for use on limited surface areas; addition of a table to assist in the evaluation of skin reactions on dogs, cats, and horses; emphasis on the need for FDA and the sponsor to agree to the number of animals to test as a subset; deletion of addendum number 1a, clinical observations, because of redundancy (see addendum number 1); addition of fecal examination measurements for presence of parasites, fecal color, consistency, and quantity; addition of lactate dehydrogenase with isoenzymes determination to the list of clinical pathological tests to consider for dogs and cats; deletion of addendum number 4 for horses and replacement of it with a table for evaluating skin reactions; an updated reference for examining bulls for breeding soundness; addition of a reference for examining boars for breeding soundness; revision of poultry guidelines to include the intermittent drug administration/skip-a-day programs; clarification of duration of testing for certain classes of poultry; addition of recommendation that young birds be sedated when blood samples are collected if sedation will not interfere with the experiment.

Dated: October 29, 1989.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 89M-0437]

Salvatori Ophthalmics, Inc.; Premarket Approval of SOF-Form 55 Spherical (Methafilcon A) Soft Hydrophilic Contact Lenses and Sof-Form 55 Toric (Methafilcon A) Soft Hydrophilic Contact Lenses

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Salvatori Ophthalmics, Inc., Sarasota, FL, for premarket approval, under the Medical Device Amendments of 1976, of the SOF-FORM 55 Spherical (methafilcon A) Soft Hydrophilic Contact Lenses for daily wear and extended wear and the SOF-FORM 55 Toric (methafilcon A) Soft Hydrophilic Contact Lenses for daily wear. The lenses are to be manufactured under an agreement with Kontur Kontact Lens Co., Inc., Richmond, CA, which has authorized Salvatori Ophthalmics, Inc., to incorporate information contained in its approved premarket approval application and related supplement for the spherical and toric configurations of the Kontur Soft (methafilcon A) Hydrophilic Contact Lenses. FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of September 28, 1989, of the approval of the application.

DATE: Petitions for administrative review by December 4, 1989.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: David M. Whipple, Center for Devices and Radiological Health (HFZ-460), Food and Drug Administration, 1390 Piccard Dr. Rockville, MD 20850, 301-427-1060.

SUPPLEMENTARY INFORMATION: On July 18, 1989, Salvatori Ophthalmics, Inc., Sarasota, FL 34234, submitted to CDRH an application for premarket approval of the SOF-FORM 55 Spherical (Methafilcon A) Soft Hydrophilic Contact Lenses for daily wear and extended wear and the SOF-FORM 55 Toric (methafilcon A) Soft Hydrophilic Contact Lenses for daily wear. The spherical lenses are indicated for daily wear and extended wear from 1 to 7 days between removals for cleaning and disinfection as recommended by the eye-care practitioner. The lenses are indicated for the correction of visual acuity in not-aphakic patients with nondiseased eyes that are myopic or hyperopic. The lenses may be worn by persons who may exhibit astigmatism of 1.50 diopters (D) or less that does not interfere with visual acuity. The spherical lenses are indicated in a power range of −20.00 D to +10.00 D. The toric lenses are indicated for daily wear for the correction of visual acuity in not-aphakic person with nondiseased eyes that are myopic or hyperopic and have astigmatism up to 5.00 D and can obtain satisfactory visual acuity. These toric lenses range in spherical powers from −20.00 D to +10.00 D and cylinder powers from 0.75 D to 5.00 D. These lenses are to be disinfected using a chemical lens care system. The application includes authorization from Kontur Kontact Lens Co., Inc., Richmond, CA 94804, to incorporate information contained in its approved premarket approval application and related supplement for the spherical and toric configurations of the Kontur Soft (methafilcon A) Hydrophilic Contact Lens.

On September 28, 1989, CDRH approved the application by letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact David M. Whipple (HFZ-460), address above. The labeling of the SOF-FORM 55 Spherical (Methafilcon A) Soft Hydrophilic Contact Lenses and SOF-FORM 55 Toric (methafilcon A) Soft Hydrophilic Contact Lenses states that the lens is to be used only with certain solutions for disinfection and other purposes. The restrictive labeling informs new users that they must avoid using certain products, such as solutions intended for use with hard contact lenses only.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the person who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before December 14, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: October 26, 1989.

Walter E. Gundaker,

Acting Deputy Director, Center for Devices and Radiological Health.

Services to establish a Federal program of student loan insurance for graduate students in health profession schools.

Section 60.13(a)(4) of the program's implementing regulations (42 CFR part 60, previously 45 CFR part 126) provides that the Secretary will announce the interest rate in effect on a quarterly basis.

The Secretary announces that for the period ending December 31, 1989, three interest rates are in effect for loans executed through the Health Education Assistance Loan (HEAL) program.

1. For loans made before January 27, 1981, the variable interest rate is 11⅝ percent. Using the regulatory formula (45 CFR 126.13(a)), in effect prior to January 27, 1981, the Secretary would normally compute the variable rate for this quarter by finding the sum of the fixed annual rate (7 percent) and a variable component calculated by subtracting 3.50 percent from the average bond equivalent rate of 91-day U.S. Treasury bills for the preceding calendar quarter (8.12 percent), and rounding the result (11.62 percent) upward to the nearest ⅛ percent (11⅝ percent).

However, the regulatory formula also provides that the annual rate of the variable interest rate for a 3-month period shall be reduced to the highest one-eighth of 1 percent which would result in an average annual rate not in excess of 12 percent for the 12-month period concluded by those 3 months. Because the average rate of the 4 quarters ending December 31, 1989, is not in excess of 12 percent, there is no necessity for reducing the interest rate. For the previous 3 quarters the variable interest at the annual rate was as follows: 11⅛ percent for the quarter ending March 31, 1989; 12⅜ percent for the quarter ending June 30, 1989; and 12¼ percent for the quarter ending September 30, 1989.

2. For variable rate loans executed during the period of January 27, 1981 through October 21, 1985, the interest rate is 11⅝ percent. Using the regulatory formula (42 CFR 60.13(a)) in effect for that time period, the Secretary computes the maximum interest rate at the beginning of each calendar quarter by determining the average bond equivalent rate for the 91-day U.S. Treasury bills during the preceding quarter (8.12 percent); adding 3.50 percent (11.62 percent); and rounding that figure to the next higher one-eighth of 1 percent (11⅝ percent).

3. For fixed rate loans executed during the period of October 1, 1989 through December 31, 1989, and for variable rate loans executed on or after October 22, 1985, the interest rate is 11⅛ percent. The Health Professions Training Assistance Act of 1985 (Pub. L. 99-129), enacted October 22, 1985, amended the formula for calculating the interest rate by changing 3.5 percent to 3 percent. Using the regulatory formula (42 CFR 60.13(a)(2)), the Secretary computes the maximum interest rate at the beginning of each calendar quarter by determining the average bond equivalent rate for the 91-day U.S. Treasury bills during the preceding quarter (8.12 percent); adding 3.0 percent (11.12 percent) and rounding that figure to the next higher one-eighth of 1 percent (11⅛ percent).

National Institute of Health

National Institutes of General Medical Sciences; Meetings

Pursuant to Public Law 92-463, notice is hereby given of the meetings of the committees of the National Institute of General Medical Sciences for November 1989.

The meetings will be open to the public to discuss administrative details to committee business for approximately two hours at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available.

These meetings will be closed thereafter in accordance with provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Public Law 92-463, for the review, discussion, and evaluation of individual research training grant and research center grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Ann Dieffenbach, Public Information Officer, National Institute of General Medical Sciences, National Institutes of Health, Building 31, Room 4A52, Bethesda, Maryland 20892 (Telephone: 301-496-7301), will provide a summary of the meeting and a roster of committee members.

Substantive program information may be obtained from each executive secretary whose name, room number, and telephone number are listed below each committee.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N-89-1917; FR-2606-N-44]

Underutilized and Unutilized Federal Buildings and Real Property Determined by HUD To Be Suitable for Use for Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized and underutilized Federal property determined by HUD to be suitable for possible use for facilities to assist the homeless.

EFFECTIVE DATE: November 3, 1989.

ADDRESS: For further information, contact James Forsberg, Room 7226, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 755-6300; TDD number for the hearing- and speech-impaired (202) 755-5965. (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.), HUD is publishing this Notice to identify Federal buildings and real property that HUD has determined are suitable for use for facilities to assist the homeless. The properties were identified from information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property.

The Order requires HUD to take certain steps to implement section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), which sets out a process by which unutilized or underutilized Federal properties may be made available to the homeless. Under section 501(a), HUD is to collect information from Federal landholding agencies about such properties and then to determine, under criteria developed in consultation with the Department of Health and Human Services (HHS) and the Administrator of General Services (GSA), which of those properties are suitable for facilities to assist the homeless. The Order requires HUD to publish, on a weekly basis, a Notice in the Federal Register identifying the properties determined as suitable.

The properties identified in this Notice may ultimately be available for use by the homeless, but they are first subject to review by the landholding agencies pursuant to the court's Memorandum of December 14, 1988 and section 501(b) of the McKinney Act. Section 501(b) requires HUD to notify each Federal agency with respect to any property of such agency that has been identified as suitable. Within 30 days from receipt of such notice from HUD, the agency must transmit to HUD: (1) Its intention to declare the property excess to the agency's need or to make the property available on an interim basis for use as facilities to assist the homeless; or (2) a statement of the reasons that the property cannot be declared excess or made available on an interim basis for use as facilities to assist the homeless.

First, if the landholding agency decides that the property cannot be declared excess or made available to the homeless for use on an interim basis the property will no longer be available.

Second, if the landholding agency declares the property excess to the agency's need, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law and the December 12, 1988 Order and December 14, 1988 Memorandum, subject to screening for other Federal use.

Finally, in lieu of declaring any particular property as excess, the landholding agency may decide to make the property available to the homeless for use on an interim basis.

Homeless assistance providers interested in any property identified as suitable in this Notice should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, Room 17A-10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443-2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit such written expressions of interest within 30 days from the date of this Notice. For complete details concerning the timing and processing of applications, the reader is encouraged to refer to HUD's Federal Register Notice on June 23, 1989 (54 FR 26421), as corrected on July 3, 1989 (54 FR 27975).

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: GSA: James Folliard, Federal Property Resources Services, GSA, 18th and F Streets NW, Washington, DC 20405 (202) 535-7067; U.S. Army: HQ-DA, Attn: DAEN-ZCI-P-Robert Conte; Room 1E671 Pentagon, Washington, DC 20360-2600 (202) 693-4583.

Dated: October 30, 1989.

Stephen A. Glaude,

Deputy Assistant Secretary for Program Management.

AGENCY: Office of Construction Management, Interior.

ACTION: Notice that applications for new school construction may be submitted for consideration for fiscal year 1992.

SUMMARY: Applications for New School Facilities Construction may be submitted for evaluation and ranking using the guidelines entitled, "Instructions and Application for New School Construction," made available through the Office of Construction Management (OCM), as noticed in 53 FR 3080, February 3, 1987. All new school construction applications will be evalauted and considered for priority ranking based on criteria developed by OCM in accordance with the guidelines, as noticed in 53 FR 12470–12471, April 14, 1988. Highly ranked projects will be considered for advance planning and design in accordance with availability of funds. A validation study will be made to analyze the cost benefits of replacement versus renovation and other project justification information.

Applications must be received by OCM by November 15, 1989, to be considered for Fiscal Year 1992. Incomplete applications or applications received without a supporting Tribal resolution will not be ranked.

The "Instructions and Application for New School Construction" is available upon request through the Office of construction Management and from the Bureau of Indian Affairs (BIA) Area and Agency office and the BIA Facilities Management and Construction Center, P.O. 1248, Albuquerque, NM 87103.

FOR FURTHER INFORMATION CONTACT: Arthur M. Love, Jr., Director, Office of Construction Management, Department of the Interior, 18th and C Streets NW., Mail Stop 2415, Washington, DC 20240, (202) 343–3403.

Lou Gallegos,
Deputy Assistant Secretary, Policy, Budget and Administration.

Bureau of Indian Affairs

Increase to the Blackfeet Irrigation Project, Operation and Maintenance Rates

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Public notice.

Purpose: Increase to the Blackfeet Irrigation Project Operation and Maintenance Rates.

SUMMARY: The Bureau of Indian Affairs is proposing to increase the operation and maintenance rate of the Blackfeet Irrigation Project from $7.50 to $7.75 per assessable acre. Congressional Cost of Living and operation cost have increased in 1989 and are anticipated to increase in 1990.

The projects annual operation and maintenance charges are based on the estimated normal operating cost of the project for one Fiscal Year. Copies of the proposed budget may be acquired from the Superintendent of the Blackfeet Agency, Bureau of Indian Affairs, Browning, Montana 59417. A self addressed manila envelope with postage must be included when making your request.

The due date for all operation and maintenance charges will be May 1 of each calendar year.

Interest and/or penalty fees will be assessed on all (Trust, and Fee assessed lands) delinquent operation and maintenance charges as prescribed in the 42 Bureau of Indian Affairs Manual and the Code of Federal Regulations, chapter 4, part 102. Government agencies, such as Federal, State and Tribal Governments are exempted from interest and/or penalty fees.

This notice will be published and posted at the following locations:

U.S. post offices	Newspaper
Browning, Mt. 59417	Glacier Reporter
Cut Bank, Mt. 59427	Browning, Mt. 59417
Valier, Mt. 59486	

Bureau of Indian Affairs

Blackfeet Agency
Browning, Mt. 59417

Comments: All comments concerning the operating and maintenance charges for the Blackfeet irrigation project must be in writing and addressed to the Superintendent of the Blackfeet Agency before the close of business on December 8, 1989.

Appeal Process: Chapter 25, part 2 of the Code of Federal Regulations outlines the appeal process for this administrative action. Appeals must be received by the Billings Area Director, Bureau of Indian Affairs, 316 North 26th St., Billings, Montana 59101 via the Superintendent of the Blackfeet Agency, before the close of business on December 8, 1989.

SUPPLEMENTARY INFORMATION: This notice is issued pursuant to the Code of Federal Regulations, chapter 25, part 171 under the authority delegated to the Area Director, by the Assistant Secretary of Indian Affairs and the Deputy Assistant Secretary of the Interior [Departmental Manual, chapter 3, part 230, (3.1 & 3.2)].

Richard Whitesell,
Billings Area Director.

Emergency Closure of Certain Public Lands in Butte County, CA

AGENCY: Bureau of Land Management, United States Department of the Interior.

ACTION: Emergency closure of certain public lands to motorized vehicle use in Butte County, California.

SUMMARY: In accordance with title 43, Code of Federal Regulations, §§ 8364.1 and 8341.2, notice is hereby given that all the below listed lands and roads therein, administered by the Bureau of Land Management, have been closed to all motorized vehicle use; except for emergency vehicles, fire suppression and rescue vehicles, BLM operation and maintenance vehicles, law enforcement vehicles and other motorized vehicles specifically approved by an authorized officer of the Bureau of Land Management.

This closure affects all of the public lands and roads located within the following area of Butte County, California:

T. 24 N., R. 3 E., M.D.M., Section 8; SW¼. A total of 160 acres.

DATES: This emergency closure action goes into effect immediately and will remain in effect until the Authorized Officer determines it is no longer needed.

SUPPLEMENTARY INFORMATION: This emergency closure is required to mitigate the impacts of unregulated vehicle use on a steep, poorly constructed and highly erosive road system on the subject land.

This road system provides access to Big Chico Creek and the Minnie-Ha-Ha placer mine. Considerable adverse impacts to the public land and resources have occurred and include the following: Excessive soil erosion and loss, vegetation damage, fisheries degradation, water pollution in Big Chico Creek, illegal trash dumping, and road damage.

Any future mining activities, including motorized vehicluar access, on the subject land will require an approved plan of operation as per 43 CFR 3809.1–4(b)(5).

The authority for this closure and rule making is 43 CFR 8341.2 and 43 CFR 8364.1. Any person who fails to comply with a closure order or rule-making is subject to arrest and fines of up to $1,000 and/or imprisonment not to exceed 12 months.

FOR FURTHER INFORMATION CONTACT: Mark T. Morse, Area Manager, Bureau of Land Management, Redding Resource Area, 355 Hemstad Drive, Redding, California 96002, (916) 246–5325.

Dated: October 19, 1989.
Mark T. Morse,
Area Manager.

Availability of the Final Environmental Impact Statement for Bitter Creek, MT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The final Bitter Creek Wilderness Environmental Impact Statement assesses the environmental consequences of managing the 59,660 acre wilderness study area as wilderness or nonwilderness. The alternatives assessed include: (1) A "No Wilderness Alternative," (2) an "All Wilderness Alternative," (3) a "Bitter Creek East Alternative," and (4) an "Enhanced Wilderness Manageability Alternative."

The proposed action for the study area is to not designate the area as wilderness.

The Bureau of Land Management wilderness proposal will ultimately be forwarded by the Secretary of the Interior to the President and by the President to Congress. The final decision on wilderness designation rests with Congress.

FOR FURTHER INFORMATION CONTACT: Terry Hueth, Area Manager, BLM Valley Resource Area, Route 1–4775, Glasgow, Montana, 59230, 406–228–4316.

SUPPLEMENTARY INFORMATION: Copies of the environmental impact statement may be obtained from the District Manager, Lewistown District, Bureau of Land Management, P.O. Box 1160, Lewistown, Montana 59457–1160. Copies are also available for inspection at Montana State University, Roland R. Renne Library, Bozeman, Montana 59717; Eastern Montana College Library, 1500 North 30th, Billings, Montana 59101; Maureen and Mike Mansfield Library, University of Monatna, Missoula, Montana 59812; Colorado State University Library, Fort Collins, Colorado 80253; Glasgow Public Library, 408 3rd Avenue South, Glasgow, Montana 59230; and in the following locations:

Availability of Draft Bull Mountains Exchange Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of the Draft Bull Mountains Exchange Environmental Impact Statement.

SUMMARY: In accordance with section 202 of the National Environmental Policy Act of 1969, a draft Environmental Impact Statement (EIS) has been prepared for the proposed Bull Mountains exchange of selected Federal coal lands for high value recreation and wildlife private lands offered by Meridian Minerals Company. The EIS describes and analyzes the proposed exchange (BLM's preferred alternative) as well as two coal for coal alternatives, a leasing alternative and a no action alternative. It addresses the impact of development of the coal as a small room and pillar underground mine producing 0.5 million tons of coal per year as the most likely development scenario. A 3.0 million tons of coal per year longwall underground mine is analyzed as the maximum development scenario. A generic railroad to haul the coal is also addressed under this development scenario

Copies of the EIS will be available at each public library located in Musselshell, Yellowstone, Rosebud, Madison, Custer, Beaverhead, Deer Lodge and Carbon counties. In addition, copies will be available at libraries in Billings, Worden, Butte, Ennis, Colstrip, Forsyth, Helena, Miles City and Roundup. Copies will be available upon request from the Miles City District Office, P.O. Box 940, Miles City, Montana, 59301; Telephone (406)232–4331. Public reading copies will be available for review at the following BLM locations:

Billings, Montana 59105

Background information and maps used in developing the EIS are available at the Montana State Office, the Miles City and Butte District Offices, and the Big Dry, Billings, Headwaters and Dillon Resource Area Offices.

DATES: Written comments on the draft EIS must be submitted or postmarked no later than January 5, 1990, or sixty days following publication of the Environmental Protection Agency's Notice of Availability in the Federal Register, whichever date is later. Oral and/or written comments may also be presented at three public meetings to be held.

November 27, 1989—7 p.m. MDT—Central School Multipurpose Room, Sixth Avenue and Second Street, Roundup, Montana
November 28, 1989—7 p.m. MDT—Eastern Montana College, Ball Room, 1500 North 30th Street, Billings, Montana
December 4, 1989—7 p.m. MDT—Bureau of Land Management, Butte District Office, 106 North Parkmont, Butte, Montana.

ADDRESS: Written comments on the document should be addressed to: Mat Millenbach, District Manager, Bureau of Land Management, Miles City District Office, P.O. Box 940, Miles City, Montana 59301.

FOR FURTHER INFORMATION CONTACT: Bill Matthews, Project Manager, Miles City District Office, P.O. Box 940, Miles City, Montana 59301; telephone (406) 232–7000.

SUPPLEMENTARY INFORMATION: The draft EIS analyzes the proposed action, i.e., the exchange of selected Federal coal lands to Meridian Minerals Company for high-value recreation and wildlife offered lands. The proposed action is BLM's preferred alternative. Two coal-for-coal exchange alternatives, a leasing alternative and a no-action alternative are also addressed.

The proposed action (Preferred-Alternative A) is to exchange 3,674.36 acres of BLM administered Federal coal for 9,008.49 acres of high-value recreation and wildlife lands offered by Meridian Minerals Company. The Federal coal reserves in the exchange application total 54.5 million tons of which 43.6 million tons are recoverable by a longwall mining operation and 27.3 million tons are recoverable by a room and pillar mining operation. The fair market value of the Federal coal is $730,000. In return for the Federal coal under consideration for exchange, BLM selected six top priority acquisition lands with a fair market value of $1,138,800. The top six priority lands have a minimum value that BLM would accept in an exchange for the Federal coal.

Under the mirror image coal for coal exchange (Alternative B), the Federal and Meridian coal in the project area would be split into two logical mining units of approximately equal size and value. Meridian would get one unit, BLM would get the other unit. About 32.7 million tons of in-place Federal coal in the southern half of the project area would be exchanged for 30.5 million tons of in-place Meridian coal in the northern half of the project area. This alternative would provide a block of private coal of 70.8 million tons in the south half and a block of Federal coal of 60.2 million tons in the north half.

Alternative C considers the option of exchanging the Federal coal in the Bull Mountains for Meridian coal in the Peabody Big Sky Mine Area B south of Colstrip, Montana. Under this proposal, selected Federal coal in the Bull Mountains and Meridian offered coal in the Peabody Big Sky Mine Area B would be appraised and exchanged on an equal cash value basis. The Federal coal in the Bull Mountains has a fair market value of $730,000. An appraisal of the Meridian offered coal in the Peabody Big Sky Mine is being prepared and will be available for the final EIS. The amount of coal that BLM could acquire through this alternative depends on the appraised value of the Meridian offered coal. Since the appraisal is pending, a possible range of the amount of coal that BLM might acquire was developed with 7.0 million tons of coal as a lower limit and all of the Meridian offered coal as an upper limit (575 acres underlaid by 21.2 million tons of coal).

Under the leasing alternatives (Alternative D), BLM evaluated the Federal coal being considered for exchange as well as some State and other Federal coal lands. the Federal coal being considered for exchange could be leased competitively. Leasing could occur through a regional coal lease sale within the regional activity planning process or, if the Coal Production Region is decertified or partially decertified, through the lease by application process. An emergency coal lease would also be issued under certain conditions.

Current market conditions indicate that the bull Mountains coal would not become economically feasible for development until market conditions approached a $20 to $30 minimum selling price (1990 dollars). This would not occur until twenty to forty years in the future. Using a mid range of these values ($25 and 2020), royalty stream flows were calculated. A 0.5 million tons of coal underground mine would generate $13,307,592 in royalty payments over a forty year period with a discounted value of $176,941 (1990 dollars). A 3.0 million tons of coal underground mine would generate $76,622,000 in royalty payments over the forty year period with a discounted value fo $1,008,208 (1990 dollars).

If BLM were able to lease the Federal coal immediately and it was developed, a 0.5 million tons of coal per year underground mine would generate $7,985,628 in royalty payments over the forty year period with a discounted value of $1,675,763 (1990 dollars). A 3.0 million tons of coal per year underground mine generates $45,773,000 in royalty payments over the same forty year period with a discounted value of $9,554, 192 (1990 dollars).

The No Action (Alternative E) would continue present management as it exists now for all the lands. It is in essence a two-part no action alternative, i.e., denial of the exchange(s) and denial of the leasing. There would be no development of the Federal coal under this alternative.

Should BLM deny the exchanges, the Bull Mountains Federal coal lands included in the exchange application would remain in public ownership and would not be developed in the foreseeble future. The offered recreational properties would remain in private ownership as would the private coal.

Should BLM deny leasing in the Bull Mountains, the Federal coal lands would still remain in public ownership for development by future generations. There would be no immediate coal developent unless it was done on private coal lands.

Public participation has occurred throughout the EIS process. A Notice of Intent was filed in the Federal Register in May 1988. Scoping was completed and public meetings are scheduled for comment on the Draft EIS.

Mathew N. Millenbach,

District Manager, Miles City District.

Notice of Availability of the Final Environmental Impact Statement for the Powder River Resource Area, Montana.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The final Powder River Resource Area Wilderness Environmental Impact Statement assesses the environmental consequences of managing two wilderness study areas as wilderness or nonwilderness. The alternatives assessed include: (1) A "No Wilderness Alternative" for each wilderness study area, and (2) an "All Wilderness Alternative" for each wilderness study area.

The names of the wilderness study areas, their total acreages, and the proposed actions for each are as follows:

Buffalo Creek—5,650 acres (all unsuitable)
Zook Creek—8,438 acres (all unsuitable)

The Bureau of Land Management wilderness proposals will ultimately be forwarded by the Secretary of the Interior and the President to Congress. The final decision on wilderness designation rests with Congress.

FOR FURTHER INFORMATION CONTACT: Gene Kolkman, Area Manager, BLM Powder River Resource Area, Miles City Plaza, Miles City, Montana 59301, 406–232–7000.

SUPPLEMENTARY INFORMATION: Copies of the environmental impact statement may be obtained from the District Manager, Miles City District, Bureau of Land Management, P.O. Box 940, Miles City, Montana 59301–0940. Copies are also available for inspection at Montana State University, Roland R. Meeting of the California Desert District Advisory Council

SUMMARY: Notice is hereby given, in accordance with Public Laws 92–463 and 94–579, that the California Desert District Advisory Council to the Bureau of Land Management, U.S. Department of the Interior, will meet in formal session Friday, December 1, 1989, from 3:00 p.m. to 5:30 p.m., and Saturday, December 2, 1989, from 8:30 a.m. to 5:00 p.m., at the Wyndham Palm Springs, 888 East Tahquitz Way, in Palm Springs, California.

On Friday, December 1, from 7:15 a.m. to 2:00 p.m., Council members will participate in a field trip to the proposed Santa Rosa Mountains National Scenic Area and the Coachella Valley Preserve. The Santa Rosa Mountain tour will be provided through BLM's contractor, Desert Off-Road Adventures. Since Desert Off-Road Adventures is the only entity with legal permission to enter the area, members of the public may not follow this portion of the tour. If space is available, members of the public can be included on the tour if they are willing to cover the cost ($75.00 per person). Anyone interested in participating should contact the Bureau of Land Management's California Desert District at (714) 351–6383. Members of the public may participate in the Coachella Valley Preserve walking tour. The Council anticipates arriving at the Preserve at approximately 12:00 p.m. for lunch and a

VOL
54
SS
2
12
NO
3
1989
UMI

briefing about the Preserve, followed by the tour. Members of the public are welcome to bring their own lunch and join in the tour.

Agenda items for the formal meetings will include:

—The proposed Santa Rosa Mountains National Scenic Area: briefing, discussion, and recommendation;
—1989 proposed amendment #1 to the California Desert Conservation Area Plan: discussion of options;
—Wind energy update: background, current status, and activities of wind energy task force;
—Desert landfill and hazardous material site proposals: Eagle Mountain (Riverside County), Blue Canyon (San Diego County), Broadwell Lake and Hidden Valley (San Bernardino County);
—Off-highway vehicle competitive events: current status, and
—Desert tortoise issues (Council will meet as the Desert Tortoise Coordinating Committee): review of the final 1990 tortoise budget, consultations with the U.S. Fish and Wildlife Service, quarantine status, ongoing research, ongoing projects, and desert tortoise category map.

All formal Council meetings are open to the public, with time allocated for public comments, such time made available by the Council Chairman during presentations of various agenda items.

Written comments may be filed in advance of the meeting with the California Desert District Advisory Council Chairman, Mr. David Fisher, c/o Bureau of Land Management, Public Affairs Office, 1695 Spruce Street, Riverside, California 92507. Written comments are also accepted at the time of the meeting and, if copies are provided to the recorder, will be incorporated into the minutes.

FOR FURTHER INFORMATION AND MEETING CONFIRMATION: Contact the Bureau of Land Management, California Desert District, Public Affairs Office, 1695 Spruce Street, Riverside, California 92507; (714) 351–6383.

Dated: October 27, 1989.

Ron Yokota,

Acting District Manager.

Coos Bay Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Meeting of Coos Bay District Advisory Council.

SUMMARY: Notice is hereby given in accordance with Public Law 94–579 and 43 CFR, part 1780 that a meeting of the Coos Bay District Advisory Council will be held on Thursday, December 7, 1989, beginning at 9:00 a.m. The meeting will include a tour of BLM lands on the Coos Bay Shorelands, and a review of proposed agency actions there. The meeting will begin at the Coos Bay District Office, and the tour will depart from there. (Note: this will be the new Coos Bay District office facility at 1300 Airport Lane, North Bend, OR).

AGENDA: The agenda for the meeting will include:

1. An update on the progress of the draft management plan for the Coos Bay Shorelands, the closely related proposed land exchange with the Oregon International Port of Coos Bay, and the proposed boat launch facility on the North Spit.
2. A tour of portions of the Coos Bay Shorelands, viewing and discussing proposed developments there.
3. Acceptance of comments or recommendations from the Advisory Council to the District Manager on the Coos Bay Shorelands draft management plan.
4. Plans for the next meeting.

The meeting is open to the public and news media, but no transportation arrangements will be made for other than members and staff. Interested persons may make oral statements to the council between 9:00 a.m. and 9:30 a.m. on Thursday, December 7, or file written statements for the council's consideration. Anyone wishing to make an oral statement must notify the District Manager by close of business Wednesday, November 22, 1989 (Telephone 503–756–0100).

ADDRESS: Bureau of Land Management, Coos Bay District Office, 1300 Airport Lane, North Bend, OR 97459.

Minutes of the meeting will be maintained at the District Office and made available during regular business hours (7:45 a.m. to 4:30 p.m.) for public inspection or reproduction at the cost of duplication.

Date: October 27, 1989.

Cary Osterhaus,

Assistant District Manager, Resources.

Lakeview District Multiple Use Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of a meeting of the Lakeview District Multiple Use Advisory Council.

SUMMARY: The Lakeview District Multiple Use Advisory Council will be meeting to consider information pertaining to the Eligibility and Suitability Report for the Upper Klamath River Wild and Scenic River Study.

DATE: Thursday, December 7, 1989, 10:00 a.m. until 3:00 p.m.

ADDRESS: Klamath County Commissioners Hearing Room, 305 Main Street, Klamath Falls, Oregon.

FOR FURTHER INFORMATION CONTACT: Renee Snyder, Public Affairs Officer, Lakeview District, Bureau of Land Management, P.O. Box 151, Lakeview, OR 97630, (503) 947–6110.

SUPPLEMENTARY INFORMATION: The agenda for the meeting includes presentations by an array of specialists designed to highlight the issues involved in the upper Klamath River Wild and Scenic River Study.

The meeting will be open to the public. However, the opportunity for public comment will be limited to one five minute presentation per person between the hours of 1:00 and 2:00 p.m. Scheduling will be on a first come first served basis. Anyone wishing to make an oral statement must notify the Lakeview District Manager by December 5, 1989. Additional comments may be submitted in writing.

Robert G. Bolton,

Acting District Manager.

Request for Public Comments on Competitive Leasing; National Petroleum Reserve in Alaska (NPR-A)

The Public is requested to give comments on its interest in competitive leasing in the National Petroleum Reserve in Alaska (NPR–A) during the calendar year 1990 for the purpose of determining a general and relative level of interest. Specific public comments are requested regarding a proposed leasing area and future NPR–A lease sales:

1. The Bureau of Land Management proposes to offer for competitive lease an onshore area in the north central NPR–A bounded by Cape Simpson on the east, private subsurface on the north, and the Chukchi Sea to the West.

a. If a 1990 lease sale were scheduled in the NPR–A, would you submit a bid at such a sale?

b. Please comment on whether the general area of the 1990 Proposed Lease Sale area is of interest to you.

c. Please comment on any other areas of specific interest: Such as the tracts selected to be offered in the 1985 sale, which was not held, tracts which have not been previously offered, or tracts which you would like to have re-offered in 1990.

2. What is your timing preference for the next NPR–A lease sale?

a. If not in the year 1990 or 1991, when might leasing in the NPR–A be most preferable?

b. Past lease sales have been scheduled during the summer (July). The summer lease sale date was selected to provide sufficient sale preparation time for both industry and the Bureau of Land Management. Present policy is to notify industry of preliminary lease tracts and proposed stipulations 7 months prior to a sale (December), in the belief that this timing will provide sufficient opportunity for gathering and analyzing geophysical data specific to the proposed tracts. Does this practice provide such an opportunity or should BLM's NPR–A leasing process be adjusted to reflect a different schedule?

5. What priority would you place on NPR–A leasing relative to other leasing opportunities in Alaska?

6. Are there any terms, conditions, stipulations or other factors currently imposed on NPR–A lease sales and leases that you would like to see changed if a sale were offered in 1990?

Comments that contain proprietary information should be so marked, and, to the extent possible under the Freedom of Information Act, will be treated confidentially.

Maps of the NPR–A and the Proposed area of lease sale are available at the Public Rooms of the Bureau of Land Management's Alaska State Office, Anchorage, Alaska and the Fairbanks Support Center, Fairbanks, Alaska as well as the address below.

Comments will be accepted for a period of 30 days from the date of publication of this Request for Comments in the Federal Register.

ADDRESSES: Direct written questions and responses to: M. Thomas Dean, Arctic District Office, Bureau of Land Management, 1150 University Avenue, Fairbanks, Alaska 99709–3844.

FOR FURTHER INFORMATION CONTACT: Donald C. Meares, Natural Resource Specialist, at the address given above or telephone 907/474–2300.

M. Thomas Dean,

Manager, Arctic District.

Conveyance and Order Providing for Opening of Public Land in Beaverhead and Madison Counties; MT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This order will open lands reconveyed to the United States in an exchange under the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1701 *et seq.* (FLPMA), to the operation of the public land laws, including the mining laws and the mineral leasing laws, as specified. It also informs the public and interested state and local governmental officials of the issuance of the conveyance document.

EFFECTIVE DATE: 9 a.m. on January 3, 1990.

FOR FURTHER INFORMATION CONTACT: James Binando, BLM Montana State Office, P.O. Box 36800, Billings, Montana 59107, 406–255–2935.

SUPPLEMENTARY INFORMATION: 1. Notice is hereby given that pursuant to section 206 of FLPMA, the following described surface and mineral estate was transferred to the State of Montana:

Principal Meridian, Montana

T. 13 S., R. 1 W.,
Sec. 1, lot 1–4, inclusive, S½N½, SE¼;
Sec. 2, lots 1–4, inclusive, S½N½;
Sec. 3, lots 1–4, inclusive, S½N½;
Sec. 4, lots 1–3, inclusive, S½NE¼, SE¼NW¼;
Sec. 7, lots 1, 2, 7–11, inclusive, E½SW¼;
Sec. 18, lots 1–4, inclusive, E½E¼;
Sec. 19, E½.
T. 13 S., R. 2 W.,
Sec. 12, lot 19, SE¼;
Sec. 13, lots 1–6, inclusive, NE¼E½NW¼.
T. 1 S., R. 3 W.,
Sec. 28, NE¼, SW¼;
T. 13 S., R. 5 W.,
Sec. 1, lot 6, 7, W½;SE¼;
Sec. 5, SE¼SE¼;
Sec. 8, E½NE¼, SE¼;
Sec. 10, SW¼SW¼, E½SW¼, SE¼;
Sec. 11, S½;
Sec. 12, lots 1–4, inclusive, E½, W½W½;
Sec. 13, N½;
Sec. 14, all;
Sec. 15, lots 1–4, inclusive, E½, W½W½;
Sec. 21, N½NE¼.
T. 12 S., R. 6 W.,
Sec. 10, NE¼NW¼;
Sec. 24, NE¼NW¼;
T. 11 S., R. 10 W.,
Sec. 35, SE¼SW¼; SW¼SE¼.
T. 12 S., R. 10 W.,
Sec. 2, lots 2, 3, SE¼NW¼;
Sec. 36, SW¼.

Total Federal acreage transferred: 7,216.01 acres.

2. In exchange for the above selected land, the United States acquired 6,874.01 acres of surface and mineral estate from the State of Montana. The lands and respective estates acquired are described as follows:

A. Surface and Mineral Estate:

Principal Meridian, Montana

T. 13 S., R. 2 W.,
Sec. 6, lots 4, 5 and 6.
T. 13 S., R. 10 W.,
Sec. 16, all.
Sec. 16, all.
T. 13 S., R. 11 W.,
Sec. 2, SW¼W¼SE¼;
Sec. 11, all;
Sec. 12, SW¼SW¼;
Sec. 13, NW¼;
Sec. 14, N½ N½SW¼m NW¼SE¼;
T. 14 S., R. 11 W.,
Sec. 6, lots 4 and 5, S½SE¼;
Sec. 8, NE¼NW¼;
Sec. 9, SW¼NW¼;
Sec. 10, NE¼NE¼; W½W¼;
Sec. 25, E½;
Sec. 36, all.
T. 15 S., R. 11, W.,
Sec. 1, lot 4, S½N½, N½S½.

B. *Surface and All Minerals Except Oil and Gas* (Oil and Gas rights reserved to the State of Montana until existing leases terminate or expire):

Principal Meridian, Montana

T. 12 S., R. 11 W.,
Sec. 36, all.
T. 13 S., R. 12 W.,
Sec. 16, NE¼;
Sec. 36, all.

C. Restricted Surface and Mineral Estate (Not open to public land laws, mining laws, or mineral leasing laws):

Principal Meridian, Montana

T. 7. S., R. 11 W.,
Sec. 7, SE¼SE¼;
Sec. 18, NW¼NE¼.
T. 14 S., R. 1 E.,
Sec. 36, all.
T. 14 S., R. 3 W.,
Sec. 36, all.
T. 15 S., R. 2 W.,
Sec. 16, lots 1 and 2.

3. The value of the federal public land were appraised at $767,000 and the values of the state land were appraised at $750,000. The $37,000 balance due to the United States was applied to another land exchange with the State of Montana that was recently completed.

4. At 9 a.m. on January 3, 1990, the lands described in paragraphs 2.A and 2.B above that were conveyed to the United States will be opened to the

operation of the public land laws generally, and to location under the United States mining laws, subject to valid existing rights and the requirements of applicable law. All

Sec. 8, W½W½;
Sec. 18, E½SE¼, SW¼SE¼;
Sec. 19, NE¼, N½SE¼;
Containing 3,080 acres.

sec. 35, N¼, N½N½SW¼.

The above description aggregates 2,560 acres.

In exchange, the United States will

(1984) for the Grand Teton National Park, and the *Buffalo Resource Area Resource Management Plan* (1985). Public involvement and participation

FOR FURTHER INFORMATION CONTACT: Mr. John Lloyd, Area Manager, Arcata Resource Area, 1125 16th Street, Room 219, P.O. Box 1112, Arcata, California

Use of Shallow Seismic Data in Relief Well Planning.

J.E. Booth, Mobil Exploration and Production Services, Inc.

operation of the public land laws generally, and to location under the United States mining laws, subject to valid existing rights and the requirements of applicable law. All valid applications under the public land laws received at or prior to 9 a.m. on January 3, 1990, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. Appropriation of any of the lands described in this order under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest on rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determination in local courts.

5. At 9 a.m. on January 3, 1990, the lands described in paragraph 2.A above will be opened to applications and offers under the mineral leasing laws.

6. At 9 a.m. on January 3, 1990, the lands described in paragraph 2.B above will be opened to applications and offers under the mineral leasing laws for leasable minerals other than oil and gas.

7. The lands described in paragraph 2.C above are not open to any of the public land laws, mining laws, or mineral leasing laws.

Dated: October 26, 1989.

John A. Kwiatkowski,

Deputy State Director, Division of Lands and Renewable Resources.

[FR Doc. 89-25887 Filed 11-2-89; 8:45 am]

BILLING CODE 4310-DN-M

Realty Action; Exchange of Public Lands in Elko County, NV

The following described public lands administered by the Bureau of Land Management are being considered for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716.

Mount Diablo Meridian, Nevada

T. 30 N., R. 59 E.,
Sec. 11, E½, E½W½, W½SW¼;
Sec. 12, W½W½;
Sec. 13, N½, N½S½, SW¼SW¼;
Sec. 14, All;
Sec. 15, E½, E½W½;
Sec. 23, N½N½, SE¼NE¼;
Sec. 24, W½NW¼, NW¼SW¼.
T. 30 N., R. 60 E.,
Sec. 8, W½W½;
Sec. 18, E½SE¼, SW¼SE¼;
Sec. 19, NE¼, N½SE¼;
Containing 3,080 acres.

Final determination on disposal will await completion of an environmental analysis.

In accordance with the regulations of 43 CFR 2201.1(b), subject to valid existing rights, publication of this Notice shall segregate the affected public lands from appropriation under the public land laws, including the mining laws, but not the mineral leasing laws, and from any subsequent land exchange proposals filed by any proponent other than Ken Jones or his nominee.

The segregation of the above-described lands shall terminate upon issuance of a document conveying such lands or upon publication in the **Federal Register** of a notice of termination of the segregation; or the expiration of two years from the date of publication, whichever occurs first.

For a period of 45 days from the date of first publication, interested parties may submit comments to the District Manager, Elko District Office, P.O. Box 831, Elko, NV 89801.

Dated: October 25, 1989.

Rodney Harris,

District Manager.

BILLING CODE 4310-HC-M

National Park Service

[WY-060-09-4920-10-4335; WYW97410 FD and PT]

Realty Action; Exchange; Wyoming

AGENCY: National Park Service, Interior; Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, exchange of Federal coal interest in Sheridan County for a conservation easement in Teton County.

SUMMARY: The following Federal coal interest has been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act (FLPMA) of 1976, 43 U.S.C. 1716:

Sixth Principal Meridian

T. 58 N., R. 84 W.,
sec. 22, E½SW¼, SE¼;
sec. 23, SW¼, W½SE¼, SE¼SE¼;
sec. 25, SW¼NE¼, S½NW¼, S½;
sec. 26, all;
sec. 27, E½, E½W½;
sec. 34, N½NE¼, NE¼NW¼;
sec. 35, N¼, N½N½SW¼.

The above description aggregates 2,560 acres.

In exchange, the United States will acquire the following conservation easement within the JY Ranch:

Sixth Principal Meridian

T. 42 N., R. 116 W.,

The conservation easement is described by metes and bounds but lies within parts of sections 4, 5, 6, and 8.

The above description aggregates 1,106.49 acres.

FOR FURTHER INFORMATION CONTACT: All comments and any further information should be addressed to: James W. Monroe, District Manager, Casper District Office, Bureau of Land Management (BLM), 1701 East "E" Street, Casper, Wyoming 82601, phone (307) 261-7600.

SUPPLEMENTARY INFORMATION: Specifically, in this exchange, the Federal Government will acquire a conservation easement within the JY Ranch in Teton County, Wyoming for approximately 200 million tons of recoverable Federal coal from portions of the Youngs Creek and Ash Creek coal tracts together referred to as the Youngs Creek Area in Sheridan County, Wyoming.

The purpose of this exchange is to fulfill recommendations of the approved *Land Protection Plan* (1984) for the Grand Teton National Park which states that "Conservation easements should be obtained through a combination of purchases, donations, or exchanges."

On August 9, 1985, Mr. Laurance S. Rockefeller and former Secretary of the Interior, Donald P. Hodel signed an agreement to pursue an exchange of public lands for a conservation easement on Rockefeller's JY Ranch.

In April of 1986, Mr. Rockefeller, the exchange proponent, followed with a formal exchange proposal to the Bureau of Land Management offering the conservation easement in exchange for Federal mineral rights (coal).

In December of 1987, Mr. Rockefeller donated this conservation easement to Sloan-Kettering Institute for Cancer Research. The Sloan-Kettering Institute is the exchange proponent of record.

This exchange will be for an amount of Federal coal equal in value to the conservation easement.

This exchange is consistent with section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716). The exchange is consistent with the approved *Land Protection Plan* (1984) for the Grand Teton National Park, and the *Buffalo Resource Area Resource Management Plan* (1985). Public involvement and participation were in conformance with current regulations (43 CFR 2203, 1988). The public interest factors were considered for this action according to BLM Manual 2200.06B. The National Park Service and the Bureau of Land Management have determined that the public interest will be served by completion of this exchange.

For a period of forty-five (45) days from the date of issuance of this Notice, interested parties may submit comments to the Bureau of Land Management, District Manager, Casper District Office, 1701 East "E" Street, Casper, Wyoming 82601. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become final.

Dated: October 26, 1989.

James W. Monroe,

District Manager.

Bureau of Land Management

Availability of Proposed Resource Management Plan and Final Environmental Impact Statement for the Arcata Resource Area, Ukiah District, California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability, proposed resource management plan and environmental impact statement.

SUMMARY: Notice is hereby given that the Bureau of Land Management, Ukiah District has issued for review the Proposed Resource Management Plan (RMP) and Final Environmental Impact Statement (EIS) for the Arcata Resource Area.

The final RMP/EIS was prepared pursuant to the National Environmental Policy Act (NEPA) of 1969, Council on Environmental Quality regulations (40 CFR 1500-1508) and Bureau of Land Management Manual 1600, Planning Guidelines.

DATE: A protest period on the RMP/EIS will extend until November 27, 1989. All protests must be submitted in writing to the Director by that date.

ADDRESS: Protests should be sent to the Director (202), Bureau of Land Management, 1800 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Mr. John Lloyd, Area Manager, Arcata Resource Area, 1125 16th Street, Room 219, P.O. Box 1112, Arcata, California 95521, or Mr. Al Wright, District Manager, Bureau of Land Management, Ukiah District Office, 555 Leslie Street, Ukiah, California 95482.

Dated: October 24, 1989.

Minerals Management Service

International Well Control Symposium/Workshop

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of meeting.

SUMMARY: The Minerals Management Service (MMS) is cosponsoring the subject symposium/workshop which will be administered by Louisiana State University and held on November 28-29, 1989, at the Hilton Hotel in Baton Rouge, Louisiana. The advance registration fee is $100.

The agenda for the workshop follows:

Tuesday, November 28, 1989

Session 1—Shallow Gas Well Control

8:30 a.m.-11:30 a.m.

Title	Author
A Unique Approach for Confirming Shallow Gas in a New Offshore Exploration Area.	J.G. Guignon, Mobil Oil, Indonesia
Inspection and Testing of Subsea Well Control Equipment.	Michael E. Montgomery, West Hou, Inc.
Analysis of Events, Leading to an Offshore Shallow Gas Blowout by History Matching Field Data Using an Advanced Gas Kick Simulator.	A.L. Podio, University of Texas, Pal Skalle, University of Trondheim, An-Ping Yang, University of Texas
Abnormally Pressured Gas Accumulation under Deep Water-A Field Case History.	Decio Fabricio Oddone Da Costa, Samir Passos Awad, Andre Lima Cordeiro, Petrobas
Method for Determining the Feasibility of a Dynamic Kill of a Diverted Well.	William L. Koederitz, Louisiana State University
Use of Shallow Seismic Data in Relief Well Planning.	J.E. Booth, Mobil Exploration and Production Services, Inc.

Session 2—Modeling of Well Control Operations

1:30 p.m.-4:30 p.m.

Title	Author
An Overview of Kicking Well Computer Codes.	D.J. Element, L.M. Wickens, T.D. Butland, AEA Technology, U.K.
A New Two Phase Flow Model of Kick Control.	Shohei Kato, Japan Drilling Company, Ltd.
Experimental Determination of Gas Migration Velocities.	D.B. White, A. Johnson, Schlumberger Cambridge Research
The Volumetric Properties of Methane and Oil Based Mud Mixtures: Effects on Surface Observations During Kicks.	B.W. Swanson, B.P. Research International
Experimental Bench Mark Data for Testing Well Control Computer Methods.	V. Casariego, Louisiana State University
Blowout Control Methods.	Rob Wesson, Cudd Pressure Controls, Inc.; R.D. Grace, Grace, Shurson, Moore & Assoc.
Gas Slip Velocities in an Inclined Annulus.	Edson Nakagawa, Louisiana State University

Session 3—MWD Applications to Well Control

8:00 a.m.-9:45 a.m.

Title	Author
Prevention or Cure? Kick Avoidance and Detection using MWD in an Integrated Wellsite Information Management System.	Michael R. Taylor, Andrew R. Morley, Exlog
A Computer Assisted Well Control Safety System for Deep Ocean Well Control.	O. Allen Kelly, Louisiana State University
Real Time Pore Pressure Evaluation Options.	Jean-Louis Alixant, Louisiana State University
Evaluation of Downhole Kick Detection Tools.	Jesse L. Holster, Exxon Production Research

Workshop 1: *Equipment Inspection Training*

10:00 a.m.-11:30 a.m.

Baton Rouge, Louisiana 70803-6423 (504) 388-5215.

The meeting will be held at: Baton Rouge Hilton, 5500 Hilton Avenue, Baton

Dated: October 20, 1989.

William D. Bettenberg,

Associate Director for Offshore Minerals Management, Minerals Management Service.

Golden Gate National Recreation Area and Point Reyes National Seashore Advisory Commission; Meeting

The meeting is open to the public. Persons wishing to receive the Environmental Assessment for the Bay Area Discovery Museum should contact

Arlene Jennings, 800 Peach Glen-Idaville Road, Peach Glen, PA 17306-1199

Noreta R. McGee,

Secretary.

VOL 54 SS 212 NO 3 1989 UMI

Workshop 1: *Equipment Inspection Training*

10:00 a.m.–11:30 a.m.

Title	Author
Chevron BOP Inspection Training and Surface and Subsea Stack Applications.	J.D. Combes, T.M. Windham, Chevron
Errors Inherent in Rig Measurements of Drillpipe and Casing Pressure.	W.R. Holden, Louisiana State University
Plastic Packing Injection Systems and Lead Targets for Choke and Kill Line Piping.	Michael E. Montgomery, West Hou, Inc.

Workshop 2: *Changes in Regulations*

1:30 p.m.–3:30 p.m.

Title	Author
New Training Requirements in U.S. (Subpart 0).	Jerry Richard, MMS
New Regulations in U.K.	To Be Announced
Well Control Training Requirements-Operator's Perspective.	To Be Announced
Well Control Training Requirements-Contractor's Perspective.	Ralph McTaggert, Global Marine

Workshop 3: *Recommendations for Research*

1:30 p.m.–3:30 p.m.

Title	Author
The Development of a Well Control Research Project.	J.W. Peel, D.I. Redman, U.K. Dept. of Energy
Progress Report on Current Projects Underway at the LSU/MMS Research Well Facility.	A.T. Bourgoyne, Louisiana State University
Recommended Well Control Research Priorities.	Panel of representatives from AADE, IADC, API, and DOE-UK

DATES: November 28–29, 1989—See agenda for times.

ADDRESSES: The registration form with complete agenda may be obtained from the following office: Dr. A.T. Bourgoyne, Chairman, Petroleum Engineering Department, Louisiana State University, Baton Rouge, Louisiana 70803–6423 (504) 388–5215.

The meeting will be held at: Baton Rouge Hilton, 5500 Hilton Avenue, Baton Rouge, Louisiana 70808.

FOR FURTHER INFORMATION CONTACT: Mr. John B. Gregory, MMS, 381 Elden Street, Herndon, Virginia, 22070–4817, telephone (703) 787–1559.

Dated: October 26, 1989.

BILLING CODE 4310–MR–M

Offshore Oil Spill Response Technology Seminar

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of meeting.

SUMMARY: The Minerals Management Service (MMS) will hold the subject seminar for the public at no charge on December 13, 1989, at its offices in Herndon, Virginia. Because of increased interest in oil spill containment and cleanup technology since the tanker oil spill in Prince William Sound, and particularly as a result of the many related inquiries received by the Department of the Interior, this seminar will be conducted by MMS research program personnel to discuss the status of the technology.

Sessions will be held, with audience participation, as follows:

1. General response requirements—Edward Tennyson, MMS;

2. Mechanical containment and cleanup—Edward Tennyson, MMS;

3. Chemical treating agents (including dispersants)—Mervin Fingas, Environment Canada;

4. Burning oil on the ocean surface—Dr. David Evans, National Institute of Standards and Technology.

DATE: December 13, 1989, at 8:30 a.m.

ADDRESS: Parkway Atrium Building, 381 Elden Street, Herndon, Virginia 22070–4817.

FOR FURTHER INFORMATION CONTACT: For planning purposes, it is requested that persons who wish to attend telephone or write to Mr. John B. Gregory, Technology Assessment and Research Branch, 381 Elden Street, Herndon, Virginia 22070–4817, telephone (703) 787–1550. An agenda with directions will be sent.

Dated: October 26, 1989.

William D. Bettenberg,

Associate Director for Offshore Minerals Management, Minerals Management Service.

BILLING CODE 4310–MR–M

National Park Service

John Muir National Historic Site; Amendment to General Management Plan

SUMMARY: The National Park Service is preparing an amendment to the General Management Plan for John Muir National Historic Site, Contra Costa County, California. An amendment is necessary at this time because of the passage of legislation in January, 1988 (Public Law 100–563) expanding the Site's boundary by over three hundred acres. Major issues to be addressed with respect to the added lands include management objectives, visitor use facilities, land protection, access to the John Muir Gravesite, and cooperative management with the East Bay Regional Park District. Additionally, the amendment will update the plan for the lands initially included in the historic site. Issues in this area include the scale and location of visitor and administration facilities and protection of the historic scene.

An environmental assessment will be prepared in combination with the management plan amendment.

Initial contact has been made with local, State and Federal agencies and private individuals and organizations in scoping the plan amendment. Any other parties not contacted are encouraged to provide any views or specific suggestions they may have regarding the future management directions of the Site. Please address any such comments and/or any requests for additional information to the Superintendent, John Muir National Historic Site, 4203 Alhambra Avenue, Martinez, California 94553. Any comments regarding plan considerations should be received within 60 days of the publication of this Notice.

The draft General Management Plan Amendment/Environmental Assessment is expected to be released for public review in January, 1990.

Dated: October 24, 1989.

Stanley T. Albright,

Regional Director, Western Region.

[FR Doc. 89–25907 Filed 11–2–89; 8:45 am]

BILLING CODE 4310–70–M

Golden Gate National Recreation Area and Point Reyes National Seashore Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Golden Gate National Recreation Area (GGNRA) and Point Reyes National Seashore (PRNS) Advisory Commission will be held at 7:30 p.m. (PST) on Thursday, December 7, 1989, at the Tamalpais High School, Mill Valley, California. The Advisory Commission was established by Public Law 92–589 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service systems in Marin, San Francisco and San Mateo Counties.

Members of the Commission are as follows:

Mr. Frank Boerger, Chairman
Ms. Amy Meyer, Vice Chair
Mr. Ernest Ayala
Mr. Richard Bartke
Dr. Howard Cogswell
Brig. Gen. John Crowley, USA (ret)
Mr. Margot Patterson Doss
Mr. Neil D. Eisenberg
Mr. Jerry Friedman
Mr. Steve Jeong
Ms. Daphne Greene
Ms. Gimmy Park Li
Mr. Gary Pinkston
Mr. Merritt Robinson
Mr. R. H. Sciaroni
Mr. John J. Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

The main agenda item at this public meeting will be a review of the Environmental Assessment on the proposed Bay Area Discovery Museum at East Fort Baker. A presentation to the Advisory Commission and public on the plans to build the Bay Area Discovery Museum in an area of vacant and underutilized historic structures at East Fort Baker in the Marin Headlands was first presented at a February 12, 1987 public meeting. A Marin Committee Resolution of April 4, 1987 on this project was presented for public comment and adopted by the GGNRA Advisory Commission at the June 30, 1987 meeting. This resolution called for a public presentation of completed plans for the museum.

Also included at this meeting will be a Superintendent's Report which will include a status report on two Marin County issues, the Stinson Pony Pasture permit and the Tinker property, and an update on other major issues impacting the GGNRA.

The meeting is open to the public. Persons wishing to receive the Environmental Assessment for the Bay Area Discovery Museum should contact the Staff Assistant, Golden Gate National Recreation Area, Building 201, Fort Mason, San Francisco, California 94123 or telephone (415) 556–4484.

This meeting will be recorded for documenttion and transcribed for dissemination. Minutes of the meeting will be available to the public after approval of the full Advisory Commission. A transcript is available after December 28, 1989. For copies of the minutes contact the Office of the Staff Assistant, Golden Gate National Recreation Area, Building 201, Fort Mason, San Francisco, California 94123.

Dated: October 24, 1989.

Stanley T. Albright,

Regional Director, Western Region.

INTERSTATE COMMERCE COMMISSION

Agricultural Cooperative; Perform Interstate Transportation for Certain Nonmembers

Date: October 31, 1989.

The following Notices were filed in accordance with section 10526 (a)(5) of the Interstate Commerce Act. These rules provide that agricultural cooperatives intending to perform nonmember, non-exempt, interstate transportation must file the Notice, Form BOP 102, with the Commission within 30 days of its annual meetings each year. Any subsequent change concerning officers, directors, and location of transportation records shall require the filing of a supplemental Notice within 30 days of such change.

The name and address of the agricultural cooperative (1) and (2), the location of the records (3), and the name and address of the person to whom inquiries and correspondence should be addressed (4), are published here for interested persons. Submission of information which could have bearing upon the propriety of a filing should be directed to the Commission's Office of Compliance and Consumer Assistance, Washington, DC 20423. The Notices are in a central file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC.

BILLING CODE 7035-01-M

[Finance Docket No. 31535]

Chicago Central and Pacific Railroad Co.—Lease and Operation Exemption—North Central Railway Association, Inc.

Chicago Central and Pacific Railroad Company (CC) has filed a notice of exemption to lease and operate a line of railroad acquired by North Central Railway Association, Inc. (NCRA), from the Chicago and North Western Transportation Company (CNW). The line extends between milepost 184.75, at Hampton, and milepost 212.0, at Steamboat Rock, in Hardin and Franklin Counties, IA, a distance of approximately 27.25 miles.[1] Since 49 U.S.C. 10905(f)(4) prohibits transfer of the line by NCRA within 2 years after its purchase, this notice does not embrace acquisition of the line by CC, but exempts only the lease and operation.

Any comments must be filed with the Commission and served on applicant's representative: T. Scott Bannister, Hanson, Bjork & Russell, 1300 Des Moines Building, Des Moines, IA 50309.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any tme. The filing of a petition to revoke will not automatically stay the transaction.

Decided: October 30, 1989.

[1] CNW was authorized to abandon this line in Docket No. AB-1 (Sub-No. 217), *Chicago and North Western Transportation Company—Abandonment—Between Steamboat Rock and Hampton in Hardin and Franklin Counties, IA* (not printed), served February 10, 1988. The State Historical Society of Iowa has indicated here that its determination in that proceeding that that proposal would not affect historic resources applies to the instant transaction as well.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Norsta R. McGee,
Secretary.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 89-21]

Luis L. Galang, New London; Hearing

Notice is hereby given that on March 22, 1989, the Drug Enforcement Administration, Department of Justice, issued to Luis L. Galang, M.D., an Order to Show Cause as to why the Drug Enforcement Administration should not revoke your DEA Certificate of Registration, AG9170490, and any pending applications for registration.

Thirty days have elapsed since the said Order to Show Cause was received by Respondent, and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held on Tuesday, November 7, 1989, commencing at 9:30 a.m., at the Henry S. Reuss Federal Plaza, 310 West Wisconsin Avenue, Milwaukee, Wisconsin.

Dated: October 27, 1989.

John C. Lawn,
Administrator, Drug Enforcement Administration.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions.

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary or Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be

impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S-3504, Washington, DC 20210.

New General Wage Determinations Decisions

Signed at Washington, DC this 27th day of October 1989.

Ethel P. Miller,
Acting Director, Division of Wage

determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

[TA-W-23,236]

Niki-Lu Hialeah, FL; Termination of Investigation

Conclusion

After careful review of the application, I conclude that the claims are of sufficient weight to justify

in accordance with expenditure reports submitted to the Secretary by the States pursuant to Training and Employment Information Notice No. 30-88, dated

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 27th day of October 1989.

Ethel P. Miller,

Acting Director, Division of Wage Determinations.

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than November 13, 1989.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than November 13, 1989.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 23rd day of October 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA-W-23,236]

Niki-Lu Hialeah, FL; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on August 9, 1989 in response to a worker petition which was filed on August 9, 1989 on behalf of workers at Niki-Lu, Hialeah, Florida. The workers produced ladies' jackets and sportswear.

The investigation revealed that subject firm Niki-Lu, Hialeah, Florida is out of business. Niki-Lu closed in January 1989. No further information is available to complete the investigation to make a determination for eligibility under section 221 of the Trade Act of 1974. Since no further information is available to complete the investigation, the investigation has been terminated.

Signed at Washington, DC this 16th day of October 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 89–25969 Filed 11–2–89; 8:45 am]

BILLING CODE 4510–30–M

[TA-W-23,122]

Santa Fe Energy Co., Amarillo, TX; Notice of Affirmative Determination Regarding Application for Reconsideration

Several former workers requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance for former workers of the Santa Fe Energy Company, Amarillo, Texas. The negative determination was issued on September 1, 1989 and published in the **Federal Register** on October 3, 1989 (54 FR 40755).

The former workers stated, among other things, that the Department should have compared revenues for the years 1987 and 1988 instead of only the first five months of 1989 compared to the same period in 1988. The former workers stated that they met all the criteria earlier and were certified under TA–W–17, 731 and should be reconsidered for benefits under the Trade Act as amended by the Omnibus Trade and Competitiveness Act of 1988.

Conclusion

After careful review of the application, I conclude that the claims are of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 24th day of October 1989.

Stephen A. Wandner,

Deputy Director, Office of Legislation and Actuarial Services, UIS.

BILLING CODE 4510–30–M

Job Training Partnership Act; Employment and Training Assistance for Dislocated Workers; Reallotment of Title III Funds

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor is publishing for public information the Job Training Partnership Act Title III (Employment and Training Assistance for Dislocated Workers) funds identified by States for reallotment, and the amount to be reallotted to eligible States.

EFFECTIVE DATES: November 2, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo, Director, Office of Employment and Training Programs, Employment and Training Administration, Department of Labor, Room N–4469, 200 Constitution Avenue NW., Washington, DC 20210. Telephone: 202–535–0577 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Title III of the Job Training Partnership Act (JTPA or the Act), as amended by the Economic Dislocation and Worker Adjustment Assistance (EDWAA) Act, directs the Secretary of Labor (Secretary) to deobligate funds from States identified pursuant to section 303(b) of the Act, and to reallot and reobligate such funds by a Notice of Obligation (NOO) adjustment to current year funds to "eligible States" and "eligible high unemployment States" as set forth in sections 303 (a), (b), and (c) of JTPA. 29 U.S.C. 1653. The reallotment process was described in Training and Employment Guidance Letter No. 4–88, dated November 25, 1988, Subject: Reallotment and Reallocation of Funds under Title III of the Job Training Partnership Act (JTPA), as Amended. 53 FR 48737 (December 2, 1988).

NOO adjustments are being issued to adjust the Program Year (PY) 1989 (July 1, 1989–June 30, 1990) formula allotments in accordance with expenditure reports submitted to the Secretary by the States pursuant to Training and Employment Information Notice No. 30–88, dated May 18, 1989, Subject: Job Training Partnership Act (JTPA) Title III Financial Data. Department of Labor Regional Offices reviewed and confirmed that adequate backup documentation was available to reasonably support the reported expenditures.

Pursuant to the provisions of section 303(b) of JTPA and the limitations on carry-over imposed by section 6305(e) of the Omnibus Trade and Competitiveness Act (OTCA), the funds reallotted are an amount equal to the sum of unexpended funds in excess of 30 percent of the PY 1988 formula allotments and all unexpended funds made available by formula for PY 1987. 29 U.S.C. 1653(b); Sec. 6305(e), Pub. L. 100–418 (August 23, 1988). Such reallotted funds are from PY 1989 allotments made available by formula and, as stated above, result in either upward or downward adjustments to PY 1989 allotments.

Unemployment Data

The unemployment data used in the formula for reallotments, relative numbers of unemployed, and relative numbers of excess unemployed were for the July 1988 through June 1989 period. Long-term unemployment data used were for calendar year 1988. The determination of "eligible high unemployment States" for the reallotment of excess unexpended funds was also based on unemployment data for the period July 1988 through June 1989, with all average unemployment rates rounded to the nearest tenth of one percent. The unemployment data were provided by the Bureau of Labor Statistics, based on the Current Population Survey.

The table below is a distribution of the net changes to PY 1989 formula allotments.

Explanation of Table

Column 1: This column shows each State's unemployment rate for the 12 months ending June 1989.

Column 2: This column shows the amount of excess funds (unexpended PY 1988 funds in excess of 30 percent of the State's PY 1988 allotment and/or unexpended PY 1987 formula-allotted funds), which are subject to reallotment. PY 1989 funds in an amount equal to the excess funds identified will be deobligated and distributed as discussed below.

Column 3: This column shows total excess funds distributed among all "eligible States" by applying the regular Title III formula. "Eligible States" are those States that had no excess funds, according to the reports submitted.

Column 4: Eligible States with unemployment rates higher than the national average, which was 5.4 percent for the 12-month period, are "eligible high unemployment States." These eligible high unemployment States receive amounts equal to their share of the excess funds (the amounts shown in column 3) according to the regular Title III formula. This is Step 1 of the reallotment process. These amounts are shown in column 4.

Column 5: The remaining share of available funds ($3,361,200) for eligible States with unemployment rates less than or equal to the national average is distributed among all eligible States, again using the regular Title III allotment formula. This is Step 2 of the reallotment process. These amounts are shown in column 5.

Column 6: Net changes in PY 1989 formula allotment are presented. This column represents the decreases in Title III funds shown in column 2, and the increases in Title III funds shown in columns 4 and 5. NOOs in the amounts shown in column 6 are being issued to the States and other jurisdictions listed.

Equitable Procedures

Pursuant to section 303(d) of the Act, Governors of States required to make funds available for reallotment shall prescribe equitable procedures for making funds available from the State and substate grantees. 29 U.S.C. 1663(d).

Distribution of Funds

Funds are being reallotted by the Secretary in accordance with sections 303(a), (b), and (c) of the Act and section 6305(e) of the OTCA, using the factors described in section 302(b) of the Act. 29 U.S.C. 1652(b) and 1653(a), (b), and (c); Sec. 6305(e), Pub. L. 100-418 (August 23, 1988). Distribution of funds within States and other jurisdictions shall be in accordance with sections 302(c) and (d) of the Act (29 U.S.C. 1652(c) and (d)), and the JTPA regulations at 20 CFR 631.12(d), 54 FR 39118, 39140 (September 22, 1989).

Signed at Washington, DC this 31 day of October, 1989.

Roberts T. Jones,

Assistant Secretary of Labor.

BILLING CODE 4510-30-M

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 89-96; Exemption Application No. D-8005 et al.]

Grant of Individual Exemptions; Consolidated Lumber Co., Inc. Profit Sharing Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, DC. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 21, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

Consolidated Lumber Company, Inc. Profit Sharing Plan (the Plan), Located in Overland Park, Kansas

[Prohibited Transactions Exemption 89-96; Exemption Application No. D-8005]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to a proposed cash sale by the Plan to the Consolidated Lumber Company, Inc., a party in interest with respect to the Plan of interests (the Interests) in the Krupp Commercial Properties Limited Partnership, provided the Plan receives the greater of $30,000 or the fair market value of the Interests as determined at the time of the sale by an independent, qualified appraiser.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on September 14, 1989 at 54 FR 38008.

FOR FURTHER INFORMATION CONTACT: Ekaterina A. Uzlyan of the Department, telephone (202) 523-8194. (This is not a toll-free number.).

Ameritrust Company National Association (Ameritrust), Located in Cleveland, Ohio

[Prohibited Transaction Exemption 89-97; Exemption Application Nos. D-7833 and L-7834]

Exemption

The restrictions of section 406 (b)(2) or (b)(3) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(F) of the Code, shall not apply to the receipt of fees by Ameritrust from Financial Reserves Fund (the Fund), an open-ended investment company for which Ameritrust performs services, in connection with the investment of funds through a daily automated sweep arrangement of certain employee benefit trusts sponsored by certain incorporated and unincorporated businesses.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption (the Notice) published on August 30, 1989, at 54 FR 35946.

Written Comments: The Department received no requests for a hearing but did receive two comment letters with respect to the Notice. One commentator, a participant in a Keogh for which Ameritrust serves as the investment manager, expressed opposition to the grant of the exemption on the grounds: (1) That Ameritrust would be paid twice for the same service, and (2) that Ameritrust would receive an additional fee of .25% of the amount of the Keogh assets invested in the Fund. In response to this comment, Ameritrust indicated that the Fund is used only for the investment of cash. Therefore, the decision to invest in the Fund is made solely by account holders (the Account Holders) of the Keoghs after such Account Holders have received and read the most recent prospectus of the Fund and have stated in a letter that they are aware of the fees Ameritrust receives from the Fund and have authorized the use of the Fund for cash management in their Keoghs. In addition, with respect to those Keoghs for which Account Holders have waived the right to direct investments, Ameritrust will reduce its investment management fee by offsetting an amount equal to the annual fee of .25% of assets managed with respect to any of the Keoghs' assets invested in the Fund for the entire period of such investment.

The other comment was filed by representatives of the applicant on behalf of Ameritrust. The content of this comment indicates that in the first paragraph of the Notice, employee benefit trusts sponsored by both incorporated and unincorporated businesses are referred to as Keoghs or as a Keogh. Ameritrust indicates that a Keogh is an employee benefit trust which is sponsored by an unincorporated business which covers one or more self-employed individuals. Accordingly, the employee benefit trusts involved in the transactions which are sponsored by incorporated business are not Keoghs and should not have been referred to as such.

In Item 2 of the Summary of Facts and Representations (the Summary), the individual Account Holders who direct their own investments are described as those who have not waived their right to direct the investment of assets in the Keoghs. Ameritrust comments that this statement is accurate as to those

individuals who have adopted a Keogh or who participate in a Keogh adopted by their employer under a prototype Keogh plan, as described in Item 1 of the Summary. Ameritrust represents that the Account Holders are provided with a copy of the Fund's prospectus and are informed that they may withdraw from the Fund at any time. Ameritrust represents that the Account Holders are aware of the fees Ameritrust receives from the Fund and have authorized the use of the Fund for cash management in their Keoghs. Ameritrust represents that the Account Holders have received and read the most recent prospectus of the Fund and have stated in a letter that they are aware of the fees Ameritrust receives from the Fund.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on September 14, 1989 at 54 FR 38010.

individuals who have adopted a Keogh or who participate in a Keogh adopted by their employer under a prototype Keogh plan, as described in Item 1 of the Summary. However, Ameritrust represents that there is another group of employee benefit trusts (the Trusts), not described in the Notice, over which Ameritrust or banks affiliated with Ameritrust (the Affiliated Banks or Bank) exercise no investment discretion. These Trusts are sponsored by both incorporated and unincorporated businesses. Such Trusts are not established under a prototype plan, but are individually designed Trusts for which Ameritrust or the Affiliated Bank act as custodians or directed trustees. The reason Ameritrust or an Affiliated Bank have no investment discretion with respect to these Trusts is that the sponsors of such Trusts limited the appointment of Ameritrust or the Affiliated Banks to the role of custodian or directed trustee and not because Account Holders retain the right to direct their own investments.

Ameritrust further represents that, as with the directed prototype Keoghs, Ameritrust and the Affiliated Banks charge a custodial fee based on a range of .1% to .3% of the market value of the assets held in these Trusts. For such Trusts either: (1) The individual Account Holders direct their own investments, or (2) the sponsors of such Trusts have appointed investment managers who are unaffiliated with Ameritrust, the Affiliated Banks, or the manager or distributor of the Fund. It is represented that neither Ameritrust or any Affiliated Bank, as applicable, has discretionary control or responsibility with respect to the investment of the assets of such Trusts, not does Ameritrust or any Affiliated Bank, as applicable, render any investment advice with respect to such assets. It is represented that the unaffiliated fiduciary who has investment responsibility will make any decision to invest in the Fund for such Trusts, following disclosure to such fiduciaries of Ameritrust's relationship with the Fund. For these reasons, Ameritrust requests that the Trusts, as described herein, be included in the exemption.

Accordingly, after consideration of the entire record and subject to the above-described modifications, the Department has determined to grant the exemption.

FOR FURTHER INFORMATION CONTACT: Angelena C. Le Blanc of the Department, telephone (202) 523-8883. (This is not a toll-free number.)

Westchester Teamsters Pension Fund (the Plan) Located in Elmsford, New York

[Prohibited Transaction Exemption 89-93; Exemption Application No. D-7931]

Exemption

The restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to (1) the purchase by the Plan from Local 456 Holding Corp. (the Corp.), a corporation owned by members of Teamsters and Chauffeurs Local 456, of approximately three acres of undeveloped land (the Land), and (2) the extension of credit by the Corp. to the Plan for up to 90 days after the closing date of the purchase pursuant to a non-interest bearing note in the amount of half of the purchase price, provided that the purchase price is not more than the fair market value of the Land on the date of the purchase, and further provided that the independent fiduciary to the Plan with respect to these transactions, Howard Lieberman, monitors these transactions on behalf of the Plan and takes all appropriate actions necessary to safeguard the interests of the Plan and its participants and beneficiaries.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on August 8, 1989, at 54 FR 32539.

Written Comments: The Department received two comment letters. One of these states that the commentator believes the proposed transaction to be a sound investment but would perfer to have at least some of the funds needed for the proposed purchase applied first to annual cost-of-living increases in pension benefits. The other comment letter expresses concern that the proposed investment may jeopardize pension benefits.

In response to these letters, the applicant states that the monies that would be invested in the proposed purchase are in addition to, and would not endanger, the reserves that the Plan maintains, as required under the Code, to fund pension benefits. The applicant explains that the purpose of the proposed purchase is to increase the Plan's assets and that the Plan fiduciaries have consulted professionals who have assured them that the proposed purchase is a sound investment which will diversify the Plan's asset base. The applicant asserts that the decision to invest a portion of the Plan's assets in real estate at this time, instead of using these assets to provide a cost-of-living increase for retired participants, is intended to insure the Plan's ability both to continue paying the pensions of retired participants and also to pay benefits to active participants when they retire.

After considering the entire record, including both written comments, the Department has determined to grant the exemption as proposed.

FOR FURTHER INFORMATION CONTACT: Mrs. Miriam Freund, of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 31st day of October, 1989.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 89-25972 Filed 11-2-89; 8:45 am]

BILLING CODE 4510-29-M

[Application No. D-7968] et al.

Proposed Exemptions; Liberty House Restaurant Corporation Profit Sharing Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of Proposed Exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this Federal Register Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, room N-5671, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, room N-5507, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the Federal Register. Such notice shall include a copy of the notice of pendency of the exemption as published in the Federal Register and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Liberty House Restaurant Corporation Profit Sharing Plan (the Plan), Located in Atlanta, Georgia

Application No. D-7968

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the Plan's proposed cash sale (the Sale) of certain improved real property (the Property) located in Atlanta, Georgia to Richard Lewis (the Applicant), a party in interest with respect to the Plan; provided that the cash consideration paid on the date of the sale by the Applicant to the Plan is the greater of either the appraised fair market value of the Property or the Plan's aggregate cost of acquisition, financing and holding of the Property as of the date of the Sale.

Summary of Facts and Representations

1. The Plan is a defined contribution plan with 52 participants as of September 14, 1988 and assets totalling $1,256,567.31 as of April 30, 1989. The Applicant is the Plan's trustee and administrator. He is also the owner of 60% of the issued and outstanding common stock of Liberty House Restaurant Corporation (the Employer), the Plan's sponsor, and a member of the Employer's board of directors.

2. The Property is located at 788 West Paces Ferry Road in the Buckhead section of Atlanta, Fulton County, Georgia. The Property consists of a luxury residence with the swimming pool situated on a heavily-landscaped acre lot in an Atlanta residential neighborhood.

3. The Plan acquired the Property on August 20, 1987 from Richard and Ellen Clapp (the Clapps). The Applicant represents that the Clapps are unrelated to any employee of the Employer, or the Applicant; have never been employed by the Employer; and have had no business relationships with either the Employer, or the Applicant. The Plan paid the Clapps $465,000 for the Property, which was encumbered by a $265,000 mortgage from the Buckhead Bank (the Bank).

4. Beginning on August 20, 1987, the date of the Plan's purchase of the Property, the Applicant directed extensive construction and renovation (the Improvements) to the Property. The Plan has paid $627,167.15 for the Improvements through March 1989. In order to finance the Improvements directed by the Applicant, the Property was additionally encumbered by a $235,000 construction loan from the Bank.

5. The Plan has leased the Property to the Applicant under a written lease (the Lease) dated July 1, 1988.[1] The Lease provides that, in addition to the Applicant, another employee of the Employer, a party in interest with respect to the Plan, may reside at the Property. The Lease term is thirty-six months and permits two optional renewals for five years each. The base monthly rental is $6,000. In addition to the base rent, the Applicant is responsible for utilities, including garbage, water, sewage, electricity and gas. The Applicant has represented that all amounts due under the Lease have been paid.

[1] The Department is not, in this notice, proposing to grant exemptive relief for any prior prohibited transactions involving the Property, including the Lease or any use of the Plan's assets to benefit a party in interest. In this regard, the Applicant has represented that a Form 5330, Return of Initial Excise Tax Relating to Pension and Profit Sharing Plans, will be filed with the Internal Revenue Service and that applicable excise tax in connection with any prior prohibited transactions will be paid by the Applicant within 90 days of the Department's grant of an exemption.

BEST COPY AVAILABLE

VOL 54 NO 3 1989 ISS 212 UMI

6. Joseph L. Walker, S.R.A., M.A.I., of Joseph L. Walker and Associates, Inc., real estate appraisers and consultants in Atlanta, Georgia, reviewed the monthly rental payment of $8,000 for the Property as of April 7, June 21 and July 13, 1989. He found the Applicant's payment to the Plan to represent the fair market rental value of the Property.

7. The Applicant now proposes to purchase the Property for cash at a price which will be the greater, on the date of the Sale, of either the aggregate cost of the Plan's acquisition, financing and holding of the Property or its appraised fair market value. The Applicant will also pay all fees, commissions and expenses in connection with the Sale.

8. During the course of its ownership of the Property, the Applicant represents that the aggregate cost to the Plan for the acquisition, financing and holding of the Property through April 20, 1989 amounts to $1,191,706.70.

9. The Property was appraised by Terrence L. Love, M.A.I., of the firm of Land Development Analysts. Mr. Love determined the fair market value of the Property to be $1,130,000 as of June 20, 1989.

10. In summary, the Applicant represents that the transaction meets the statutory criteria of section 408(a) of the Act because: (a) The Sale will be a one-time transaction; (b) The Sale will be consumated for cash; (c) The Plan will pay no fees, commissions or expenses in connection with the Sale; (d) The Plan will receive the greater, on the date of the Sale, of either the aggregate cost to the Plan of the acquisition, financing and holding of the Property or its appraised fair market value; (e) The Sale will enable the Plan to divest itself of the Property and pursue alternative investments; and (f) The Applicant will file Form 5330, Return of Initial Excise Tax Relating to Pension and Profit Sharing Plans, with the Internal Revenue Service and pay applicable excise tax in connection with past prohibited transactions concerning the Property within 60 days of the grant of this proposed exemption.

FOR FURTHER INFORMATION CONTACT: Mrs. B.S. Scott of the Department, telephone (202) 523-8883. (This is not a toll-free number.)

Howard Simon and Associates, Inc. Profit Sharing Plan (the Plan), Located in Deerfield, IL

[Application No. D-7964]

Proposed exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to: (1) the purchase, by the individually-directed accounts (the Rollover Accounts) in the Plan of Mr. Howard Simon (Mr. Simon) and his spouse, Mrs. Elizabeth M. Simon (Mrs. Simon) of certain computer equipment (the Equipment), for the total cash consideration of $14,625; (2) the leasing (the Lease) of the Equipment by the Rollover Accounts to Dudley Enterprises, Inc. (DEI), a party in interest with respect to the Plan; (3) the guarantee of rental payments under the Lease by Mr. and Mrs. Simon; and (4) the future sale of the Equipment by the Rollover Accounts to DEI pursuant to an option to purchase (the Purchase Option), provided the terms of the transactions are at least as favorable to the Rollover Accounts as those obtainable in arm's length transactions with unrelated parties.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with total assets of $121,944 as of March 31, 1989. As of August 14, 1989, the Plan had ten participants. The trustees of the Plan (the Trustees) are Mr. and Mrs. Simon and Mr. Mark Schwechter.

2. Both Mr. and Mrs. Simon have regular accounts (the Regular Accounts) and rollover accounts in the Plan, the latter of which were merged into the Plan from a predecessor plan. As of March 31, 1989, Mr. and Mrs. Simon had $21,001 and $576, respectively, in their Regular Accounts. Also as of March 31, 1989, Mr. and Mrs. Simon had total assets of $55,649 and $2,929, respectively, in their Rollover Accounts. Although Mr. and Mrs. Simon are permitted to direct investments in their Regular Accounts, they and the other participants have elected to have the Trustees make decisions involving Plan investments in the Regular Accounts. Mr. and Mrs. Simon, may, however, direct investments in their Rollover Accounts. Mr. and Mrs. Simons' Rollover Accounts are the only accounts that will be involved in the subject transactions and are described below.

3. Howard Simon and Associates, Inc. (HSAI) is the sponsor of the Plan. HSAI is an actuarial consulting firm that maintains its principal place of business at 425 Huehl Road, Building No. 20, Northbrook, Illinois. DEI, which is located in Des Plaines, Illinois, is in the video rental business. DEI is 100 percent owned by Mrs. Simon.

4. In May 1989, HSAI purchased certain IBM computer hardware and related network items for $33,275 from an unrelated party, Unique Business Systems Corporation of Santa Monica, California. The purchase was made in three separate installments, all of which were related to the delivery of the Equipment. At present, HSAI is not indebted to the seller.

5. To provide the Rollover Accounts with a higher income-yielding investment, HSAI proposes to sell the following Equipment to the Rollover Accounts for cash: 1 IBM PS/2 Model 70, 60 MB Hard Disk, IBM Ram, 1.44 MB Floppy; 3 IBM 8512 Color Monitors; 1 Bar Code Reader; 1 Cash Drawer; 1 Okidata 182 & Printer w/Cable; 1 IBM DOS 3.3; 1 80386 Memory Expansion; 1 Novell ELS Network Software (4-User Limit); 1 Puredata ArcNet Card; 1 RG62 25' Cable; 1 Continuous Power Supply (450 watt); 1 Maynard External Tape Backup (60MB); 1 Hayes 2400 Baud Internal Modem; 2 IBM PS/2 Model 286 W/1 MB RAM, 1.44 MB Floppy. The total sales price for the Equipment will be $14,625. This amount reflects the fair market value of the Equipment as determined on August 15, 1989 by Mr. James Sherwood (Mr. Sherwood), an independent computer dealer who is affiliated with Technical Software Development Company of Des Plaines, Illinois. Both Rollover Accounts will hold proportionate interests in the Equipment and such interests will not exceed 25 percent of the assets that are contained in each account. Thus, Mr. Simon's Rollover Account will invest $13,894 for a 95 percent interest in the Equipment and Mrs. Simon's Rollover Account will invest $731 for a 5 percent interest in the Equipment. In addition, neither Rollover Account will be required to pay any fees or commissions in connection therewith.

6. Following the acquisition, the Rollover Accounts will lease the Equipment to DEI under the provisions of a written lease. The terms of the Lease will be those that are commonly used by commercial leasing companies and will provide for an arm's length dealings between the Rollover Accounts and DEI. The Lease will be for a duration of five years and at a monthly rental of $308 in accordance with Mr. Sherwood's determination of the fair market rental value of such Equipment. The Lease will require that DEI give the Plan a security deposit that will be equal to one month's rent. In addition, the Lease will require that DEI maintain adequate insurance on the Equipment and designate the Rollover Accounts as the loss payees of such insurance. Further, the Lease will provide that DEI bear all costs that are incidental to the repair and maintenance of the Equipment. In the event DEI makes any improvements to the Equipment, the Lease will provide that such improvements belong to the Rollover Accounts. Finally, because DEI is a start-up business, Mr. and Mrs. Simon propose to guarantee rental payments under the Lease should a rental delinquency or default occur on the part of DEI. As of February 15, 1989, Mr. and Mrs. Simon had a combined net worth that was in excess of $2.3 million.

7. At the end of the Lease term, DEI will have an option to purchase the Equipment, for cash, from the Rollover Accounts. The proposed sales price for the Equipment will be the greater of the fair market value of the Equipment as determined by a qualified, independent appraiser or $1,232 representing the Equipment's salvage value. In calculating the fair market value of the Equipment, the independent appraiser will consider the value of any improvements that are affixed to the Equipment. The Rollover Accounts will not be required to pay any fees or commissions in connection with the Purchase Option transaction. In the event DEI does not exercise the Purchase Option, the Rollover Accounts will sell the Equipment to an unrelated party.

8. In addition to calculating the fair market value and fair market rental value of the Equipment, Mr. Sherwood represents that the Equipment would be a very sound investment for the Rollover Accounts and have a maximum potential resale value. Mr. Sherwood also states that the salvage value of the equipment would equal four months rent.

9. In summary, it is represented that the proposed transactions will satisfy the statutory criteria for an exemption under section 408(a) of the Act because: (a) The Rollover Accounts will purchase the Equipment from HSAI for cash; (b) the sales price for the Equipment that will be acquired by the Rollover Accounts will be based on the independently appraised value of the Equipment as determined by Mr. Sherwood; (c) the Rollover Accounts will receive rent under the Lease that is based upon the fair market rental value of the Equipment as determined by Mr. Sherwood; (d) Mr. and Mrs. Simon will guarantee rental payments under the Lease in the event of a rental default or delinquency by DEI; (e) DEI will purchase the Equipment, for cash, at the conclusion of the Lease pursuant to the Purchase Option for the greater of the Equipment's fair market value as determined by a qualified, independent appraiser or $1,232, representing the Equipment's salvage value; (f) the Rollover Accounts will not be required to pay any fees or commissions in connection with the sale or the exercise of the Purchase Option; and (g) Mr. and Mrs. Simon, who are the only participants in the Plan whose accounts will be affected by the transactions proposed herein, have determined that the proposed transactions will be in the interest of their Rollover Accounts and they desire that such transactions be consummated.

Notice to interested persons: Because Mr. and Mrs. Simon are the only participants in the Plan whose individual accounts will be affected by the proposed transactions, it has been determined that there is no need to distribute the notice of proposed exemption to interested persons. Therefore, written comments and requests for a public hearing are due 30 days from the date of publication of this notice of proposed exemption in the Federal Register.

FOR FURTHER INFORMATION CONTACT: Ms. Jan D. Broady of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Ocmulgee Fields, Inc. Profit Sharing Plan and Trust (the Plan) Located in Macon, Georgia

[Application No. D-7966]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406 (a) and (b) (1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the Plan's proposed cash sale (the Sale) ot Ocmulgee Fields, Inc. (the Employer), the Plan's sponsor and, as such, a party in interest with respect to the Plan, of a certain parcel of improved real property (the Property) located in Macon, Georgia; provided that the terms and conditions of the proposed Sale are at least as favorable to those obtainable by the Plan in an arm's-length transaction between unrelated parties.

Summary of Facts and Representations

1. The Plan is a defined contribution plan with approximately 100 participants. As of May 31, 1988, the Plan held total assets of $1,198,535. The trustee (the Trustee) of the Plan is Charles H. Jones, who is also an officer and director of the Employer. He is also the father of Jeff Jones, the president of the Employer. The Employer is in the business of buying, selling, developing and managing real property with a specialization in hotel, motel, restaurant, and convention center developments. The Employer is currently the owner, developer, and manager of several different hotel and motel properties.

2. The Property is located on the western side of Holiday North Drive in Macon, Georgia, and is legally described as Land Lot 346 of the Thirteenth Land District of Bibb County. The Property consists of 7.148 acres of unimproved land. The Employer currently owns two hotels and a conference center on land adjacent to the Property.

3. The Property was purchased by the Plan on October 10, 1985 for a total consideration of $607,580.00 from Clarence S. and Linton S. Lundy, who, the applicant, represents are unrelated parties. The Property was purchased by the Plan as part of a development strategy to create a hotel/motel/conference center complex. The Property has produced no income and the Trustee repesents that it has not been used by any party-in-interest with respect to the Plan. Since its acquisition, the Plan has incurred $129,239.82 in interest costs; $7,479.03 in taxes; $22,736.50 for engineering, legal closing costs, clearing and grading. The Plan's aggregate cost of acquisition and holding the Property $767,037.35 as of July 19, 1989.

4. Robert H. Gerhardt, MAI, SREA, CPM of Gerhardt and Contemporaries, in Macon, Georgia, and his associate James L. Green, (the Appraisers) have appraised the Property. The Appraisers repesent that they are independent of the Trustee, the Employer and the Plan. The Appraisers determined that, as of February 28, 1989, the fair market value of the Property was $715,000.00.

Because the Property is contiguous to other real estate owned by the Employer, Mr. Gerhardt performed an updated appraisal to determine the special value of the Property to the Employer. Mr. Gerhardt determined that, as of May 19, 1989, a special value reflecting an additional 25% premium to the Sale price should be added to the earlier appraisal. Accordingly, the resultant appraised value of the

BEST COPY AVAILABLE

VOL 54 NO 212 SS 2 1 2 NO 3 1989 UMI

Property, including the special value to the Employer, totals $893,500 pursuant to Mr. Gerhardt's updated report of July 26, 1989. At its appraised special value, the Property currently constitutes approximately 66% of Plan assets.

5. The Employer now proposes to purchase the Property from the Plan for cash at the greater of $893,500 or the appraised value (including special value to the Employer) as of the date of the Sale. No fees, commissions or expenses will be paid by the Plan in connection with the Sale. The Trustee has determined that the highest and best use of the Property would be development into commerical property and that it is in the Plan's best interest to sell the Property to the Employer rather than attempt to have the Plan develop the Property itself. The Employer intends to build a hotel on the Property.

6. In summary, the Applicant represents that the proposed transaction will meet the statutory criteria of section 408(a) of the Act because: (1) The Sale will be a one-time transaction; (2) The Sale will be consummated for cash; (3) The Plan will receive the greater of $893,500 or the value of the Property (including special value to the Employer) as determined by a qualified independent appraiser as of the date of Sale; (4) The Plan will pay no fees commissions or expenses in connection with the Sale; (5) The Plan will divest itself of an investment which constitutes approximately 66% of Plan assets; and (6) The Trustee has decided that the Sales is in the best interest of the Plan and its participants and beneficiaries.

FOR FURTHER INFORMATION CONTACT: Mrs. B.S. Scott of the Department, telephone (202) 523–8883. (This is not a toll-free number.)

Yehudi M. Felman, M.D., P.C. Defined Benefit Pension Plan (the Plan) Located in Brooklyn, New York

[Application No. D–8023]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption if granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the purchase of certain shares in a cooperative corporation by the Plan from Yehudi M. Felman, M.D., P.C. (the Employer), a disqualified person with respect to the Plan, and the subsequent lease of an apartment from the Plan to the Employer, provided that the terms of the transactions are no less favorable than the Plan could obtain in arm's-length transactions with an unrelated party and that the transactions represent no more than 25 percent of the assets of the Plan at the time of purchase.[1]

Summary of Facts and Representations

1. The Employer is a professional corporation, having subchapter S status under the Code, engaged in the practice of medicine since 1971. The Plan is a defined benefit plan having assets of $1,389,841 as of June 30, 1989. Yehudi Felman (Felman) is the sole owner of the Employer and is also a trustee of the Plan. Felman and his wife, Brenda Felman, are the only participants in the Plan.

2. The Employer has entered into a subscription agreement with Bay Parkway Owners Corp. (Bay Parkway), a cooperative corporation owning an apartment building, for the purchase of 1,815 shares of Bay Parkway allocated to a professional apartment. The apartment consists of eight rooms and approximately 1,400 square feet. The subscription price under the agreement is $205,000. The apartment is presently leased to the Employer.

3. The Plan proposes to purchase the 1,815 shares of Bay Parkway by assumption of the subscription agreement for the subscription price of $205,000. The purchase will not account for more than 25 percent of the assets of the Plan at the time of the transaction. The Plan will pay no more than fair market value for the shares at the time of purchase, based on an independent appraisal of the shares to be updated at the time of closing.

The Plan obtained an appraisal on the apartment from Anthony Giuliano (Giuliano), a real estate broker located in Brooklyn, New York. The applicant represents that Giuliano is independent of the Plan and the Employer. According to Giuliano, the fair market value of the apartment as of November 2, 1988, was the same as the subscription price of $205,000. The $205,000 purchase price will be paid in cash by the Plan and no indebtedness will be involved in the purchase. Also, the Plan will pay no fees or commissions in regard to the purchase.

4. Following the purchase of the shares by the Plan, the Plan proposes to lease the apartment to the Employer. The Employer will pay no less than fair market rent as established by independent appraisal. The lease will be net of expenses to the Plan. The initial lease will be for three years, with renewals every three years based on an updated independent appraisal as to fair market rent. The total lease tem will be for nine years, with two renewal options of three years each to be exercised by the Employer. In a letter dated August 31, 1989, Giuliano stated that two comparable facilities to the apartment currently rented for $30 and $25 per square foot. Accordingly, the applicant proposes that the initial lease of the apartment to the Employer will be for no less than $27.70 per square foot, which is a weighted average of the two comparable leases.

5. In summary, the applicant represents that the proposed transactions will satisfy the statutory criteria of section 4975(c)(2) of the Code because: (1) The Plan will pay no more than fair market value for the 1,815 shares of Bay Parkway at the time of purchase; (2) the fair market value of the shares and the fair market rent of the apartment will be established by an appraiser who is independent of the Plan and the Employer; (3) the transactions will account for no more than 25 percent of the assets of the Plan; and (4) the purchase of the shares will be entirely for cash and the Plan will pay no fees or commissions in regard to the transactions.

Notice to Interested Persons: Because Felman is the applicant and he and his wife are the only participants in the Plan, it has been determined that there is no need to distribute the notice of pendency to interested persons. Comments and requests for a hearing must be received by the Department within 30 days of the date of publication of this notice of proposed exemption.

FOR FURTHER INFORMATION CONTACT: Paul Kelty of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

Great Southern Printing and Manufacturing Company Profit Sharing Plan and Trust (the Plan), Located in Frederick, MD

[Application No. D–8093]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section

[1] Because Yehudi Felman is the sole shareholder of the Employer and he and his wife, Brenda Felman, are the only participants in the Plan, there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510.3–3(b). However, there is jurisdiction under Title II of the Act under section 4975 of the Code.

408(a), 408 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale by the Plan of certain improved real property (the Property) to Great Southern Printing and Manufacturing Company (the Employer), for $143,000, provided the amount paid for the Property is not less than its fair market value at the time the transaction is consummated.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with 225 participants and total assets of $3,597,040 as of December 31, 1988. The trustee of the Plan (the Trustee) is Mr. George B. Delaplaine, Jr., who is an officer of the Employer. Investment decisions for the Plan are made by an administrative committee comprised of eight employee/participants among whom include the Trustee. The Employer, which maintains its headquarters at 438 West Patrick Street, Frederick, Maryland, is engaged, through its various subsidiaries, in newspaper publishing as well as in the provision of cable television services to subscribers in Maryland, West Virginia and Pennsylvania.

2. On April 12, 1978, the Plan purchased, for investment purposes, certain residential property located at 704 East Patrick Street, Frederick, Maryland. The Property, which is contiguous to other unimproved property owned by the Employer, consists of a 12,599 square foot parcel of land on which is situated a two-story masonry dwelling that has been subdivided into two apartments. Also comprising the Property are a small brick building at the rear of the dwelling, a wood frame barn, an asphalt driveway and a chain link fence. The Plan purchased the Property at a public auction from the Estate of Ada Nusbaum, an unrelated party. The Plan paid the seller $35,000 in cash. At present, the Property is not encumbered by a mortgage.

3. Since the Plan has owned the Property, it has incurred operating expenses in excess of $29,000 and it has expended approximately $50,000 in capital improvements, none of which have been financed. Also since the time of acquisition, the Plan has leased the Property to unrelated parties and there has been no use of such Property by parties in interest. With respect to the leasing of the Property, the Plan has received rental income of approximately $60,205. At present, Ms. Louis Anne Morley and Mrs. Eve Tagalang occupy the demised premises and they pay the Plan $320 and $290, respectively, in monthly rent.

4. The Trustee realizes that the Plan's assets that are invested in the Property would be enhanced if they were placed in other investment vehicles. Accordingly, the Trustee requests an administrative exemption from the Department in order to sell the Property to the Employer for the total cash consideration of $143,000. It is believed that the proposed sale will enable the Employer to expand its operations, increase its future revenues and permit greater contributions to the Plan.

5. The Property was appraised by Mr. Leslie U. Hutzell (Mr. Hutzell), Realtor-Appraiser and Certified Appraiser/Senior, an independent appraiser, who is affiliated with Hutzell's Realty Associates and Appraisal Service of Frederick, Maryland. On February 11, 1989, Mr. Hutzell placed the fair market value of the Property at $130,000. In an addendum to the appraisal dated August 25, 1989, Mr. Hutzell represented that the Property would have no unique or special value to the Employer by reason of its proximity to other property owned by the Employer.[2]

6. To evidence the proposed sale transaction, the Plan and the Employer will enter into an agreement of purchase and sale (the Agreement). The Agreement provides that the Property will be sold to the Employer in an "as is" condition for $143,000. The Agreement also requires the Employer to make a $5,000 downpayment and pay the balance of the purchase price in cash, certified check or title company check at closing which will occur within 60 days after the Plan and the Employer execute the Agreement. At the time of closing, the Plan will give exclusive possession of the Property to the Employer. The Agreement further requires the Plan to convey good and merchantable title to the Employer; states that the Employer will accept the existing leases on the Property and insure the premises; and stipulates that real estate taxes, water, rent, sewer charges and other public charges will be apportioned as of the closing. Finally, the Agreement provides that the Employer will pay all expenses and commissions that are associated with the proposed sale.

7. In summary, it is represented that the proposed sale will satisfy the criteria for an administrative exemption under section 408(a) of the Act because: (a) The sale will be a one-time transaction for cash; (b) the Property has been appraised by Mr. Hutzell, a qualified, independent appraiser; (c) the sales price for the Property will be greater than the fair market value of the Property as determined by Mr. Hutzell; (d) the Plan will not be required to pay any real estate fees or commissions in connection with such sale; and (e) the proposed transaction will allow the Plan to reinvest its assets in higher-yielding investment vehicles.

[2] The applicant represents that the amount by which the purchase price for the property exceeds its fair market value, if treated as an Employer contribution to the Plan when added to the balance of the annual additions to such Plan, will not exceed the limitation prescribed by section 425 of the Internal Revenue Code.

Tax Consequences of Transaction

The Department of the Treasury has determined that if a transaction between a qualified employee benefit plan and its sponsoring employer (or affiliate thereof) results in the Plan either paying less than or receiving more than fair market value such excess may be considered to be a contribution by the sponsoring employer to the plan and therefore must be examined under applicable provisions of the Internal Revenue Code, including sections 401(a)(4), 404 and 415.

FOR FURTHER INFORMATION CONTACT: Jan D. Broady of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Bi-County Radiology Medical Group, Inc. Profit Sharing Plan and Trust (the Plan), Located in Yuba City, California

[Application No. D–8113]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed sale of certain real property (the Property) by the Plan to Bi-County Radiology Medical Group, Inc., (the Employer), a party in interest with respect to the Plan, provided the Plan receives the greater of $149,000 or the fair market value as determined at the time of the sale by an independent qualified appraiser.

Summary of Facts and Representations

1. The Plan, established on February 1, 1970, is a defined contribution profit sharing plan, which as of September 30, 1988, had 21 participants and $3,413,640 in net assets. The current trustees are

VOL 54 SS 212 NO 3 1989 UMI

Robert Wallace, M.D., Lynn Frink, M.D., Robert Wankmiller, M.D., Owen Van Kirk, M.D., and Henry Reimers, CPA (the Trustees). The Trustees, except for Robert Wallace, M.D., and Henry Reimers, CPA are also twenty percent owners of the Employer. The Employer is a California corporation engaged in the practice of radiology.

2. On July 10, 1987, the Plan bought the Property for $145,000 from an unrelated third party The Property consists of three contiguous parcels of unimproved vacant land located in Yuba City, California, and was originally purchased in order to diversify the Plan's investment portfolio and to increase the return to the Plan. The Property is adjacent to property owned by the Employer, however, the applicant maintains that the Property has not been used by any parties in interest since its acquisition by the Plan.

3. The applicant proposes to sell the Property to the Employer for cash with no expenses related to the transfer to be paid by the Plan. An appraisal of the Property was prepared on March 31, 1989, by Forrest C. Geary, M.A.I. (Mr. Geary), an independent and qualified real estate appraiser and consultant. Mr. Geary determined that the fair market value of the Property as of March 16, 1989, was $149,000. An update to this appraisal, prepared on September 1, 1989 also by Mr. Geary, concluded that the adjacency of the Property to the Employer's property does not merit a premium above the fair market value of the original three contiguous parcels.

4. The applicant represents that the transaction is desirable for the Plan as the sale will increase the liquidity of the Plan's investment portfolio. The transaction is protective of the Plan because the fair market value of the Property was determined by a qualified independent appraiser. The applicant maintains that economic hardship will result if the transaction is denied as the Plan will forego an opportunity to invest in vehicles with a higher return.

5. In summary, the applicant represents that the transaction satisfies the statutory criteria of section 408(a) of the Act and section 4975(c)(2) of the Code because:

(a) The proposed sale will be a one-time cash transaction;

(b) The price paid to the Plan will be the greater of $149,000 or the fair market value as determined at the time of the sale by an independent qualified appraiser;

(c) The Plan will pay no expenses associated with the sale;

(d) The sale will allow the Plan to liquidate its assets and will provide cash for investments with a higher yield.

FOR FURTHER INFORMATION CONTACT: Ekaterina A. Uzlyan of the Department telephone (202) 523-8194. (This is not a toll-free number.)

Ed Miller & Sons, Inc. Profit Sharing Plan (the PS Plan) and Ed Miller & Sons, Inc. Money Purchase Pension Plan (the MP Plan; together, the Plans), Located in Omaha, Nebraska

[Application Nos. D-8160 and D-8161]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed loans (the Proposed Loans) of up to 25% of the assets of the PS Plan and of the MP Plan to Miller Developments (the Partnership), a party in interest with respect to the Plans, under the terms and conditions described in this notice of proposed exemption, provided such terms and conditions are not less favorable to the Plans than those obtainable in an arm's-length transaction with an unrelated party.

Temporary nature of exemption: If the proposed exemption is granted it will be effective as to loans entered into within four years from the date of granting of this exemption.

Summary of Facts and Representatives

1. The Plans are both defined contribution plans which are sponsored by Ed Miller & Sons, Inc. (Miller), a corporation engaged in the construction business in Omaha, Nebraska. Each Plan currently has ten participants. As of April 30, 1988, the PS Plan had assets of $1,914,122 and the MP Plan had assets of $514,426.

2. The Proposed Loans are to be made to the Partnership, a Nebraska general partnership, for the purpose of developing real estate. The Partnership is composed of Miller, which has a 55% interest, and three individuals who are officers, directors and employees of Miller. The Partnership is thus a party in interest with respect to the Plans.

3. The applicants have requested an exemption which would permit the Plans to loan up to 25% of their assets to the Partnership. The Proposed Loans will require semi-annual payments of principal and interest such that the loans will be fully repaid over a 15 year term. The interest rate for the first of the Proposed Loans is expected to be at 10% per annum, as this has been determined to be the current fair market rate of interest by the Plans' independent fiduciary (see rep. 6, below). The independent fiduciary will review and, if necessary, renegotiate the interest rate for each of the Proposed Loans at the time such loan is actually made, in order that each Proposed Loan will be at the fair market interest rate.

4. Each Plan participant will be given the opportunity to participate in this investment. Each participant will initially be offered the opportunity to invest a pro rate portion of his or her account balance in the Proposed Loan, up to 25% of his or her account balance. If any participants decline, their share will be offered to those participants who wish to invest, provided that no participant in either plan will be permitted to invest more than 25% of his or her account balance in the Proposed Loans.

5. The Proposed Loans will be secured by a First Trust Deed on improved real property in the Horizon West Industrial Park located at 156th Street and Center Road, Omaha, Nebraska (the Property). The Property consists of three Lots, Lots 10, 11 and 12. Lot 12 has been appraised by Mr. Leon F. Black, an independent real estate appraiser in Omaha, Nebraska, as having a fair market value of $760,000 as of July 22, 1989. The first of the Proposed Loans will be secured by a First Deed of Trust on Lot 12. The applicants represent that the fair market value of Lot 12 as appraised by Mr. Black represents more than 150% of the Proposed Loan on Lot 12. As Lots 10 and 11 are developed, appraisals will be made of those Lots, and the appraised value of the Lots will represent more than 150% of the value of any Proposed Loans with respect to those Lots. The First Trust Deeds will be recorded and otherwise perfected under local law.

6. Norwest Bank Nebraska, N.A. (the Bank) presently acts as trustee of the Plans and has agreed to continue to act as the independent fiduciary for the Plans with respect to the Proposed Loans for their duration and will undertake all actions to protect the Plans and safeguard their interests. Mr. John Atkins is a trust officer with the Bank and has had more than 10 years experience as a plan fiduciary. Mr. Atkins represents that he understands his responsibilities, duties and liabilities as a fiduciary under the Act. The Bank will have the authority to monitor the collateral to ensure that its value remains at least 150% of the outstanding balance of the Proposed Loans, and the Bank will act on behalf of the Plans to require additional collateral should the existing collateral decrease in value below the 150% limit. The applicants represent that the Bank is independent of Miller, the Partnership and its individual partners, and that less than 1% of the net receipts of the Bank are derived from Miller, the Partnership and its individual partners.

7. Mr. Atkins has reviewed the terms of the Proposed Loans and has determined that the transactions are appropriate for the Plans and in the best interests of the Plans. Mr. Atkins represents that the Proposed Loans would provide a prudent diversification of the Plans' assets and that the interest rate on the Proposed Loans would be at fair market terms and would be favorable to the Plans. Mr. Atkins represents that the Proposed Loans will be adequately secured based upon Mr. Black's appraisal, and because the Property is in a viable commercial area.

8. Mr. John Pearson is a vice president with the Bank and has reviewed the Proposed Loans in his capacity as an experienced loan manager for the Bank. Mr. Pearson represents that the interest rate and other terms of the Proposed Loans, and the security provided, are fair market terms. Mr. Pearson represents that based upon his experience as a corporate bank loan officer of the Bank, he would grant a loan with similar terms and conditions.

9. Prior to the Plans' entering into each of the Proposed Loans, the Bank's trustee and loan officer will each certify by letter to the Plans that such loan would be an appropriate investment for the Plans, and that the terms of each loan are equal to or better than those which the Plans could receive in dealing with an unrelated party. Each loan made will be required to satisfy the terms and conditions described in this notice of proposed exemption.

10. In summary, the applicants represent that the Proposed Loans satisfy the criteria of section 408(a) of the Act because: (1) The Proposed Loans will at no time represent more than 25% of the assets of either of the Plans or of any individual account of any participant in either of the Plans; (2) the Proposed Loans will be adequately secured at all times by property having an appraised value of at least 150% of the amount of the loans; (3) the Plans' independent fiduciary, the Bank, has reviewed the terms of the Proposed Loans and determined that it would make a loan under similar terms and conditions, (4) the Bank has determined that the Proposed Loans are appropriate for the Plans and in the best interests of their participants and beneficiaries; and (5) the Bank will monitor the Proposed Loans and will take whatever action is necessary to protect the Plans' rights under the loans.

Vinings Chemical Company, Inc. Profit Sharing Plan and Trust (the Vinings Profit Sharing Plan) and Vinings Industries, Inc. Section 401(k) Retirement Savings Plan and Trust (the Vinings 401(k) Plan; collectively, the Vinings Plans), Located in Atlanta, Georgia

[Application Nos. D-8201 through D-8203]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed cash sale (the Sale) by the Vinings Plans of certain securities (the Securities) to Laporte, Inc., a party in interest with respect to the Vinings Plans, provided that the consideration paid for the Securities is either the greater of the original consideration paid by the Vinings Plans for the acquisition of the Securities or the fair market value of Securities on the date of the Sale.

Summary of Facts and Representations

1. The Vinings Plans are qualified defined contribution plans with the Vinings Profit Sharing Plan having 49 participants and possessing total assets of $1,470,000, as of December 31, 1988, and the Vinings 401(k) Plan having 46 participants and possessing total assets of $1,300,000, as of December 31, 1988. Vinings Industries, Inc. (Vinings) is the sponsor of the Vinings Plans. Mr. J. Robert Carpenter is president of Vinings and the trustee of the Vinings Plans (the Trustee). He has exclusive authority to manage, control, and invest the assets of the Vinings Profit Sharing Plan. As the trustee of the Vinings 401(k) Plan, Mr. Carpenter must invest its assets in accordance with general investment guidelines set forth in the documents and instruments of the Vinings 401(k) Plan. These general investment guidelines provide the Trustee with the authority to buy and sell the assets of the Vinings Plans.

2. Prior to January 31, 1987, Vinings, a Georgia corporation, operated under the corporate and trade name of Vinings Chemical Company, Inc. Its principal offices are located in Atlanta, Georgia and it is engaged in the manufacture and sale of various chemical products to the pulp and paper industry, primarily in the southeastern part of United States. Pursuant to a merger agreement, dated September 1, 1987, Vinings was acquired by Laporte, Inc. (Laporte), a Delaware corporation, which owns 100 percent of Vinings outstanding shares. Laporte has a number of subsidiaries in the United States which are engaged in diverse businesses, involving the manufacture and sale of chemicals, cement products, silicon wafers, and various industrial seafants. Laporte's principal offices are located in Charlotte, North Carolina.

3. On January 1, 1989, Laporte established a qualified profit sharing plan (the Laporte Profit Sharing Plan) and a qualified money purchase plan (collectively, the Laporte Plans) for its employees and the employees of some of its subsidiaries, including Vinings. At the same time Laporte established a master trust agreement (the Master Trust) for the purpose of holding for investment the assets of the Laporte Plans and the assets of retirement plans maintained by certain subsidiaries of Laporte. As a consequence of these activities by Laporte, effective as of January 1, 1989, Vinings became a participating affiliate in the Laporte Plans. Thus, as soon as practicable, Vinings intends to merge the Vinings Plans into the Laporte Profit Sharing Plan in order to maximize administrative efficiency and to assure compliance with the participation requirements of the Code. In anticipation of the pending merger, both Laporte and the Trustee request an exemption for the Sale so as to avoid retaining certain securities in the portfolio of the Vinings Plans that have declined significantly in value since their acquisition. There is a concern by the applicants that the Securities will adversely affect the value of the assets of the Laporte Profit Sharing Plan when commingled in the Master Trust upon the merger. The proposed Sale is designed to avoid a diminution of the value of the benefits which will be available for distribution to the participants and beneficiaries of the Vinings Plans.

4. The Securities that the Vinings Plans propose to discontinue holding and selling to Laporte include certificates of a .05 percent interest in a

limited partnership designated as Enex Program I Partners, L.P. (Enex LP) in which the total sum of $44,446 was invested by the Vinings Profit Sharing

American Stock Exchange on the date of the Sale; (c) the Vinings Plans will pay no commissions nor incur any expenses in connection with the proposed Sale;

including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or

applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be

6:30 p.m., November 29—9:00 a.m.–9:00 p.m., November 30—9:00 a.m.–10:00 p.m., December 1—9:00 a.m.–7:30 p.m., December 2—9:00 a.m.–3:30 p.m., in

FOR FURTHER INFORMATION CONTACT: Charles E. Myers, Permit Office, Division of Polar Programs, National Science Foundation, Washington, DC

limited partnership designated as Enex Program I Partners, L.P. (Enex LP) in which the total sum of $44,446 was invested by the Vinings Profit Sharing Plan, and 12,658 shares of Landsing Pacific Funds (LPF), a real estate investment trust whose shares are traded on the American Stock Exchange, in which the total sum of $326,473 was invested by the Vinings Plans. Enex LP is engaged in the oil and gas businesses, owning wells and gas processing plants in the South and Southwest. LPF holds a variety of real property that is broadly distributed geographically and which includes office buildings, shopping malls, and industrial parks. The Securities have been appraised by a qualified, independent appraiser, Robert A. Stanger & Co., L.P. of Shrewsbury, New Jersey, and determined to have a fair market value, as of September 19, 1989, of $10,000 for the Enex LP certificates and $115,513 for the LPF shares, respectively. The value of the LPF shares was determined by their closing price on the American Stock Exchange.

5. It is represented by the applicants that the proposed Sale of the Securities is in the best interests of the participants and beneficiaries because the Sale will protect their separate accounts from a decline in value and enable the liquid funds received from the Sale to be invested in better quality and higher yielding assets. The Sale will be a one-time transaction with the full purchase price paid in cash by Laporte on the date of the Sale. No commissions or other costs will be incurred by the Vinings Plans with respect to the Sale. For federal income tax purposes, if the consideration for the Sale is greater than the current fair market value of the Securities on the date of the Sale, Laporte intends to treat the difference as a special ocntribution to the Laporte Plans.[4]

6. In summary, the proposed Sale will satisfy the statutory criteria of section 408(a) of the Act because (a) the proposed Sale will be a one time transaction for cash; (b) the Vinings Plans will receive as consideration the greater of either their total investment in acquiring the Enex LP certificates or the current fair market value of the Enex LP certificates on the date of the Sale as determined by a qualified, independent appraiser and the consideration the Vinings Plans will receive for the LPF shares will be the greater of either the total investment in acquiring the LPF shares or the closing price on the American Stock Exchange on the date of the Sale; (c) the Vinings Plans will pay no commissions nor incur any expenses in connection with the proposed Sale; and (d) the separate accounts for the participants and beneficiaries of the Vinings Plans will avoid retaining the Securities which have significantly declined in value.

Tax Consequences of Transaction

The Department of the Treasury has determined that if a transaction between a qualified employee benefit plan and its sponsoring employer (or an affiliate thereof) results in the plan either paying less or receiving more than fair market value, such excess may be considered to be a contribution by the sponsoring employer to the plan, and therefore must be examined under the applicable provisions of the Internal Revenue Code, including sections 401(a)(4), 404, and 415.

FOR FURTHER INFORMATION CONTACT: Mr. C. E. Beaver of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the follow:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan soley in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 31st day of October, 1989.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-029]

Yankee Atomic Electric Co., Yankee Nuclear Power Station; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-3 issued to Yankee Atomic Electric Company (the licensee) for operation of the Yankee Nuclear Power Station (YNPS) located in Franklin County, Massachusetts.

Environmental Assessment

Identification of Proposed Action

The licensee is proposing to change its

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 34-27397; File No. SR-MSTC-89-

Programs Limited Representative ("Series 22") qualifications examination.

Notice of the proposed rule change together with its terms of substance was

rules and regulations thereunder applicable to the NASD and, in particular, the requirements of section 15A and the rules and regulations

Procedural Regulations (See 14 CFR 302.1701 et seq.). The due date for answers, conforming application, or motion to modify scope are set forth

Environmental Assessment

Identification of Proposed Action

The licensee is proposing to change its Technical Specifications by eliminating the cycle-specific operating limits from various sections of the YNPS Technical Specifications; listing the approved methods; and describing the Core Operating Limits Report (COLR), which will contain the cycle-specific limits. The changes were in response to the NRC Generic Letter 88–16, which encouraged all licensees and applicants to eliminate the cycle-specific limits from the Technical Specifications.

The proposed action is in accordance with the licensee's application for amendment dated September 14, 1989.

The Need for the Proposed Action

The licensee presently generates the cycle-specific limits for each cycle using NRC-approved methods. For each cycle, the licensee generates and the NRC reviews a proposed Technical Specification change to the cycle-specific limits. This is an administrative burden on the NPC staff and Yankee because the limits are similar and the methods are the same for each cycle. The NRC recognizes this burden and has recommended that all licensees eliminate the cycle-specific limits from their Technical Specifications. Therefore, the licensee proposes these changes following the recommendations in Generic Letter 88–16.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revisions to the TS. The proposed revisions remove cycle-specific operating limits form the various sections of the YNPS Technical Specifications. The proposed changes do not increase the probability or consequences of any accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure.

Accordingly, the Commission concludes that this proposed action would result in no significant radiological environment impact.

With regard to potential non-radiological impacts, the proposed change to the Technical Specifications involves systems located within the restricted area as defined in 10 CFR part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendment.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on October 13, 1989. No request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in not meeting NRC requirements.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in previous reviews for the Yankee Nuclear Power Station. The plant was licensed prior to the requirement for issuance of a Final Environmental Statement.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated September 14, 1989, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at the Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

Dated at Rockville, Maryland, this 27th day of October 1989.

For the Nuclear Regulatory Commission.

Morton B. Fairtile,

Acting Director, Project Directorate I–3, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended October 27, 1989

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 46565.

Date filed: October 24, 1989.

Due Date for Answers. Conforming Applications, or Motion to Modify Scope: November 21, 1989.

Description: Application of Mayacarga Internacional, SA. De C.V., pursuant to section 402 of the Act and subpart Q of the Regulations seeks authority to provide charter foreign air transportation of property and mail between Merida, Yucatan, Mexico and Miami, Florida with possible intermediate points in Mexico and the United States and, subject to the regulations of the Department, between points in the United States and other points worldwide.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

BILLING CODE 4910–62–M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. RSSI–89–1, Notice No. 1]

Special Safety Inquiry; Railroad Reporting Requirements

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of Special Safety Inquiry.

SUMMARY: FRA is initiating a Special Safety Inquiry to examine FRA-imposed railroad safety reporting requirements. The inquiry is meant to explore whether the reporting process results in accurate data and whether there are methods of improving the process.

DATES: (1) A public hearing will be held at 10:00 a.m. on January 16, 1990, in Room 2230 of the Nassif Building, 400 Seventh Street SW., Washington, DC. Any person who desires to make an oral statement at the hearing is requested to notify the Docket Clerk at least five working days prior to the hearing, by phone or by mail and must submit three copies of the oral statement that he or she intends to make at the hearing.

(2) Written comments must be received no later than January 11, 1990. Comments received after that date will be considered to the extent possible without incurring additional expense or delay.

ADDRESSES: (1) Written comments should be submitted to the Docket Clerk, Office of Chief Counsel, FRA, 400 Seventh Street SW., Washington, DC 20590. Persons desiring to be notified that their written comments have been received by FRA should submit a stamped, self-addressed postcard with their comments. The Docket Clerk will indicate on the postcard the date on which the comments were received and will return the card to the addressee. Written comments will be available for examination, both before and after the closing date for comments, during regular business hours in Room 8201 of the Nassif Building at the above address.

(2) A public hearing will be held in Room 2230 of the Nassif Building, 400 Seventh Street SW., Washington, DC. Persons desiring to make oral statements at the hearing should notify the Docket Clerk by telephone (202–366–0628) or by writing to the Docket Clerk at the address above.

FOR FURTHER INFORMATION CONTACT: Bruce Fine, Chief, Office of Safety Analysis, Office of Safety, FRA, 400 Seventh Street SW., Washington, DC 20590 (telephone 202–366–0522), or Mark Tessler, Office of Chief Counsel, FRA, 400 Seventh Street SW., Washington, DC 20590 (telephone 202–366–0628).

SUPPLEMENTARY INFORMATION: FRA's primary function is to promote safety within the railroad industry. In order to protect railroad employees, travelers, and the public at large, FRA must have an accurate picture of the safety situation within the industry. FRA's safety mission can only be effective if its regulations and enforcement activities are geared towards real problems, rather than ones merely perceived. Thus, accurate safety data is the cornerstone of an effective rail safety program. Because of that, various FRA rail safety regulations require that reports be filed with the agency, some on a periodic basis, and others upon the occurrence of a specified event.

The General Accounting Office (GAO) recently issued a report (GAO/RCED–89–109 Railroad Safety) regarding the accuracy of railroad injury and accident data and FRA efforts for ensuring the accuracy of that data. GAO has pointed out important areas in need of improvement and FRA plans to make necessary improvements. Towards that end, FRA will, in the very near future, be initiating a separate rulemaking proceeding focusing exclusively on improvements in the accident/injury reporting systems.

This inquiry is being initiated because FRA is concerned that issues similar to those raised by the GAO in the accident reporting context may extend to other required railroad safety-related reports. GAO's concern about accident reporting led it to recommend that FRA: require that railroads establish injury and accident reporting internal control procedures; include an analysis of railroads' internal control procedures for reporting in FRA's inspections; and provide inspectors with the authority to take enforcement actions against railroads with inadequate internal control procedures.

Our paramount concern is that the information received by FRA be accurate and complete. We also want to ensure that only those reporting requirements necessary for the proper performance of FRA's safety function are imposed on the railroads, while minimizing the cost to the railroad of providing the information. If the information is not needed, we should not collect it. Similarly, if the information, while valuable, can be collected and reported on either a different schedule or through a different, less expensive means, we want to know about it.

We urge interested parties to share their views regarding safety-related reporting requirements listed in the Appendix to this notice. As noted above, accident reporting requirements will be the subject of a separate rulemaking in the near future and thus will not be considered in this inquiry. Similarly, because alcohol and drug test reporting is currently the subject of a separate rulemaking (49 FR 39646, September 27, 1989), it will not be addressed in this proceeding.

We encourage interested parties to comment on the following questions and on any other issue falling within the scope of this inquiry—the following list is illustrative, not all-inclusive. Where appropriate, please identify the specific reporting requirement you are referring to.

1. Do the FRA reporting requirements summarized in the Appendix promote the submission of accurate data to FRA? If not, how can the system be improved? What costs would be associated with your suggested improvements?

2. If there are inaccuracies in the reporting system, what improvements in railroads' internal control procedures would reduce or eliminate the problem?

3. Should FRA impose specific internal control procedures on the railroads to assure proper reporting? What should those internal procedures consist of? What additional costs would be incurred?

4. Should deviations from such prescribed procedures render the railroads liable for civil penalties?

5. Intstead of specific, prescribed procedures for internal control, would you favor FRA-established, generic standards for such procedures that would apply regardless of the differences among railroads?

6. A railroad is given a specific period of time to report after the occurrence of an event requiring FRA notification. Are these periods long enough for the railroad to collect accurate information? Are they too long? Please be specific regarding the reporting requirement you are addressing.

7. Should there be a two-tier reporting process, with an initial report followed up by a later, ostensibly more accurate, individual report? Or should there be a later more complete report which consolidates the data of the early individual reports?

8. Are FRA's instructions for filing required data clear and informative? If not, how could the instructions be improved to eliminate any confusion? Please be as specific as possible.

9. Could the method of reporting data to the FRA be improved? How?

10. What is your view as to the availability of electronic transfer of data. Would there be compatibility problems, and if so, how could they be overcome? How would such data transfer affect the speed and accuracy of a railroad's reporting? What would be the short term and long term effect of electronic transfers on the costs required to fulfill the reporting requirements?

11. Would electronic data transfer affect the ability of FRA to determine compliance with the reporting requirements?

Appendix

One-Time Reports

49 CFR part 215—Report regarding freight cars used in dedicated service.
49 CFR part 216—Report when freight cars, locomotives, or track is returned to service following Special Notice for Repairs.
49 CFR part 217—File copy (and each amendment) of operating rules;
File program (and each amendment) for operational testing; and
File program (and each amendment) for instruction on operating rules.

49 CFR part 220—Report (both telephone and written confirmation) of accident due to a locomotive failure or coming into contact with an electrically energized part.
49 CFR part 233—Report within 24 hours of accident/incidents arising from signal system failure.
Report within 15 days of signal system failure.

Periodic Reports

49 CFR part 217—Annual reports regarding operational tests and inspections.
49 CFR part 228—Monthly reports of excess service.
49 CFR part 233—Annual signal system report.

Issued in Washington, DC, on October 27, 1989.

Gilbert E. Carmichael,

Administrator.

BILLING CODE 4910–06–M

[Order 89–10–62, Docket 46577]

Order Instituting Chicago-Prestwick/Glasgow Service Proceeding

AGENCY: Department of Transportation.

ACTION: Institution of the *Chicago-Prestwick/Glasgow Service Proceeding.*

SUMMARY: By Order 89–9–52, the Department invited applications from U.S. carriers to provide scheduled foreign air transportation between the United States and Prestwick/Glasgow, Scotland. United Air Lines and American Airlines have responded to Order 89–9–52 expressing their interest in serving between Chicago, Illinois, and Prestwick/Glasgow, Scotland. Pursuant to the U.S.–U.K. Air Services agreement, only one U.S. carrier may be designated on the route. Accordingly, the Department has decided to institute the *Chicago-Prestwick/Glasgow Service Proceeding*, Docket 46577, to select a primary and a backup carrier to provide scheduled combination service in the Chicago-Prestwick/Glasgow, Scotland market. The Department has also placed at issue the public convenience and necessity of renewing the certificate authority of Northwest Airlines to serve the Chicago-Glasgow market. The Department has set an expedited schedule for processing this case to facilitate commencement of service in summer 1990.

DATES: Petitions for leave to intervene, and petitions for reconsideration of Order 89–10–62, should be filed by November 7, 1989. Answers should be filed by November 13, 1989.

ADDRESSES: Petitions for leave to intervene, petitions for reconsideration, etc. should be filed in Docket 46577, addressed to the Documentary Services Division, U.S. Department of Transportation, 400 Seventh Street, SW, Room 4107, Washington, DC 20590, and should be served on all parties in Docket 46577, as well as the Office of Hearings, Room 9228, at the same address.

Date: October 31, 1989.

Jeffrey N. Shane,

Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910–62–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Tax on Certain Imported Substances; Notice of Filing of Petition

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice.

SUMMARY: This notice announces the acceptance under Notice 89–61, 1989–21 I.R.B. 25, of petitions requesting that *2-ethyl hexanol, bisphenol-A,* and *alpha-methylstyrene* be added to the list of taxable substances in section 6472(a)(3) of the Internal Revenue Code. Publication of this notice is in compliance with Notice 89–61. This is not a determination that the list of taxable substances should be modified.

DATES: Written comments and requests for a public hearing relating to these petitions must be delivered or mailed by January 2, 1990.

ADDRESS: Send comments and requests for a public hearing to the Internal Revenue Service, Attention: CC:CORP:T:R (Petition), Room 4429, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Ruth Hoffman, Office of Assistant Chief Counsel (Passthroughs and Special Industries). Telephone 202–566–4475 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The petitions were received on August 18, 1989. The petitioner is Aristech Chemical Corporation, a manufacturer and exporter of these substances. The following is a summary of the information contained in the petitions. The complete petitions are available in the Internal Revenue Service Freedom of Information Reading Room.

2-Ethyl Hexanol

Harmonized Tariff System number: 290516 0010
Schedule B number: 290516 0010
Chemical Abstract Service number: 104–76–7

This substance is derived from the taxable chemical *propylene.* 2-ethyl hexanol is produced by the oxo process.

The stoichiometric material consumption formula for this substance is:

$2\ C_3H_6$ propylene $+ 2\ CO$ carbon monoxide $+ 4\ H_2$ hydrogen $\rightarrow C_4H_9CHC_2H_4CH_2OH$ 2-ethyl hexanol $+ H_2O$ water

According to the petition, taxable chemicals constitute 59.2 percent by weight of the materials used to produce this substance. The rate of tax for this substance would be $3.90 per ton. This is based upon a conversion factor for propylene of 0.80.

Bisphenol-A

Harmonized Tariff System number: 290723 0000
Schedule B number: 290723 0000
Chemical Abstract Service number: not given

This substance is derived from the taxable chemicals *benzene* and *propylene.* Bisphenol-A is produced by the acid catalyzed reaction of phenol with acetone.

The stoichiometric material consumption formula for this substance is:

$2\ C_6H_6$ benzene $+ 2\ C_3H_6$ propylene $+ 2\ O_2$ oxygen $\rightarrow C_{15}H_{16}O_2$ bisphenol-A $+ C_3H_6O$ acetone $+ H_2O$ water

According to the petition, taxable chemicals constitute 78.8 percent by weight of the materials used to produce this substance. The rate of tax for this substance would be $6.63 per ton. This is based upon a conversion factor for benzene of 0.885 and a conversion factor for propylene of 0.476.

Alpha-methylstyrene

Harmonized Tariff System number: 290290 0000
Schedule B number: 290290 0000
Chemical Abstract Service number: not given

This substance is derived from the taxable chemicals *benzene* and *propylene.* Alpha-methylstyrene is recovered as a byproduct from the cumene oxidation process for the production of phenol-acetone.

The stoichiometric material consumption formula for this substance is:

C_6H_6 benzene $+ C_3H_6$ propylene $+ \frac{1}{2}\ O_2$ oxygen $\rightarrow C_9H_{10}$ alpha-methylstyrene $+ H_2O$ water

According to the petition, taxable chemicals constitute 79.5 percent by weight of the materials used to produce

VOL 54 ISS 212 NO 3 1989 UMI

this substance. The rate of tax for this substance would be $4.97 per ton. This is based upon a conversion factor for benzene of 0.66 and a conversion factor for propylene of 0.36.

Dale D. Goode,

Chief, Regulations Unit, Assistant Chief Counsel (Corporate).

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that

the Resolution Trust Corporation's Board of Directors will meet in open session at 2:30 p.m. on Tuesday, November 7, 1989, to consider the following matters:

Minority and Women Outreach Contracting Program

This program implements provisions of FIRREA to ensure that minority-and women-owned companies or individuals are given

Requests for further information concerning the meeting may be directed to Mr. John M. Buckley, Jr., Executive Secretary of the Corporation, at (202)

Corrections

Federal Register
Vol. 54, No. 212
day, November 3, 1989

the Resolution Trust Corporation's Board of Directors will meet in open session at 2:30 p.m. on Tuesday, November 7, 1989, to consider the following matters:

Resolution Program for Minority Institutions

This program implements provisions of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA") to encourage the continued minority ownership of failed minority-owned thrift institutions.

Minority and Women Outreach Contracting Program

This program implements provisions of FIRREA to ensure that minority-and women-owned companies or individuals are given the opportunity to participate fully in all contractual activities that the Corporation enters into for the goods and services required to manage and dispose of assets acquired from failed thrift institutions.

The meeting will be held in the Board Room of the FDIC Building located at 550 17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. John M. Buckley, Jr., Executive Secretary of the Corporation, at (202) 898–3804.

Dated: October 31, 1989.

Resolution Trust Corporation.

17 CFR Parts 3 and 31

Leverage Transactions

Correction

In rule document 89-23452 beginning on page 41068 in the issue of Thursday, October 5, 1989, make the following corrections:

§ 3.33 [Corrected]

1. On page 41078, in the second column, in the fifth line, "For7-R"should read "Form 7-R".

2. On page 41080, in the first column, in amendatory instruction 14, in the fifth and eighth lines, "bold-face" should read "bold-faced".

§ 31.11 [Corrected]

3. On page 41080, in § 31.11(a)(1), in the first line, "bold-face" should read "bold-faced".

4. On the same page, in the same column, in § 31.11(e)(2), in the first line, "Submit" should read "Subject".

§ 31.12 [Corrected]

5. On page 41081, in the second column, in § 31.12(h), in the 10th line, insert "rules," following "bylaws,".

§ 31.29 [Corrected]

6. On page 41084, in the first column, in § 31.29, in the 12th line, insert "or any employee of a member leverage transaction merchant" following "merchant".

[Docket No. R-89-1445; FR-2588-P-01]

RIN No. 2501-AA80

Income Verification Procedures for Applicants and Participants in HUD Programs

AGENCY: Office of the Secretary, HUD.

ACTION: Proposed rule.

SUMMARY: This rule would govern the collection and use of wage and claim information and the collection of employee income information about applicants and participants in HUD's assisted housing programs. This rule would require these applicants and participants to sign and submit consent forms when they apply for participation in a program subject to this rule, or when their continuing eligibility to participate in a program is determined. These consent forms would permit (1) HUD, the Public Housing Agency (PHA), or the owner responsible for determining eligibility for or level of benefits to verify employee income information with previous or current employers, and (2) HUD or the PHA to request wage and claim information from the State agency responsible for the administration of the State unemployment law (State Wage Information Collection Agency [SWICA]). Failure of any applicant or participant to sign the required consent form would constitute grounds for denying eligibility, or continuing eligibility, under the program involved. The rule would help decrease the incidence of fraud, waste, and abuse in these programs. Covered programs would include housing assistance programs under 24 CFR chapter II, Subchapter B; and the section 8 and Public and Indian Housing programs under 24 CFR chapters VIII and IX.

This rule would provide protections for applicants and participants in HUD programs from improper use of wage and claim information obtained from a SWICA by HUD or a PHA by restricting the use of the information to official purposes. This rule would also prohibit termination, denial, suspension, or reduction of benefits unless the information is independently verified and the applicant or participant has an opportunity to contest adverse findings. This rule would also provide criminal and civil penalties in certain circumstances.

DATES: Comments must be received by January 2, 1990.

ADDRESSES: Comments on the rule: Interested persons are invited to submit comments regarding this rule to the Rules Docket Clerk, Office of the General Counsel, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410-0500. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection by interested persons during regular business hours (7:30 a.m. to 5:00 p.m. weekdays) in the Office of the Rules Docket Clerk at the address listed above.

FOR FURTHER INFORMATION CONTACT: For the Section 8 programs administered by the Assistant Secretary for Housing: James Tahash, Director of Planning and Procedures, Office of Multifamily Housing Management, room 6182, 451 7th St., SW., Washington, DC 20410, telephone number (202) 426-3944 (TDD number (202) 755-0455). For the 202 Elderly and Handicapped program administered by the Assistant Secretary for Housing: Robert Wilden, Director, Assisted Elderly and Handicapped Division, room 6116, 451 7th St., SW., Washington, DC 20410, telephone number (202) 426-8730. For the Public Housing program administered by the Assistant Secretary for Public and Indian Housing: Edward C. Whipple, Chief, Occupancy Branch, Office of Public Housing, room 4206, 451 7th St., SW., Washington, DC 20410, telephone number (202) 426-0744 (TTD number (202) 245-0850). For the Indian Housing program administered by the Assistant Secretary for Public and Indian Housing: Dom Nessi, Director, Office of Indian Housing, room 4232, 451 7th St., SW., Washington, DC 20410, telephone number (202) 755-1015 (TDD number (202) 426-0744). For questions concerning the submission and use of consent forms: Dennis Raschka, Director, Fraud Control Division, Office of Inspector General, room 8254, 451 7th St., SW., Washington, DC 20410, telephone (202) 426-8493 (TDD number (202) 426-0015). None of these telephone numbers are toll-free.

As a convenience to commenters, the Rules Docket Clerk will accept brief public comments transmitted by facsimile ("FAX") machine. The telephone number of the FAX receiver is (202) 755-2575. (This is not a toll-free number.) Only public comments of six or fewer *total* pages will be accepted via FAX transmittal. This limitation is necessary in order to assure reasonable access to the equipment. Comments sent by FAX in excess of six pages will *not* be accepted. Receipt of FAX transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Rules Docket Clerk at (202) 755-7084.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act of 1980

The information collection requirements contained in this rule have been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980. Public reporting burden for the collection of information requirements contained in this rule are estimated to include the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, completing and reviewing the collection of information, and filling out the consent forms. Information on the estimated public reporting burden is provided later in this preamble under the subheading, "Findings and Certifications." Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Housing and Urban Development, Rules Docket Clerk, 451 7th St., SW., room 10276, Washington, DC 20420; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

II. Statutory Basis

This proposed rule would implement section 904 of the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100-628, approved November 7, 1988) ("McKinney Amendments") for a number of HUD programs.

Section 904(a), Definitions, requires HUD to define the terms "applicant" and "participant" by regulation. It specifies, however, that the terms shall include members of an applicant's or participant's household, but not include persons acting purely in their official capacity, such as State or local government officials or officers of lending institutions.

Section 904(b), Applicant and Participant Consent, permits HUD to require applicants and participants (and members of their households) in any HUD program involving initial and periodic review of an applicant's or participant's income, to sign a consent

form authorizing (1) HUD, the PHA, or the owner to verify employee income information from current or previous employers; and (2) HUD or the PHA to request a SWICA to release wage and claim information. This subsection specifies that the consent may not be used to request taxpayer information protected by section 6103 of the Internal Revenue Code of 1986. Signing the consent form is made an explicit condition of initial or continuing eligibility for participation in the covered programs. This requirement is designed to ensure correct determinations of eligibility for and level of benefits are made under these programs.

Section 904(c)(1), Amendments to Social Security Act, adds a new section 303(i) to the Social Security Act, which requires SWICAs to disclose wage and claim information to HUD and PHAs with respect to individuals who are applying for or participating in any covered HUD assisted housing program and who have signed an appropriate consent form. Regulations prescribed by the Secretary of Labor will govern how often and in what form this information may be disclosed. The Department of Labor is required, after notice and hearing, to terminate further payments under the Social Security Act to a State where a SWICA has failed to substantially comply with a request for information. The new subsection 303(i) will expire on October 1, 1994, unless extended.

Section 904(c)(2), Applicant and Participant Protections, protects applicants and participants from the improper use by HUD or a PHA of information obtained under section 303(i) of the Social Security Act by restricting the use of the information to (1) verifying an applicant's or participant's eligibility for or level of benefits, or (2) informing the owner that the applicant's or participant's eligibility is uncertain and needs to be verified. This section prohibits the termination, denial, suspension, or reduction of benefits without prior independent verification of the wage and claim information. The applicant or participant must also be notified of adverse findings and be given an opportunity to contest them.

Section 904(c)(3), Penalty, provides that any person who knowingly and willfully requests or obtains under false pretenses any wage and claim information concerning an applicant or participant from a SWICA under this authority or who knowingly and willfully discloses any such information in any manner to any individual not entitled under any law to receive it, shall be guilty of a misdemeanor and fined not more than $5,000. This penalty applies to officers or employees of HUD, to officers or employees of PHAs, and to any owner (or employee of an owner) responsible for determining eligibility for or level of benefits. This subsection also gives applicants and participants a right of action for damages and other relief against an officer or employee of any public housing agency or owner (or employee of an owner) if the applicant or participant is affected by (1) a negligent or knowing disclosure of information referred to in section 904 of the McKinney Amendments or section 303(i) of the Social Security Act about such person by the officer or employee of the PHA or the owner (or employee of an owner) which is not authorized by section 904, section 303(i), or any implementing regulation or (2) any other negligent or knowing action that is inconsistent with section 904, section 303(i), or any implementing regulation.

Section 904(d), Effective Date, provides for this section to take effect no earlier than September 30, 1989 with one exception. This exception gives a State or an agency of a State, with the approval of the Secretary of Labor, the option of implementating the provisions governing the collection of wage and claim information on any date which is after February 5, 1989 (90 calendar days after November 7, 1988, the date of enactment of the McKinney Amendments), but before September 30, 1989. In the case of any State legislature which has not been in session for at least 30 calendar days (consecutive or not) between November 7, 1988 and September 30, 1989, the provisions governing the collection of wage and claim information shall take effect 30 calendar days after the first day on which the legislature is in session on or after September 30, 1989.

III. Structure of Rule

This proposed rule would implement the requirements governing the collection and use of wage and claim information obtained from a SWICA and of employee income information, including requirements pertaining to the signing and submission of consent forms, through two independent, but parallel, provisions. These are:

1. 24 CFR part 200, subpart V: This subpart would cover the Rent Supplement program; the section 221(d)(3) BMIR and 236 programs; and activity under 24 CFR part 280, Management and Preservation of HUD Multifamily Projects.

2. 24 CFR part 760: This part would cover the public housing and section 8 housing assistance programs administered by HUD under 24 CFR chapters VIII and IX.

The remainder of the rule contains conforming changes that are designed to incorporate the proposed consent form requirements into the existing regulatory provisions to which the rule would apply. Readers should review these changes carefully to determine matters such as the timing and context of the required signing of consent forms and the effect upon eligibility, or continued eligibility, caused by a failure to meet the requirements.

A. Programs Covered by the Rule

The information collection requirements, including consent form requirements, contained in this proposed rule would apply to the following programs:

1. 24 CFR part 200, subpart V, as follows:

(a) Rent Supplement Payments under part 215.

(b) Low Cost and Moderate Income Mortgage Insurance for Below Market Interest Rate (BMIR) Mortgages under part 221.

(c) Mortgage Insurance and Interest Reduction Payments for Rental Projects under part 236.

(d) Management of HUD-Owned Multifamily Housing Projects under part 290.

2. 24 CFR part 760. The Section 8 and Public and Indian Housing programs, as follows:

(a) Section 8 Housing Assistance Payments for New Construction under part 880.

(b) Section 8 Housing Assistance Program for Substantial Rehabilitation under part 881.

(c) Section 8 Housing Assistance Payments for Housing Certificates and Moderate Rehabilitation under part 882.

(d) Section 8 Housing Assistance Payments, State Housing Agencies, under part 883.

(e) Section 8 Housing Assistance Payments, New Construction Set-Aside for section 515 Rural Rental Housing Projects under part 884.

(f) Loans for Housing for the Elderly or Handicapped under part 885.

(g) Section 8 Housing Assistance Payments, Special Allocations under part 886, subpart A (Loan Management) and subpart C (Property Disposition).

(h) Section 8 Housing Vouchers under part 887.

(i) Section 23 Housing Assistance Payments, New Construction and Substantial Rehabilitation, under part 900.

(l) Admission to, and Occupancy of, Public Housing under part 960.

B. "Applicants" Subject to the Rule

The following is a complete list of "applicants" who would be covered under the rule:

1. 24 CFR part 200, subpart V: An individual or family that seeks assistance under part 215, 221 (BMIR), 236, or 290.
2. 24 CFR part 760.
(a) An individual or family wishing to participate, or to receive assistance, as appropriate, under part 880, 881, 882, 883, 884, 885, 886, 887, and 900.
(b) A prospective homebuyer under part 904.
(c) A prospective tenant or homebuyer under part 905.
(d) A prospective tenant under part 960.

C. "Participants" Subject to the Rule

The following is a complete list of "participants" who would be covered under the rule:

1. 24 CFR part 200, subpart V: A tenant or qualified tenant under part 215, 221 (BMIR), 236, or 290.
2. 24 CFR part 760.
(a) A family receiving assistance under parts 880, 881, 882, 883, 884, 885, 886, 887, and 900.
(b) A homebuyer under part 904.
(c) A homebuyer or tenant under part 905.
(d) A tenant under part 960.

D. Exclusion of Certain Individuals and Entities from the Rule's Coverage

Section 904 of the McKinney Amendments excludes from its coverage those persons whose participation in a covered program is limited to their official capacity, such as State or local government officials or officials of lending institutions. The Department believes that this provision is designed to exclude individuals whose sole function with respect to a transaction under a covered program is to *facilitate* the objective of the transaction.

Thus, using the statutory examples, officials and employees of a State Housing Finance Agency that is serving as contract administrator under the Section 8 State Agency program (Part 883) would not have to sign consent forms for purposes of carrying out their responsibilities for the Agency.

These statutory exclusions reflect the fact that the State or local agencies and private owners, as well as their officials, do not *participate* in the program involved: their role is limited to aiding the successful completion of the transaction. Thus, these entities do not have a sufficiently strong link to the transaction to justify execution of consent forms.

The rule would also exclude from the consent requirements public housing agencies (PHAs) that participate in any covered program, irrespective of whether the PHA is acting as a facilitator (for example, as a section 8 contract administrator), or as an actual participant (as where the PHA is a section 8 project owner or the owner or operator of public housing). The rule would also exclude from the consent requirements any "entity applicant" (including its officers or employees) under the covered programs, such as any partnership, corporation, or any other association or entity, either non-profit or for profit, that seeks to participate as a private owner in any of the programs contained in 24 CFR part 215, 221, 236, 880, 881, 882, 883, 884, 885, 886, or 887. It would also exclude any individual who seeks to participate as a private owner in any of the programs contained in 24 CFR part 221, 236, 880, 881, 883, 884, 886, or 887. However, any employee of one of the aforementioned entities who is an applicant for or participant in a covered program would still be subject to the consent form requirements.

The exclusions cited above are based upon the discretion accorded the Department by section 904(a) of the McKinney Amendments to define the terms "applicant" and "participant." The Department does not believe the collection of wage and claim information or employee income information from the officers and employees of these entities or from private owners will be sufficiently useful in combatting fraud, waste, and abuse to justify HUD requiring these persons to sign consent forms.

E. Other Definitions

1. *Claim information.* "Claim information" would be defined as information regarding:
(a) Whether an individual is receiving, has received or has applied for unemployment compensation;
(b) The amount of compensation the individual is receiving or is entitled to receive; and
(c) The period or periods when, or with respect to which, the individual actually received such compensation.
This definition is consistent with the description of information, other than wage information, that HUD or a PHA is explicitly authorized to request from a State agency under section 303(i) of the Social Security Act, as amended by section 904 of the McKinney Amendments. (See the definition of "wage information.") Paragraph (c) of the definition is also properly included as part of the definition since section 904(c)(1)(B) of the McKinney Amendments prohibits the termination, denial, suspension, or reduction of benefits for applicants or participants, as applicable, based on wage and claim information without first independently verifying, among other things, information relating to the period or periods when or with respect to which, the applicant or participant actually received unemployment compensation benefits.

2. *Computer Matching.* "Computer matching" would be defined as the automated comparison of data bases containing records about individuals.

3. *Computer Matching Agreement.* "Computer matching agreement" would be defined as the agreement which describes the responsibilities and obligations of the parties regarding a computer match.

4. *Consent form.* "Consent form" would be defined as a consent form or forms approved by HUD to be signed by applicants and participants for the purpose of obtaining employee income information from employers and wage and claim information from SWICAs. These consent forms may also be used to collect other information, including information which may be obtained under other laws, regulations, and handbooks.

5. *Employee income information.* "Employee income information" would be defined as all the information known to current or previous employers which HUD or the processing entity determines to be necessary for purposes of determining an applicant's or participant's eligibility for or level of benefits in a covered program.

6. *HUD.* "HUD" would be defined as the United States Department of Housing and Urban Development.

7. *Owner.* "Owner" would be defined as the person or entity (or employee of an owner) that leases an assisted dwelling unit to an eligible family.

8. *Public Housing Agency (PHA).* "Public Housing Agency (PHA)" would be defined as any State, county, municipality, or other governmental entity or public body (or agency or instrumentality thereof) that is authorized to engage in or assist in the development or operation of housing for lower income families under 24 CFR Chapters VIII or IX. The term includes Indian housing authorities.

9. *Processing entity.* "Processing entity" would be defined as the person or entity that is responsible for making eligibility determinations and any interim or regularly scheduled income reexaminations under any of the covered programs. Examples of "processing entity" would include private owners, PHA owners, or management agents under the Section 8 program; PHAs or Indian housing authorities (IHAs) that own and operate Public or Indian Housing projects; PHAs or IHAs that act as section 8 contract administrators for the Certificate, Moderate Rehabilitation, and Housing Voucher programs and owners of section 236, 221(d)(3) BMIR, or Rent Supplement projects.

10. *State Wage Information Collection Agency (SWICA)* means the State agency receiving quarterly wage reports from employers in the State (which may be the agency administering the State's unemployment compensation program), or an alternative system which has been determined by the Secretary of Labor, to be as effective and timely in providing employment related income and eligibility information.

11. *Wage information.* "Wage information" would be defined as information about wages as defined in the State's unemployment compensation law and includes the Social Security Number (or numbers, if more than one) and quarterly wages of an employee, and the name, address, State, and (when known) Federal employer identification number of an employer reporting wages under a State unemployment compensation law.

This definition is adopted from the definition of "wage information" used by the Department of Labor for purposes of the income and eligibility verification system required under section 303(f) of the Social Security Act (see 20 CFR 603.2(b)). We have not included the part of that definition which provides an alternative definition for "wage information" for States in which wages are not required to be reported under the unemployment compensation law. That part of the definition is not applicable to section 303(f)(1)(A) of the Social Security Act, which only requires disclosure of information contained in the records of SWICAs.

F. Interaction with the Social Security Number Regulation

This proposed rule would operate in conjunction with the final rule which implements section 165 of the Housing and Community Development Act of 1987 ("1987 Act") (54 FR 39060; September 27, 1989). Section 165 of the 1987 Act authorizes HUD to require applicants and participants in certain HUD programs, including the ones covered by this rule, to disclose their Social Security Numbers (SSNs) or Employer Identification Numbers (EINs). SSNs obtained under that final rule would be used in computer matching programs to compare income information provided by the family with wage and claim information maintained by SWICAs, the disclosure of which would be authorized by this proposed rule. HUD anticipates that computer matching programs will be the primary method by which HUD and PHAs obtain wage and claim information from SWICAs, although requests relating to one or a few families may be possible depending on the matching agreements entered into between SWICAs and HUD or between SWICAs and individual PHAs. This proposed rule incorporates the changes made by the final SSN regulation.

G. Information to be Covered by Consent Forms

Section 760.3 and § 200.1203 would specify that the information covered by consent forms signed by applicants and participants under this rule would be (a) employee income information; and (b) wage and claim information from a SWICA. The rule would explicitly prohibit the use of the consent forms for requesting taxpayer return information protected by section 6103 of the Internal Revenue Code of 1986. The consent forms could be designed to cover the collection of the information specified in item (a) or item (b) above, or both. Moreover, the consent forms could be used to collect other information which can be obtained under other laws, regulations, and handbooks. General authority to obtain information relating to eligibility is provided in the program specific regulations for the assisted housing programs contained in 24 CFR Chapter II, Subchapter B. More specific guidance is provided through administrative instructions in program handbooks. For the section 8 and Public Housing programs, respectively, 24 CFR 813.109(b) and 24 CFR 913.109(b) authorizes, as a condition of eligibility or continuing eligibility, applicants and participants in the Section 8 and Public Housing (including Indian Housing) programs to sign consent forms authorizing any depository or private source of income, or any Federal, State, or local agency, to furnish or release to the PHA or owner and to HUD such information as the PHA, owner, or HUD determines to be necessary. Information is determined to be necessary if it is to be used to determine or audit a family's eligibility to receive housing assistance, to determine the Family's Adjusted Income or Tenant Rent, to verify related information, or to monitor compliance with equal opportunity requirements.

This regulation is in no way intended to interfere with HUD's current authority to obtain information, including employee income information and wage and claim information, necessary to determine an applicant's or participants eligibility for or level of benefits. Section 904, instead, provides explicit authority to obtain wage and claim information in order to preempt certain State privacy acts which limit the ability of HUD and PHAs to collect wage and claim information from SWICAs. These State privacy acts interfere with HUD's ability to ensure that scarce Federal housing assistance is being provided in the correct amounts to the beneficiaries for which it is intended. Section 904 also explicitly authorizes the collection of employee income information so that wage and claim information can be independently verified before an applicant's or participant's benefits are terminated, denied, suspended, or reduced based on wage and claim information obtained from a SWICA.

H. Consent by Applicants and Participants

Applicants for and participants in the covered programs would have to sign consent forms and submit them to the processing entity. (See § 760.10 and § 200.1210.) Applicants and participants would also be responsible for the signing and submission of consent forms by members of their families. Members of the family under the age of 18 would not be required to sign consent forms, unless that member is the family head or his or her spouse. The consent forms would permit (a) HUD, the PHA, or the owner to verify employee income information; and (b) HUD or the PHA to request a SWICA to release wage and claim information. All applicants, including members of their families, would have to sign the consent forms at the time when the eligibility of the applicant under any of the covered programs is being determined.

Participants, including members of their families, who were not required to sign the consent forms as applicants (*i.e.*, those whose participation was initiated before the effective date of the rule) would have to sign the consent forms at the first regularly scheduled income reexamination held after the effective date of the final rule. Once a participant has signed and submitted a consent form as an applicant or participant, that participant would still have to sign a subsequent consent form at each regularly scheduled income

reexamination to ensure that all consents are timely dated to facilitate their use.

Subsequent consent forms would also be required to be signed at the next

I. Penalties for Failing To Sign Consent Forms

This rule would permit HUD to require applicants and participants, as

§ 200.1220. The provisions of the Privacy Act apply to records on individual U.S. citizens (or aliens lawfully admitted for permanent residence) that are maintained by HUD in a "system of

current or previous employers and wage and claim information obtained from SWICAs.

HUD would not be responsible for the

Under this rule, a PHA could enter into a computer matching agreement to obtain wage and claim information with a SWICA separately from HUD or

applicant and participant data, including social security numbers. The IG would code the social security numbers onto a separate disk and send it to a SWICA

VOL
54

1989
UMI

reexamination to ensure that all consents are timely dated to facilitate their use.

Subsequent consent forms would also be required to be signed at the next interim or regularly scheduled income reexamination under the following circumstances:

(1) Where there has been a change in the composition of the participant's family, any new member of the family would have to sign and submit a consent form at the next interim or regularly scheduled income reexamination.

(2) When a member of a family turns 18 years of age, that member would have to sign and submit a consent form at the next interim or regularly scheduled income reexamination.

(3) Such other circumstances as HUD (and in the case of the Public Housing program, or the Section 8 Certificate, Housing Voucher, or Moderate Rehabilitation program, the PHA) may prescribe in administrative instructions. Examples of these other circumstances might include situations where the consent form has been lost, the signature by the applicant or participant is illegible, or an employer requires a consent form with an original signature before he or she will disclose information.

As noted above, members of a family under 18 years of age would not be required to sign consent forms, unless that member of the family is the family head or his or her spouse. There is no reason for minors, who are not family heads or spouses, to sign consent forms since their income is excluded for purposes of calculating the annual income of a family under the covered programs.

HUD believes that the requirements relating to the signing of consent forms at interim income reexaminations and regularly scheduled income reexaminations are not burdensome and reflect the Department's concern that signing of consent forms be required only where necessary to produce information helpful to its efforts to mitigate abuse in HUD programs.

The exact context for applicants and participants to sign the consent forms would be governed by the specific rules for the program involved. Readers should review the proposed amendments to individual program regulations subject to this rule for more information.

As discussed in the next section, failure to sign consent forms constitutes grounds for denying eligibility of an applicant, or for terminating assistance or tenancy (or both) of a participant, under the covered program.

I. Penalties for Failing To Sign Consent Forms

This rule would permit HUD to require applicants and participants, as well as members of their households, to sign consent forms as a condition of eligibility, or continuing eligibility, for the covered programs. (See § 200.1215 and § 760.15). The Department believes that full implementation of the authority under section 904 for the covered programs is essential to achieve the legislative objective of controlling fraud, waste, and abuse in HUD programs. Each of the individuals required under the rule to sign consent forms are receiving assistance from HUD, thereby justifying the Department's interest in ensuring that they are appropriate program beneficiaries or that they receive the proper level of benefits.

For applicants, the rule would provide that the failure to sign consent forms would be grounds for denying eligibility for the covered program.

For participants, failure to sign consent forms would be grounds for termination of assistance under the covered program and, if authorized under the program, termination of the participant's tenancy. Whether termination of tenancy is authorized depends on the program involved. In some cases, termination of assistance would also require that the family be evicted from the project (see, for example, the Public and Indian Housing programs).

In others, such as the tenant-based Certificate and Housing Voucher programs, assistance can be terminated without terminating the participant's tenancy: the participant simply pays an unsubsidized rental. In still others, failure to meet the proposed rules signing of consent form requirements not only could result in termination of assistance, but also would specifically be made a substantial violation of the lease for which termination of tenancy is the appropriate remedy (see, for example, the Section 8 New Construction and Substantial Rehabilitation programs, as amended by this proposed rule). Readers should carefully review the program-specific amendments to this rule, as well as existing regulatory and administrative guidance for the existing programs, to determine the effects of the proposed rule.

J. Privacy Act Protections

The collection, maintenance, use, and dissemination of information obtained pursuant to this rule may be subject to the requirements of the Privacy Act of 1974, 5 U.S.C. 552a. See § 760.20 and § 200.1220. The provisions of the Privacy Act apply to records on individual U.S. citizens (or aliens lawfully admitted for permanent residence) that are maintained by HUD in a "system of records" whereby information is retrieved by the name of the individual or other identifying number or symbol. Records concerning applicants and participants in most of the housing programs listed in part 760 are maintained in Privacy Act systems of records. (a complete listing of the Department's Privacy Act systems is published in the **Federal Register's** Privacy Act Issuance: 1986 Compilation.)

As noted above, HUD would collect employee income information and wage and claim information about applicants for, or participants in, HUD programs, for purposes of ensuring that they are income-eligible for the covered program and that the level of benefits provided is appropriate. The income information would be used to decrease the incidence of fraud, waste, and abuse in HUD programs.

HUD may disclose information obtained pursuant to this rule and maintained in Privacy Act systems of records only as permitted by the Privacy Act and section 904 of the McKinney Amendments. In general, the information may be disclosed outside the agency to facilitate the administration of the applicable program. (However, as discussed later, this rule would provide specific limitations on the collection, use, and dissemination of wage and claim information.) Permissible routine uses of the information subject to the Privacy Act are listed in the individual Privacy Act notices for each system of records published by the **Federal Register** in its Privacy Act Issuances: 1986 Compilation. Requests for information not contained in a Privacy Act system of records will be governed by the Freedom of Information Act, 5 U.S.C. 552 (FOIA). FOIA permits HUD to withhold information concerning individuals where disclosure would constitute a clearly unwarranted invasion of personal privacy.

For the most part, the Privacy Act applies only to Federal agencies, and does not govern the collection, maintenance, use, or disclosure of information by the processing entity or by other entities or persons. The rule would make it clear that employee income and wage and claim information is subject to all applicable Federal, State and local laws. State and local laws concerning the protection of personal privacy may restrict the use of employee income information obtained from

current or previous employers and wage and claim information obtained from SWICAs.

HUD would not be responsible for the further use of employee income information and wage and claim information that has been properly disclosed outside the Department. However, the requirements of the Privacy Act are applicable to other Federal agencies that may receive the employee income information and wage and claim information from HUD, and that maintain the information in a Privacy Act system of records.

This rule would also provide specific additional limitations on the use of wage and claim information obtained from a SWICA. The rule would also provide criminal penalties for the wrongful collection and use of the wage and claim information, and also provide civil penalties for certain negligent or knowing actions concerning wage and claim information and employee income information. These limitations and penalties are discussed in the following sections.

K. Request for Wage and Claim Information from SWICAs and Restrictions on the Use of the Information

Section 904 explicitly permits HUD to require applicants for and participants in HUD programs to sign consent forms authorizing HUD or the PHA to request wage and claim information from a SWICA. The signed consent forms would be physically maintained by the processing entity. Congress also prescribed certain restrictions on the collection and use of the wage and claim information. The information which could be obtained from SWICAs would be limited to wage and claim information. See § 200.1225 and § 760.25. The Secretary of Labor would prescribe how often and in what form wage and claim information would be obtained from a SWICA.

It is anticipated that HUD and PHAs will obtain wage and claim information from SWICAs subject to individual computer matching agreements between the parties. Computer matching is a term used to describe the automated comparison of data bases containing records about individuals. Computer matching agreements would describe the responsibilities and obligations of the parties to an agreement regarding the computer match. After July 19, 1989, computer matches in which HUD participates will be conducted in conformance with the requirements of the Computer Matching and Privacy Protection Act of 1988.

Under this rule, a PHA could enter into a computer matching agreement to obtain wage and claim information with a SWICA separately from HUD or request HUD to perform the PHA's match request. If the PHA wants to perform the match itself, it must submit the proposed matching agreement with the SWICA to HUD for review and approval. This is to ensure that matching agreements are in compliance with this part and the Department of Labor regulations, and are not burdensome on the SWICAs. The matching agreements would specify, among other things, the purpose and legal authority for the match, a description of the records to be matched, a statement regarding disposition of information generated through the match, a description of the administrative and technical safeguards to be used in protecting the information obtained through the match, a description of the use of the records, duplication and redisclosure restrictions, and the amount a SWICA will charge HUD or a PHA for processing a request.

The Office of the Inspector General (IG) at HUD would be responsible for coordinating initial implementation of computer matches under the regulation. The IG intends to encourage groups of PHAs or individual PHAs who have the capacity to perform computer matches to enter into computer matching agreements with SWICAs. Computer matches subject to these agreements could take several forms. For example, some States are willing to allow PHAs on-line access to their SWICA's wage and claim databases. Subject to any restrictions established by the Department of Labor, these PHAs could perform front-end verification by checking the income of an applicant before he or she becomes a tenant by matching the applicant's Social Security Number with the SWICA's wage and claim database. These PHAs could also verify a participant's wage and claim information in this manner.

PHAs, without on-line access but with computer matching capability, would also be encouraged to enter into computer matching agreements with SWICAs. The IG would be available to provide technical assistance. PHAs without the capability to handle computer matching could request HUD to perform the computer match for them. The IG would be responsible for determining how and when these matches would be performed. In these case, PHAs would be expected to provide the IG with a computer tape or diskette containing all relevant applicant and participant data, including social security numbers. The IG would code the social security numbers onto a separate disk and send it to a SWICA for the computer match. Once a match is completed, the IG would compare the data received from the SWICA with the applicant and participant data received from the PHA. No PHA would be required to perform a computer match itself.

PHAs which currently receive wage and claim information from SWICAs in less formal ways, such as by individual written request or telephone call, would not be prohibited from continuing these practices. However, *all* collection and use of wage and claim information by PHAs from SWICAs would be subject to the Department of Labor regulations and the restrictions and penalties of this part.

In the case of owners where there is no PHA operating as a section 8 contract administrator, the IG would be responsible for establishing computer matching agreements with SWICAs. The IG would also be responsible for accomplishing independent verification with regard to such owners.

HUD and PHAs would only be able to use wage and claim information obtained from a SWICA (1) to verify an applicant's or participant's eligibility for or level of benefits; or (2) to inform the owner that an applicant's or participant's eligibility for or level of benefits is uncertain and needs to be verified. Verification would include the procedures for independent verification discussed in the next section. Neither HUD nor a PHA would be permitted to disclose wage and claim information obtained from a SWICA to an owner.

L. Procedures for Termination, Denial, Suspension, or Reduction of Benefits based on Information Obtained from a SWICA

Section 200.1230 and § 760.30 would permit a Federal, State, or local agency, a PHA, or an owner, as applicable, to terminate, deny, suspend, or reduce any benefits of an applicant or participant based on wage and claim information obtained from a SWICA by HUD or a PHA if (1) the agency takes steps to independently verify wage and claim information relating to (i) the amount of wages or unemployment compensation involved, (ii) whether the applicant or participant actually has (or had) access to the wages or benefits for his or her own use; and (iii) the period or periods when or with respect to which the applicant or participant actually received the wages or benefits; and (2) the applicant or participant has been

VOL 54 SS 212 NO 3 1989 UMI

given an opportunity to contest any adverse findings. The regulation would not permit an owner to perform independent verification of wage and claim data since section 904 prohibits HUD or a PHA from disclosing wage and claim information to an owner. Moreover, section 552a(p)(1) of title 5, U.S.C., as added by the Computer Matching and Privacy Protection Act of 1988, requires that "an officer or employee" of the Federal agency or non-Federal agency involved to independently verify information obtained through a computer match which may be used as the basis for an adverse determination involving the individual.

The rule would establish separate procedures to meet the requirements of independent verification depending on whether HUD or a PHA is responsible for determining an applicant's or participant's eligibility for or level of benefits or whether an owner has that responsibility.

Where a PHA is responsible for determining an applicant's or participant's eligibility for or level of benefits in a covered program, HUD or the PHA would compare the information received from a SWICA with information about a family's income which is obtained from the applicant or participant or from his or her employer. HUD would compare the information where it has performed the computer match; PHAs would compare the information where they have performed the match. A "hit" occurs where the wage and claim information reveals an employer that was not disclosed by the applicant or participant or where the wage and claim information differs from information received from the applicant or participant or from his or her employer. HUD or the PHA would request the undisclosed employer or other employer disclosed by the "hit" to furnish, in writing to HUD or the PHA, any information HUD or the PHA determines to be necessary to establish an applicant's or participant's eligibility for or level of benefits in a covered program. (In most cases, the employer request letter would ask the employer to provide the information to the responsible PHA.) HUD or the PHA would not be expected to pursue these verification procedures where the sums of money at issue are too small to raise an inference of fraud or justify the expense of independent verification and the procedures related to termination, denial, suspension, or reduction of benefits. Neither HUD nor a PHA would be permitted to disclose wage and claim information obtained from a SWICA to an owner.

Where an owner is responsible for determining an applicant's or participant's eligibility for or level of benefits in a covered program, HUD or a PHA, as the section 8 contract administrator, would be responsible for requesting wage and claim information from a SWICA. Where there is no PHA involved as contract administrator, HUD would be solely responsible for requesting wage and claim information from a SWICA. Upon receiving the wage and claim information, HUD or the PHA, as applicable, would compare the information with the information about a family's income obtained by the owner from the applicant or participant or from his or her employer. Where the wage and claim information reveals a "hit," HUD or the PHA would request the undisclosed employer or other employer to furnish, in writing to the owner, any information that HUD or the PHA determines to be necessary for purposes of having the owner redetermine an applicant's or participant's eligibility for or level of benefits in the covered program. Again, HUD or the PHA would not be expected to pursue these verification procedures where the sums of money at issue are too small to raise an inference of fraud or justify the expense of independent verification and the procedures related to termination, denial, suspension, or reduction of benefits. HUD or the PHA could not directly disclose to the owner wage and claim information received from a SWICA.

HUD or the PHA could inform an owner that an applicant's or participant's eligibility for or level of benefits is uncertain and needs to be verified. The owner would then reverify the applicant's or participant's income information by checking the accuracy of the information with the employer or directly with the family. However, before any benefits could be terminated, denied, suspended, or reduced, HUD or the PHA would have to independently verify the wage and claim information obtained from a SWICA. Neither HUD nor a PHA would be permitted to disclose wage and claim information obtained from a SWICA to any owner.

In addition, HUD or the PHA would be able to independently verify wage and claim information obtained from a SWICA by checking the accuracy of information with the applicant or participant directly in cases where verification cannot be obtained from any other source.

Before any benefits could be terminated, denied, suspended, or reduced, HUD, PHAs and owners would be required to promptly notify any applicant or participant in writing of any adverse findings determined on the basis of the independent verification of the wage and claim information. The applicant or participant would then be given an opportunity to contest the findings in the same manner as applies to other information and findings relating to eligibility factors under the applicable programs. Termination, denial, suspension, or reduction of benefits shall be determined according to the standards, including income standards, applicable to each covered program. Readers should review the requirements of specific programs for more information.

M. Criminal and Civil Penalties

Sections 200.1235 and 760.35 would set forth criminal and civil penalties for certain wrongful or negligent actions under this part.

As for criminal penalties, this section would provide that any person who knowingly and willfully requests or obtains under false pretenses any wage and claim information concerning an applicant or participant from a SWICA pursuant to this part, or who knowingly and willfully discloses any such information in any manner to any individual not entitled under any law to receive it, shall be guilty of a misdemeanor and fined not more than $5,000. The term "person" for purposes of this section would include an officer or employee of HUD, an officer or employee of any PHA, and any owner (or employee of an owner) responsible for determining eligibility for or level of benefits.

In the case of civil penalties, any applicant or participant affected by (1) a negligent or knowing disclosure of information referred to in section 904 of the McKinney Amendments or section 303(i) of the Social Security Act about such person by an officer or employee of any PHA or owner (or employee of an owner), which disclosure is not authorized by section 904, section 303(i), or any implementing regulation, or (2) any other negligent or knowing action that is inconsistent with section 904, section 303(i), or any implementing regulation may bring a civil action for damages and such other relief as may be appropriate against any officer or employee of any PHA or owner (or employee of an owner) responsible for the unauthorized action. Jurisdiction of such a case would be in the applicable United States District Court for the district in which the affected applicant or participant resides, in which the unauthorized action occurred, or in which the applicant or participant alleged to be responsible for the unauthorized action resides. (This last grant of jurisdiction appears to be a mistake on the part of the draftors of section 904. What was probably intended was to provide jurisdiction to the U.S. District Court for the district where an individual alleged to be responsible for the unauthorized action resides. The proposed regulation, however, follows the statutory language.) Appropriate relief that may be ordered by the district court would include reasonable attorney's fees and other litigation costs. These civil penalties would apply to certain actions with regard to both employee income information and wage and claim information. However, section 904 does not provide any restrictions on the use of employee income information. Nor does it describe unauthorized disclosure or inconsistent use of such information. Consequently, any lawful use of this information is authorized use and should be considered consistent with section 904 and this part. Lawful use is any use of employee income information determined by HUD, PHAs, or owners to be necessary for determining eligibility for or level of benefits and not prohibited by any Federal or State law.

N. Federal Preemption of State Privacy Acts

The doctrine of Federal preemption of State law recently summarized by the United States Supreme Court, as follows:

> It is familiar and well-established principle that the Supremacy Clause, U.S. Const., Art. VI, cl.2, invalidates state laws that "interfere with, or are contrary to" federal law. *Gibbons* v. *Ogden*, 9 Wheat I, 211 (1824) (Marshall, C.J.). Under the Supremacy Clause, Federal law may supersede state law in several different ways. First, when acting within constitutional limits, Congress is empowered to preempt state law by so stating in express terms. *Jones* v. *Rath Packing Co.*, 430 U.S. 519, 525 (1977). In the absence of express preemptive language, Congress' intent to pre-empt all state law in a particular area may be inferred where the scheme of Federal regulation is sufficiently comprehensive to make reasonable the inference that Congress "left no room" for supplementary state regulation. *Rice* v. *Santa Fe Elevator Corp.*, 331 U.S. 218, 230 (1947). Pre-emption of a whole field also will be inferred where the field is one in which "the Federal interest is so dominant that the Federal system will be assumed to preclude enforcement of state laws on the same subject." *Ibid;* see *Hines* v. *Davidowitz*, 312 U.S. 52 (1941).
>
> Even where Congress has not completely displaced state regulation in a specific area, state law is nullified to the extent that it actually conflicts with Federal law. Such a conflict arises when "compliance with both Federal and state regulations is a physical impossibility," *Federal Lime & Avocado Growers, Inc.* v. *Paul*, 373 U.S. 132, 142–143 (1963), or when State law "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress," *Hines* v. *Davidowitz*, *supra* at 67. (*Hillsborough County, Florida* v. *Automated Medical Laboratories, Inc.*, 471 U.S. 707, 712–13 (1985)).

Under section 4 of Executive Order 12612, *Federalism*, HUD will construe a Federal statute to preempt State law only when (1) the Federal statute in question contains an express preemption provision; (2) there is some other firm and palpable evidence compelling the conclusion that the Congress intended preemption of State law; or (3) the exercise of State authority directly conflicts with the exercise of Federal authority under the statute. (*See* Implementation of Executive Order 12612, *Federalism*, 53 FR 31926 (August 22, 1988).)

Section 904 of the McKinney Amendments provides explicit Federal authority with regard to the collection and use of employee income information and wage and claim information by HUD and PHAs. However, certain State privacy acts limit the ability of HUD and PHAs to collect wage and claim information from SWICAs. Although section 904 does not contain an express preemption provision, it is clearly intended to preempt these State privacy acts under the two other tests noted above.

Under the "firm and palpable" evidence test, the Department will infer preemption where (1) the scheme of Federal regulation is sufficiently comprehensive to provide firm and palpable evidence that Congress intended to leave no room for State regulation, or (2) the field is one in which the Federal interest is sufficiently dominant to provide firm and palpable evidence that Congress intended to preclude enforcement of State laws on the same subject. Here, the Federal interest is sufficiently dominant to provide firm and palpable evidence that Congress intended to preclude the enforcement of State privacy acts which interfere with the collection of wage and claim information from SWICAs by HUD and PHAs. Section 904 of the McKinney Amendments gives the Federal government a paramount interest in the collection and review by HUD and PHAs of wage and claim information about applicants and participants in HUD programs. Section 904's stated purposes are to ensure that scarce Federal housing assistance is being provided in the correct amounts to the beneficiaries for which it is intended, and to help decrease the incidence of fraud, waste, and abuse in these programs.

Thus, section 904 provides compelling evidence that its purposes are to be achieved without interference from State law. State privacy acts must also give way to section 904 under the "direct conflict" test, described above. The Department cannot carry out its responsibilities under section 904 if State privacy acts prevent HUD and PHAs from obtaining the wage and claim information called for under that provision.

Section 904, therefore, preempts any State privacy acts, including restrictions and penalties provided in the acts, to the extent they prohibit the release of wage and claim information to HUD or a PHA or otherwise conflict with section 904.

The proposed regulation has been carefully reviewed to ensure that the extent of preemption is the minimum necessary to accomplish the goals of section 904 in the collection of wage and claim information. Affected officials and organizations should carefully review the proposed regulation as to the effect and the extent of Federal preemption under it.

The proposed rule does not attempt to preempt any Indian tribal law since, in almost all cases, wage and claim information as it relates to members of Indian tribes is covered by State law.

O. Effective Date

For applicants, the proposed rule would apply to all applicant eligibility determinations initiated on or after the date HUD established as the effective date of the rule, which can be no earlier than September 30, 1989. For participants, the rule would apply to each regularly scheduled review of participant income initiated on or after the effective date as established by HUD, and to each future review.

Section 904 also gives a State or an agency of a State, with the approval of the Secretary of Labor, the option of implementing the provisions governing the collection of wage and claim information on any date which is after February 5, 1989 (90 days after November 7, 1988, the date of enactment of the McKinney Amendments) but before September 30, 1989. In the case of any State in which the legislature has not been in session for at least 30 calendar days (whether or not consecutive) between November 7, 1988 and September 30, 1989, the provisions authorizing the obtaining of information from a SWICA would take effect 30 calendar days after the first day on which the legislature is in session on or after September 30, 1989. This rule would not address these provisions. We believe that certain of section 904's

(7:30 a.m. to 5:00 p.m. weekdays) in the Office of the Rules Docket Clerk, Office of the General Counsel, Department of Housing and Urban Development, Room

are covered by the Order are PHAs and SWICAs. PHAs would be affected in their role as "processing entities." Since PHAs already perform significant

TABULATION OF ANNUAL REPORTING BURDEN [2] INCOME VERIFICATION PROCEDURES FOR APPLICANTS AND PARTICIPANTS IN HUD PROGRAMS

VOL 54 SS 212 NO 3 1989 UMI

which the legislature is in session on or after September 30, 1989. This rule would not address these provisions. We believe that certain of section 904's provisions are too complex to be implemented before the regulation is made effective and that the effective date of the regulation will be no earlier than September 30, 1989. Moreover, as of the effective date of the regulation, all State legislatures will have been in session the required length of time.

P. Indian Housing Authorities

For purposes of brevity, this rule encompasses Indian Housing authorized by title II of the 1937 Act under proposed 24 CFR part 760, and provides that PHAs include Indian Housing Authorities.

On June 29, 1988, President Reagan signed into law the Indian Housing Act of 1988 (Indian Housing Act) (Pub. L. 100–358), which created a separate title for Indian Housing under title II of the 1937 Act. Section 201(b)(2) of the Indian Housing Act requires that any provision modifying the public housing program under title I of the 1937 Act must explicitly apply to the Indian Public Housing Program if it is to cover that program. The McKinney Amendments was enacted on November 7, 1988 and is subject to the requirements of the Indian Housing Act. Although the McKinney Amendments modifies the public housing program, HUD believes that section 904 of the McKinney Amendments does not come within coverage of the Indian Housing Act exclusion because it is not a law which specifically modifies the public housing program under title I of the 1937 Act. Section 904 is general legislation modifying all HUD programs, including title I. The requirements of section 904 would, therefore, be applicable to Indian Public Housing Program.

HUD has published a proposed rule to consolidate all Indian Housing regulations from 24 CFR Chapter IX into a revamped part 905. When this rule is made final, appropriate amendments will be inserted in the appropriate place in the reconstituted part 905.

IV. Findings and Certifications

Environment. A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours (7:30 a.m. to 5:00 p.m. weekdays) in the Office of the Rules Docket Clerk, Office of the General Counsel, Department of Housing and Urban Development, Room 10276, 451 Seventh Street, SW., Washington, DC 20410.

Major rule. This rule would not constitute a "major rule" as that term is defined in section 1(d) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. An analysis of the rule indicates that it would not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act. In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule would require applicants and participants in certain HUD programs to sign consent forms permitting (1) HUD, the PHA, or the owner to verify employee income information, and (2) HUD or the PHA to request wage and claim information from a SWICA. The costs of complying with this requirement and collection of the information would be slight since verification of family income is already required.

Executive Order 12612, Federalism. The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the policies contained in this rule would not (if implemented) have federalism implications and, thus, are not subject to review under the Order. Although section 904 preempts certain State privacy acts which interfere with the ability of HUD and PHAs to collect wage and claim information about applicants and participants in HUD programs from SWICAs, the extent of the preemption is the minimum necessary to accomplish the goals of section 904 in the collection of the information. A full discussion of Federal preemption of State privacy acts by section 904 can be found under paragraph N. of the preamble. Moreover, the only entities subject to the rule that are covered by the Order are PHAs and SWICAs. PHAs would be affected in their role as "processing entities." Since PHAs already perform significant functions in this role with respect to providing HUD assistance to applicants and participants, the additional burden of requiring applicants and participants to sign consent forms and of collecting information pursuant to the consent would appear to be insubstantial. SWICAs would be required to provide wage and claim information to HUD and PHAs. Since HUD anticipates the information will be collected through a computer matching program, the burden on the SWICAs should be small. SWICAs would also be reimbursed for this activity.

Executive Order 12606, the Family. The General Counsel, as the Designated Official under Executive Order 12606, *the Family*, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. Applicants and participants, and members of their families, would be required to sign consent forms authorizing the verification or collection of certain information necessary for determining eligibility for or level of benefits under the covered programs. Consent forms to permit verification of information provided by the family are already required. This rule would add an insignificant additional burden for applicants and participants, and will help ensure that scarce housing assistance will be targeted to the truly needy.

Semiannual agenda of regulations. This rule was listed as item number 900 in the Department's Semiannual Agenda of Regulations published on April 24, 1989 (54 FR 16708, 16709) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

Catalog of Federal Domestic Assistance. The catalog of Federal Domestic Assistance program numbers are 14.103, 14.135, 14.137, 14.149, 14.150, 14.157, 14.177, 14.850, 14.851, and 14.852.

Information collection requirements. The collection of information requirements contained in this rule have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980. Virtually all of the sections of this proposed rule have been determined by the Department to contain collection of information requirements. Information on these requirements is provided as follows:

TABULATION OF ANNUAL REPORTING BURDEN [1] INCOME VERIFICATION PROCEDURES FOR APPLICANTS AND PARTICIPANTS IN HUD PROGRAMS

Description of information collection response	Section of 24 CFR affected hours	Number of respondents	Number of responses per respondent	Total annual	Hours per response	Total
Consent form allowing: (1) HUD or Public Housing Authority (PHA) or owner to verify employee income information with previous or current employees; (2) HUD or the PHA to request wage and claim information from the State Wage agency responsible for the administration of the State Unemployment Law State Wage Information Collection Agency (SWICA) (2502–0204)	200, 215, 221, 225, 247, 290, 760, 883, 884, 885, 886	2,171,256	4	8,685,024	.016	138,960
Consent form allowing: (1) HUD or PHA or owner to verify employee income information with previous or current employers; (2) HUD or the PHA to request wage and claim information from State Wage Agency responsible for the administration of the State Unemployment Law (SWICA) (2577–0083)	760, 813, 882, 887, 900, 904, 905, 913, 960	2,640,000	4	10,560,000	.016	168,960
OIG request for SWICA to provide wage and claim information (includes computer match agreement and running magnetic tape against State Wage database)		52	1	53	16	848
Total annual burden						308,768

[1] The annual reporting burden for OMB clearance numbers (2502–0204) and (2577–0083) on this table was included in the calculation of annual burden at the most recent approval of each and therefore does not represent an increase in the HUD information collection inventory.

List of Subjects

24 CFR Part 200

Administrative practice and procedure, Claims, Housing standards, Loan programs: housing and community development, Mortgage insurance, Organization and functions (Government agencies), Reporting and recordkeeping requirements, Minimum property standards, Incorporation by reference.

Public housing, Indian housing.

24 CFR Part 960

Public housing.

Accordingly, 24 CFR Parts 200, 215, 221, 236, 247, 290, 813, 880, 881, 882, 883, 884, 885, 886, 887, 900, 904, 905, 913, and 960 would be amended, and new 24 CFR part 760 would be added, to read as follows:

PART 200—INTRODUCTION

1. The authority citation for part 200 would be revised to read as follows:

Authority: Titles I, II, National Housing Act (12 U.S.C. 1701–1715z–16); sec. 7(d), Department of Housing and Urban Development Act (12 U.S.C. 3535(d)). Subpart V is also issued under sec. 904 of the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (42 U.S.C. 3544), sec. 101, Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), and sec. 203, Housing and Community Development Amendments of 1978 (12 U.S.C. 1715z–11).

2. Part 200 is amended by adding new subpart V, to read as follows:

Subpart V—Income Verification Procedures for Applicants and Participants in HUD's Assisted Mortgage and Loan Insurance and Related Programs

Sec.

200.1201 Summary, purpose, and Federal preemption.
200.1203 Applicability.
200.1205 Definitions.
200.1210 Consent by applicants and participants.
200.1215 Penalties for failing to sign consent forms.
200.1220 Compliance with the Privacy Act and other requirements.
200.1225 Request for wage and claim information from SWICAs and restrictions on the use of the information.
200.1230 Procedures for termination, denial, suspension, or reduction of benefits based on information obtained from a SWICA.
200.1235 Criminal and civil penalties.
200.1240 Implementation.

§ 200.1201 Summary, purpose, and Federal preemption.

(a) *Summary.*

(1) This part implements section 904 of the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 ("McKinney Amendments") as it pertains to the assisted mortgage and loan insurance and related programs administered by the Department of Housing and Urban Development under Subchapter B of this Chapter. The programs covered by this subpart include the following: Rent Supplements under 24 CFR part 215; management of HUD-acquired multifamily properties under 24 CFR part 290; and the rental assistance programs under sections 221(d)(3)(BMIR) and 236 of the National Housing Act. Section 904 is implemented for most of the housing assistance programs administered by HUD under 24 CFR Chapters VIII and IX, at 24 CFR part 760.

(2) This part requires applicants and participants in the covered programs to sign consent forms authorizing:

(i) HUD or the owner to verify employee income information; and

(ii) HUD to request a SWICA to release wage and claim information. The failure of any person to sign these consent forms constitutes grounds for denial of eligibility, or termination of assistance or tenancy (or both), for the covered program.

(3) This part restricts the use of information received by HUD from a SWICA to

(i) Verifying an applicant's or participant's eligibility for or level of benefits; or

(ii) Informing the owner that an applicant's or participant's eligibility for or level of benefits is uncertain and needs to be verified. This part prohibits termination, denial, suspension, or reduction of benefits without prior independent verification of wage and claim information obtained from a SWICA. The applicant or participant shall then be notified of any adverse findings and given an opportunity to contest them.

(4) This part provides criminal and civil penalties for certain wrongful or negligent actions under this part.

(b) *Purpose.* The purpose of this part is to enable HUD to obtain employee income information and wage and claim information about applicants and participants in the covered programs in order to verify an applicant's or participant's eligibility for or level of benefits and help decrease the incidence of fraud, waste, and abuse in these programs.

(c) *Federal Preemption.* This part preempts any State law, including restrictions and penalties, which governs the collection and use of employee income information and wage and claim information to the extent it is inconsistent with this part.

§ 200.1203 Applicability.

(a) *Information to be Covered by Consent Forms.* The information covered by consent forms described in this part involves employee income information and wage and claim information from a SWICA. In addition, consent forms may authorize the collection of other information, including information which can be obtained under other laws, regulations, and handbooks.

(b) *Programs Covered.* This part applies to the following housing assistance programs contained in subchapter B of this Chapter:

(1) Part 215, Rent Supplement Payments.

(2) Part 221, Low Cost and Moderate Income Mortgage Insurance (BMIR).

(3) Part 236, Mortgage Insurance and Interest Reduction Payments for Rental Projects.

(4) Part 290, Management and Disposition of HUD-Owned Multifamily Housing Projects.

§ 200.1205 Definitions.

As used in this part:

Applicant has the following meaning for the programs referred to in § 200.1203: An individual or family that seeks assistance under 24 CFR part 215, 221 (BMIR), 236, or 290.

Claim information means information regarding:

(a) Whether an individual is receiving, has received, or has applied for unemployment compensation;

(b) The amount of compensation the individual is receiving or is entitled to receive; and

(c) The period or periods when, or with respect to which, the individual actually received such compensation.

Consent form means a consent form or forms approved by HUD to be signed by applicants and participants for the purpose of obtaining employee income information from employers and wage and claim information from a SWICA or other information which can be obtained under other laws, regulations and handbooks.

Employee income information means all the information known to current or previous employers which HUD or the processing entity determines is necessary for purposes of determining an applicant's or participant's eligibility for or level of benefits in a covered program.

HUD means the United States Department of Housing and Urban Development.

Owner means the person or entity (or employee of an owner) that leases an assisted dwelling unit to an eligible family.

Participant has the following meaning for the programs referred to in § 200.1203: A tenant or a qualified tenant under 24 CFR part 215, 221 (BMIR), 236, or 290.

Processing entity means the person or entity that is responsible for making eligibility determinations and any interim or regularly scheduled income reexaminations under any of the programs referred to in § 200.1203.

Scheduled income reexamination has the following meaning for the programs referred to in § 200.1203.

(a) *Parts 215, 221(BMIR), and 236.* The regularly scheduled reexamination of participant income.

(b) *Part 290.* Income certification as provided by § 290.17(e).

State Wage Information Collection Agency (SWICA) means the SWICA receiving quarterly wage reports from employers in the State (which may be the agency administering the State's unemployment compensation program), or an alternative system which has been determined by the Secretary of Labor to be as effective and timely in providing employment related income and eligibility information.

Wage information means information about wages as defined in the State's unemployment compensation law and includes the Social Security Number (or numbers, if more than one) and quarterly wages of an employee, and the name, address, State, and (when known) Federal employer identification number of an employer reporting wages under a State unemployment compensation law.

§ 200.1210 Consent by applicants and participants.

(a) *Required consent by applicants and participants.* The following individuals shall sign consent forms authorizing HUD or the owner to verify employee income information, and HUD to request a SWICA to release wage and claim information:

(1) Each applicant under a program referred to in § 200.1203, including each family head and spouse regardless of age, and every other member of the household of the applicant who is at least 18 years of age; and

(2) Each participant in a program referred to in § 200.1203, including each family head and spouse regardless of age, and every other member of the participant's household who is at least 18 years of age.

(b) *Consent authorization: To whom and when—*

(1) Consent by applicants. Applicants shall sign the consent forms and submit them to the processing entity when their eligibility under a program referred to in § 200.1203 is being determined. Applicants shall be responsible for the signing and submitting of consent forms by members of their household.

(2) Initial consent by participants. If participation for a program referred to in § 200.1203 was initiated before the effective date of the part, participants, including members of their family, shall sign and submit consent forms at the next interim or regularly scheduled income reexamination. Participants shall be responsible for the signing and submitting of consent forms by members of their households.

(3) Subsequent consent forms to be signed at each regularly scheduled income reexamination. Participants who have signed initial consent forms under this section. Once a participant has submitted signed consent forms as an applicant or as a preexisting participant, subsequent consent forms are required to be signed and submitted at each regularly scheduled income reexamination.

(4) Subsequent consent forms to be signed at the next interim or regularly scheduled income reexamination—special cases. Consent forms are required under the following circumstances:

(i) Where there has been a change in the composition of the participant's family, any new member of the family shall sign and submit a consent form at the next interim or regularly scheduled reexamination.

(ii) When a member of a family turns 18 years of age, that member shall sign and submit a consent form at the next interim or regularly scheduled reexamination; and

(iii) Such other circumstances as HUD may prescribe in administrative instructions.

§ 200.1215 Penalties for failing to sign consent forms.

(a) *Denial of Eligibility.* The processing entity shall deny the eligibility of an applicant, in accordance with the provisions governing the program involved, if the applicant, or any member of the applicant's household, does not sign and submit the consent forms as required in § 200.1210.

(b) *Termination of assistance or tenancy.* It shall be considered grounds for termination of assistance, and (as provided by the individual program covered by this part) the tenancy of a participant, in accordance with the provisions governing the program involved, if the participant, or any member of the participant's household, fails to sign and submit the consent forms as required in § 200.1210.

(c) *Cross references.* Individuals should consult the regulations and administrative instructions for the programs referred to in § 200.1203 for further information on the use of employee income information and wage and claim information in determining the eligibility of applicants and the continued eligibility of participants.

§ 200.1220 Compliance with the Privacy Act and other requirements.

Compliance with the Privacy Act. The collection, maintenance, use, and dissemination of employee income information and wage and claim information under this part shall be conducted, to the extent applicable, in compliance with the Privacy Act (5 U.S.C. 552a) and all other provisions of Federal, State, and local law.

§ 200.1225 Request for wage and claim information from SWICAs and restrictions on the use of the information.

(a) *Information Available from SWICA—to whom and what.* HUD may, after signed consent forms have been submitted to the processing entity by an applicant or participant, request wage and claim information from a SWICA. Regulations prescribed by the Secretary of Labor govern how often and in what form information may be disclosed by a SWICA.

(b) *Restrictions on Use of Wage and Claim Information Obtained from SWICA.* HUD may only use wage and claim information obtained from a SWICA:

(1) To verify an applicant's or participant's eligibility for or level of benefits; or

(2) In the case of an owner, to inform the owner that an applicant's or participant's eligibility for or level of benefits is uncertain and needs to be verified.

§ 200.1230 Procedures for termination, denial, suspension, or reduction of benefits based on information obtained from a SWICA.

(a) *Termination, Denial, Suspension, or Reduction of Benefits.* A Federal, State, or local agency or an owner may terminate, deny, suspend, or reduce any benefits of an applicant or participant based on wage and claim information obtained from a SWICA if:

(1) the agency has taken the steps contained in paragraph (b) of this section to independently verify wage and claim information relating to—

(i) The amount of the wages or unemployment compensation involved;

(ii) Whether such applicant or participant actually has (or had) access to such wages or benefits for his or her own use; and

(iii) The period or periods when, or with respect to which, the applicant or participant actually received the wages or benefits; and

(2) The applicant or participant has been given an opportunity to contest any adverse findings in accordance with paragraph (c) of this section.

(b) *Procedures for Independent Verification.*—(1) *Verification by HUD.* Upon receiving wage and claim information from a SWICA, HUD shall compare this information with the information about a family's income obtained by the owner from the

applicant or participant or from his or her employer. Where the wage and claim information reveals an employer that was not disclosed by the applicant or participant or where the wage and claim information differs from the information received from the applicant or participant or from his or her employer, HUD may request the undisclosed employer or other employer to furnish, in writing to the owner, any information HUD determines to be necessary for purposes of having the owner redetermine an applicant's or participant's eligibility for or level of benefits in a covered program. Based on the wage and claim information, HUD may inform an owner that an applicant's or participant's eligibility for or level of benefits is uncertain and needs to be verified. The owner shall then reverify the applicant's or participant's income information by checking the accuracy of the information with the employer or directly with the family. However, before any benefits are terminated, denied, suspended, or reduced, HUD shall independently verify the accuracy of the wage and claim information obtained from a SWICA as described in this paragraph. HUD may not disclose wage and claim information directly to an owner.

(2) *Verification by Applicant or Participant.* Where independent verification cannot be obtained from any other source, HUD may independently verify wage and claim information obtained from a SWICA by checking the accuracy of the information with the applicant or participant directly.

(c) *Opportunity to Contest.* HUD or the owner shall promptly notify any applicant or participant, in writing, of any adverse findings made on the basis of the information verified in accordance with paragraph (b) of this section. Termination, denial, suspension, or reduction of benefits shall be determined according to the standards, including the income standards, applicable to the individual covered program. The applicant or participant shall be given an opportunity to contest the findings in the same manner as applies to other information and findings relating to eligibility factors under the applicable housing assistance program.

§ 200.1235 Criminal and civil penalties.

(a) *Criminal Penalties.* Any person who knowingly and willfully requests or obtains under false pretenses any wage and claim information concerning an applicant or participant from a SWICA pursuant to this part, or who knowingly and willfully discloses any such information in any manner to any individual not entitled under any law to receive it, shall be guilty of a misdemeanor and fined not more than $5,000. The term "person" for purposes of this paragraph shall include an officer or employee of HUD and any owner (or employee of an owner) responsible for determining eligibility for or level of benefits.

(b) *Civil Penalties.* Any applicant or participant affected by:

(1) A negligent or knowing disclosure of information referred to in section 904 of the McKinney Amendments or section 303(i) of the Social Security Act about such person by an officer or employee of any PHA or owner (or employee of an owner), which disclosure is not authorized by section 904, section 303(i), or any implementing regulation, or

(2) Any other negligent or knowing action that is inconsistent with section 904, section 303(i), or any implementing regulation may bring a civil action for damages and such other relief as may be appropriate against any owner (or employee of an owner) responsible for any such unauthorized action. Authorized use of employee income information includes any use of the information determined by HUD or an owner to be necessary for determining eligibility for or level of benefits in a covered program and not prohibited by any Federal or State law. Jurisdiction of such a case is in the United States district court in the district in which the affected applicant or participant resides, in which the unauthorized action occurred, or in which the applicant or participant alleged to be responsible for the unauthorized action resides. Appropriate relief that may be ordered by the district court shall include reasonable attorney fees and other litigation costs.

§ 200.1240 Implementation.

(a) *Applicants.* The provisions of this part, and the conforming changes made with respect to consent forms in the regulations governing the programs referred to in § 200.1203 apply to all applicant eligibility determinations initiated on or after the effective date of this rule.

(b) *Participants.* The provisions of this part and the conforming changes made with respect to the execution of consent forms for participants in the regulations governing the programs referred to in § 200.1203 apply to:

(1) Each interim or regularly scheduled reexamination of the income of a participant initiated by the processing entity on or after the effective date of this rule; and

(2) Each such reexamination thereafter.

PART 215—RENT SUPPLEMENT PAYMENTS

3. The authority citation for part 215 would continue to read as follows:

Authority: Sec. 101(g), Housing and Urban Development Act of 1965 (12 U.S.C. 1701s); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

4. In § 215.20, paragraph (b)(2) would be revised to read as follows:

§ 215.20 Qualified tenant.

* * * * *

(b) * * *

(2) For requirements covering the disclosure and verification of Social Security Numbers by individuals and families, see part 200, subpart T, of this chapter. For requirements covering the signing and submitting of consent forms by individuals and families, see part 200, subpart V, of this chapter.

* * * * *

5. Section 215.55 would be revised to read as follows:

§ 215.55 Reexamination of family income and composition.

(a) *Regular reexaminations.* The owner must reexamine the income and family composition of all Qualified Tenants at least once every 12 months. After consultation with the Qualified Tenant and upon verification of the information, the owner must make appropriate adjustments in the Total Tenant Payment in accordance with § 215.45 and determine whether the family's unit size is still appropriate. The owner must adjust Tenant Rent and the Rent Supplement payment to reflect any change in Total Tenant Payment and must carry out any unit transfer required by HUD. At the time of the annual reexamination of family income and composition, the owner must require the Qualified Tenant to meet the disclosure and verification requirements for Social Security Numbers, as provided by part 200, subpart T of this chapter, and to sign and submit consent forms, as provided by part 200, subpart V, of this chapter.

(b) *Interim reexaminations.* The Qualified Tenant must comply with provisions in its lease regarding interim reporting of changes in income or family composition. If the owner receives information concerning a change in the Qualified Tenant's income or other circumstances between regularly scheduled reexaminations, the owner must consult with the Qualified Tenant and make adjustments determined to be appropriate. Any change in the Qualified Tenant's income or other circumstances that would result in an adjustment in the Total Tenant Payment, Tenant Rent, and the Rent Supplement Payment must be verified. At the time of the interim reexamination, the owner must require the Qualified Tenant to sign and submit consent forms, as required by part 200, subpart V of this chapter. See 24 CFR 750.10(d)(2)(i) for the requirements for the disclosure and verification of Social Security Numbers for interim reexaminations involving new family members.

(c) *Termination of assistance.* A Qualified Tenant's eligibility for Rent Supplement Payments continues until the Total Tenant Payment equals the Gross Rent. The rent charged at that point may not exceed the market rent approved by the Secretary. The termination of eligibility at such point will not affect the Qualified Tenant's other rights under its lease, nor will such termination preclude the resumption of payments as a result of later changes in income, rents, or other relevant circumstances during the term of the contract. However, assistance also may be terminated in accordance with any requirements of the lease or with HUD requirements, including the failure of the Qualified Tenant to meet the disclosure and verification requirements for Social Security Numbers, as provided by part 200, subpart T of this chapter, and the failure of the Qualified Tenant to sign and submit consent forms, as provided by part 200, subpart V of this chapter.

PART 221—LOW COST AND MODERATE INCOME MORTGAGE INSURANCE

6. The authority citation for part 221 would continue to read as follows:

Authority: Secs. 211, 221 National Housing Act (12 U.S.C. 1715b, 1715l; sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)); sec. 221.544(a)(3) is also issued under sec. 201(a), National Housing Act (12 U.S.C. 1707(a)).

7. In § 221.537, a new paragraph (f) would be added, to read as follows:

§ 221.537 Additional occupancy requirements; preferred purchasers or tenants.

* * * * *

(f) *Signing of Consent Forms for Income Verification.* Upon determining an individual's or family's eligibility for initial occupancy under paragraph (a) of this section, and at any subsequent reexamination of a tenant's income for continued occupancy under paragraph (b) of this section, the mortgagor must require the individual or family, or the tenant (as appropriate), to sign and submit consent forms as provided by part 200, subpart V, of this chapter. Failure of the individual or family, or the tenant (as appropriate), to meet such requirements will constitute grounds for denying its eligibility for initial occupancy, or for terminating its tenancy, in accordance with the Commissioner's administrative instructions and, if applicable, part 200, subpart V, of this chapter.

PART 236—MORTGAGE INSURANCE AND INTEREST REDUCTION PAYMENT FOR RENTAL PROJECTS

8. The authority citation for part 236 would continue to read as follows:

Authority: Secs. 211, 236, National Housing Act (12 U.S.C. 1715b, 1715z–1); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

9. In § 236.70, paragraph (a)(1) would be revised to read as follows:

§ 236.70 Occupancy requirements.

(a)(1) In processing applications for admission, the housing owner will

(i) Establish to the satisfaction of the Commissioner that it qualifies as a group practice unit, as that term is defined in 24 CFR 244.1(c);

(ii) Meet the requirements for the disclosure and verification of Social Security and Employer Identification Numbers, as provided by part 200, subpart U, of this chapter; and

(iii) Meet the requirements for the signing and submitting of consent forms as provided by part 200, subpart V, of this chapter.

* * * * *

10. Section 236.80 would be revised to read as follows:

§ 236.80 Reexamination of income.

(a) *Regular reexaminations.* The owner must reexamine the income and family composition of all Qualified Tenants at least once every 12 months. After consultation with the Qualified Tenant and upon verification of the information, the owner must make appropriate adjustments in the Tenant Rent (or Total Tenant Payment for tenants receiving the benefit of Rental Assistance Payments) in accordance with § 236.55 or § 236.735, and determine whether the Qualified Tenant's unit size is still appropriate. The owner must adjust Tenant Rent and the Rental Assistance Payment, if applicable, to reflect any change in Total Tenant Payment, and must carry out any unit transfer required by HUD. At the time of the annual reexamination of family income and composition, the owner must require the family to sign and submit consent forms, as provided by part 200, subpart V, of this chapter.

(b) *Interim reexaminations.* The Qualified Tenant must comply with provisions in its lease regarding interim reporting of changes in income or family composition. If the owner receives information concerning a change in the Qualified Tenant's income or other circumstances between regularly scheduled reexaminations, the owner must consult with the Qualified Tenant and make adjustments determined to be appropriate. Any change in the Qualified Tenant's income or other circumstances that would result in an adjustment in the Rental Assistance Payment or Tenant Rent must be verified. At the time of the interim reexamination, the owner must require the Qualified Tenant to sign and submit consent forms, as required by part 200, subpart V of this chapter.

(c) *Termination of assistance.* A Qualified Tenant loses eligibility for assistance when the Tenant Rent (Total Tenant Payment for tenants receiving the benefit of Rental Assistance Payments) equals the Basic Rent (Gross Rent for RAP tenants). The termination of eligibility at such point will not affect the Qualified Tenant's other rights under its lease, nor will such termination preclude the resumption of payments as a result of later changes in income, rents or other relevant circumstances during the term of the contract. However, assistance or eligibility to pay below Market Rent also may be terminated in accordance with any requirements of the lease or with HUD requirements, including failure to sign consent forms, as provided by part 200, subpart V, of this chapter.

11. Section 236.710 would be revised to read as follows:

§ 236.710 Qualified tenant.

The benefits of rental assistance payments are available only to an individual or a family renting a dwelling unit in a project that is subject to a contract under this subpart or occupying such a dwelling unit as a cooperative member. To qualify for such benefits, the individual or family must satisfy the definition of Qualified Tenant found in § 236.2 of subpart A. In order to receive rental assistance under this Subpart, it must have been determined that the income of the individual or family is too low to permit the individual or family to pay the approved Gross Rent with 30 percent of such individual's or family's Adjusted Monthly Income, as defined in subpart A. For requirements concerning the signing and submitting of consent

forms, see part 200, subpart V, of this chapter.

PART 247—EVICTIONS FROM CERTAIN SUBSIDIZED AND HUD-OWNED PROJECTS

12. The authority citation for Part 247 would continue to read as follows:

Authority: Sec. 101, Housing and Urban Development Act of 1965 (12 U.S.C. 1701s); secs. 211, 221, 236, National Housing Act (12 U.S.C. 1715b, 1715*l*, 1715z–1); sec. 202, Housing Act of 1959 (12 U.S.C. 1701q); secs. 3, 5, 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, 1437f); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

13. In § 247.3, paragraph (c) would be revised to read as follows:

§ 247.3 Entitlement of tenants to occupancy.

* * * * *

(c) *Material noncompliance.* The term "material noncompliance with the rental agreement" includes:

(1) One or more substantial violations of the rental agreement;

(2) Repeated minor violations of the rental agreement that:

(i) Disrupt the livability of the project,

(ii) Adversely affect the health or safety of any person or the right of any tenant to the quiet enjoyment of the leased premises and related project facilities,

(iii) Interfere with the management of the project, or

(iv) Have an adverse financial effect on the project;

(3) Failure of the tenant to timely supply all required information on the income and composition, or eligibility factors, of the tenant household (including failure to meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 200, subpart T, or 24 CFR part 750 (as appropriate), or failure to sign and submit consent forms, as provided by 24 CFR part 200, subpart V, or 24 CFR part 760 (as appropriate)) will constitute a substantial violation of the rental agreement; and

(4) Non-payment of rent or any other financial obligation due under the rental agreement (including any portion thereof) beyond any grace period under State law, except that the payment of rent or any other financial obligation due under the rental agreement after the due date, but within the grace period permitted under State law, constitutes a minor violation.

PART 290—MANAGEMENT AND DISPOSITION OF HUD-OWNED MULTIFAMILY HOUSING PROJECTS

14. The authority citation for part 290 would continue to read as follows:

Authority: Secs. 202, 203, 204, Housing and Community Development Amendments of 1978 (12 U.S.C. 1715z–1b, 1701z–11, 1701z–12); secs. 207, 211, National Housing Act (12 U.S.C. 1713, 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

15. In § 290.17, a new paragraph (h) would be added, to read as follows:

§ 290.17 Rental rates during ownership by HUD.

* * * * *

(h) *Signing of consent forms for income verification.* Any certifications or reexaminations of the income of tenants or prospective tenants in connection with tenancy under this section are subject to the requirements for the signing and submitting of consent forms, as provided by part 200, subpart V, of this chapter.

16. 24 CFR chapter VII would be amended by adding a new part 760, to read as follows:

PART 760—INCOME VERIFICATION PROCEDURES FOR APPLICANTS AND PARTICIPANTS IN HUD'S SECTION 8 AND PUBLIC HOUSING PROGRAMS

Subpart A—General

Sec.
760.1 Summary, purpose, and Federal preemption.
760.3 Applicability.
760.5 Definitions.

Subpart B—Conditions Governing Collection and Use of Information Obtained Pursuant to Consent Forms

760.10 Consent by applicants and participants.
760.15 Penalties for failing to sign consent forms.
760.20 Compliance with the Privacy Act and other requirements.
760.25 Request for wage and claim information from SWICA and restrictions on the use of the information.
760.30 Procedures for termination, denial, suspension, or reduction of benefits based on information obtained from a SWICA.
760.35 Criminal and civil penalties.

Subpart C—Implementation

760.40 Effective date of rule.

Authority: Sec. 904, Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (42 U.S.C. 3544), sec. 3, 6, 8, 205, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437d, 1437f, 1437ee); sec. 202, Housing Act of 1959 (12 U.S.C. 1701q); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Subpart A—General

§ 760.1 Summary, purpose, and Federal preemption.

(a) *Summary.* (1) This part implements section 904 of the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 ("McKinney Amendments") as it pertains to the section 8 Housing Assistance Payments program and the Public and Indian Housing programs. Section 904 is implemented for the assisted mortgage and loan insurance and related programs administered by HUD under 24 CFR chapter II, subchapter B, at 24 CFR part 200, subpart V.

(2) This part requires applicants and participants in the covered programs to sign consent forms authorizing:

(i) HUD, the PHA, or the owner to verify employee income information; and

(ii) HUD or the PHA to request a SWICA to release wage and claim information.

The failure of any person to sign these consent forms constitutes grounds for denial of eligibility, or termination of assistance or tenancy (or both), for the covered program.

(3) This part restricts the use of information received by HUD or a PHA from a SWICA to:

(i) Verifying an applicant's or participant's eligibility for or level of benefits; or

(ii) In the case of an owner, informing the owner that an applicant's or participant's eligibility for or level of benefits is uncertain and needs to be verified.

This part prohibits termination, denial, suspension, or reduction of benefits without prior independent verification of wage and claim information obtained from a SWICA. The applicant or participant shall then be notified of any adverse findings and given an opportunity to contest them.

(4) This part provides criminal and civil penalties for certain wrongful or negligent actions under this part.

(b) *Purpose.* The purpose of this part is to enable HUD and PHAs to obtain employee income information and wage and claim information about applicants and participants in the covered programs in order to verify an applicant's or participant's eligibility for or level of benefits and help decrease the incidence of fraud, waste, and abuse in these programs.

(c) *Federal Preemption.* This part preempts any State law, including restrictions and penalties, which governs the collection and use of employee income information and wage and claim information to the extent it is inconsistent with this part.

§ 760.3 Applicability.

(a) *Information to be Covered by Consent Forms.* The information covered by consent forms described in this part involves employee income information, and wage and claim information from a SWICA. In addition, consent forms may authorize the collection of other information, including information which can be obtained under other laws, regulations, and handbooks.

(b) *Programs Covered.* This part applies to the following housing assistance programs contained in Chapters VIII and IX of this title:

(1) Part 880, Section 8 Housing Assistance Payments for New Construction.

(2) Part 881, Section 8 Housing Assistance Payments for Substantial Rehabilitation.

(3) Part 882, Section 8 Housing Assistance Payments Program for Housing Certificates and Moderate Rehabilitation.

(4) Part 883, Section 8 Housing Assistance Payments Program for State Housing Agencies.

(5) Part 884, Section 8 Housing Assistance Payments Program, New Construction Set-aside for Section 515 Rural Rental Housing Projects.

(6) Part 885, Loans for Housing for the Elderly or Handicapped.

(7) Part 886, Section 8 Housing Assistance Program Special Allocations (Subpart A, Loan Management, and Subpart C, Property Disposition).

(8) Part 887, Housing Vouchers.

(9) Part 900, Section 23 Housing Assistance Payments Program—New Construction and Substantial Rehabilitation.

(10) Part 904, Low Income Housing Homeownership Opportunities.

(11) Part 905, Indian Housing.

(12) Part 960, Admission to, and Occupancy of, Public Housing.

§ 760.5 Definitions.

As used in this part:

Applicant has the following meaning for the programs referred to in § 760.3:

(a) 24 CFR parts 880, 881, 882, 883, 884, 885, 886, 887 and 900: An applicant for assistance or participation, as appropriate, under the covered program.

(b) 24 CFR part 904: A prospective homebuyer.

(c) 24 CFR part 905: A prospective tenant or homebuyer under the program.

(d) 24 CFR part 960: A prospective tenant.

Claim information means information regarding:

(a) Whether an individual is receiving, has received, or has applied for unemployment compensation;

(b) The amount of compensation the individual is receiving or is entitled to receive; and

(c) The period or periods when, or with respect to which, the individual actually received such compensation.

Computer match means the automated comparison of data bases containing records about individuals.

Computer matching agreement means the agreement which describes the responsibilities and obligations of the parties regarding a computer match.

Consent form means a consent form or forms approved by HUD to be signed by applicants and participants for the purpose of obtaining employee income information from employers and wage and claim information from a SWICA or other information which can be obtained under other laws, regulations and handbooks.

Employee income information means all the information known to current or previous employers which HUD or the processing entity determines is necessary for purposes of determining an applicant's or participant's eligibility for or level of benefits in a covered program.

HUD means the United States Department of Housing and Urban Development.

Owner means the person or entity (or employee of an owner) that leases an assisted dwelling unit to an eligible family.

Participant has the following meaning for the programs referred to in § 760.3.

(a) 24 CFR parts 880, 881, 882, 883, 884, 885, 886, 887, and 900: A family receiving assistance under the covered program.

(b) 24 CFR part 904: A homebuyer under the program.

(c) 24 CFR part 905: A tenant or homebuyer under the program.

(d) 24 CFR part 960: A tenant under the program.

Public Housing Agency (PHA) means any State, county, municipality, or other governmental entity or public body (or agency or instrumentality thereof) that is authorized to engage in or assist in the development or operation of housing for lower income families under 24 CFR chapters VIII or IX. The term includes Indian housing authorities.

Processing entity means the person or entity that is responsible for making eligibility determinations and any interim or regularly scheduled income reexaminations under any of the programs referred to in 24 CFR 750.3.

State Wage Information Collection Agency (SWICA) means the SWICA, including any Indian tribal agency, receiving quarterly wage reports from employers in the State (which may be the agency administering the State's unemployment compensation program), or an alternative system which has been determined by the Secretary of Labor, to be as effective and timely in providing employment related income and eligibility information.

Wage information means information about wages as defined in the State's unemployment compensation law and includes the Social Security Number (or numbers, if more than one) and quarterly wages of an employee, and the name, address, State, and (when known) Federal employer identification number of an employer reporting wages under a State unemployment compensation law.

Subpart B—Conditions Governing Collection and Use of Information Obtained Pursuant to Consent Forms

§ 760.10 Consent by applicants and participants.

(a) *Required consent by applicants and participants.* The following individuals shall sign consent forms authorizing HUD, the PHA, or the owner to verify employee income information, and HUD or the PHA to request a SWICA to release wage and claim information:

(1) Each applicant under a program referred to in § 760.3, including each family head and spouse regardless of age, and every other member of the household of the applicant who is at least 18 years of age; and

(2) Each participant in a program referred to in § 760.3, including each family head and spouse regardless of age, and every other member of the participant's household who is at least 18 years of age.

(b) *Consent authorization: to whom and when—*

(1) Consent by applicants. Applicants shall sign the consent forms and submit them to the processing entity when their eligibility under a program referred to in § 760.3 is being determined. Applicants shall be responsible for the signing and submitting of consent forms by members of their household.

(2) Initial consent by participants. If participation for a program referred to in § 760.3 was initiated before the effective date of the part, participants, including members of their family, shall sign and submit consent forms at the next regularly scheduled income reexamination. Participants shall be responsible for the signing and submitting of consent forms by members of their households.

(3) Subsequent consent forms to be signed at each regularly scheduled income reexamination by participants who have signed initial consent forms.

§ 760.15 Penalties for failing to sign consent forms.

(a) *Denial or termination of assistance or tenancy.* If any person who is required to sign a consent form described in this part fails to do so within 10 days after receiving a request to do so, the PHA or owner shall deny or terminate assistance or tenancy (or both), for the covered program.

(b) *Notice and opportunity for hearing.* The PHA or owner shall provide the person with written notice of the proposed denial or termination of assistance or tenancy, and a brief statement of the reasons for the proposed denial or termination. The notice shall offer the person an opportunity to request a hearing before a final action is taken.

§ 760.20 Compliance with the Privacy Act and other requirements.

Compliance with the Privacy Act. The

§ 760.30 Procedures for termination, denial, suspension, or reduction of benefits based on information obtained from a SWICA.

(a) Whether an individual is receiving, has received, or has applied for unemployment compensation;

(b) The amount of compensation the individual is receiving or is entitled to receive; and

(c) The period or periods when, or with respect to which, the individual actually received such compensation.

Computer match means the automated comparison of data bases containing records about individuals.

Computer matching agreement means the agreement which describes the responsibilities and obligations of the parties regarding a computer match.

Consent form means a consent form or forms approved by HUD to be signed by applicants and participants for the purpose of obtaining employee income information from employers and wage and claim information from a SWICA or other information which can be obtained under other laws, regulations and handbooks.

Employee income information means all the information known to current or previous employers which HUD or the processing entity determines is necessary for purposes of determining an applicant's or participant's eligibility for or level of benefits in a covered program.

HUD means the United States Department of Housing and Urban Development.

Owner means the person or entity (or employee of an owner) that leases an assisted dwelling unit to an eligible family.

Participant has the following meaning for the programs referred to in § 760.3.

(a) 24 CFR parts 880, 881, 882, 883, 884, 885, 886, 887, and 900: A family receiving assistance under the covered program.

(b) 24 CFR part 904: A homebuyer under the program.

(c) 24 CFR part 905: A tenant or homebuyer under the program.

(d) 24 CFR part 960: A tenant under the program.

Public Housing Agency (PHA) means any State, county, municipality, or other governmental entity or public body (or agency or instrumentality thereof) that is authorized to engage in or assist in the development or operation of housing for lower income families under 24 CFR chapters VIII or IX. The term includes Indian housing authorities.

Processing entity means the person or entity that is responsible for making eligibility determinations and any interim or regularly scheduled income reexaminations under any of the programs referred to in 24 CFR 750.3.

State Wage Information Collection Agency (SWICA) means the SWICA, including any Indian tribal agency, receiving quarterly wage reports from employers in the State (which may be the agency administering the State's unemployment compensation program), or an alternative system which has been determined by the Secretary of Labor, to be as effective and timely in providing employment related income and eligibility information.

Wage information means information about wages as defined in the State's unemployment compensation law and includes the Social Security Number (or numbers, if more than one) and quarterly wages of an employee, and the name, address, State, and (when known) Federal employer identification number of an employer reporting wages under a State unemployment compensation law.

Subpart B—Conditions Governing Collection and Use of Information Obtained Pursuant to Consent Forms

§ 760.10 Consent by applicants and participants.

(a) *Required consent by applicants and participants.* The following individuals shall sign consent forms authorizing HUD, the PHA, or the owner to verify employee income information, and HUD or the PHA to request a SWICA to release wage and claim information:

(1) Each applicant under a program referred to in § 760.3, including each family head and spouse regardless of age, and every other member of the household of the applicant who is at least 18 years of age; and

(2) Each participant in a program referred to in § 760.3, including each family head and spouse regardless of age, and every other member of the participant's household who is at least 18 years of age.

(b) *Consent authorization: to whom and when—*

(1) Consent by applicants. Applicants shall sign the consent forms and submit them to the processing entity when their eligibility under a program referred to in § 760.3 is being determined. Applicants shall be responsible for the signing and submitting of consent forms by members of their household.

(2) Initial consent by participants. If participation for a program referred to in § 760.3 was initiated before the effective date of the part, participants, including members of their family, shall sign and submit consent forms at the next regularly scheduled income reexamination. Participants shall be responsible for the signing and submitting of consent forms by members of their households.

her employer. Where the wage and claim information reveals an employer that was not disclosed by the applicant or participant or where the wage and

independently verify wage and claim information obtained from a SWICA by checking the accuracy of the information with the applicant or participant

prohibited by any Federal or State law. Jurisdiction of such a case is in the United States district court in the

VOL 54 SS 212 NO 3 1989 UMI

(3) Subsequent consent forms to be signed at each regularly scheduled income reexamination by participants who have signed initial consent forms under this section. Once a participant has submitted signed consent forms as an applicant or as a preexisting participant, subsequent consent forms are required to be signed and submitted at each regularly scheduled income reexamination.

(4) Subsequent consent forms to be signed at the next interim or regularly scheduled income reexamination—special cases. Consent forms are required under the following circumstances:

(i) Where there has been a change in the composition of the participant's family, any new member of the family shall sign and submit a consent form at the next interim or regularly scheduled income reexamination;

(ii) When a member of a family turns 18 years of age, that member shall sign and submit a consent form at the next interim or regularly scheduled reexamination; and

(iii) Such other circumstances as HUD (and in the case of the Public Housing program, or the Section 8 Certificate, Housing Voucher, or Moderate Rehabilitation program, the PHA) may prescribe in administrative instructions.

§ 760.15 Penalties for failing to sign consent forms.

(a) *Denial of Eligibility.* The processing entity shall deny the eligibility of an applicant, in accordance with the provisions governing the program involved, if the applicant, or any member of the applicant's household, does not sign and submit the consent forms as required in § 760.10.

(b) *Termination of assistance or tenancy.* It shall be considered grounds for termination of assistance, and (if provided by the individual program covered by this part) the tenancy of a participant, in accordance with the provisions governing the program involved, if the participant, or any member of the participant's household, fails to sign and submit the consent forms as required in § 760.10.

(c) *Cross references.* Individuals should consult the regulations and administrative instructions for the programs referred to in § 760.3 for further information on the use of employee income information and wage and claim information in determining the eligibility of applicants and the continued eligibility of participants.

§ 760.20 Compliance with the Privacy Act and other requirements.

Compliance with the Privacy Act. The collection, maintenance, use, and dissemination of employee income information and wage and claim information under this part shall be conducted, to the extent applicable, in compliance with the Privacy Act (5 U.S.C. 552a) and all other provisions of Federal, State, and local law.

§ 760.25 Request for wage and claim information from SWICA and restrictions on the use of the information.

(a) *Information Available from SWICA—to whom and what.* HUD or the PHA may, after signed consent forms have been submitted to the processing entity by an applicant or participant, request wage and claim information from a SWICA. Regulations prescribed by the Secretary of Labor govern how often and in what form information may be disclosed by a SWICA. Wage and claim information will generally be obtained through computer matching agreements between HUD or a PHA and a SWICA, as described in paragraph (c) of this section.

(b) *Restrictions on Use of Wage and Claim Information Obtained from SWICA.* HUD or a PHA may only use wage and claim information obtained from a SWICA:

(1) To verify an applicant's or participant's eligibility for or level of benefits; or

(2) In the case of an owner, to inform the owner that an applicant's or participant's eligibility for or level of benefits is uncertain and needs to be verified.

(c) *Computer Matching Agreements between PHAs and SWICA.* Before entering into a computer matching agreement with a SWICA for wage and claim information, the PHA shall submit the agreement to HUD for review and approval. Computer matching agreements shall specify, among other things, the purpose and the legal authority for the match, a description of the records to be matched, a statement regarding disposition of information generated through the match, a description of the administrative and technical safeguards to be used in protecting the information obtained through the match, a description of the use of records, duplication and redisclosure restrictions, and the amount a SWICA will charge HUD or a PHA for processing a request.

§ 760.30 Procedures for termination, denial, suspension, or reduction of benefits based on information obtained from a SWICA.

(a) *Termination, Denial, Suspension, or Reduction of Benefits.* A Federal, State, or local agency, a PHA or an owner may terminate, deny, suspend, or reduce any benefits of an applicant or participant based on wage and claim information obtained from a SWICA if:

(1) The agency or owner has taken the steps contained in paragraph (b) to independently verify wage and claim information relating to—

(i) The amount of the wages or unemployment compensation involved;

(ii) whether such applicant or participant actually has (or had) access to such wages or benefits for his or her own use; and

(iii) the period or periods when, or with respect to which, the applicant or participant actually received the wages or benefits; and

(2) the applicant or participant has been given an opportunity to contest any adverse findings in accordance with paragraph (c) of this section.

(b) *Procedures for Independent Verification.*

(1) *Where HUD or a PHA is responsible for determining eligibility for or level of benefits.* The following procedure constitutes independent verification for purposes of paragraph (a) of this section where a PHA is responsible for determining an applicant's or participant's eligibility for or level of benefits in a covered program.

(i) Where HUD receives wage and claim information from a SWICA, HUD shall compare the information with applicant and participant information about a family's income provided by the PHA to HUD. Where the wage and claim information reveals an employer that was not disclosed by the applicant or participant or where the wage and claim information differs from the information received from the applicant or participant or from his or her employer, HUD shall have the PHA request the undisclosed employer or other employer to furnish in writing to the PHA any information necessary to establish an applicant's or participant's eligibility for or level of benefits in a covered program. Neither HUD nor the PHA may disclose wage and claim information to an owner.

(ii) Where a PHA receives wage and claim information from a SWICA, the PHA shall compare the information with applicant and participant information about a family's income provided by the applicant or participant or from his or her employer. Where the wage and claim information reveals an employer that was not disclosed by the applicant or participant or where the wage and claim information differs from the information received from the applicant or participant or from his or her employer, the PHA shall request the undisclosed employer or other employer to furnish in writing to the PHA any information necessary to establish an applicant's or participant's eligibility for or level of benefits in a covered program. Neither HUD nor the PHA may disclose wage and claim information to an owner.

(2) *Where an owner is responsible for determining eligibility for or level of benefits.* The following procedure constitutes independent verification for purposes of paragraph (a) of this section if an owner is responsible for determining an applicant's or participant's eligibility for or level of benefits in a covered program. Upon receiving wage and claim information from a SWICA, HUD or the PHA, as applicable, shall compare the wage and claim information with the information about a family's income obtained by the owner from the applicant or participant or from his or her employer. Where the wage and claim information reveals an employer that was not disclosed by the applicant or participant or where the wage and claim information differs from the information received from the applicant or participant or from his or her employer, HUD or the PHA shall request the undisclosed employer or other employer to furnish in writing to the owner any information HUD or the PHA determines to be necessary for purposes of having the owner redetermine an applicant's or participant's eligibility for or level of benefits in a covered program. Based on the wage and claim information, HUD or the PHA may inform an owner that an applicant's or participant's eligibility for or level of benefits is uncertain and needs to be verified. The owner shall then reverify the applicant's or participant income information by checking the accuracy of the information with the employer or directly with the family. However, before any benefits are terminated, denied, suspended, or reduced, HUD or the PHA shall independently verify the wage and claim data obtained from a SWICA as described in this paragraph. Neither HUD nor the PHA may disclose wage and claim information to an owner.

(3) *Verification by Applicant or Participant.* Where independent verification cannot be obtained from any other source, HUD or a PHA may independently verify wage and claim information obtained from a SWICA by checking the accuracy of the information with the applicant or participant directly.

(c) *Opportunity to Contest.* HUD, the PHA, or the owner shall promptly notify any applicant or participant in writing of any adverse findings made on the basis of the information verified in accordance with paragraph (b) of this section. Termination, denial, suspension, or reduction of benefits shall be determined according to the standards, including income standards, applicable to each individual program. The applicant or participant shall be given an opportunity to contest the findings in the same manner as applies to other information and findings relating to eligibility factors under the applicable housing assistance program.

§ 760.35 Criminal and civil penalties.

(a) *Criminal Penalties.* Any person who knowingly and willfully requests or obtains under false pretenses any wage and claim information concerning an applicant or participant from a SWICA pursuant to this part, or who knowingly and willfully discloses any such information in any manner to any individual not entitled under any law to receive it, shall be guilty of a misdemeanor and fined not more than $5,000. The term "person" for purposes of this paragraph shall include an officer or employee of HUD, an officer or employee of any PHA, and any owner (or employee of an owner) responsible for determining eligibility for or level of benefits.

(b) *Civil Penalties.* Any applicant or participant affected by:

(1) A negligent or knowing disclosure of information referred to in section 904 of the McKinney Amendments or section 303(i) of the Social Security Act, about such person by an officer or employee of any PHA or owner (or employee of an owner), which disclosure is not authorized by section 904, section 303(i), or any implementing regulation, or

(2) Any other negligent or knowing action that is inconsistent with section 904, section 303(i), or any implementing regulation may bring a civil action for damages and such other relief as may be appropriate against any officer or employee of any PHA or owner (or employee of an owner) responsible for any such unauthorized action. Authorized use of employee income information includes any use of the information determined by HUD, a PHA, or an owner to be necessary for determining eligibility for or level of benefits in a covered program and not prohibited by any Federal or State law. Jurisdiction of such a case is in the United States district court in the district in which the affected applicant or participant resides, in which the unauthorized action occurred, or in which the applicant or participant alleged to be responsible for the unauthorized action resides. Appropriate relief that may be ordered by the district court shall include reasonable attorney fees and other litigation costs.

Subpart C—Implementation

§ 760.40 Effective date of rule.

(a) *Applicants.* The provisions of this part, and the conforming changes made with respect to consent forms in the regulations governing the programs referred to in § 760.3, apply to all applicant eligibility determinations initiated on or after the effective date of this rule.

(b) *Participants.* The provisions of this part, and the conforming changes made with respect to the execution of income verification consent forms for participants in the regulations governing the programs referred to in § 760.3, apply to:

(1) Each interim or regularly scheduled reexamination of the income of a participant initiated by the processing entity on or after the effective date of the rule; and

(2) Each such reexamination thereafter.

PART 813—DEFINITION OF INCOME, INCOME LIMITS, RENT AND REEXAMINATION OF FAMILY INCOME FOR THE SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM AND RELATED PROGRAMS

17. This authority citation for part 813 would continue to read as follows:

Authority: Secs. 3, 5(b), 8, 18, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, 1437f, 1437n); Sec. 7(d) Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

18. In § 813.109, paragraph (a) would be revised to read as follows:

§ 813.109 Initial determination, verification, and reexamination of family income and composition.

(a) *Responsibility for initial determination and reexamination.* The owner or PHA shall be responsible for determination of eligibility for admission; for determination of Annual Income, Adjusted Income and Total Tenant Payment; and for reexamination of Family income and composition at least annually, as provided in pertinent

program regulations and handbooks (see, *e.g.*, part 880, subpart F and part 881, subpart F which for purposes of this part shall apply (as appropriate) to projects developed under 24 CFR part 885, subpart B; 24 CFR part 882, subparts B and E; 24 CFR part 883, subpart C; 24 CFR part 884, subpart B; 24 CFR part 885, subpart C; 24 CFR part 886, subpart A and C; 24 CFR part 887, subpart H; 24 CFR part 750 for the disclosure and verification of Social Security Numbers; and 24 CFR part 760 for the signing and submission of consent forms). As used in this Part, the "effective date" of an examination or reexamination refers to

(1) In the case of an examination for admission, the effective date of initial occupancy; and

(2) In the case of a reexamination of an existing tenant, the effective date of the redetermined housing assistance payment with respect to the Housing Voucher program (24 CFR part 887) and the effective date of the redetermined Total Tenant Payment.

* * * * *

PART 880—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM FOR NEW CONSTRUCTION

19. The authority citation for 24 CFR Part 880 would continue to read as follows:

Authority: Secs. 3, 5, 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, 1437f); Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

20. In § 880.601, paragraph (b) would be revised to read as follows:

§ 880.601 Responsibilities of owner.

* * * * *

(b) *Management and maintenance.* The owner is responsible for all management functions (including provision of Federal selection preferences in accordance with § 880.613, selection of tenants, obtaining and verifying Social Security Numbers submitted by families (as provided by 24 CFR part 750), obtaining signed consent forms from families (as provided by 24 CFR part 760), reexamination of family income, evictions and other terminations of tenancy, and collection of rents and all repair and maintenance functions (including ordinary and extraordinary maintenance and replacement of capital items). All these functions must be performed in compliance with applicable Equal Opportunity requirements.

* * * * *

21. In § 880.603, the introductory text of paragraph (b), and paragraphs (b)(3) and (c), would be revised to read as follows:

§ 880.603 Selection and admission of assisted tenants.

* * * * *

(b) *Determination of eligibility and selection of tenants.* The owner is responsible for determining whether the applicant is eligible, in accordance with parts 812 and 813 of this chapter, and parts 750 and 760 of chapter VII. The owner is also responsible for the selection of families, including giving a Federal selection preference in accordance with § 880.613.

* * * * *

(3) If the owner determines that an applicant is ineligible on the basis of income or family composition, or because of failure to meet the disclosure and verification requirements for Social Security Numbers (as provided by 24 CFR part 750), or because of failure by an applicant to sign and submit consent forms (as provided by 24 CFR part 760), or that the owner is not selecting the applicant for other reasons, the owner will promptly notify the applicant in writing of the determination and its reasons, and that the applicant has the right to meet with the owner or managing agent in accordance with HUD requirements. Where the owner is a PHA, the applicant may request an informal hearing. If the PHA determines that the applicant is not eligible, the PHA will notify the applicant and inform the applicant that he or she has the right to request HUD review of the PHA's determination. The applicant may also exercise other rights if the applicant believes that he or she is being discriminated against on the basis of race, color, creed, religion, sex, or national origin. The informal review provisions for the denial of a Federal preference under § 880.613 are contained in paragraph (k) of that section.

* * * * *

(c) *Reexamination of family income and composition.* (1) *Regular reexaminations.* The owner must reexamine the income and composition of all families at least every 12 months. Upon verification of the information, the owner must make appropriate adjustments in the Total Tenant Payment in accordance with part 813 of this chapter and determine whether the family's unit size is still appropriate. The owner must adjust Tenant Rent and the Housing Assistance Payment to reflect any change in Total Tenant Payment and must carry out any unit transfer required by HUD. At the time of the annual reexamination of family income and composition, the owner must require the family to disclose and verify Social Security Numbers, as provided by 24 CFR part 750, and to sign and submit consent forms, as provided by 24 CFR part 760.

(2) *Interim reexaminations.* The family must comply with provisions in its lease regarding interim reporting of changes in income. If the owner receives information concerning a change in the Family's income or other circumstances between regularly scheduled reexaminations, the Owner must consult with the family and make any adjustments determined to be appropriate. At the time of the interim reexamination, the owner must require the family to sign and submit consent forms, as provided by 24 CFR part 760. Any change in the family's income or other circumstances that results in an adjustment in the Total Tenant Payment, Tenant Rent and Housing Assistance Payment must be verified. See 24 CFR 750.10(d)(2)(i) for the requirements for the disclosure and verification of Social Security Numbers at interim reexaminations involving new family members.

(3) *Continuation of housing assistance payments.* A family's eligibility for Housing Assistance Payments continues until the Total Tenant Payment equals the Gross Rent. The termination of eligibility at such point will not affect the family's other rights under its lease, nor will such termination preclude the resumption of payments as a result of later changes in income, rents, or other relevant circumstances during the term of the Contract. However, eligibility also may be terminated in accordance with HUD requirements, for such reasons as failure to submit requested verification information, including failure to meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 750, or failure to sign and submit consent forms, as provided by 24 CFR part 760.

22. In § 880.607, paragraph (b)(3) would be revised to read as follows:

§ 880.607 Termination of tenancy and modification of lease.

* * * * *

(b) * * *

(3) *Material noncompliance.* Material noncompliance with the lease includes:

(i) One or more substantial violations of the lease; or

(ii) Repeated minor violations of the lease that disrupt the livability of the building; adversely affect the health or safety of any person or the right of any tenant to the quiet enjoyment of the leased premises and related facilities; interfere with the management of the

building or have an adverse financial effect on the building.

Failure of the family to timely submit all required information on family income and composition or eligibility factors (including failure to disclose and verify Social Security Numbers, as provided by 24 CFR part 750, failure to sign and submit consent forms, as provided by 24 CFR part 760, or knowingly providing incomplete or inaccurate information) will constitute a substantial violation of the lease. Nonpayment of rent or any other financial obligation due under the lease (including any portion thereof) beyond any grace period permitted under State law will constitute a substantial violation of the lease. The payment of rent or any other financial obligation due under the lease after the due date but within the grace period permitted under State law will constitute a minor violation.

* * * * *

PART 881—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM FOR SUBSTANTIAL REHABILITATION

23. The authority citation for part 881 would be revised to read as follows:

Authority: Secs. 3, 5, 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, 1437f); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

24. In § 881.601, paragraph (b) would continue to read as follows:

§ 881.601 Responsibilities of owner.

* * * * *

(b) *Management and maintenance.* The owner is responsible for all management functions (including provision of Federal selection preferences in accordance with § 881.613, selection of tenants, obtaining and verifying Social Security Numbers submitted by families (as provided by 24 CFR part 750), obtaining signed consent forms from families (as provided by 24 CFR part 760), reexamination of family incomes, evictions and other terminations of tenancy, and collection of rents and all repair and maintenance functions (including ordinary and extraordinary maintenance and replacement of capital items). All these functions must be performed in compliance with applicable Equal Opportunity requirements.

* * * * *

25. In § 881.603, the introductory text of paragraph (b), and paragraphs (b)(3) and (c), would be revised to read as follows:

§ 881.603 Selection and admission of assisted tenants.

* * * * *

(b) *Determination of eligibility and selection of tenants.* The owner is responsible for determining whether the applicant is eligible, in accordance with parts 812 and 813 of this chapter, and parts 750 and 760 of chapter VII. The owner is also responsible for the selection of families, including giving a Federal selection preference in accordance with § 881.613.

* * * * *

(3) If the owner determines that an applicant is ineligible on the basis of income or family composition, or because of failure to meet the disclosure and verification requirements for Social Security Numbers (as provided by 24 CFR part 750), or because the applicant fails to sign and submit consent forms (as provided by 24 CFR part 760), or that the owner is not selecting the applicant for other reasons, the owner will promptly notify the applicant in writing of the determination and its reasons, and that the applicant has the right to meet with the owner or managing agent in accordance with HUD requirements. Where the owner is a PHA, the applicant may request an informal hearing. If the PHA determines that the applicant is not eligible, the PHA will notify the applicant and inform the applicant that he or she has the right to request HUD review of the PHA's determination. The applicant may also exercise other rights if the applicant believes that he or she is being discriminated against on the basis of race, color, creed, religion, sex, or national origin. The informal review provisions for the denial of a Federal preference under § 881.613 are contained in paragraph (k) of that section.

* * * * *

(c) *Reexamination of family income and composition.* (1) *Regular reexaminations.* The owner must reexamine the income and composition of all families at least once every 12 months. After consultation with the family and upon verification of the information, the owner must make appropriate adjustments in the Total Tenant Payment in accordance with part 813 of this chapter and determine whether the family's unit size is still appropriate. The owner must adjust Tenant Rent and the Housing Assistance Payment to reflect any change in Total Tenant Payment and must carry out any unit transfer required by HUD. At the time of the annual reexamination of family income and composition, the owner must require the family to disclose and verify Social Security Numbers, as provided by 24 CFR part 750, and to sign and submit consent forms, as provided by 24 CFR part 760.

(2) *Interim reexaminations.* The family must comply with provisions in its lease regarding interim reporting of changes in income. If the Owner receives information concerning a change in income between regularly scheduled reexaminations, the Owner must consult with the family and make any adjustments determined to be appropriate. At the time of the interim reexamination, the Owner must require the family to sign and submit consent forms, as provided by 24 CFR part 760. Any change in the family's income or other circumstances that results in an adjustment in the Total Tenant Payment, Tenant Rent and Housing Assistance Payment must be verified. See 24 CFR 750.10(d)(2)(i) for the requirements for the disclosure and verification of Social Security Numbers at interim reexaminations involving new family members.

(3) *Continuation of housing assistance payments.* A family's eligibility for Housing Assistance Payments continues until the Total Tenant Payment equals the Gross Rent. The termination of eligibility at such point will not affect the family's other rights under its lease, nor will such termination preclude the resumption of payments as a result of later changes in income, rents, or other relevant circumstances during the term of the contract. However, eligibility also may be terminated in accordance with HUD requirements, for such reasons as failure to submit requested verification information, including failure to meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 750, or failure to sign and submit consent forms, as provided by 24 CFR part 760.

26. In § 880.607, paragraph (b)(3) would be revised to read as follows:

§ 880.607 Termination of tenancy and modification of lease.

* * * * *

(b) * * *

(3) *Material noncompliance.* Material noncompliance with the lease includes:

(i) One or more substantial violations of the lease; or

(ii) Repeated minor violations of the lease that disrupt the livability of the building; adversely affect the health or safety of any person or the right of any tenant to the quiet enjoyment of the leased premises and related facilities; interfere with the management of the building; or have an adverse financial effect on the building. Failure of the family to timely submit all required

information on family income and composition or eligibility factors (including failure to disclose and verify

29. In § 882.118, paragraph (a)(1) would be revised to read as follows:

§ 882.118 Obligations of the Family.

the time of the annual reexamination of family income and composition, the PHA must require the family to disclose and verify Social Security Numbers, as

for determining income eligibility and the amount of the assistance payments. The PHA is also responsible for giving a Federal selection preference in

HUD requirements for such reasons as failure to submit requested verification information, including failure to meet the disclosure and verification

because of failure to meet the disclosure and verification requirements for Social Security Numbers (as provided by 24 CFR part 750), or because of failure to

VOL 54 ISS 212 NO 3 1989 UMI

information on family income and composition or eligibility factors (including failure to disclose and verify Social Security Numbers (as provided by 24 CFR part 750), failure to sign and submit consent forms (as provided by 24 CFR part 760), or knowingly provide incomplete or inaccurate information) will constitute a substantial violation of the lease. Nonpayment of rent or any other financial obligation due under the lease (including any portion thereof) beyond any grace period permitted under State law will constitute a substantial violation of the lease. The payment of rent or any other financial obligation due under the lease after the due date but within the grace period permitted under State law will constitute a minor violation.

PART 882—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—EXISTING HOUSING

27. The authority citation for part 882 would continue to read as follows:

Authority: Secs. 3, 5, 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, 1437f); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

28. In § 882.116, paragraphs (c) and (m) would be revised to read as follows:

§ 882.116 Responsibilities of the PHA.

* * * * *

(c) Receipt and review of applications for Certificates of Family Participation; provision of a Federal preference in selecting applicants for participation in accordance with § 882.219; verification of family income and other factors relating to eligibility and amount of assistance (including obtaining and verifying Social Security Numbers submitted by families, as provided by 24 CFR part 750, and requiring families to sign and submit consent forms, as provided by 24 CFR part 760); and maintenance of a waiting list in accordance with this part;

* * * * *

(m) Reexamination of family income, composition, and extent of medical or child care expenses; redeterminations, as appropriate, of the amount of Total Tenant Payment and amount of housing assistance payment in accordance with part 813 of this chapter; obtaining and verifying Social Security Numbers submitted by families, as provided by 24 CFR part 750; and requiring families to sign and submit consent forms, as provided by 24 CFR part 760;

* * * * *

29. In § 882.118, paragraph (a)(1) would be revised to read as follows:

§ 882.118 Obligations of the Family.

(a) The family must:

(1) Supply such certification, release, information, or documentation as the PHA or HUD determine to be necessary, including the submission of Social Security Numbers and verifying documentation (as provided by 24 CFR part 750), the submission of signed consent forms (as provided by 24 CFR part 760), and submissions required for an annual or interim reexamination of family income and composition.

* * * * *

30. In § 882.209, paragraph (a)(2) would be revised to read as follows:

§ 882.209 Selection and participation.

(a) * * *

(2) The PHA must determine whether an applicant for participation:

(i) Qualifies as a family;

(ii) Has disclosed and verified Social Security Numbers, as provided by 24 CFR part 750;

(iii) Has signed and submitted consent forms, as provided by 24 CFR part 760; and

(iv) Is income-eligible.

* * * * *

31. In § 882.210, new paragraph (e) would be added:

§ 882.210 Grounds for denial or termination of assistance.

* * * * *

(e) The PHA shall deny the eligibility of an applicant, if the applicant, or any member of the applicant's household does not sign and submit consent forms as provided by 24 CFR 760. It shall be considered grounds for termination of assistance, if the participant, or any member of the participant's household fails to sign and submit consent forms, as provided by 24 CFR 760.

32. In § 882.212, paragraphs (a), (b), and (c) would be revised to read as follows:

§ 882.212 Reexamination of family income and composition.

(a) *Regular reexaminations.* The PHA must reexamine the income and composition of all families at least once every 12 months. After consultation with the family and upon verification of the information, the PHA must make appropriate adjustments in the Total Tenant Payment in accordance with part 813 of this chapter and determine whether the family's unit size is still appropriate (see § 882.213). The PHA must adjust Tenant Rent and the Housing Assistance Payment to reflect any change in Total Tenant Payment. At the time of the annual reexamination of family income and composition, the PHA must require the family to disclose and verify Social Security Numbers, as provided by 24 CFR part 750, and to sign and submit consent forms, as provided by 24 CFR part 760.

(b) *Interim reexaminations.* The family must comply with provisions in § 882.118 regarding interim reporting of changes in income. If the PHA receives information concerning a change in the family's income or other circumstances between regularly scheduled reexaminations, the PHA must consult with the family and make any adjustments determined to be appropriate. At the time of the interim reexamination, the PHA must require the family to sign and submit consent forms, as provided by 24 CFR part 760. Any change in the family's income or other circumstances that results in an adjustment in the Total Tenant Payment, Tenant Rent, and Housing Assistance Payment must be verified. See 24 CFR 750.10(d)(2)(i) for the requirements for the disclosure and verification of Social Security Numbers at interim reexaminations involving new family members.

(c) *Continuation of housing assistance payments.* A family's eligibility for Housing Assistance Payments shall continue until the Total Tenant Payment equals the Gross Rent. The termination of eligibility at such point will not affect the family's other rights under its lease, nor will such termination preclude the resumption of payments as a result of later changes in income, rents or other relevant circumstances during the term of the Contract. However, eligibility also may be terminated in accordance with HUD requirements for such reasons as failure to submit requested verification information, including failure to meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 750, or failure to sign and submit consent forms, as provided by 24 CFR part 760.

* * * * *

33. In § 882.514, paragraph (a)(1) would be revised to read as follows:

§ 882.514 Family participation.

(a) *Initial determination of family eligibility.* (1) The PHA is responsible for receipt and review of applications, and determination of family eligibility for participation in accordance with HUD regulations (see 24 CFR parts 812 and 813, and 24 CFR parts 750 and 760). The PHA is responsible for verifying the sources and amount of the family's income and other information necessary

for determining income eligibility and the amount of the assistance payments. The PHA is also responsible for giving a Federal selection preference in accordance with § 822.517.

* * * * *

34. Section 882.515 would be revised to read as follows:

§ 882.515 Reexamination of family income and composition.

(a) *Regular reexaminations.* The PHA must reexamine the income and composition of all families at least once every 12 months. After consultation with the family and upon verification of the information, the PHA must make appropriate adjustments in the Total Tenant Payment in accordance with Part 813 of this chapter and determine whether the family's unit size is still appropriate (see § 882.213). The PHA must adjust Tenant Rent and the Housing Assistance Payment to reflect any change in Total Tenant Payment. At the time of the annual reexamination of family income and composition, the PHA must require the family to disclose and verify Social Security Numbers, as provided by 24 CFR part 750, and to sign and submit consent forms, as provided by 24 CFR part 760.

(b) *Interim reexaminations.* The family must comply with provisions in § 882.118 regarding interim reporting of changes in income. If the PHA receives information concerning a change in the family's income or other circumstances between regularly scheduled reexaminations, the PHA must consult with the family and make any adjustments determined to be appropriate. At the time of the interim reexamination, the PHA must require the family to sign and submit consent forms, as provided by 24 CFR part 760. Any change in the family's income or other circumstances that results in an adjustment in the Total Tenant Payment, Tenant Rent, and Housing Assistance Payment must be verified. See 24 CFR 750.10(d)(2)(i) for the requirements for the disclosure and verification of Social Security Numbers at interim reexaminations involving new family members.

(c) *Continuation of housing assistance payments.* A family's eligibility for Housing Assistance Payments shall continue until the Total Tenant Payment equals the Gross Rent. The termination of eligibility at such point will not affect the family's other rights under its lease, nor will such termination preclude the resumption of payments as a result of later changes in income, rents or other relevant circumstances during the term of the Contract. However, eligibility also may be terminated in accordance with HUD requirements for such reasons as failure to submit requested verification information, including failure to meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 750, or failure to sign and submit consent forms, as provided by 24 CFR part 760.

PART 883—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—STATE HOUSING AGENCIES

35. The authority citation for Part 883 would continue to read as follows:

Authority: Secs. 3, 5, 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, and 1437f); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

36. In § 883.702, paragraph (b) would be revised to read as follows:

§ 883.702 Responsibilities of owner.

* * * * *

(b) *Management and maintenance.* The owner is responsible for all management functions (including provision of Federal selection preferences in accordance with § 883.714, selection of tenants, obtaining and verifying Social Security Numbers submitted by families (as provided by 24 CFR part 750), obtaining signed consent forms (as provided by 24 CFR part 760), reexamination of family income, evictions and other terminations of tenancy, and collection of rents) and all repair and maintenance functions (including ordinary and extraordinary maintenance and replacement of capital items). All these functions must be performed in compliance with applicable Equal Opportunity requirements.

* * * * *

37. In § 883.704, the introductory text of paragraph (b), and paragraphs (b)(3) and (c), would be revised to read as follows:

§ 883.704 Selection and admission of tenants.

* * * * *

(b) *Determination of eligibility and selection of tenants.* The owner is responsible for determining whether the applicant is eligible, in accordance with parts 812 and 813 of this chapter, and parts 750 and 760 of chapter VII. The owner is also responsible for the selection of families, including giving a Federal preference in accordance with § 883.714.

* * * * *

(3) If the owner determines that an applicant is ineligible on the basis of income or family composition, or because of failure to meet the disclosure and verification requirements for Social Security Numbers (as provided by 24 CFR part 750), or because of failure to sign and submit consent forms (as provided by 24 CFR part 760), or that the owner is not selecting the applicant for other reasons, the owner will promptly notify the applicant in writing of the determination and its reasons, and that the applicant has the right to meet with the owner or managing agent in accordance with HUD requirements. Where the owner is a PHA, the applicant may request an informal hearing. If the PHA determines that the applicant is not eligible, the PHA will notify the applicant and inform the applicant that he or she has the right to request a review by the Agency and HUD of the PHA's determination. The applicant may also exercise other rights if the applicant believes that he or she is being discriminated against on the basis of race, color, creed, religion, sex, or national origin. The informal review provisions for the denial of a Federal preference are contained in § 883.714(k).

* * * * *

(c) *Reexamination of family income and composition.* (1) *Regular reexaminations.* The owner must reexamine the income and composition of all families at least once every 12 months. After consultation with the family and upon verification of the information, the owner must make appropriate adjustments in the Total Tenant Payment in accordance with part 813 of this chapter and determine whether the family's unit size is still appropriate. The owner must adjust Tenant Rent and the Housing Assistance Payment to reflect any change in Total Tenant Payment and must carry out any unit transfer required by HUD. At the time of the annual reexamination of family income and composition, the owner must require the family to disclose and verify Social Security Numbers, as provided by 24 CFR part 750, and to sign and submit consent forms, as provided by 24 CFR part 760.

(2) *Interim reexaminations.* The family must comply with provisions in its lease regarding interim reporting of changes in income. If the Owner receives information concerning a change in the family's income or other circumstances between regularly scheduled reexaminations, the Owner must consult with the family and make any adjustments determined to be appropriate. At the time of the interim reexamination, the Owner must require the family to sign and submit consent forms, as provided by 24 CFR part 760. Any change in the family's income or
